An unusual opportunity to secure really good birds for foundation stock. Year-old and two-year-old breeders from our own best pens. Males \$3 and \$5. Females \$1.50 and \$2. We can furnish single birds, trios or pens of any number. Write for particulars. If you want to start a strain of heavy winter layers you can put faith in these birds.

Fifteen Hundred Young Cockerels

for delivery after September 1st. Every one a carefully selected bird and shipped on approval. Price \$5. Only one grade—the best. The best lot of utility breeders in this country. It pays to buy male birds from a strain of known quality.

Hatching Eggs

We shall keep ten of our best pens mated through the year to supply eggs for those doing fall hatching. Price, \$1.50 per 13, \$4.50 per 50, \$7 per 100. Eggs shipped on day laid; results guaranteed.

Pittsfield Exhibition Barred Rocks

Cockerels and Pullets: We have an unusually fine lot of early hatched birds for fall and early winter shows. Birds that are of up-to-date show quality and sure to win. We make a special business of mating up exhibition pens for our customers.

Cocks and Hens: We also have a few choice exhibition cocks and about 100 hens of the same quality that we will sell at very low prices. The lot includes some of our best winners last season.

Prices of Exhibition Birds quoted on application. If you want to win or want a good breeder it will pay you to write us. Illustrated catalogue free.

ORPINGTONS

J. M. WILLIAMS & CO., Box B, North Adams, Mich.

World's Foremost
White Wyandottes

have won for me the highest honors at the leading shows of America. I have sold more prominent winners for the best shows in America than any other breeder from Atlantic to the Pacific, Canada to Texas, past winter more than ever; every bird I sold for winter proved a winner. All stock returned at my expense if not satisfactory. Write me.

J. H. Jackson -- Lock Box 88 -- Hudson, Massachusetts

Burhans' "Quality" Exhibition Barred P. Rocks

Champions of the Northwest

Captured the lion's share of honors and the glory for the strongest exhibit ever made in the Twin Cities. See former ad for winnings. Am offering now the cream of my breeders at low prices. My egg season has been immense. No matter what you want in top quality stuff, I can supply you at low prices now, for I must have room.

25 cockerel bred pullets, \$3 to \$5
25 cockerel bred hens, \$3 to \$5
25 pullet bred hens, \$3 to \$5
25 pullet bred pullets, \$3 to \$5
20 cockerel bred cocks and ckls., \$4 to \$15
10 pullet bred cocks and ckls., \$4 to \$10

I must have room and am really pricing \$10 birds for \$4 and \$5. There is still time to get breeding service from this grand offering. First come, get the best.

Amos Burhans : Box A : Waterville, Minnesota

1908-1909 Madison Square Garden Winner. On Buffs we won first and third cockerels, second and third pullets, fourth hen, fifth cock, silver cup for best cockerel, silver cup for best collection. Showed nine birds winning silver cup with 7 points more than any other breeder. On Whites at Cleveland 1908, first cock, first cockerel, first hen, first pullet. S. C. Blacks all sold.

KELLERSTRASS WHITE ORPINGTONS

Are the biggest payers because they have proven to be the biggest winter layers

KELLERSTRASS STRAIN

CRYSTAL White Orpingtons are the grandest utility birds on record today, and as to their fancy quality they won first at Madison Square Garden, N. Y., 1905, 1906, 1907, 1908; also at Crystal Palace, London, England, Chicago, and Boston. If you need some birds to improve your stock or for the show room, write us, we have them, and the kind that win, as our past record shows. Stock and eggs for sale at all times. Remember, we are the originators of Crystal White Orpingtons, and breed only the one kind. We devote our whole time to this one breed. Send for catalog; mention A. P. J.

THE FAMOUS HEN "PEGGY"
Value \$10,000.00

First prize winner at Jamestown Exposition, Madison Square Garden, New York, and everywhere she has been shown. The reason we value the above hen at Ten Thousand Dollars is because we refused \$2,500 for her after we sold five of her chicks for \$7,500; and we will give \$10,000 for a "Crystal" White Orpington hen that will equal her in every way.—Kellerstrass Farm, Kansas City, Mo.

Kellerstrass Farm, R. F. D. No. 1, Box 98, Kansas City, Mo.

Diseases of Poultry

—BY—

D. E. SALMON, D. V. M.

Chief of the United States Bureau of Animal Industry

Every poultryman should have this book in their poultry library. It contains 250 pages, and every disease to which fowls are subject is treated in a most thorough manner. The cause, symptoms and cure of each disease is put before the reader in such a manner as to be understood at a glance. With this book in hand you can be your own poultry doctor. Better order one now and not wait until your fowls become ill.

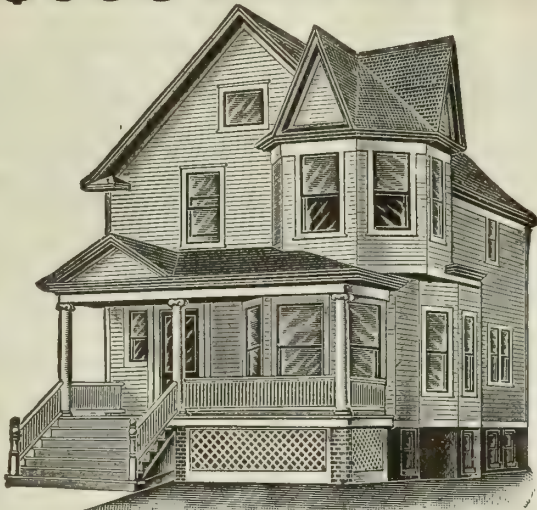

THE PRICE IS ONLY FIFTY CENTS

Will send this book and American Poultry Journal one year for only 75 cents. Send all orders to

American Poultry Journal Pub. Co.
358 DEARBORN STREET -- CHICAGO, ILLINOIS

GREATEST BUILDING MATERIAL OFFER

\$650 Buys the material to build this house

Our House Design No. 6

This is our leader, the best seller of any house ever designed anywhere, by anybody, at any price. Why? Because it comes nearer to filling the requirements of a home than any house of its size ever built. It is 23 ft. wide and 33 ft. 6 in. long, not including the porch. It has seven rooms, bath, pantry and a large front porch. It is of handsome appearance and symmetrical proportions. It is magnificently lighted and perfectly ventilated. Embodies every modern comfort and convenience. Our extremely low price makes it the best bargain proposition on the market. We cannot recommend this design too highly. Even if you don't need a home, build this house for an investment. You can sell it ten times over before it is finished.

EVER PUBLISHED!

Read Every Word of This Remarkable Offer

\$498 Buys the material to build this modern barn

Our Joist Frame Barn No. 221

The above is an illustration of our famous Joist Frame Barn. It is the most practical and serviceable barn ever designed. It may be built at a price very much cheaper, and has more available space than any other style. We can supply this barn in six different sizes, all of the uniform width of 36 ft. The above quotation covers a barn 36 ft. wide by 48 feet long and 18 feet high. The roof is of the self-supporting type, there being no posts in the hay loft. There are 6 windows on each side, 3 in each end and 2 in each gable, so the barn is thoroughly ventilated. Our price covers all the lumber, mill work, hardware and nails required to complete this building from the ground up. We can also furnish this design in larger sizes.

Of all wonderful offers advertised, this unquestionably is the greatest. The Chicago House Wrecking Company offers to sell you at a saving of from 25 to 50 per cent all the building material needed to construct the house or barn shown above. This means that we are absolutely leaving out all middlemen's profits and are dealing direct with the consumer. Our ideas are absolutely original and no other firm in the world has ever before advertised to completely supply the material such as is offered herewith. We are the largest concern in the world selling lumber and building material direct to the consumer. We propose to furnish you everything for the construction of these buildings as outlined in our offer. It will be in accordance with specifications which are so clear that there can be no possible misunderstanding. Our prices as given above mean for the material all correctly laid out in accordance with our plans and specifications.

We will furnish you an itemized material list. We will also supply blue prints, architect's specifications and full information needed to properly and economically erect these buildings. This is not an experiment with us. During the past year we have sold upwards of five hundred complete houses and barns. All the material is stored right in our main warehouse and yards at Chicago, ready to

ship promptly upon receipt of your order. We guarantee every stock furnished to be absolutely brand new. Don't pay any attention to what jealous lumber dealers or unscrupulous merchants may tell you to the contrary. We would not dare to advertise any false statement. If you buy a building and receive any material that is in any way, shape or manner to the contrary of our general and specific representation, we guarantee to take back such material at our expense and replace it with material strictly in accordance with our description, or to refund you the full purchase price of same, or make such adjustment as meets with your entire approval. As to our terms: They are as liberal as anyone could ask for. If you do not want to send money in advance, we will make shipment, to be paid for after it reaches destination, provided you furnish us with absolutely satisfactory bank references.

Our literature explains, fully, our operations. On application we will furnish you the names of hundreds of satisfied customers in all parts of the country. On request we will quote a price delivered, freight prepaid, at your railroad shipping point, thus there will be no question as to the ultimate cost of the material. You will know all the facts before you buy. We are not asking you to buy a "cat in the bag." You will see what you buy with open eyes.

Lumber and Building Material at 25 to 50 Per Cent Saving

We say to you positively that no matter what your wants in the line of building material, we can supply it, and always at a saving. This statement is backed by any number of unsolicited testimonials from those who have taken advantage of our liberal offers of the past. Especially do we urge you to act now. Never in years has lumber been offered at such low prices as we are offering it for at the present time, and it is good lumber, too, first-class, right up to grade, and as good or better than that carried by any local dealer anywhere. Every stick of lumber that we sell is new. Nothing "wrecked" about it. It is as good as can be bought. We haven't a piece of second-hand lumber in our stock, and if we did have it we would not sell it by mail. We are selling only new, clean stock, no shop-worn material, and all our grades are guaranteed.

Then our Mill Work. You cannot improve its quality. It's as good as anyone wants. It's better than 90 per cent of the dealers have for sale. We can furnish you every single thing you may need in the line of Doors, Sash,

Mouldings, Sideboards, Mantels, Interior Trim, or anything else, in other words, each and every article that comes into the construction of a building of any kind, and that includes also Structural Iron, Iron Beams, Iron Columns, or anything else in the iron line.

We have a complete stock of Roofing Material, both tin, steel, iron and ready-roofing. We can furnish you shingles in all grades, everything in the way of plumbing and heating material. We can supply your plumbing, your heating apparatus as well as your paint. We can supply your wants in Builders' Hardware at a saving of 25 per cent or more. We mean your Nails, your Builders' Hardware and your Tools. And so it goes all the way down the line of material you need. We save you money everywhere, and the way to convince you of this fact is to have you submit to us a list of building material that you are in the market for. Let your carpenter or contractor, or whoever has charge of your building operations, send us a list of the material you need and we will give you a prompt estimate. We will, on application, name you prices, freight prepaid.

OUR FREE BOOK of PLANS

Our BOOK OF PLANS is unquestionably the finest publication of its kind. It shows, true to life, about fifty houses and barns, describes them in a general way, and shows the first and second floor design of all houses and interior suggestions for all barns; gives price complete and at the same time shows the additional cost of plumbing, heating and painting. Even if you have no immediate intention of building, you should send for this book. Fill in the coupon to the left and we will send it to you at once.

Complete Blue Prints of any of the designs are furnished at \$2.00 each with privilege of returning same and receiving a credit of \$1.50, so the net cost would be but 50c. Or keep the blue print and when you purchase your building material from us for the complete construction, we will give you credit in full for the \$2.00 charged you for the plans.

FREE, Mammoth Catalog No. 186

Our Mammoth GENERAL CATALOG contains 10,000 bargains of merchandise for the home, the field, the factory and the office. Represents our complete stock bought at various wholesale, receivers' and manufacturers' sales. Gives illustrations and explains our quotations. Tells all about our wonderful stock. It is a price maker in every sense of the word. You will find that in every instance we undersell regular merchandise houses. Goods are described just as they are. There are some 450 pages of interesting quotations and reading matter. You will also find that we show our Rugs, Carpets and Floor Coverings in their natural colors, so that you can see just what they look like after you receive them. Write us for this book at once. It costs about \$1 to place a catalog in your hands, but we mail it free of all charge if you fill in the coupon

SILVER-LACED WYANDOTTES

Our Silvers won last year in the hottest competition. They are better this year; they scored 93 1/2 to 95 under such judges as Tucker, Mullin, Emmel and McClave, in competition. Utility breeding birds, full brothers and sisters to our winners, \$1.50 each. Fine exhibition pullets and cockerels, \$3 to \$10.

Clare E. Hoffman

Allegan, Michigan

Blanchard's White Leghorns

are no experiment, having been carefully selected and bred for over twenty years. No labor or expense has been spared in building up and perfecting this strain, and while the production of large, pure white, fancy market eggs has been the main object, **standard qualities have not been neglected.** They are large, vigorous, active and handsome. Good winter layers and keep at it all summer. Unexcelled as foundation stock or for introducing new blood. Stock for sale, both old and young. Illustrated circular free.

WINNERS AT MADISON SQUARE GARDEN, N. Y., 1903-1904-1905-1906-1907

A. M. SHAW

SUCCESSOR TO H. J. BLANCHARD

Box 997, GROTON, N. Y.

EXHIBITION COOPS

Now ready for immediate delivery. Prices, single size, \$1 each; \$5.50 per half doz.; \$11 per dozen. Pen size \$2 each, two for \$3.50 or six for \$9. Furnished complete with the proper size tacks, nails and cloth to cover. All coops are stained a rich mahogany color unless ordered without any finish. **Free with each order of one dozen single coops,** we will send without any extra charge one coop, pen size, or for \$6.50 we will ship one-half dozen single and one pen size. Our coops are all machine made. The single coops are 24x24x30 inches and the pen coops 24x48x30 inches as called for in the American Standard of Perfection. Coops of any other size are very apt to be set in the back row at many poultry shows. The dowels are of the best yellow pine and the door slides all the way up, which will allow the bird to be removed without breaking the feathers. This means POINTS in scoring. All coops can be shipped flat and be set together in a few minutes. They can be as easily taken apart after the show and packed away in a small space. Our coops are built strong and can be shipped from show to show with birds enclosed in perfect safety. Order direct from this ad or send for our new illustrated catalog, showing how our coops are made, with pictures of the machines that make them. The catalogue shows the different styles of coops we make and also tells about our popular I. C. Trap-Nests, feed boxes, shipping coops and other poultry supplies. We make a specialty of cooping shows and make a special 3-section coop that is just the thing for poultry associations.

H. R. COOPER & CO., Mfgs.

SAGINAW, MICHIGAN, U. S. A.

YOUR HENS WILL PAY BIG PROFIT

Keep only your laying hens! Your non-layers, barren hens, drones, etc., eat up the layers' profits faster than the useful hens make those profits by steady egg laying. You must get rid of the hens which can't pay their own board bills, to say nothing of egg profits.

But, of course, you don't want to kill a hen that, though it is a non-layer now, still possesses egg-laying qualifications. How are you going to tell whether the hen will ever lay again?

That's just what the **Potter System** teaches in ten minutes. You'll quickly know how to tell the absolutely eggless hens in your flock. You take the non-layers away, keeping only the hens that pay profit. Then you sell the non-layers to market—more profit.

Thousands of poultry keepers and farmers are making their flocks pay big because they are using the **Potter System.** Their success is yours, too. Send us that coupon in the lower right hand corner and enclose two red stamps for postage.

"Don't Kill the Laying Hen"

Reveals the simple way of making money by eliminating non-laying hens from your flock. The method of telling whether a hen will ever lay another egg is laid bare.

Our Book Tells You

- 1st—How to avoid killing the hen that is laying.
- 2d—How to pick out the hen that is not laying.
- 3d—To know about how far advanced the hen is toward the laying point.
- 4th—How to avoid wintering hens that are not likely to be good winter layers.
- 5th—To know how to select the hen having strong laying powers for breeding purposes.
- 6th—How to know the hen that has entirely lost her power of egg production.
- 7th—To know how to sort out the hens in summer or fall that have ceased laying.
- 8th—How to know the hen that has become weakened in her laying powers.
- 9th—To know how to buy hens in the early winter that will make good winter layers, and dispose of them at a large profit after receiving their crop of eggs.
- 10th—How a very close estimate of the number of eggs the hen lays in a week or month may be made without the use of trap nests.
- 11th—How overfeeding before egg development has started tends to reduce the egg production.
- 12th—How, when and why the laying hen should be educated.
- 13th—How to arouse and stimulate the laying organs of the hen.
- 14th—How to know the pullets that will make, and are, strong layers.
- 15th—Roup, and how it affects the laying organs of the hen.

This Splendid House, Only \$40

This Potter Portable Sanitary Poultry House, shown here, is eight feet by ten feet in size, completely equipped with two Potter Henneries Outfits, six nests, etc., two pens, room for fifteen to eighteen hens each. It is complete, convenient, sanitary, neat and attractive. If in need of a house of this style and size, you can't beat it for \$40.00. The house shown here is but one of the dozen different styles and sizes which we make. We recently bought out the business of the Sanitary House Company of Lemont, Illinois, and now manufacture the complete line of Portable (K. D.) Poultry Houses, Broods, Coops, Pigeon Lofts, etc., formerly made by them. If you want a complete up-to-date and cheap house we can supply it. Large 100-page catalog fully describing our houses, fixtures and supplies will be sent.

American Standard of Perfection

LATEST EDITION

No poultryman can breed fowls intelligently without this book. It tells you what the different varieties of fowls must be to conform to the regulations of the American Poultry Association. This book is the guide by which all poultry judging is done.

It contains ideal drawings of the different varieties of fowls, gives the Standard weights, colors, markings, etc. In fact, is the poultryman's encyclopedia.

Order one today and learn to your own satisfaction if your fowls are up to Standard requirements.

ONE PRICE, \$1.50

Send all orders to

American Poultry Journal Pub. Co.
358 DEARBORN STREET : : CHICAGO, ILLINOIS

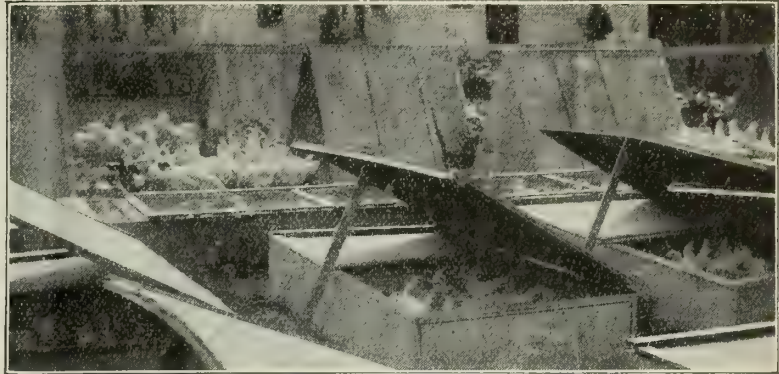

A LIVING FROM POULTRY

\$1,500.00 from Sixty Hens in Ten Months on a City Lot 40 Feet Square

TO the average poultryman that would seem impossible and when we tell you that we have actually done a \$1,500 poultry business with sixty hens on a corner in the city garden forty feet wide by forty feet long, we are simply stating facts. It would not be possible to get such results by any one of the systems of poultry keeping recommended and practiced by the American people, still it is an easy matter when the new

Philo System

is adopted.

The Philo System is Unlike All Other Ways of Keeping Poultry

and in many respects just the reverse, accomplishing things in poultry work that have always been considered impossible, and getting unheard-of results that are hard to believe without seeing.

The New System Covers All Branches of the Work Necessary for Success

from selecting the breeders to marketing the product. It tells how to get eggs that will hatch, how to hatch nearly every egg and how to raise nearly all the chicks hatched. It gives complete plans in detail how to make everything necessary to run the business and at less than half the cost required to handle the poultry business in any other manner.

Two Pound Broilers in Eight Weeks

are raised in a space of less than a square foot to the broiler without any loss, and the broilers are of the very best quality, bringing here three cents per pound above the highest market price.

Our Six-Months-Old Pullets Are Laying at the Rate of 24 Eggs Each Per Month

in a space of two square feet for each bird. No green cut bone of any description is fed, and the food used is inexpensive as compared with food others are using.

Our new book, the **Philo System of Poultry Keeping**, gives full particulars regarding these wonderful discoveries, with simple, easy-to-understand directions that are right to the point, and fifteen pages of illustrations showing all branches of the work from start to finish.

Don't Let the Chicks Die in the Shell

One of our secrets of success is to save all chickens that are fully developed at hatching time, whether they can crack

the shell or not. It is a simple trick and believed to be the secret of the ancient Egyptians and Chinese which enabled them to sell the chicks at ten cents a dozen.

Chicken Feed at 15 Cents a Bushel

Our book tells how to make the best green food with but little trouble and have a good supply, any day in the year, winter or summer. It is just as impossible to get a large egg yield without green food and is to keep a cow without hay or fodder.

Our New Brooder Saves Two Cents on Each Chicken

No lamp required. No danger of chilling, over-heating or burning up the chickens as with brooders using lamps or any kind of fire. They also keep all the lice off the chickens automatically or kill any that may be on them when placed in the brooder. Our book gives full plans and the right to take and use them. One can easily be made in an hour at a cost of 25 to 50 cents.

Testimonials

Bellevue, Ohio, June 7, 1909.

Mr. E. R. Philo, Elmira, N. Y.

Dear Sir:—I just want to tell you of the success I have had with the Philo System. In January, 1909, I purchased one of your Philo System books and I commenced to hatch chickens. On the third day of February, 1909, I succeeded in hatching ten chicks. I put them in one of your fireless brooders and we had zero weather. We succeeded in bringing through nine, one got killed by accident. On June 1, one of the pullets laid her first egg, and the most remarkable thing is she has laid every day since up to the present time. Yours truly,

R. S. LaRue.

Valley Falls, N. Y., September 10, 1909.

My Dear Mr. Philo:—I want to tell you how pleased I am with my use of the Philo System during the past year. The fowls laid exceptionally well in the New Economy Coop, much better in proportion than those in my old style house. The fireless brooder has solved the problem for me of raising extra early chicks. I am going into your methods more extensively this coming year. Wishing you success, I am, sincerely yours,

(Rev.) E. B. Templar.

Osakis, Minnesota, June 7, 1909.

Mr. E. R. Philo, Elmira, N. Y.

Dear Sir:—You certainly have the greatest system the world has ever known. I have had experience with poultry, but I know you have the system that brings the real profits.

Yours, Jesse Underwood.

Brockport, N. Y., Sept. 12, 1908.

Mr. E. R. Philo, Elmira, N. Y.

Dear Sir:—I have had perfect success brooding chickens your way. I think your method will raise stronger, healthier chicks than the old way of using lamps and besides it saves so much work and risk.

Yours respectfully,

M. S. Gooding.

South Britain, Conn., April 10, 1909.

Mr. E. R. Philo, Elmira, N. Y.

Dear Sir:—I have followed your system as close as I could; the result is a complete success. If there can be any improvement on nature, your brooder is it. The first experience I had with your System was last December. I hatched seventeen chicks under two hens, put them as soon as hatched in one of your brooders out of doors and at the age of three months I sold them at 35 cents a pound. They then averaged two and a half pounds each, and the man I sold them to said they were the finest he ever saw, and he wants all I can spare this season. Yours truly,

A. E. Nelson.

Send \$1.00 direct to the publisher and a copy of the latest revised edition of the book will be sent you by return mail.

E. R. Philo, Publisher, 14 Third Street, Elmira, New York

The Poultry Review

A monthly magazine devoted to progressive methods of poultry keeping. \$1.00 a year. Edited by E. R. Philo, author of the Philo System book. Results of experiments on his poultry plant are given each month. Rev. W. W. Cox, associate editor, is handling a six-hen plant by the Philo System and will give full particulars each month of every step taken to secure the largest returns from six hens. Also a review of the best poultry articles from other publications. The price of the Review is \$1.00 a year for twelve copies by mail, postpaid. Or with the Philo System book for \$1.50.

Three Pound Roasters Ten Weeks Old

WE ARE READY, ARE YOU? ? ? ? OWEN

THIS SPACE COSTS MONEY and we are not going to use any of it this month to illustrate our many grand winning birds. Most of those you will find exquisitely done by the two great artists Sewell and Schilling in our beautiful catalogue which is yours for the asking. We have taken so much pains in that catalogue to tell you the story of Owen Farms, to picture for you to the very best of our ability a very interesting modern poultry plant and to fully make you acquainted with our ways and methods of raising fancy poultry, that it is entirely unnecessary for us to reproduce in our advertising space anything concerning these very important and, we hope, to the public, very interesting subjects.

Another reason why we are not inclined to use our space for illustrating our birds is that we have so much to say about them, so many really strong features and arguments to present to you as to why you should get into close touch with Owen Farms that we can not possibly spare the space in this advertisement.

A BUSINESS HOUSE.—Perhaps no one question concerning a house we anticipate purchasing anything from is more important to use than this one, suggested by the caption. Is Owen Farms a true business house? Will they answer my correspondence promptly and give me the information I want? Do they appreciate what every good business house puts before everything else that a satisfied customer is the only true foundation on which to build a lasting and successful business? If I am disappointed in my purchase of Owen Farms will they give me entire satisfaction, such satisfaction as every reasonable man has a right to expect of an honest house from which he buys anything? Do they not describe their birds fairly, without exaggeration, calling your attention to any defect as well as to their excellent points?

We dare to say to all of these questions "Yes" and again "Yes."

GET ACQUAINTED WITH OWEN FARMS.—It will pay you to get acquainted with Owen Farms. Get their catalogue and read it carefully and see if it is not almost like a visit to a complete poultry plant. Write to them for information and then judge for yourself as to whether our Mr. Owen and our Mr. Delano have not apparently done their very best to help you and, perchance, if you ask for advice (which we are always ready to give) see how often it happens that the advice given you is manifestly to your own interest rather than to the interest of Owen Farms.

Buff : Black Orpingtons White Wyandottes

When "I fell in love" with the Orpington during an eight years' residence in England it was not love at first sight. I think that somewhere back I must have had progenitors from Missouri. All England was apparently convinced of the Orpington's surpassing excellence. I could see that by the shows and their poultry papers. I wanted to know the reasons why they were such grand birds. So I set about finding out. I tried them out as layers and they answered every question. They commenced to lay early and kept it up right through the year. I found it easy to raise them. They were hardy and they grew as fast as I had ever known birds to grow. They bred well and true. The eggs were always fertile. They were good mothers and my hatches were large. Finally I ate them and I found their flesh to be better than any poultry I had ever tasted. Then I studied the Orpington and with all the enthusiasm I possessed I FANCIED them. Every day since I have grown to like them more. There was no breeder of any importance that I did not come to know personally and as expense did not stand in my way if I did not get the best England had I am mistaken. That I did is well evidenced by the fact that ever since Orpington breeders in this country have again and again ransacked England, buying here and there to beat me in New York and I am bound to say without success. We have this year the following to offer you: Grand color, which is an inheritance, not an accident; good heads with combs not too large, fairly smooth, well set, and serrations close to standard; grand type; large birds, as low down as any English breeder or judge would desire; in fact, Buff Orpingtons that are not to be beaten either in this country or in England. One thing I want to say. In England the Orpington is called a majestic bird and the type originated and demanded is not too low down. He should never look squatty. He should look rather low on account of his size and massive proportions rather than because he is actually short from his hock to the ground.

Owen Farms can and will sell you Buff Orpingtons that are as near right as they can be found and at the fair price.

BLACK ORPINGTONS.—We have them, and good ones, but we can not use the space to describe them here. You will find them in our catalogue.

Everyone at Madison Square Garden last winter who saw our 1st pen of White Wyandottes said that it was the best five birds in this variety ever exhibited. We added four more females to it, equal to the four exhibited, and from this pen we have raised a large number of chicks that are simply wonderful in type, color, and head; birds that I truly believe will score higher than any birds we have ever seen. Our 1st Chicago last year sired two of the best birds at the New York Show and many others winning all over the country. This year he has been breeding better than ever and we even now think we have the winner for New York this winter sired by this bird. Our 1st Boston this last year was another grand sire. All through our matings we have birds way ahead of any previous year. I am saying this to fanciers. You know that good birds do not come by chance breeding. It takes good matings to produce nearly perfect type, color, head, eyes, and station, and if you get birds of that class into your pens YOU CAN DO IT JUST AS SURELY AS WE DO. We will sell you White Wyandottes of that class and at fair prices. You can win with them and you can breed them. Don't think that all our White Wyandottes are high-priced. They are not. They are all of our best blood, but we have grand birds for \$7.50, \$10.00 and \$15.00. These birds are much better than most birds at these prices and you cannot help but get important advances in color, type, head, eye and comb, which are characteristics of the blood lines. Then they answer two important questions, they lay grandly and they breed well and true. I feel strongly concerning our White Dottes and when one is sure they are right it becomes almost impossible to stop writing about it. Oh, if I could only prove in some way beyond question that our White Wyandottes are in advance of any other strain! Our winnings at New York, Chicago and Boston help, but I see the birds themselves daily and then I feel that enough has not been said.

Owen Farms Wm. Barry Owen, Prop.
Maurice F. Delano, Mgr. **Box A, Vineyard Haven, Mass.**

FARMS' "Big 4"

LETTER WRITING.—I wish to thank our friends for writing many letters to Owen Farms of late that have allowed us to quote them on just what they wanted and without delay. One writes: "Please describe to me the best young trio in Buff Orpingtons you can send me for \$35.00. I wish to show them at the show at, held on the 4th of December." Another writes: "I want to win 1st cockerel and 1st pullet at, on November 8th, in White Wyandottes. I can afford to pay \$25.00 for the cockerel and \$15.00 for the pullet. Can you send me birds at these prices that you think will surely win?" Still another writes: "I want a first class breeding trio of White Rocks that will produce young birds good enough to win at Pittsburg." While still another writes: "I have grand birds in the male line of Barred Rocks; good size, splendid barring, and exhibition color, but my females lack size and a little in shape. My color is near the standard. What can you send me for \$15.00 in a pullet breeding male that will correct these faults?" It is a great pleasure to answer letters like these because we know what is wanted. Do not hesitate to write us your full wants. Both of us will gain a lot of time by being frank.

EARLY ORDERS.—Do you really know what it means to you to place your orders early? We have a large number of birds and we are constantly selecting and growing and conditioning birds for the fall and winter shows, and if we have your orders placed with us for future delivery we select the birds and handle them, train them and get them absolutely fit for the time when they are to be sent you. On all early orders for future delivery 25 per cent only of the amount to be paid is required in advance, the balance to be paid just before shipment. I ask each interested reader, "If you receive an order to be executed in advance can you not give better satisfaction, and do you not consider it an advantage to the buyer?" If you answer "Yes" are we wrong, then, in urging you to enter into correspondence with us at once to find out what we will do and place your orders early?

White Ply. Rocks Barred Ply. Rocks

Have you seen Owen Farms' Exhibition Record in White Rocks for the past ten years? It is in our catalogue, yours for the asking. There is no other record in this variety that approaches it. I dare to say it, and I will, that there is no flock of White Rocks in this country that approaches that on Owen Farms for General Excellence. First, they are the whitest flock in the country, naturally so, bred so, and they can't help being so year in and year out. Sun does not change them, and creaminess is not known there. The quills will make any other quills look creamy. You may have the satisfaction of knowing to start with that you cannot be beaten on color if you have Owen Farms blood pure and straight. Next comes head and head points, concerning which Mr. Delano says I am almost a crank—(I hope I am not quite that). I believe that poultry like women are first judged by their head. This must be what we call handsome in a woman. There must be no angles. The "comb" must set on the head at the right angle, be not too large and as near the ideal as possible. Over the head and down the back of the neck it must take a beautiful curve. There must be no break in this curve. The front of the neck, also, must be full and perfect, curving into a full round breast. The eye must be bright red and have fire in it. The head must give you the impression that the bird is all right. He must be deep and long of body and rather level, standing up just high enough on good legs, well spread apart and as yellow as possible. Then, the back and tail must answer the last and, perhaps, most important question. It must be broad and level with no break at the saddle and the hangers must be long and graceful and finally curve up to the proper angle. Then style, condition, and coop training make a winner. Now, may I say just what I think? I will, anyway. If anyone buys a White Plymouth Rock without first learning all he can about Owen Farms birds and finding out if they can give him what he wants at his price he actually does himself a great hurt. Always you are allowed to be the sole judge of whether you are satisfied. If not satisfied you may return after two days' examination and your money will be promptly returned. If you wish to show the birds you purchase we fit and get them ready. Our hat is ready to come off to anyone who will do it better than we do.

Talmadge, the noted divine, once said that undoubtedly the Creator could have made a better berry than the strawberry but he doubted if He had tried. So I say about Barred Rocks. Possibly someone may make a more difficult variety of poultry to breed than the Barred Rock, but I have honest doubts about it. It is this great difficulty in breeding Barred Rocks up to our ideal and standard that gives Barred Rock breeding its most decided charm. Think what you have to add to the White Rock. You must have the same perfect head, eyes and comb, with nearly perfect outline, the same perfection of back and tail. All of these excellencies must be present and in addition proper barring in every feather of every section. The bars must be of the right width and clear. The darker color must not run into the light color. Each point must be tipped with an edge of black. And then all these feathers must overlay each other so as to give the snappy ringy appearance so much desired and also give a total effect of color that is exactly of the right shade. Owen Farms Barred Rocks represent years of effort in bringing their males and females to near perfection. The whole country concedes that the great yearly battle in Barred Rocks is fought out at Madison Square, New York. During the last ten years our Barred Rocks have won more than 30 per cent of all the 1st and 2nds awarded there. A Grand Record, is it not? We have today in the male line Cock birds and Cockerels, that are able to win in any show and many of them. Also breeding birds that will advance you years in getting results. We have also many Hens and Pullets ready for showing and breeding that will not be beaten anywhere. At New York our 1st pullet took the Shape Special. We always combine in a female wonderful barring and most perfect type and size. And, lastly, our Prices are Right. My experience says in addition, if there is any bird I want to see before I call the purchase complete it is the Barred Rock. This you may always do with Owen Farms. Send us fearlessly the amount you want to spend and a careful description of what you want. We will send it; give you two or three days to examine and rest; and, if you send it back, we do two things: First, pay the return express charges; 2nd, return your full money. Knowing what it means to the bird to go a journey and return, don't you see how careful we must be to give you a little more than good value?

CRUSADER III

: : A REGAL : : VICTORY

At the New York State Fair, September, '09
J. H. Drevenstedt, Judge

Martin's White Wyandottes

again carried all before them and for the fourth time won best display and final possession of the \$50.00 Hodgkins cup. The Eastern States and Canada were scouring to find birds to beat me, and the competition was terrific. In a class of 166 birds I won twice as many firsts and seconds as all my competitors combined. Pens (old)—First, second and third; pens (young)—first, second, fourth and fifth; cocks—first, second and fifth; cockerels—first and fifth; pullet—second and also first display (the coop containing my exhibition birds was lost for three days by the express company and arrived when the judging was just about over, putting them out of the running.) I did not have to pick up birds from all over the country to win. Every one of my entire string of fifty birds was personally bred by me on my farm at Port Dover. 1,000 young birds of the same breeding for sale. Let me book your order for winners. I have them. Free booklet telling all about the Regal strain.

JOHN S. MARTIN
Box 51, PORT DOVER, CANADA

Get Acquainted With The Cyphers Folks

They'll Guide You Right In Chicken-Raising

WE want to give you our advice and help on any poultry subject—*free and freely*. We are practical poultry-raisers; have spent a lifetime at it. Years of hard experience and constant experiment on

Our Big, Successful, \$40,000 Poultry Farm

—where every Cyphers device and Cyphers method is thoroughly tested and *proved*; have taught us things that will be worth your while to know.

Write Us a Letter—Now

Let us prove to you that the way to succeed with poultry is to *start right*.

Many chicken-raisers are looking forward to some future day when they will own a Cyphers Incubator.

But they continue, year after year, *trying* to get results from the inferior kinds.

Don't make *their* mistake.

The Cyphers Incubator Isn't a Luxury

It's a real, every-day *necessity* to the practical, successful poultryman or poultry-woman who plans to get out of poultry-keeping the most there is in it.

And it's the poorest kind of economy to try to hatch healthy chickens from a flimsy, cheaply-built machine that wastes your time, money, eggs and oil.

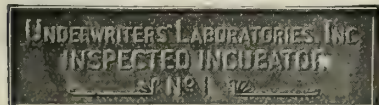

—One that's simply "loaded" with

Heat and Moisture Troubles

—That's wrong in ventilation, wrong in regulation, with a tank that leaks and a cheap, uncertain lamp that worries you.

—One that turns out, at best, a few lonesome, weak, wabbly, scared-looking chicks.

You don't want *that* kind of an incubator, at *any* price.

Form of Brass Label to be found (in serial numbers) on every 1910 Standard Cyphers Incubator.

Form of Brass Label to be found (in serial numbers) on every 1910 Standard Cyphers Brooder.

The Cyphers will give you—right along—*big* percentages of bright, sound, healthy

Chicks and Ducks that Live

In all countries, it has proved the best by test—has been adopted by more Government Experiment Stations, more leading Agricultural Colleges, more well-known fanciers and practical poultrymen, than *all* other makes combined.

Take the Cyphers, point by point, feature by feature, and compare it with *any* other incubator on the market.

And, remember, that the Cyphers isn't the highest-priced incubator. There are other makes more expensive.

The cheaply-built and wrongly-constructed ones for example. But *no* other *can* have

The Cyphers Exclusive Patented Features

Cyphers Incubators are made of Michigan White Pine—the very best for incubator construction. It

Costs Us \$10 to \$20 More

per thousand feet than if we used ordinary incubator wood. But white pine is lighter, more workable—best resistant to heat and moisture.

The Cyphers is a hot-air machine—no metal tanks to leak and spoil your hatch, to give out and render the machine useless.

Our Patented Diffusive Principle is an unequalled feature. Exists only in the genuine, Standard Cyphers.

The Cyphers is self-ventilating and self-regulating—that takes a lot of bother off your shoulders. Our drop-bottom and special nursery drawers are points of real merit.

Our Guarantee—and 90 Days' Trial

fully protect you. Cyphers Incubators and Brooders are guaranteed to give good results to *you*—must please *you* in *every* way, or back they come to us, and back your money goes to you.

And you have full 90 days—4 hatches—to find out how you and the Cyphers get along together.

Address Nearest Office

Cyphers Incubators and Brooders are Insurable

All Cyphers Incubators and Brooders are perfected and safeguarded in heater, lamp and entire construction, to conform to the strict "Rules and Regulations" of the National Board of Fire Underwriters.

They were the *first* of *all* incubators and brooders to receive the official fire-insurance Inspection Labels, as shown in illustrations.

All Cyphers Insurable Incubators and Brooders bear the Inspection Label, placed there under the direction of the National Board of Fire Underwriters.

Get Our New, 160-Page Cyphers Catalog for 1910

It is full of rich and helpful reading for poultry-men and -women.

Pictures and describes Cyphers Incubators and Brooders—from popular sizes up to The Mammoth 50,000-Egg Machines for big poultry-plant equipment; tells about our newly-patented Electrical Incubators and Brooders, and over 70 valuable poultry specialties which we manufacture.

Just fill in the coupon, mail it to us *today*, and we will send catalog *free*, and *postpaid*.

A Treatise on Food and Egg Production

A valuable book for anyone who is raising fowls for egg production. It gives in a very plain and concise form the composition of the different foods.

It tells how and what to feed to produce eggs in winter.

The author has sent this book on approval and has always received the money for same at once, which is proof that the book is valuable.

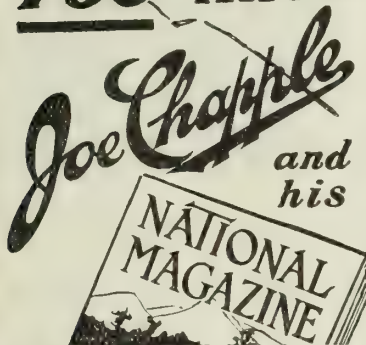

By special arrangement with the publisher we are offering this book and one year's subscription to American Poultry Journal for only \$1.00. Send all orders to

American Poultry Journal Pub. Co., 358 Dearborn St., Chicago

I'm proud so many good Farm Folks now read my Magazine

I want 10,000 more Farm Home Readers for the NATIONAL MAGAZINE by January 1st. That's why I'm making this Great Offer. Let me send my Magazine on 4 months' FREE TRIAL and one of my splendid Gift Books FREE for good measure. *Joe Chapple*

Do YOU know

I Know—

That I've only to get my magazine into the homes of the reading, thinking American farmers—to make them readers of the NATIONAL for good and always.

You read farm papers for farm matters. You read your poultry paper for help and suggestions on chicken-raising.

You will read my magazine to get and keep a close grip upon real happenings in the every-day life of our Nation.

You'll want my magazine in your home For Yourself, For Your Wife, For Your Sons and Daughters

I was reared among farmers and I learned on a farm the things that have moulded my career—that are largely responsible for whatever success I have attained.

I know that the young man and young woman on the farm—your son and your daughter—want to keep in close touch with the outer world—with national life.

Give them a clean, wholesome, human magazine that appeals to the best that is in them.

The articles on "Affairs at Washington" are the most widely quoted that appear anywhere. Actual word-photographs of inside life at the Capitol, flash-lights of public men, and the big National happenings, a unique and exclusive feature of the NATIONAL, first suggested by William McKinley.

Very often I have a chat with Secretary Wilson at the Agricultural Department and write you what I can find out about new ideas for the farm.

When Theodore Roosevelt was president he wrote: "Joe Chapple is a good fellow and has done excellent work." Similar generous endorsements from senators, congressmen and men high in public life are treasured more for what it means to the NATIONAL than for any personal gratification.

But the NATIONAL MAGAZINE isn't Washington alone. Not by a long way; it is as big and broad as its name.

It takes in every state in the forty-six—touches every corner of the country.

Not heavy and deep, nor cold and stilted—but written in a friendly heart-to-heart style that glows and grips your attention from the first to last.

I am enthusiastic about the NATIONAL MAGAZINE and I have a right to be. No other publication has ranked with it in winning readers among the plain people of the country, as Lincoln loved to call us.

I want you to be one of my readers.

I want you to know the good things in the NATIONAL MAGAZINE, and I want you to have your choice of these two splendid gift books.

THESE GREAT BOOKS FREE

"HEART THROBS" the Old Scrap Book

was compiled by 50,000 readers of the NATIONAL MAGAZINE sending me their favorite poems, sentiments—gems of real heart interest that had helped them in their daily lives and inspired them to better things. I paid \$10,000 in cash for these contributions and found in them fabulous riches of helpful human thought.

You will find in "Heart Throbs" the gems of sentiment that you love best, and hundreds of new and old thoughts that will help along the way. The other book is

"THE HAPPY HABIT"

Through all my life I have gone about with both eyes open for the bright, cheerful, do-your-heart-good kind of things that happen on the brighter side of life.

Best cure in the world for the blues—best livener of dull hours.

Both books are well printed and beautifully bound in gold and garnet—they are selling in the book stores for \$1.50. But—

Because I want you for a subscriber to the NATIONAL MAGAZINE, I am making this great offer.

Send me \$1.50 (regular price) for a year's subscription to the NATIONAL MAGAZINE and I'll send you, prepaid, either one of these splendid gift books, "Heart Throbs" or "The Happy Habit," and if you wish, I'll autograph the first 1000 books ordered.

Choose the book you like; or if you prefer

I'LL SEND BOTH BOOKS and let you take your choice

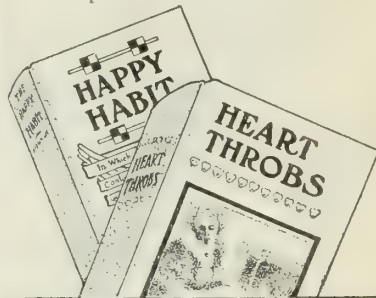

And return the other one to me. That's how much I'll stake on your honesty and your interest. I'll do even more.

FOUR MONTHS' FREE TRIAL

I'll give you four months to prove the wonderful value of the NATIONAL MAGAZINE. If at the end of that time you say you are not satisfied, I'll return your money. Tell me how I could make a fairer, squarer offer.

Now, neighbor, just fill out the coupon and mail it to me today. Address me personally—Joe Chapple, Editor National Magazine, Boston, Massachusetts.

Pin your check—money order will do—to this coupon and mail direct to me.

FREE BOOK COUPON

Joe Chapple, Boston, Massachusetts:
Dear Sir—I accept your offer and enclose \$1.50 for which please send me NATIONAL MAGAZINE for one year and a free copy of the Gift Book

Indicate your choice

I understand that I have the privilege of discontinuing this subscription at the end of four months if I am not satisfied with the magazine and will receive my money back in full.

METAL MOTHERS

OUR NEW DISCOVERIES MAKE

POULTRY KEEPING EASY AND PROFITS SURE

OUR MACHINES were used exclusively in the original Philo System plant where over \$1500 FROM 60 HENS IN TEN MONTHS. has been cleared from the sale of eggs, baby chicks and fowls raised on a city lot 40 feet square. One of the largest hatching plants in America saved over \$700 this year by using our system of brooding. We sell the best brooder ever made for only \$2.50.

One party hatched and raised \$500 worth of poultry last year with four Metal Mothers, and hundreds of others are delighted with our machines and our new way of raising poultry. Our combined machine hatches and broods perfectly at the same time with only one lamp and one-fifth the oil used in other machines. Once filling the lamp completes the hatch. It runs as steady as a clock in any room from cellar to garret, and our Long Burning Safety Lamp runs on for weeks without attention. It is the only machine that airs the eggs in the natural way and applies the heat to the chickens like the mother hen.

THE BROODER-HATCHER

OUR 1909 PATTERN METAL MOTHERS

and goose eggs equally well and at the same time. Regulation of moisture and heat entirely automatic. One Metal Mother complete \$7.50; two, \$14; four, \$24. One Hatcher complete \$5; two, \$9; four, \$17; six, \$24. Catalogue free.

The Cycle Hatcher Co., Elmira, N. Y.

Dear Sirs:—As per your letter I will send you an order for six machines in a few weeks. Am hatching with the one I now have. Got 47 chicks from 50 eggs. Have abandoned all my 200-egg machines. Am practicing in my store with a view to starting my 40-acre poultry plant near town here. Think I can sell a lot of these machines next year.

H. W. White, 311 Ada St., Yankton, S. D.

The Cycle Hatcher Co., Elmira, N. Y.

Gentlemen:—The hatcher we bought of you last May is all right. We took off two hatches with it; one of 43 chicks and one of 46 chicks. All good ones.

Yours respectfully, G. W. Simpson, Austin, Pa.

The Cycle Hatcher Co., Elmira, N. Y.

Sirs:—You people may be interested to know what an experiment with one of your Metal Mothers has done for us. On the 17th of Oct. we put 40 eggs in your machine, 38 of them being fertile, and when hatching time came we were surprised to find 38 chicks from our 38 eggs. This we think an excellent record, for the machine had been placed out in the open weather, the only protection being an old tin covered box. Yours respectfully,

J. P. & L. L. Hollinger, R. I. Red Farm, Witner, Pa.

Cycle Hatcher Co. - 214 Wm. St., Elmira, N. Y.

**FERRIS' S. C. W. LEGHORNS**
ARE BRED TO PAY AND WIN

THEY are the best that skilled breeding can produce. Their good points are well illustrated in the accompanying photo of our first cockerel at St. Louis and Grand Rapids last winter. Notice his fine head, his splendid shape in every section. And he is large, pure white and vigorous, like all FERRIS LEGHORNS. Hundreds of cockerels and pullets sired by this male and our other winners at

Chicago, St. Louis, Toledo, Detroit, Grand Rapids and the Michigan and Indiana State Fairs

are now ready to sell. They are large, pure white and typical in shape, with fine heads and low tails, and they will win for you wherever you want to exhibit.

Prices are very low, considering quality. Exhibition males, \$5 to \$35; exhibition females, \$4 to \$20. Splendid exhibition-breeding males at \$5, \$7 and \$10 that will win and breed winners. Early hat-headed cockerels and pullets from our best matings, single birds \$3.50, three or more \$3 ea. h. They are large, pure white, good shaped, and will make No. 1 breeders. We send them properly mated, and by purchasing a trio or pen you can get a fine start with thoroughbred White Leghorns at small cost.

All stock is sold on approval. Keep the birds two or three days; if they are not entirely satisfactory send them back at my expense. I will refund your money at once. I don't want dissatisfied customers.

We breed for size, health, vigor and profit, as well as for exhibition. Years of careful breeding have made FERRIS LEGHORNS remarkably profitable.

Our New 32 page Catalog is Ready

It tells why you need THIS STRAIN OF WINNERS BRED TO PAY. Shows unretouched photos of the birds I sell, gives a complete list of winnings and explains why FERRIS LEGHORNS are so healthy, vigorous and productive. I'll send you a copy free.

Bennett's Famous S. C. Reds

Quality Hill Poultry Yards Make Another Grand Winning at Illinois State Fair—In a hot class of Reds brought out by the meeting of the National S. C. Red Club and School on Reds THIS WINNING proves they are "the best in the world." First and third cockerel; first, second and third pullets; first cock; third hen and first and second pen. Plenty of stock for show or breeding purposes. Write for prices.

W. C. Nelson : Successor to F. A. Bennett : Canton, Illinois

Mr. D. J. LAMBERT, Professor of Poultry Culture at Rhode Island State College, Kingston, R. I., says:

Permit me to say that I never hesitate to recommend **Farm-Poultry** to any one inquiring about poultry papers. I have long admired your editorial policy, and believe that you present facts as you see them, without fear or favor. Of course we appreciate every good word you say for the Agricultural Schools, and think that you recognize the poultry schools as one of the trio of forces that is helping to increase the welfare of this industry. The poultry press and the shows the other two. **D. J. LAMBERT.**

When a poultry publication is recommended by the foremost poultry instructors of the times you can safely pin your faith to that paper. For twenty years **Farm-Poultry** has been teaching everything that is sane and trustworthy about Incubating, Brooding, Rearing, Feeding, Mating, Housing, Exhibiting, Killing, Dressing, Marketing, etc., of poultry. Full show reports is a feature, and as Mr. Lambert says, its editorial policy is "without fear or favor." **Farm-Poultry** is a monthly, fifty cents a year. Sample copy sent free on request.

This safety razor is beyond doubt a blessing to mankind. Made on the pattern of the best safety razor on the market. Finely finished. Blades are made of the best tempered steel. Guaranteed to shave you without cutting. This useful article will be sent you free, postpaid.

Send for our great Fall Subscription Offer today and get this razor, as well as many other useful premiums. Besides receiving these you have a chance to win one of the 50 grand prizes. 1st prize, \$200 cash; 2d prize, \$100 cash; 48 other prizes, value \$500. For complete list, address

American Poultry Journal Pub. Co.
358 Dearborn Street : : Chicago, Illinois

Our International Champion. First Madison Square Garden, Guelph, Toronto, Hamilton, Ottawa. Weight 11½ pounds.

WILLARD'S BUFF ORPINGTONS

Win again at the great Mich. State Fair, Detroit, Sept., 1909. We won every 1st, 2d, 3d prize in singles on cocks, hens, cks. and pullets; also 1st 2d pens. Every prize offered except 3d pen, for which we made no entry. Our champion male shown in cut illustrates the type and quality we breed. He is sire or grandsire of most of our stock.

500 Grand Young Birds, Culled Out of 1,000

We offer 250 cockerels and 150 pullets at reasonable prices, bred from our New York, Boston, Toronto, Detroit State Fair, etc., winners, for quick sales. These birds are bred in the purple, have great size, correct type, light exhibition color and strong head points. Write us fully your wants in either show birds or breeders. A few good yearling cocks and breeders left. Get our prices. Satisfaction guaranteed or money back. Approval shipments.

John O. Willard : Linden, Michigan
Vice-President Nat'l Single Comb Buff Orpington Club for Michigan

DUSTYNE FACTS

It is a well-known **FACT** that you cannot raise **lice**, **mites** and **paying poultry** at the same time.

It is a **pertinent FACT** that **Dustyne** is the most persistent and effective lice and mite exterminator on the market. The chickens do the work.

It is a **unique FACT** that we have combined in **Dustyne**—a sanitary dust bath—all the elements for the successful elimination of vermin—for both fowls and pens.

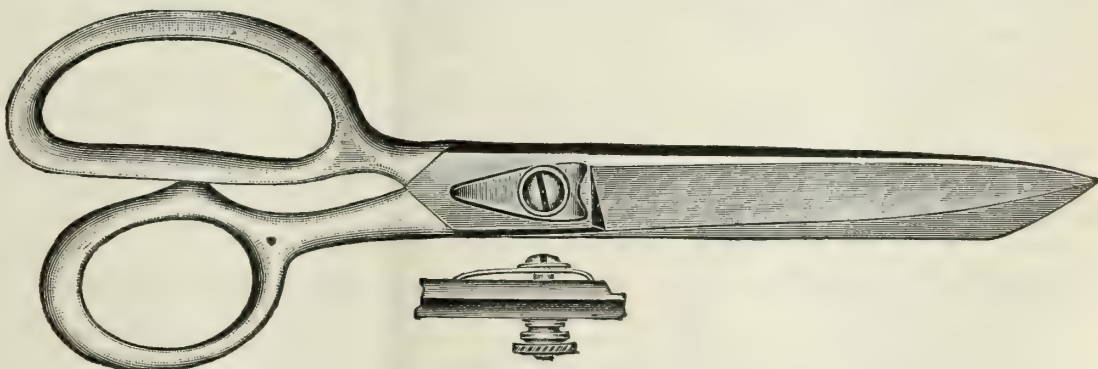

It is a **kindly FACT** that a 200-lb. sack of **Dustyne** for \$2.00 means 200 lbs. of solid comfort for your fowls.

It is a **valuable FACT**—for you—that you can take the first step **today** toward ending your trouble with the lice and mite problem by sending in your order for a sack of **Dustyne**. 200 lbs. in a sack. The price is \$2.00. Freight prepaid east of the Missouri. Send a postal for testimonials and further information.

We **guarantee** to refund your money if you are not satisfied. Address

COLUMBIAN WYANDOTTES

Show birds and breeders, all of the highest quality in either old or young stock. Get my prices before you order. Mention A. P. J. C. L. Patterson, Walnut Street, Barberton, Ohio

Canada's Best R. C. and S. C. Black Minorcas

They are all for sale and for sale worth the money. We please every customer and if you are not pleased, please return the birds and get your money back. We sold nearly \$800.00 worth of birds in August and September past and did not have one bird returned; nor one dissatisfied customer. How is that for pleasing the people? We have just as good birds left as we have sold, but you will have to "hurry" if you want any. Our last show was London, Ontario, but London, the great when it comes to raising prize chickens, we won every first and second prize on both R. C. and S. C. Black Minorcas, also silver cup for best collection in the Mediterranean class.

T. A. FAULDS

LONDON, ONTARIO, CANADA

THE ROCKANDOTTE FARM

W. R. Graves :: Mrs. S. H. Graves

We are ready for your trade in White Rocks and White Wyandottes. To prove that we have the birds, just note our winnings at the Tri-State Fair, Memphis, Tennessee, over 2,500 birds competing. On White Rocks with six entries won first cock, first hen, first and second cockerel, first pullet, first pen. \$25.00 special best cock, hen, cockerel, pullet and pen. \$50.00 cup for best pen all Rocks competing. Special best cockerel in show. Special best pullet in show. On White Wyandottes, second cock, first hen; first, second and third cockerel; first and second pullet; first pen. Grand prize of \$100.00 gold for best fifteen birds of any one variety in show. \$25.00 special for best cock, hen, cockerel, pullet and pen. \$50.00 cup best pen all Wyandottes competing. \$10.00 special best and largest display. We have more of the same quality that are for sale. Write at once for prices.

Page Poultry Fence Outlasts Them All! Look Out for "Fads" and "Freaks" in Wire Fences!

Page Woven Wire Fence was introduced over a quarter of a century ago. Within that time, many "Fads" and "Freaks" in wire fencing have come and gone. Page Fence is here to **stay**. It stands the test. It gives the **service**. It has the **record**. You don't **experiment** when you buy it. The **wear** is **there!** It's got the high carbon wire that **stands the strain**. It's got the **knot** that holds. The wonderful Page Knot—**wrapped three times** around the horizontals and **a part of the fence itself**.

Your Poultry is Safe Behind Page Fence

More Page Fence used by Poultrymen than any other make of heavy fence. Enclose your poultry yard with Page Fence and you need not sleep with one eye open. Page Poultry Fence is absolute protection—and costs much less in the long run than any other kind.

A Sample of Page Fence FREE!

Send the "Show Me" coupon today and get a free sample of the strongest wire in existence. Its great strength and its high tension coil give it the utmost stability and elasticity. It will "give and take," without breaking or sagging. You can run a traction engine over Page Woven Wire Fence and it will spring back to position instantly. It is as nearly **uniform in quality** as it is possible to manufacture steel wire. It can be taken down and restretched any number of times without losing its elasticity. It is **50 per cent stronger** than common wire and the **dalvanizing 50 per cent heavier**.

Crescent Poultry Farm, Frank Foy, Prop., Des Moines, Iowa

Foy's Big Book---Money in Poultry and Squabs

Describes and illustrates all the leading varieties of pure bred fowls and Homer Pigeons for squab raising. "Tells you all about how to raise poultry for profit, how to feed and mate, all about diseases and remedies and a great mass of useful information." "Gives plans for building poultry houses, describes and illustrates the best incubators and brooders and the famous Crescent Poultry Farm, which is the largest poultry farm in this country devoted exclusively to the rearing of pure bred poultry and pigeons." **IMPORTANT ADVICE**—Tells you how to start the business in a small way and grow big. My specialties are thoroughbred fowls of a high quality, and Homer Pigeons for raising squabs. "I can supply eggs for hatching from all leading varieties by the single setting or in large lots for incubators. My prices are low. The quality is high. All who want to keep posted in the poultry business, or contemplate purchasing anything in the above line, should send for this book. Mailed to any address for 4c in stamps. Write your wants; mention A. P. J.

NORTH

VALLEY CITY HATCHERY

Grand Rapids, Mich., Sept. 5, 1909.
Prairie State Incubator Co.

Gentlemen: Have just finished a successful hatching season. I beg to advise you that the Prairie State Incubators I installed last spring are "it" and the very best I ever operated. Hatches were in every instance beyond expectation, some running as high as 96 percent and chicks 100 percent stronger than those hatched by non-moisture, so-called, "fire-proof" incubators. They are as represented in your catalog in every particular, which cannot be said of the many other makes I have operated.

(Signed) D. J. VEREEKE.

From
Every Quarter
From Every State
From Expert and Amateur

there comes the same universal opinion, that Prairie State Incubators, Universal Hovers and Colony House Brooders are the most successful and satisfactory machines yet produced.

The remarkable high per cent hatches and the big, strong, hen-like-hatched chicks the Sand Tray

Prairie State

is producing for its owners everywhere, is the secret of its wide-spread popularity.

Then the problem of rearing the greatest possible number of chicks hatched to the marketable point, has been so successfully solved by the Prairie State Universal Hover and Colony House Brooder, that the profits of their users have been almost doubled. No wonder they will use no other.

Thus the words of their users in all parts of the country are their best advertisements. We don't ask you to take our statements solely as to their exceptional merit. Let us send you proofs from someone near you, for Prairie State pleased patrons are everywhere. Write your name on a post card; simply say "Send me more proofs why I shall buy Prairie State machines." We'll surprise you and show you how much more profitable Prairie State machines are than any other.

PRAIRIE STATE INCUBATOR COMPANY
468 MAIN ST. HOMER CITY, PENNA.

EAST

The HIGHLAND POULTRY FARM

New Hartford, Conn., Apr. 29, 1909.

Prairie State Incubator Co.

Gentlemen: I am very glad to be able to tell you that from the first hatch in my new No. 3 Prairie State I got 320 chicks from 860 eggs, beating all my other machines of the same size by 40 or 50 chicks. I have bought another large size machine and shall want several more another year—as soon as I can get rid of my incubators of other makes.

C. M. MAXFIELD.

The ROCKY FORD POULTRY CO.

Rocky Ford, Colo., April 29, 1909.

Prairie State Incubator Co.

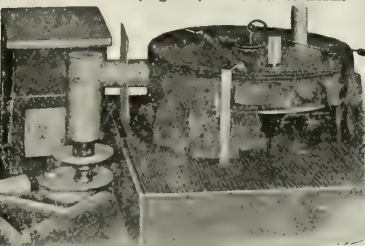

Dear Sirs: The 400-egg incubator I ordered has opened up the eyes of the Western people. This is the record—392 fertile eggs; 366 chicks large and strong; 2 cripples, 5 pipped, but dead in shell; total number of chicks, 373. 19 eggs showed no life.

Look out for orders from here early next year. There are many Universal Hovers in use here and giving the finest kind of satisfaction. We could not think of using any other.

Box 144. (Signed) O. C. FRANTZ.

WEST

SOUTH

Sylvania, Ga., March 20, 1909.

Prairie State Incubator Co.

Gentlemen: I have just taken off 107 vigorous chicks from the 117 eggs put in the 100 egg machine No. 0. I tested these 117 eggs down to 111 eggs, which only left 4 that did not hatch. Two out of the 4 unhatched eggs had dead chicks in them. Do you know of any record that beats this? And too, from eggs that were bought from the country wherever I could find them. I have people constantly expressing wonder about this machine.

(Signed) O. C. EVERETT.

FOUR FOR \$1.00

Four First-Class Poultry Publications, Published in Different Parts of the U. S., at One-Half Price

American Poultry Journal - - - - } \$1.00
American Poultry Advocate - - - - } Regular Price \$2
Poultry Item and Commercial Poultry

AMERICAN POULTRY JOURNAL needs no introduction, as it is the oldest, largest and best poultry paper in the world. Is the leader of the poultry press, and is now in its 40th volume. No poultryman can afford to be without it, as it has no equal.

AMERICAN POULTRY ADVOCATE, the great New York state paper published at Syracuse, and full of good reading matter, is always welcomed by the subscriber. Now in its 18th volume. It is conceded to be one of the best poultry papers published in the east.

POULTRY ITEM, published at Sellersville, Pa. Now in its 12th volume, and although a young publication compared to the others embraced in this offer, it is safe to state that Poultry Item is rapidly pushing toward the front. Full of valuable information and complete show winnings.

COMMERCIAL POULTRY, published at Marseilles, Ill., is now in its 18th volume. True to its name, it instructs the reader on poultry as a business. Its volumes contain articles by excellent writers who contribute regularly and make it interesting for the reader.

When reading this do not lose sight of the fact that American Poultry Journal contains from 60 to 166 pages of interesting reading matter; that it has a strong corps of field men who report on conditions in their territory each month so that it contains the "newsiest" news of the poultry world. A single copy is worth more than we ask for one year's subscription to all four.

\$2.00 VALUE FOR ONLY \$1.00

This offer is for both new and renewal subscriptions. Cut out the coupon and send in your order today. Address

No. 11

THE SIZE AND TYPE OF A BUFF ORPINGTON

Raising and Fitting Exhibition Birds Should Never be Paramount to the Production of Good Layers—Size and Weight Necessary—Orpington Type in a Class by Itself—Errors of the Orpington Breeder

Mr. Cook, in developing the Orpingtons, according to his publications, strove to combine three great essentials in one breed of fowls. These are:

1st: To produce the largest smooth legged variety of strong, quickly growing fowls of vigorous constitution.

2nd: To produce birds that were especially good layers of large eggs, and in season, good mothers for a brood of chicks.

3rd: To produce a solid, compactly built body, having an extra large breast of the finest table qualities. To him the question of color was largely a secondary consideration all the way through his experiment.

Now it is evident to every thoughtful breeder that any variety of fowls, to be a permanent and popular success must combine all these three qualifications, or at least the last two. It is now admitted in almost every country on the globe that the Buff Orpington meets all three requirements more fully than any other variety of fowls yet brought before the public. Every successful breeder must always keep before him the utility side of the poultry business. The raising, fitting up and exhibiting of show birds is highly commendable, but should never be paramount to the production of good layers to fill the egg basket, and good table fowls to please and tickle the palate. Only about one bird in fifty is a high class show specimen, therefore every breeder must figure out where the profit must be earned from the other forty-nine. It is at this point that most breeders fail. It has been truly said that size and shape which constitute type, make the breed, and that color designates the variety of the breed. The Orpingtons are not distinguished from other varieties by their color alone. Color is common to all varieties of Plymouth Rocks, Wyandottes, Leghorns, etc., alike. Color never made the Orpington useful or famous. It is perhaps true in a general way that better Buff color has been developed in several of the buff varieties, than has yet been produced in the Buff Orpington, therefore, if a breeder wants color in its greatest perfection, it would be well for him to confine his efforts to some one of the other varieties, perhaps Buff Leghorns, where a greater degree of perfection has been reached in soft, even, golden buff. What Mr. Cook sought and struggled to obtain was the more distinguishing characteristics above enumerated, and that he achieved to a large degree those qualities is evidenced by their unprecedented development and adoption in every country of the world. No breed or variety of poultry can stand long in public favor that is devoid of strong commercial qualities. The fancier and commercial poultryman are each dependant upon the other. The Buff Orpington has the very strongest commercial qualities. It owes its very existence and prominent place in the poultry world to these qualities, and it is the duty of every breeder to keep these qualities before the public. I shall not attempt to discuss the table qualities, nor the ability of this popular variety to lay a great number of large, well shaped brown eggs, as these two are now commonly accepted on every hand, but I shall confine myself in this discussion largely to the size and type

of those beautiful birds. First, let us consider the question of size. There are three things that go to make up the size and weight of any bird, viz.: length, breadth, and depth of carcass. Now in an Orpington that meets the requirements of the standard, you must have all three dimensions well developed and properly balanced, therefore the birds must have a long and level keel, which means a long breast bone, and prominent breast, carried low down, and well formed, on short, stout legs, and the hinder parts of its body sufficiently developed to balance up the fowl (look through the publication and study the pictures of birds and with especial attention to length of keel and shortness of the legs).

Many of the breeders utterly fail to comprehend this requirement, and they are turning out birds that are cut away on the breast, are shaped in front like a Plymouth Rock, and do not in any sense reach Orpington length on the keel. This long, level keel, of course, results in a prominent breast, which means a large quantity of juicy meat for the table. Restaurateurs hit the nail on the head when they advertise on their bills of fare, about as follows: "Chicken Pie 35 cts., all breast meat 50 cts." Mr. Cook strove to develop a table fowl with the largest possible amount of breast meat, as this is uniformly considered the choicest delicacy. For this reason he introduced the Dorking cross. The next dimension necessary is breadth; on the back and shoulders, over the saddle, across the breast, and over all the body, from bill to rump, and from wing to wing. This dimension also tends to produce weight, and a general appearance of bigness. A narrow breasted bird, or one contracted or pinched over the back, and shoulders or tail is usually worthless for special matings, and should be discarded. The third dimension is depth. This means the distance from back to hock, from back through breast, and from back through rump. It takes all three of these dimensions in abundance to give the Orpington size. Not one of them, nor any two of them, but all three in the right proportions. When all these are properly combined in one bird, we shall have Orpington size, and standard weight.

Let me say a word about standard weight, my idea being that a bird shall be up to standard weight when in normal condition when it enters the breeding pen, and not after it has been closely confined three or four weeks and stuffed until it gains from one pound to two pounds in order to bring it up to the required weight. Another important requisite to get standard weight is to have a sufficiently large frame on which to carry the meat of the bird naturally. It is almost impossible to get an Orpington of small frame or small bone up to standard weight, except by stuffing it. As a general rule you ought not to expect to produce standard sized birds from a lot of runts, or specimens a pound or two below weight. You must first start to breed chicks from large, vigorous specimens of standard weight, under normal conditions. It is a well known fact that hens' eggs will produce larger chicks than pullets' unless the latter begin to lay in October or November. The continued use, year by year of pullets exclusively, as breeders, will tend to reduce the size of your birds materially. Another thing to remember is never to set or incubate small or misshapen eggs. Chicks, to come naturally to standard size and weight, ought to be hatched under hens in March, April and early May. Incubator hatched chickens and the brooder raised orphans generally fall short a little in weight, vitality and that rare requisite of show quality. The old hen still has the stuffy incubator and

stinking brooder beaten in every stage of the game. With her motherly care, and natural heat of the body, she combines brains with her labor and teaches the little fellow what to eat, how to eat it, and how to grow and exercise. You can not put brains into either an incubator or brooder. Size is not only controlled by the method of hatching and rearing, but also by the way they are fed and cared for by their owners. Poorly fed and housed chicks seldom produce show winners, or very good looking specimens. There is nothing that pays better in the rearing of chicks than proper food and intelligent care if a breeder wishes to show his birds. These things also have a material effect upon the color of the bird, more than is usually admitted or known. Birds also to attain standard size and vigor must have free range and plenty of shade, and be free from lice. If chicks are incubator hatched and hen raised, they are not usually developed in either size or vigor as much as hen hatched and raised chicks. They suffer a still greater handicap if incubator hatched and brooder raised, and if they are incubator hatched, brooder raised, and while growing kept in pens off of free range, then they very seldom mature into standard size chicks. So while the big, modern farms raise sometimes thousands of chicks, under artificial conditions, and have the advantage of numbers, still the small breeder often makes up in quality what he lacks in numbers. It is a fact that a 1st and 3rd prize

S. C. Buff Orpington male. Bred and owned by John O. Willard, Linden, Mich.

Buff Orpington at the last Madison Square Garden show were raised on a farm where there were less than 90 chicks all told. Standard weight also means money and profit, when birds are sold on the market. A 6 lb. hen may bring 75 cts., while an 8 lb. hen brings \$1.00. Thus it pays big to get your birds up to standard weight, both for the show and the market.

Next, let us speak of the type of the Orpington. This subject naturally follows after the discussion of size, and the two combined, are generally speaking, those things which the eye sees, irrespective of color. In other words what makes an Orpington look like one of that variety whether it is white, black or buff. When once you study a real Orpington, its size and type, you will appreciate its difference from all other breeds. Its type is intensified by the shortness of the legs, and shape of the back, saddle and tail, the long, level keel, carried very low, the prominent breast, the poise of the neck, head, tail, etc., also very materially by the fluff and looseness of the feathering on the bird. A bird of Orpington body, up on high legs would be ludicrous. The short, stout legs, set wide apart, are among the strong characteristics of the breed. Mr. Cook realized long ago that the shank of the leg neither lays the egg, nor is it eaten on the table, and therefore length is entirely superfluous. Some breeders fear that a

short legged bird might look squatty. To these, our reply is, study the Blacks, also "Peggy," the famous White Orpington hen, yet we never heard of anybody calling her squatty. There can only be one standard for Orpington type of all varieties, the same as Rocks, Wyandottes, Leghorns, etc. The type of the best Blacks is almost universally considered the ideal by the breeders of all varieties of Orpingtons. In the Blacks, we have the big, short shanks. And the Buffs, during the next five years, if we follow the Revised Standard, must approximate the requirements which the Blacks so nearly fulfill. Any attempt to modify this type or change the present standard by the Club should be most carefully considered, and the members of our Club and every other Orpington Club thoroughly posted by bulletin, and a vote taken, so that every Club member of every other Orpington Club could have a voice in the matter, and be a determining factor in the future requirements of the breed. If some of our members want lower weight, longer legs and closer feathering, etc., we suggest the breeding of Buff Rocks, as an outlet to their enthusiasm and an easy solution to the question of size and type for them. The rest of us perhaps prefer to be left alone with the present standard as it is. In any event, the standard calling for the low down, massive, blocky type, as described in the latest revision can not be changed for five years, and then will not be changed unless modified for all varieties of Orpingtons alike, to which change most breeders of Buffs and of other varieties will strenuously object. In five years by careful mating, breeders can, and should develop size and type in Buffs, equal to the best Blacks of today. Therefore, in my opinion, this agitation of changing the size and type is absolutely useless for five years, and in addition, contrary at present, to the wishes and desires of 9-10 of the Buff Orpington Club members. A long legged Orpington should always be discarded from the breeding pen. Type, to the mind of most breeders, means shape, outline of outward appearance to the age, irrespective of color. Shape is largely controlled by two things. 1st. The carcass of the bird itself. This fundamental principle is sadly overlooked by most breeders. It is absolutely essential that we study the type with the carcass of the bird. 2nd. The next thing to consider about type is the feathers of the bird, and the way the live fowl carries them when attached to the body. You can not have ideal type unless the carcass is big enough to make standard weight, and of the proper shape, nor unless the bird is properly feathered in all sections. These two requisites go hand in hand. To illustrate, take an extra large Minorca cock, weighing ten pounds. Here you have the required weight, also a bird quite closely feathered. Contrast the two breeds here illustrated, having in mind the carcass and feathering of an Orpington. Breeders are usually very careless about the breadth over the shoulder and saddle. You must have broad backs. The saddle also must be wide and large, in order to furnish proper surroundings for a wide, well spread and medium low tail. Narrow shoulders mean a narrow body. A small, contracted saddle is usually accompanied by a pinched tail, frequently carried too high. In my experience I find those male birds which are widest across the back, are usually strong in saddle, excellent in tail shape, and unusually vigorous. Tail shape is a large factor in ideal type. If you have never studied the close relation between saddle and tail shape, do so at once. The wide, well spread, and properly carried tail, materially assist in giving the bird an added appearance of bigness and makes it look massive and majestic. The type of an Orpington is not attained by size alone, nor by length of shank alone, nor by the shape of back, saddle and tail, neither by color, but to get perfect type, you must have a big, broad, deep carcass, with extra large breast development; then the bird must be from moderately to loosely feathered, so as to increase very materially the apparent size of the body underneath, and lastly, short, stout legs set wide apart. Of course the shape of the neck, back saddle, tail, etc., are not to be neglected. These primary essentials, to my mind, make up Orpington type. It is thus apparent that neither a small or medium bodied bird, or a loosely feathered bird, or a long legged one, can have true Orpington type; therefore, the small specimens, the birds too closely feathered and the long legged ones ought to be discarded from the breeding yards, and only those used for special matings that have the above requirements, so as to produce standard size and type, or approximately those requirements under normal conditions.

Another thing that is overlooked by most of the breeders is the way the feathers are attached to and molded

upon the living body. Perhaps you have never stopped to think how different a closely feathered Orpington would look. To me, it would be about like a horse without a mane or tail. I am not one of those, however, who favors a bird that is too closely feathered, or one which resembles the Buff Cochins too strongly. In those hens which do, we usually find the poorest layers, but I am nevertheless in favor of a happy medium between a Buff Rock and a Buff Cochins. The feathering has a great deal to do in helping to fix the type of the Orpington. It fills out the body of the bird, and makes it look big, massive and majestic, which are the attributes all strive to attain in Orpingtons.

The easiest error for a breeder to fall into is to let the size and type of his flock run down to Plymouth Rock lines, in the pursuit of color. Color is alright in its place, and I try as hard as anybody to get it, but the proper thing to strive for in the breeding of Buff Orpingtons is to combine size, type, color and other qualities all together in the development of the perfect bird. You must continually struggle to breed up in size and type as well as color. If any of these are neglected the birds rapidly degenerate. Vigor should also be constantly in the minds of the breeders, and no specimen be used in special matings that did not possess this quality to a very high degree. It is the scrappy, showy and vigorous male that ought to be mated up with the busy, industrious and hustling hens.

For the egg trade of 1910 and our own uses, we shall probably, mate up about 15 special pens of Buff Orping-

show that will be cut four points for color, more than the average color cuts. So to win in score card shows, we must have big birds, as well as good colored ones, but big, heavy ones first, and fine colored ones next. If our Buff Orpingtons look so much like Buff Rocks that we have to look at the color of the legs to tell the breed, then we either fail to comprehend what Orpington type really is, or fail as breeders to produce it.

One reason why the Orpingtons are being seriously handicapped on the question of size and type, is because the judges are placing awards upon undersized specimens of the Buff Rock type, possibly on account of the superior color. This is the most harmful thing that could be done. It is at the largest shows, which are usually comparison affairs, that people's ideas are formed about the size and type of this beautiful variety. Color does not make much difference, as that can be had in any variety of chickens. When a judge awards a blue ribbon to a specimen from one to three pounds below standard weight, he is doing a great injustice to the breeders at large, and to the variety. In my opinion the awards should be placed only upon those birds which under normal conditions would most nearly, in the opinion of the judge, produce other specimens of standard, size, type and color. A five pound or a five and one-half pound pullet in ninety-nine chances out of a hundred never would produce a specimen up to standard weight, neither would a seven pound cockerel if he was fully developed, no matter how fine his color really was. Color of itself has never done anything to make the Orpington

Home of "Simmons'" Golden Wyandottes, Stockton, Ill.

tons. Of this number three of the very choicest pens in America will be especially devoted to size, type and color. In these three pens, every breeder will be up to or above standard weight under normal conditions, and every breeder strong in these two essentials of size and type. One choice pen will be particularly selected for exhibition of color, size and type, one extra fine pen for perfect head points, size, type, and color. These five special matings, containing about 50 of our very best breeders, tell more clearly our opinion of size, type and color than this whole article. We place size and type first in three grand pens, place color first once, and head points once. Brother breeder, if you are not mating up your birds along somewhat similar lines, I venture to say that your flock is way below standard weight on the average and also diminishing slightly in weight from year to year. If the color craze has excluded the just and proper consideration of size and type, which characterize the breed, your future with Buff Orpingtons will see your efforts fail. We expect the grandest chicks from the three pens mated for size and type. A good, big, standard weight cockerel of fine type might sell for \$25.00, while a smaller one of better color might not find a satisfied customer at \$5.00. Most of the shows in the middle West and West, where a majority of the breeders live, and compete in, are score card shows. A cockerel 2 lbs. below weight will be cut four on size and type. There are few big cockerels up in weight and fit to

famous, but it is the other qualifications that have brought it to the front more rapidly than any other breed. It is well to remember that at the last Madison Square Garden show, which was also the annual meeting place of the National Single Comb Buff Orpington Club, the largest specialty club in the world, that the first, second and third prize cockerels weighed over ten pounds each. The question of size and weight, I have no doubt, had a material influence on the judge's mind in placing these particular awards. Every breeder dreams of some time producing a high class, high priced show bird. If your birds are not getting up to standard weight and of required type, you might as well forget about the high priced show birds, because it would be foolish for anybody to pay a fancy price for an undersized specimen. Therefore, if you want to get to the front in the breeding of any variety of Orpingtons, you must stick close to size and type. These things are readily overlooked, and color is easily made paramount, because it is always before the eye, while the carcass of the bird is never seen except after its usefulness as a show bird has been destroyed.

The Buff Orpington, in my opinion, can be bred today as close to size and type, and with possibly almost as much uniformity in color as any other variety of Buff fowls. If this statement is not true, it then becomes the duty and privilege of the latter day breeders to take up Mr. Cook's unfinished work along these lines and carry it to comple-

tion. The greatest need of the Orpington breeders today is to bend their efforts toward the proper development of size and type. The question of color is now well in hand.

As a member of the National Single Comb Buff Orpington Club, I am strongly of the opinion that in all future Club shows the birds should be judged by score card method and the penalty attached to a bird which lacks size and type. I have seen more injustice done to the Buff Orpington in comparison shows where the standard is

confusion to the breeders and dissention and discontent among exhibitors. The fundamental elements which have made the Orpington so popular, I repeat, are their tremendous, yet majestic size and carriage, their beautiful, symmetrical type, their great reputation as layers of large eggs, and their excellent table qualities. If we depart from these principles, we are deteriorating the value of our flocks, the capacity to make money out of them, placing the variety on a level with smaller and inferior breeds, and

OWEN FARMS' FIRST PRIZE EXHIBITION PEN OF BUFF ORPINGTONS AT BOSTON.

No other buff fowl ever took such a hold on the fancy on both sides of the Atlantic and for such a length of time commanded so remunerative prices as the Buff Orpington. The fact that it was originally bred for those seeking a profit-paying fowl has made it none the less the fancier's favorite and we find it being bred exclusively on many farms. Even after the enormous sales of Owen Farms' stock last winter they were winners at the final big show at Boston, of first on cockerel, first on hen and first on the breeding pen shown above. At some important shows I was not surprised to have a number of progressive fanciers tell me, "This is an Owen Farms' bird." They are proud to say it, because they know that the blood of the Owen Farms' Buff Orpingtons can be traced back through many of the greatest winners that the breed has produced. During our visit to these far-famed farms last winter we saw splendid flocks of young May-hatched Buff Orpingtons that were rounding into promising show form, in fact many of their best birds are hatched in May. It is one of the safest months in which to start this variety, when it is desired to have them exhibited in fresh feather at the mid-winter shows.—F. L. SEWELL.

thrown to the winds than I ever have in a score card show. Whenever a judge places a blue ribbon upon a small, undersized specimen, he not only injures the breed itself, but also deeply wrongs all those breeders who are making an honest effort to keep close to standard size and type. It is largely the judges who write up and prepare the Standard of Perfection and the ones who fight hardest for a standard. It is also these very judges who frequently ignore its precepts and laws in the comparison shows, and thus bring

sowing confusion and dissention in the rank and file of Buff Orpington breeders.

Let us therefore keep close to the essentials, and especially bear in mind the size and type of this most wonderful variety as laid down in the Standard of Perfection, which for the next five years, must be our mentor and final arbitrator.

JOHN O. WILLARD,
Vice-president of the National Single Comb Buff Orpington Club for Michigan.

PRIZE ARTICLE

DEPARTMENT

We would like to have all of our readers compete for the prizes offered each month in this department. Send as many articles each month as you desire. For the best article we will pay \$3.00 and for the second best \$2.00. Make your communications about a column in length, which is about 600 words. They should be timely and appropriate to the season. Articles describing appliances and houses and accompanied by rough drawings are especially desirable. All the communications must be accompanied by a letter stating that they have been sent in for competition in the Prize Article Department. All articles must be written on one side of the paper only. Articles received after the 15th of the month will be too late for competition in the month following, but will be entered the next month. No manuscript will be returned, but all who send meritorious articles will be given a year's subscription to AMERICAN POULTRY JOURNAL, whether the article is published or not.

The first prize in the contest this month has been awarded to J. Wesley Griffin, Warsaw, Ky., and the second prize to Fred W. Greene, Ft. Calhoun, Neb.

WHY SO MANY AMATEURS FAIL WITH POULTRY.

First, they get the fever ("chicken business") and jump in blind-folded, get into deep water and drown, where, if they had only looked around and studied the business a little, they could have kept their heads above the water line until experience had taught them the lesson so hard for many to learn. The first thing to do is to get the house ready. If situated so

place. A curtain hangs in front of roosts, to be pulled down on cold nights. There is a thin wall between the two roosting places, dividing the house into two complete parts, so two breeds may use the same house. When the curtains in front of the building are down and those in front of the roosts drawn close there is no danger from draughts. You will have no roop, colds or sore throat with your flock.

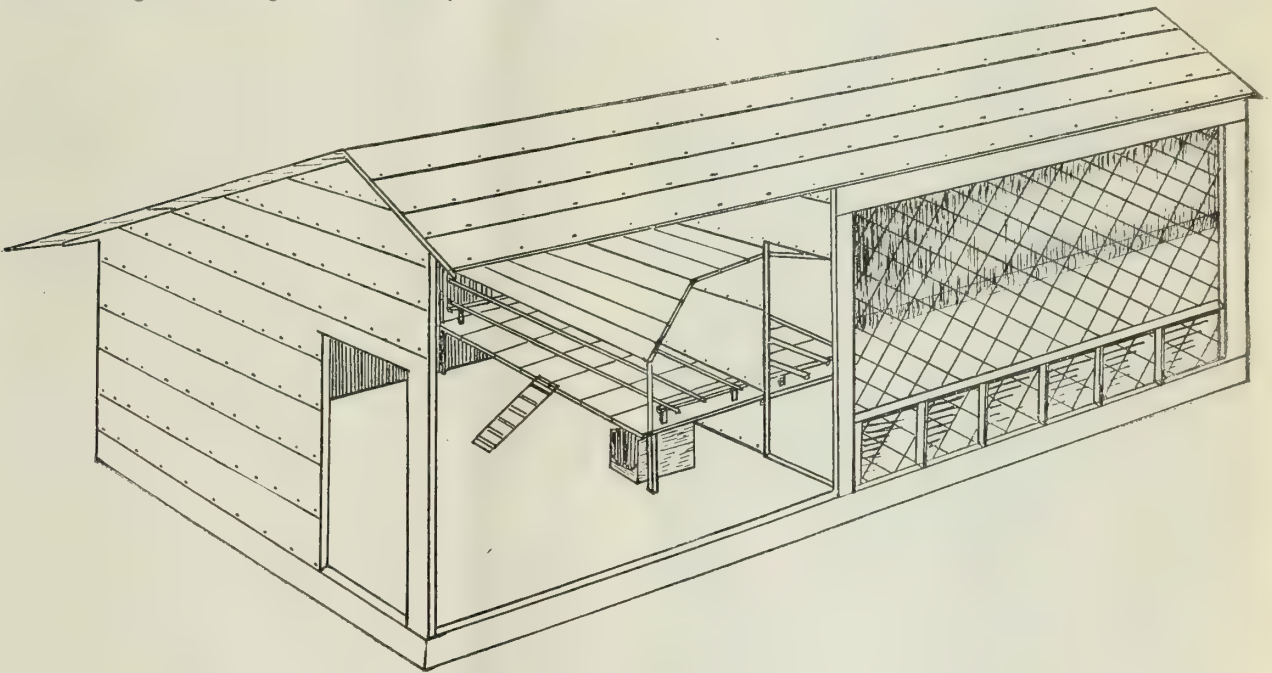

Beneath the dropping boards is used for nest boxes. Common cracker boxes or canned goods boxes are fine for nests. The sill or base of the house should be ten or twelve inches high and earth filled in nearly to the top of this. An earth floor where properly drained is the best. All fixtures in the building should be removable, so as to facilitate cleaning and whitewashing. Now we have the house, and have made it as cheaply as we could. Now we want the best pure bred fowls we can get to start with, feed and water them properly and they will do the rest.

Warsaw, Ky.

J. Wesley Griffin.

CUTTING PRICES FOR HOME TRADE.

Every year from about November 1 to March of the following year the poultryman is asked repeatedly to cut prices on breeding stock. Directly following this he is up against the same proposition for eggs for hatching; so, taking things on

THE COMMONSENSE POULTRY HOUSE.

as to build a lean-to shed on the south or southeast side of another building you are lucky, as it will save one side, and another advantage is the other building will serve as a wind-break. Now with one side to start with we have just the two ends to start with solid. The front should be left almost entirely open; the opening to be covered with poultry netting and a row of sash with glass sixteen inches high, as shown in drawing. The ends and roof should be made of very cheap lumber and covered with a paper or rubber roofing material. Good quality tarred paper is all right for the ends, also the roof. What we want to do is to keep the air (the cold and damp draught) from entering the building. Make the building just as tight as you possibly can, all but the front.

A part of the front is left out in the drawing so as to show the interior. The end is also left out in the hooded roosting

the whole, he is forced to accept or refuse cut-price orders for his poultry products the whole year round. It does not matter how small or how extensive his or her operations may be, only the larger one's operations the oftener such requests.

These requests generally come from acquaintances or from people who, while not speaking acquaintances, have heard of you and your business through others, and who live in your own locality. Of course we receive requests of the same nature by mail, but for most people it is easier to refuse a request of this kind by letter than to one's own friends face to face.

There is no reason for this whatever. It shows poor business qualities in a man to say yes when he is positive that he should have said no, although I believe that it is to the advantage of the poultryman to sell both stock and eggs cheaper to home trade where the customer comes right to your yards with coops

or baskets of his own for stock or eggs, as the case may be. By so doing the home customer saves the producer the price of patented egg boxes (or shipping coops) and the time required to take them to the express office. But there the difference ends.

It is poor business policy on the part of the breeder to sell stock or eggs to a neighbor at market price just for the sake of a good name (?) and lots of business among local friends and acquaintances.

The difference in dollars and cents between the market value and the breeding value of a bird worthy of a place in another's breeding flock is, of course, in comparison to the value the purchaser places on a breeding fowl. With many people there is no difference; the market value at so much per pound is its true worth. I have in mind a gentleman who came to me three years ago for a dozen Single Comb Brown Leghorn cockerels. I asked 75 cents each. He expected to get them at market

If a man cuts prices or sells his products at market price his stock will be looked upon as cheap stuff in his own locality and he will be known as an "easy mark" for buyers. On the other hand, the man who does not cut prices will be respected; he gives the impression that his stock are worth what he asks, and if in reality they are that impression will remain and the breeder will be well spoken of instead of slurred.

Ft. Calhoun, Neb.

Fred W. Greene.

SECRETARY CAMPBELL'S ADDRESS

At the Late Meeting of the American Poultry Association Mr. Campbell Delivered the Following Address After Being Installed as Secretary of the Association

Mr. President, Ladies and Gentlemen of the American Poultry Association:

As the newly elected and qualified secretary and treasurer of your association, one on whom devolves the duty of answering your correspondence and of attending to the various kind of work connected with that office, during the coming year, I realize the advantage of being able to meet you face to face at a meeting of this kind. It has been suggested to me, by our worthy president, that I, at this time, address this convention, and he also stated that it would be well to reduce to writing that which I might have to offer or suggest to you.

In the brief address which I have prepared for this occasion, I have endeavored to incorporate several suggestions which will, I trust, assist me in the performance of my duty, and result in the general welfare of the association.

Inasmuch as this association is one in which all have an equal voice in its management, and in which the sovereign will is vested in its members, I would indeed be ungrateful if I did not, first of all, extend to you my thanks and appreciation for the honor you have conferred on me, of representing you as its secretary and treasurer, and also for the confidence you repose in me.

The American Poultry Association is an organization of wonderful possibilities, having, in fact, unlimited territory in which to do its work. In the study of the breeding of birds, a world of information and knowledge lies before us, so that I am not unmindful of the fact that with this honor, for which I am truly grateful, there comes a great responsibility and labor.

Every member owes to the association a duty—that of serving it in his individual capacity as best he can, but on me is laid the duty, not only of acting in my individual capacity, but in the capacity of servant to all; carrying out that well founded and well known doctrine that, "A public office is a public trust," and he only can do his full duty who uses all his powers to serve the people best.

As you, all, like myself, are interested in the welfare of our association, let me, at this time, impress on you the importance of a mutual co-operation among the members in this work. I am reminded at this time, of the well known fable of the bundle of sticks, how an old man, thinking of the death which he knew he must meet, called together his seven sons, handed them a bundle of sticks bound together, and asked them to break them. They, in turn, tried, but were unable to do so. Then the old man took the bundle, untied it, and broke the sticks one by one. On seeing this, the boys exclaimed that, in that manner, it was an easy task. Thus they were taught the valuable lesson that, "In union there is strength." So let us exemplify the teaching of that ancient fable in the operations of our association, and by the union and co-operation of every member, let us go about the task, that awaits us in the coming year.

It was at the convention held in the National Capital, Washington, in 1896, that my name was enrolled as a member. It was my privilege, at this meeting, to cast my first vote for George O. Brown as President, and D. Lincoln Orr for Secretary and Treasurer, both of whom proved worthy officials. For many years, meetings were held annually with seemingly little interest. During this time but few members were added to the association, the attendance averaging not to exceed forty, but it was at the meeting held in Cincinnati in 1906, that the good old association seemed to take on new life. It was there that a committee was appointed to prepare a new constitution, and the secretary and treasurer elected at this meeting received but thirty-one votes. The new constitution drafted by this committee,

National Silver Trophy Cup won by E. B. Thompson, Amenia, N. Y., on his famous Ringlet Parred Rocks at Madison Square Garden, New York, 1908. The cup was won for the best Parred Rock cock, cockerel, hen and pullet. It stands 24 inches high.

price. He said he didn't want any "fancy" chickens, but his wife liked them for the looks (beauty). I did not get the price asked nor did he get them at market price, but took them with him. Another man said he could not afford to pay \$2 per setting for eggs and place birds hatched from such eggs in with a lot of scrubs, etc. I retaliated by saying that I could not afford to pay \$5 per set for eggs and from \$5 to \$25 for breeding birds and sell the surplus hatching eggs at market price.

And so it goes, but I do not believe that the poultryman is materially benefited in selling stock to a man who will put them in with a lot of scrubs; but the poultryman knows (or ought to know) the value of his own stock as breeders. Knowing this every poultryman owes it to his own business integrity to fix the prices on his surplus products and, with reasonable allowance for customers who come right to your door, maintain those prices. Any other procedure is throwing profits to the winds.

the officers chosen at Cincinnati to put it into effect, and the good work accomplished by the present officials and members has revolutionized the association, that it has been changed from a dormant to an active state.

In a little more than two years, we have doubled our membership, and instead of less than half a hundred members being present at our annual convention, we now have

Missouri King, first prize cockerel at Missouri State Show, 1908, and won silver medal for best cockerel in Mediterranean class. Pronounced by all leading judges as the best cockerel yet produced. Bred and owned by Tom H. Woods, Fayette, Mo.

several hundred. Because of our popular form of government, and as our elections are held by ballot, thus granting everyone the privilege of casting a vote, at our last election more than nine hundred members voted.

We have about sixteen hundred members enrolled, but we should and can increase this number to five thousand. It is estimated that less than five per cent of the poultry breeders of America are members of the American Poultry Association. This condition should not exist, and, if during the coming year, each member will secure one new member, we shall not be long in doubling our membership.

The American Poultry Association should be just what the name represents to the community and the nation, "A band of men schooled in the science of poultry raising and poultry breeding, banded together to gain assistance from each other and a better knowledge of that which we profess." It is indeed a great privilege to be a member of such an organization. The facts are—you do not belong to the American Poultry Association, the Association belongs to you. I feel assured that those who devote their time to the work and who become so proficient that they are accepted as judges at various exhibitions, are benefited by being members of an association that is not only state wide but international in character.

To those men to whom the special opportunity will be afforded of making known the advantages of an association of this kind, I desire to say that, in the work of the coming year, you endeavor to assist in bringing in new members, you who are able to know and to learn who should be solicited for membership. Let me urge you who are provided with special talents in this respect, do not bury them but use them, and I assure you that it will be pleasing to the association to learn, at the end of the year, that the good, arising from your talents, has been many fold.

It has been said by one great orator that, "Eternal vigilance is the price of liberty," and it is for us, if we desire to gain the best results for our association, to be vigilant in all things.

It is said that the laws of a community are created as the needs and wants of the people demand them. We have now created the demand for parcel post system by showing that the community needs it. Let us strive to see that a law is enacted that will supply this demand. This will call upon each one of us a duty of taking a special interest in the welfare of our country at large by seeing that the great underlying principle for which our government

was founded, that of supplying the needs of the people and of avoiding oppression, is properly carried out.

No great reform was ever brought about without being first kindled, and then by continually adding fuel to the flames. In time, it has assumed such proportion, that it has spread over everywhere. How can we assist in satisfying this need? Let us see that it is written on the plat forms of our great political parties, and let us awaken the public mind to a full realization of what it means ever bearing in remembrance that motto "Vigilance."

What further can we do? We can also endeavor to obtain from express companies better service and lower rates. Better service and lower rates are needed, and certainly would be a great stimulant to our poultry business. Let us be strong advocates of revision of rates, not upward, however, but downward.

In conclusion, let me say that what I need most, in the coming year, is your hearty support and co-operation with me in my work. I again thank you for this great mark of favor in selecting me for your secretary and treasurer, and wish to inform you that my home is in the beautiful city of Mansfield, Ohio, and although it is not like Rome of old, nevertheless all roads lead there, and should any of you, on any occasion, visit the city, bear in mind that my country residence lies in view of the city, easily located, and above all things remember that the latch string always hangs out.

FEED AND MANAGEMENT OF TURKEYS

One of the Most Profitable Branches of Poultry Raising—Lack of Proper Breeding and Care Results in Heavy Losses—The Demand for Turkeys Far Exceeds the Supply

Written for American Poultry Journal by J. C. Clipp, Sault Ste. Marie, Michigan

Certainly the feed and management of turkeys is a science and should merit the careful study and attention of every turkey grower. That turkey culture has somewhat been neglected in the past goes without question. Every poultry publication should set apart a "turkey department," at least

S. C. Buff Orpington hen. Bred and owned by John O. Willard, Linden, Mich.

that is the way I see it. Turkeys are profitable, and should receive encouragement from every hand. The reason bad results follow in turkey growing in many instances is because they are fed too heavily on artificial foods. What we mean by artificial foods is grain and mashes fed by the growers are unnatural foods for turkeys. It must be remembered that turkeys are naturally wild. Their constitution requires wild

habits and unless they receive such managements, they will naturally grow weaker and weaker from one generation to another until their vitality is so far gone the progeny continue to die in infancy. Consequently many failures with turkeys are experienced. Since the incentive of continued high prices in the market exist for turkeys, the majority of growers through a mad and exciting effort to raise every turkey possible, feed entirely too much. Consequently kill the majority of their turkeys, that otherwise would have lived and developed into promising young specimens. It is a fact that the demand for turkeys is far in excess of the supply and always will be. I have turkeys sold and paid for every year before they are hatched, which is an evident fact that the supply is far short of the demand. Turkeys are unusually scarce this season, due largely to the wet weather throughout the entire spring months. Hence, those that will be required to buy breeding toms will be compelled to buy early or do without. The turkey crop for 1910 will likewise be short, due to the fact that there will not be a sufficient number of toms raised this year to mate half the would-be breeding pens that will be in existence the coming season. While the demand is so great and prices so high for turkeys of all grades, every breeder should make every effort possible to raise every turkey hatched. The number can be increased wonderfully if

ter," and so he should, but this was my mistake, one that we will never make again. While you may not have the same weakness you may fall down over some error equally simple. So be cautious and don't be guilty of any such mistakes as they are expensive, very expensive indeed, especially at the present high prices. Don't get it into your head that you must have a ton of excessive weight for breeding purposes. Those large birds are all right for exhibition purposes provided their plumage will permit, but all wrong for breeders. As a rule turkeys running a few pounds over standard weight never prove profitable, as breeders, at least this has been my experience, for I have used a number of them. I am now using turkeys over standard weight for breeders, not because I think them best nor because I prefer them above all others for I do not, but because my trade demands it. Hence, I am compelled to cater to what my trade demands. It would be a poor merchant if he did not carry a stock of goods his trade demanded. We are compelled to keep what our trade calls for regardless of our own wishes. However, keep in view the many errors that you are liable to make. If possible escape at least a few of them, especially those I have mentioned and I feel confident you will succeed in raising a nice flock the coming season. Remember to buy your breeding tom early in order to be sure of him. You will find them scarce.

A CROWTHER "ARISTOCRAT."

S. C. Red pullet with clean ticked hackle, soft even red and strong black sections. Bred and owned by Ira M. Crowther, Willoughby, O., Box A.

growers will leave off the artificial foods and allow them to pick up their own living on the range. Another great mistake many growers make every year and one that I have made is in giving too many poults to one hen. No turkey hen should be given over twenty poults. This number, even, is overtaxing her capacity, as but few hens lay over seventeen or eighteen eggs before they become broody, especially if they are allowed to steal their nest out. It's a fact we are all anxious for every hen to lay every egg she will before we allow her the control of a clutch of eggs, compelling one hen to brood a number sufficient for three hens. The fewer poults we place with a hen the larger number of poults we are sure to raise. Not only this but the larger poults we are sure to raise if we brood them in limited numbers and provide them unlimited range. The greatest mistake I ever made in my life in growing turkeys was overtaxing the mother turkey with poults. If my memory serves me correctly we placed fifty poults with one hen. Of course, you will say, "Any fool should have known bet-

PREPARING BIRDS FOR THE SHOW ROOM

An Interesting and Instructive Article on How to Prepare Birds for the Show Room so that They Will Win the Blue—Faking Is Unnecessary When Proper Attention Is Given the Breeding Stock

Written for American Poultry Journal by S. M. Dickinson, Granville, Ohio

In writing on this ever interesting and, yes, laborious subject, the first caution is, do not wait until time to show your birds, ten weeks before is none too soon, as an example it may be necessary to pluck a sickle feather from a male that has been broken, or a wing feather; at times it will take this long to grow a new one to full length. One often reads concerning feeding at this time certain fattening foods. Such advice is considered by the writer very bad form, indeed, and is most impracticable, if you are to show at a comparison show; remember, after all, it is the best type that wins, not a specimen that has merely good head points with a poor shaped body, fattened by rich foods. Select your best matured specimens and trust to luck after you have thoroughly washed and groomed them. Take your birds, giving as large a yard as is possible; separate males from females; keep as few together as you can. Go carefully over each, watch for disqualifications. Cull all broken feathers; feed in your usual way. Free all birds from lice. Go carefully over their legs. If you have any with rough legs, take equal parts of flour of sulphur and lard, mix thoroughly, add to this a few drops of coal oil, there is nothing better. Often it is necessary to rub it on several times. Scales should be carefully removed with anything that will pass under the scales. Don't make birds' legs bleed. Those birds that seem more timid than others should be placed in coop and fed from your hand, first allowing them to become hungry. This will generally fix them in a day or so. Three days before washing keep your birds from all dust baths, as they are now supposed to be free from lice. This is for your benefit, as the birds will relieve themselves of much dirt from their plumage, therefore it will make your labor less. Do this by cleaning your houses in which they are confined. Do not put in small coops until three days before shipping time, in other words, until you start to wash them. Let them have all possible exercise until the last minute. They will go the route better and be the better for it. In washing birds I use only one tub. It is as large as a regular bath tub. Take a small amount of lukewarm water. Having first water too warm will set the dirt. Remember, you can't get a bird wet in five minutes. Don't wash until bird is thoroughly wet. Best plan is to take water and soap and boil until soap has dissolved. Pour a little of this in water and start with this. After that you can use cake of Ivory soap on bird. Don't be afraid of using too much. I use two cakes on an average to three birds. I use a stiff hand nail brush. I could never get a bird clean with a sponge. Now about the time you think there is no more dirt on bird, just start to brush like you were com-

mencing with another bird. Let your first water out of tub. This time you want more water to rinse bird. Now get all the soap from plumage in this water you possibly can. Into the next water add a tablespoonful of Twenty Mule Team borax. This is your last rinsing, so let it be thorough. Into the fourth and last water take the bird from the tub while you put into the water enough bluing to just appear blue. If the water is hard it takes less bluing, if soft it takes more. See that you have bluing thoroughly mixed with water, otherwise it will streak your bird. Let the bird remain in tub until as much water will drip from it as possible; squeeze all from it you can, wrap in a warm towel, take before a fire and fan, raising feathers as you do so. This will dry feathers rapidly and fluffs them out, which is most essential. Place bird in coop with clean sawdust, all coops having been thoroughly cleaned before time. After all birds have been washed, go carefully over them. If there are any off colored feathers, either pluck them or leave the bird at home. Birds for first few hours should be placed in warm room if washing has been done in cold weather, gradually changing bird to one or more colder temperatures. The writer believes putting foreign substances on comb and legs after washing only makes them in short time appear worse. A healthy specimen's comb is naturally red. Do not starch or chalk your birds, for nine times in ten it only makes a bad thing worse. What you win, win honestly. If you accompany your birds, give them all the green food, vegetables and the like, while at the show. They need this at this time above all other times. This is the way I prepare White Plymouth Rocks. Would also apply to any other white breed. Now, reader, there is such a thing as faking your birds. Sometimes they win, but not always. The fellow that has the naturally good birds will win nine out of ten times. As has been written, don't admit by showing faked specimens that you can't breed good birds.

KELLERSTRASS FARM GOING FORWARD

A Visit to This Immense High Quality White Orpington Farm by the American Poultry Journal Representative Reveals a Growing Business—The Cause Explained.

By Amos Burhans.

No poultry plant in the country has ever caused the comment and favorable mention that the Kellerstrass Farm, Kansas City, Mo., has earned by the treatment it has accorded those who have dealt with it. Some time ago we said that this farm was the best thing that had ever happened to the poultry fancy for the simple reason that it had added dignity to the calling and had created impressions that would put the business on a higher plane. This fall we have been inquiring into the business methods of this farm and are going to report what we have discovered to the readers of the American Poultry Journal, feeling that they will want to know more about the way in which the orders are cared for after being entrusted to them.

First, let me say that my impressions of Mr. Ernest Kellerstrass, the proprietor, have been such that I am convinced that he is doing more than his share in making a clean business proposition out of the fancy. He has been in other lines of business long enough to know that a straight, clean method of selling and making good in the delivery of the goods is what brought him the repeat orders and inspired other orders from the neighborhoods where satisfied buyers voiced their pleasure. This is the original way of advertising. And today it stands as the best method of increasing a business—letting the satisfied buyers and users of the article vouch for its worth.

The Kellerstrass Farm is producing White Orpingtons that have no superiors. Money and brains have not been spared in the founding of the strain now known as the Crystal strain from one side of the world to the other. They are being talked of in the show rooms of Europe, in the yards of the best fanciers of Australia, and there is no part of the United States where the White Orpington is known that does not know the name Kellerstrass and the Crystal strain and the high quality that these signify. The English poultry journals have been busy chronicling the details of some of the big sales that Mr. Kellerstrass has made to the breeders of England and other European countries. The Madam Paderewski sale set the pace and following upon the heels of it were some extra high class sales that were not given to the public. European breeders have drawn upon the Kellerstrass Crystal strain of White Orpingtons for the best additions that they were able to find to add to their flocks.

Only a few weeks ago there was an English fancier in America who made the trans-Atlantic trip to buy a few birds on the Kellerstrass Farm with which to found a great flock of these birds in his own country, seeing their rapid advance and knowing well that it paid to buy the best, no matter where they were or what the cost. Certain birds that Mr. Kellerstrass has found to be ideal in the breeding pens for the production of exhibition specimens were picked out by this English fancier and he was told by the owner that they could not be spared at any figure; that the monetary consideration did not enter into their value; that they were worth more to the flock than any price that could be placed on them. Mr. Kellerstrass placed no price on them and would listen to no proposals, for he knew that these birds would be of more value to him, who knew how to mate and use them, than to any other flock. The English fancier offered as high as \$1,200 for the five certain birds that he had in mind, but seeing that they were absolutely a part of the high class breeding pens he gave up trying to get them.

I looked over the order cards from the various fanciers who have placed business with the Kellerstrass Farm and found that a large per cent of them had ordered the second time. It

seems characteristic of the White Orpington fanciers to believe in the great forward march of the variety. They have faith in the progress that is being made from season to season and are adding to their flocks carefully and steadily, trying to handle the business that is coming their way. There is more doing in the Orpingtons than most any other breed. They have proven themselves the prime fowls of all purposes and are adding to their admirers every season. Breeders in the mother country are also assured that the future of the White Orpington is exceedingly bright. The extensive plant of Madam Paderewski has sent to the Kellerstrass Farm two additional orders for birds of high quality. These birds, as well as the five birds that Peggy was the dam of and which sold for seventy-five hundred dollars, are being shown by Madam Paderewski in the keenest shows of Europe and are winning wherever they go.

The past spring this farm sold over sixty settings of eggs at \$30 per fifteen. These eggs were from the very best breeding hens on the place and went from north to south and east to west to breeders. Sixty odd buyers reported that they were pleased with their hatches and that the treatment they received from the Kellerstrass Farm was such that they were more than satisfied. This certainly means a clean business.

Thousands of buyers of their other grades of eggs for hatching have been well pleased with the eggs they bought and the care that the farm gave to their business.

Do these high priced eggs and fowls pay to add to a flock, you ask?

Does it really benefit a fancier who is taking up a popular variety to secure the very best that is available?

It certainly does.

Up to the time of our last visit to the Kellerstrass Farm, the fore part of October, there were seventy-five breeders reporting that they had won first and special prizes at that many fairs on the chicks they had reared from the eggs they purchased the past spring. Breeders and fanciers and readers, this is a record to be proud of. It is a criterion on which to base the higher plane of the fancy to which we are all working. It is blazing the way for the rest of the American poultry breeding business. That the majority of this farm's best customers should come back and order more stock of the same grade or better, is proof positive that they were well satisfied with what they bought.

It is such treatment as this that has made the business of the Kellerstrass Farm grow steadily from year to year. This fall the farm is being added to as regards its capacity to winter over and develop the young birds. Over six hundred feet of new housing, the pens of which are eighteen feet deep and nine feet wide, muslin fronted on the fresh air plan, is now finished. A few birds of the choicest quality are finished in each pen. None of the birds are crowded. This is the secret

quicker recognition for your flock in the show room and among the breeders to secure the best.

One breeder I know purchased a pen of birds from Mr. Kellerstrass for which he paid in cash running into the hundreds that can be counted on one hand. This was a couple of seasons ago. Today he cannot fill the demand for stock, as he is known to breed the best. At the Kellerstrass Farm I saw nearly two thousand names of fanciers who had asked for eggs since the middle of August! The exact number I cannot remember, and having failed to make a note of it, I may have missed the exact figures a couple of hundred either way.

Now let me tell you what I have found of Mr. Kellerstrass himself as a fancier: Firstly, he knows what it takes to make up a top quality White Orpington. This accounts for the Crystal strain. There is no guess work about the mating and breeding. It is nothing more or less than the personal enthusiasm which this master breeder has put into his work that has achieved the remarkable results in building up this strain. He knows that the continued success of his breeding enterprise all depends upon the skill that he uses in growing better birds. He is a true fancier from the inside. The Orpingtons have been a study with him.

At a certain show the past season there was going to be exhibited in the open classes a pullet that had won what was reputed to be the highest honor in the greatest show in America. A customer of Mr. Kellerstrass' wrote to the latter that he had a good string of birds to show at this exhibition but was afraid that he would not be able to compete against this

A FLOCK OF CRYSTAL WHITE ORPINGTON CHICKS ON
KELLERSTRASS FARM KANSAS CITY MO.

of Mr. Kellerstrass' success in bringing out the best there is in a chick.

It is the high order of quality this farm is breeding that makes it possible for those who are advertising this strain of birds to dispose of all they have to spare. I was astonished to see the number of breeders who are advertising the Kellerstrass strain of White Orpingtons, as he allowed me to run over the mail that poured in to the farm by the basket. The name puts a tag of assurance on the bird that makes it valuable.

The White Orpington run is now on and it will grow in popularity for some years to come. The excellent practical value that this bird possesses and the great favor with which it meets wherever introduced makes it assured that no past bidder for the popular favor will approach its record run. It is true that this farm will not be able to fill the demand made upon it for birds this winter and season. Out of over ten thousand birds there will be a number removed to make the average of quality run high. You cannot buy a poor White Orpington from the Kellerstrass Farm for any money.

The breeding pens will be increased in number and the best of birds will be found in them. It is imperative that Mr. Kellerstrass make some provision to handle the greater trade he is building up. Many an order was returned the past spring for eggs, and a great number were returned during the past season which came too late to get stock for breeding and exhibition purposes.

If you are thinking of adding these excellent fowls to the varieties you are now breeding and want the best, we have no hesitancy in saying, go to Kellerstrass, for it will mean

pullet, as her reputation was such that none expected her ever to be defeated. Such a pullet, I know, would be a credit to any strain of fowls in existence. Mr. Kellerstrass replied to his customer that he would let him have a pullet to beat the first prize winner at the coming show for a certain amount. The amount named was small, owing to the fact that Mr. Kellerstrass thought the customer had invested enough money with him to be entitled to some consideration. The customer thought the price too low. He doubted until told again by Mr. Kellerstrass that the pullet would win if she was given a chance at the hands of the judge. More or less reluctantly, the customer sent for the pullet, as he knew that to beat a bird showed at America's leading show would be invaluable to him as an advertisement for egg and stock business.

Mr. Kellerstrass then took the same personal interest in every customer that he does today, so he fitted the pullet for the show and sent her to the customer at the right time. It is now history that the Kellerstrass pullet won easily. Last March you probably heard the details, which it will do no good to recite again. The incident only goes to show that the man takes more than the usual interest in the work and strives to please. He tells me that clean business methods are bringing him patronage from sources unlooked for. I believe this, as I saw letters which proved it when I was in his office recently.

At the recent American Royal Live Stock Show Mr. Kellerstrass made an exhibit of a hundred White Orpingtons which were the center of attraction on the whole grounds. The association persuaded Mr. Kellerstrass to make this showing as one of the attractions of the exhibition, and it not only ac-

complished this but went further in that it was the one big hit with all visitors. This display was superb in its appointments. The hens that made the big egg record the past season were duly labeled and the young stock was single cooped so that it could be inspected to advantage. It required the services of a corps of police to keep the throngs moving along in front of Peggy's yard, as she was again the center of all eyes. I understand that the association presented Mr. Kellerstrass with a handsome loving cup in appreciation of the exhibit he made of the Crystal strain of White Orpingtons.

Again we make the statement that this farm has been the one great happening in the poultry world during the past decade. That it will go on making good as the foundation head of good White Orpingtons there can be no doubt. Robert Kellerstrass, the son, is just as much a fancier as his father and with the father to guide the son we can look forward to a continuance of such a great poultry enterprise. No breeding business has helped more fanciers than the Kellerstrass Farm business. No farm has done more to raise the standard of treatment which such a business should accord its patrons. No farm has enjoyed such success, and we may expect the same to grow and prosper as the hands on the helm aim to guide a true course.

WINTER EGGS

The term "poultry farms" is familiar to all. These are mainly small holdings of one or more acres and do not contribute greatly to the egg supply.

On the average agricultural farms, advantages are afforded

clean, dry, well ventilated with no drafts, and facing the south. By having large sliding doors you may have sunlight all the year, which is a great factor in the health of poultry, as dark places so often breed disease.

Feeding, too, plays an important part in the egg yield. We like a variety in the bill of fare. A change of diet induces winter laying and keeps the hen in health. The farmer is in a position to furnish a well balanced ration without buying high priced patent foods. We might mention that clean, fresh water, oyster shell, grit, commercial beef scraps and dry bran, should at all times be before them. This, with a variety of grains, constitute, in a great measure, their bill of fare. It makes winter seem more like summer, when you have mangel wortzels, turnips, cabbage and potatoes for them.

Then comes attention, which is just as necessary as either feeding or housing. By attention we mean the every day kind, not the haphazard way. What is worth doing at all is worth doing well.

Be regular in your feeding, don't disappoint the poultry, for they know when the feeding time has arrived. Success depends on the management and the management depends on the man. On his judgment hinges the question of profit and loss. The most successful poultry keepers are those who carefully attend to the small details. If anything on the farm is to be cheated or neglected it is usually the hen.

You remember our little blizzard of last year. Mr. Wingert was with our poultry the greater part of the day. They were happy and contented and expecting something each time he made his appearance, and I assure you they were not disappointed, and we were not disappointed, either, when we gathered the eggs that evening. Some work, but it pays.

VIEW ON THE KELLERSTRASS FARM KANSAS CITY MO.

for keeping unlimited numbers of laying stock, and opportunities are given to increase the egg yield that are not found anywhere else.

In the past poultry keeping was a side issue with many farmers, but now things are quite different and we have learned that it is one of the best paying investments we have. In proportion to the amount of capital invested, larger profits are derived from this source than from any other live stock on the farm.

The poultryman's trade is practically at his door, but he must inspire confidence in his hens. Hens, like men, fail to co-operate when confidence is shattered. When hens are well fed and well cared for they have confidence in their keeper and they prove that faith by a profitable egg yield.

It is therefore necessary that we get down to strict business principles. Any one can keep hens, but not every one can have hens to keep them.

It requires no stretch of imagination to believe that a well managed hen will lay 150 eggs a year.

Some farmers I know do not even get eggs in winter for home use. If your hens do not lay at all there is a reason for it somewhere. Hens do not belong to unions, but they go on a strike when the pay is insufficient.

We think feeding, housing and attention go hand in hand. Each is essential in order to be successful.

It is not necessary that houses should be expensive, but

Many have gone into the poultry business only to fail and then decide that "poultry keeping" does not pay. "Opportunity," we are told, "knocks once at the door of every man." If we are indifferent when opportunity knocks we miss the golden chance. It is the man right on the spot that wins.

Make friends of your fowls and they will not be frightened when you go among them. A severe fright does much to decrease the profits.

It is seldom necessary to feed condition powder to poultry which are properly housed, fed and cared for. Clean, dry quarters, wholesome food and plenty of straw on the floor for them to scratch in, is the attention they should receive.

Do not allow fowls outdoors while there is snow on the ground, neither expose them to raw, windy days, and remember that ice water is not good for them. Work each day in the year against the mites which cause so much trouble.

We like the Brown Leghorns. They are very active, full of vim and will run and scratch from morning till night. It is surely due to this same exercise that they are the greatest egg layers.

You've heard the latest from Texas how a firm shipped a car load of poultry to New York City and gathered enough eggs on the way to pay the freight. Whether this is true or not, it has been known for a long time that hens pay their own way.

Mrs. J. J. Wingert.

OUR GUARANTEE.

We guarantee our subscribers against loss due to fraudulent misrepresentation in any display advertisement appearing in the American Poultry Journal, providing the subscriber when ordering the fowls or merchandise states that the advertisement was seen in the American Poultry Journal, and places the order during the month or months in which the ad is inserted in our columns and notifies us of the fraudulent misrepresentation of the advertiser, giving full particulars, as soon as it occurs.

We Lead, Others Follow

The above is what American Poultry Journal has adopted as its slogan, and in the future, no matter where you see these words, you will know that it means American Poultry Journal. We have adopted this for the reason that it is true in every sense of the word. American Poultry Journal is the oldest poultry publication in the United States and has always been a leader in everything pertaining to the upbuilding of the poultry industry in the United States and Canada, and with the excellent staff we now have it is our intention to put American Poultry Journal so far in the lead of all other poultry publications that there will be no comparison. There is but one American Poultry Journal.

Thanksgiving

Before another issue of American Poultry Journal has reached the hands of our readers Thanksgiving day will have come and gone. This is a day set apart by our National Government to give thanks for the blessings given us the past year. In this respect the poultry fanciers throughout the country have much to be thankful for. The business was never in a more flourishing condition and the opportunities to make money in the poultry business today are greater than in any other line of industry that we know of. There is absolutely no other industry that is making the rapid advancement that it is. It can no longer be called a "small" business, as it is now the leading industry of the country. This condition has been brought about by the constant efforts of those engaged in raising poultry, and by the manufacturers of incubators and poultry appliances who have made possible the hatching and rearing of fowls in large numbers. This in addition to the grand work done by the poultry press makes it possible for us all to give thanks that we are engaged in such a grand and growing industry.

The Parcels Post and Express Rate Questions

There is grist enough in either one of these subjects, as they concern poultry breeders and their interests alone, to fill several of these Editorial pages. Both subjects have been treated before, and from what we can see and learn, no improvement, in fact no advancement of any kind has been made.

Concentrated action is now our only hope, and at this time I will only make this article long enough to state a few opinions and trust the interests in which we plead will awake and show a united front, with an open hand.

In our humble opinion the government should give these people the parcels post; the demand of the people for this improved service is just. The cause exists, and no American will, or can consistently, ask or demand to be heard without cause.

They tell us in their yearly reports that each year the government mail and postal service runs several millions of dollars behind. That besides paying postage on our mail matter, we are also taxed in other ways to support this service, and to make up the shortage found each year. This is true, the deficit must be paid, and it can only be met in this way.

Now is it not most reasonable to expect that with the parcels post, and the great additional revenue to be derived therefrom, with but little if any additional expense added, excepting, of course, in transportation, that the postal service would not only be put on a paying basis, but some millions saved each year? And that such service would fill a long-felt want, as well as prove one of the grandest favors the government could bestow upon its people?

One of the grandest enjoyments of life, and one that is being rapidly realized by many in these days, is a home in the country. A home nearer to nature. A home where the clerk, laborer and merchant can spend his daily few hours of rest, in the open

fresh air, away from the noisy, clamorous, busy city life, with family and friends, to the betterment of all, both mentally and physically.

With the electric lines and rapid transit on the suburban routes, these conditions are placed within the reach of all those who aim to better their condition and to get the best there is in store for them in life. There is but one condition, but one drawback to this ideal life, and that is the lack of the parcels post. Give us this and benefit thousands more of our people, who then can take the wife from the city flat to the cozy country home, within thirty minutes of the city, and an acre or two of fruit, flowers and garden, with plenty of room for the youngsters to run, play and grow on.

There are great interests that demand the parcels post. The business interests of the above are but one; other village and rural districts, further from the cities, also have their wants. Another is the government's own interest, as well as that of the people in general, by placing the entire service on a self-supporting and paying basis.

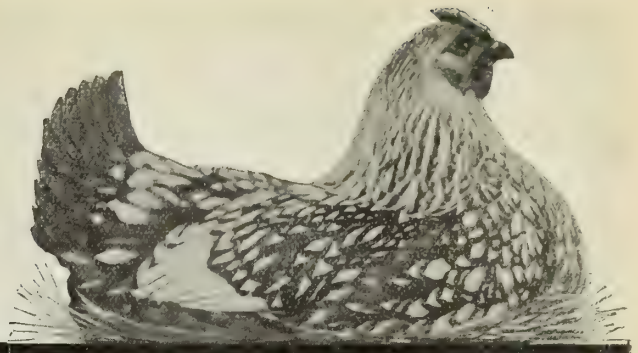

There are also great interests opposing the parcels post, and so far they have played the winning hands. These are the moneyed interests, the multi-millionaires who hold the fat offices and control the great express companies. Besides drawing down large dividends they draw yearly salaries far in excess of those paid to our presidents and other government officials. With such interests to oppose, and with these same men or their corporate counsels in Congress and in other positions of trust and influence, they form an obstacle that can only be removed by proper publicity and the ballot of the people.

In regard to express rates and the service given the breeders in return for these excessive rates, combined with positively shameful handling, much has been said, and a great deal more can be said. Here is where the poultry breeder and the poultry shipper suffer most, for they are the gentle victims of this game of graft worked to the limit.

Every time I have a chicken or a basket of eggs to ship it makes me feel rather cheap to deliver them to the express office. We take them there, make out a receipt that is a matter of form only, hand it to the agent, and unless you place an extra high value on the package that will insure additional charges and commissions, he will first stamp it "Value asked and not given," and then in all cases he will also stamp it "Accepted only at owner's risk." Scrawling his name to the bottom, this becomes your receipt, taken under their conditions only, the real value of which I do not believe amounts to 2 cents. Still you have to take it, as it is the best you will get, while he kicks or pitches the package aside, while you begin to wonder if the chicken will live to get to his destination or whether one of the eggs will be spared unbroken to gladden the desires of the broody biddy miles away. If this is not a condition that forcibly impresses us with the fact that we have given away all our rights, then I fail to grasp the meaning of the terms we used to glory in.

Then there are also the rates and

Read how
two men make
\$12,000 a year
clear profit, on a small egg-farm

FOUR years ago the Cornings, father and son, both in poor health, and with no practical experience, began egg-raising on a few acres of land at Bound Brook, N. J., with only thirty hens. To-day they have one of the greatest egg-producing plants in this country, and a business that, with 1953 hens, paid last year *a clear profit of more than twelve thousand dollars.*

Next year they plan to have 4000 hens. What do you think their profits will be? Get the **FARM JOURNAL** and find out.

The CORNING EGG-BOOK

(entitled "**\$6.41 per Hen per Year**") tells HOW these two men did it. Not theories, but *facts*; not air-castles, not expectations, but *methods*, tested and proved by experience. It tells how they found a market eager to get choice eggs at high prices. It tells how they learned to meet that demand with an *unfailing supply*, in winter as in summer. It tells of their problems and failures, and how they overcame them and won **SUCCESS**. It gives photographic pictures of their plant, plans of their buildings, etc.

And it gives beginners just the help they need to make money in this unlimited field. Your chances of success are far better than theirs, for you have their experience to guide you. The knowledge which cost the Cornings thousands of dollars and years of experience is at your command for the price of a dozen eggs.

Here are some of the things that the CORNING EGG-BOOK tells:

The troubles of great hotels in getting reliable eggs.
The prices paid for CORNING eggs throughout the year.
The number of eggs sold each month throughout the year.
How to get the most eggs when other people get none.
When to hatch chicks that are to lay winter eggs.
How to grow juicy broilers in nine weeks.
How to mix the food that makes the most eggs.

How to prevent the drafts that kill chickens.
How to save 97 per cent. of the young chicks.
Why and how they make the hens scratch for food.
Why they send hens to roost with full crops.
How to make hens attend strictly to business.
Why they raise only white-shelled eggs.
How to have May chicks laying eggs in October.

The Corning Egg-Book is sold only in combination with the
FARM JOURNAL to increase its subscription list
to ONE MILLION for next year

Farm Journal has for thirty-three years conducted a poultry department known the country over for the ability of its editors and the value of its contents. Beside this strong section, which of itself makes the paper valuable to every chicken owner, its other departments are ably conducted and widely quoted: It is the standard monthly farm and home paper of the country, with already more than three million readers. It is clean, bright, intensely practical; boiled down; cream, not skim-milk. Its editors and contributors know what they are talking about, and can quit when they have said it. It is for the gardener, fruit man, stockman, trucker, farmer, villager, suburbanite, the women folks, the boys and girls. It is illustrated and well printed on good paper. It has not a medical or trashy advertisement in it. More than half a million of its subscribers pay five and ten years ahead—a very remarkable fact.

HERE IS OUR OFFER:—We will send, postpaid, The Corning Egg-Book and Farm Journal for five years,

BOTH for \$1.00

cash, money order or check. And if you send order and money within TEN DAYS, we will also send you FREE "Poor Richard Revived," a splendid 48-page FARM ALMANAC for 1910, full of wit and wisdom for the rural home.

charges to consider. These, to say the least, are excessively high. From one and one-half to three times the regular rates are charged for poultry. Why? Surely not for any special care or service rendered. No; simply because they can get it—and what is more, do get it. If the value is placed at more than \$5, additional charges are added to make it more interesting. We personally know of where two males were sold and shipped at their actual value of \$100 a distance of not over 100 miles, and something over \$9 was collected in charges. The coop was received badly broken, proving that not even ordinary care in handling was had in return for these enormous rates. We have frequently shipped birds a distance of thirty-six or more hours' ride from here with a bag of food and instructions to feed en route, and in eight out of ten cases the food arrived intact with the bird nearly starved for want of it. Coops arranged to water birds and instructions given are, we dare say, never complied with, so when we consider this service along with the rates charged, we can well cry out for fair rates and humane service.

There are plenty more of good reasons why the parcel post and express rate and service should receive serious consideration from the poultryman. Uniform and general attention at this time will put these questions fairly before the people. The poultry press I am confident will do its share, and it now is up to the breeders in general to give their support with aid and advice.

At the last meeting of the American Poultry Association President Bryant appointed, on motion of C. D. Cleveland, a committee composed of Messrs. C. D. Cleveland, W. R. Curtice and A. G. Clark, to investigate the question of express rates and service and to report at the next annual meeting. Here is the beginning in the right direction, and we only wish to add to this the question of parcel post. In this we also want to interest the grangers as well as the poultrymen and all others who believe in fair play.

We have that much confidence in our institutions to live on in hopes of realizing and enjoying these benefits in the near future. Now is the time for every man to do his duty. Let us all unite and plead our cause. If that fails we have the ballot left. The ballot belongs to the people—let them use it.

H. P. Schwab.

Professor Spillman Replies

A couple of months ago we made the remark in these columns that it would be right to the point if Professor Spillman would explain some of the things he said in his article in Poultry about Barred Plymouth Rocks. He made the statement that barred females of any species do not transmit their barring to their offspring, and in the last number of Poultry he goes ahead with his argument.

One of his interesting statements is that the real ground color of a Barred Plymouth Rock is black and that the bars are the light spaces on the black. His article is very timely, and if there is real basis for some of his statements it would follow that some of us have been stumbling along in the dark. Think of what it means to the breeding fraternity if it can be proven beyond all

doubt that the female Barred Rock cannot transmit her barring.

We would like to ask Professor Spillman why it is necessary to use various colored females in order to attain desired results in color of chicks. In other words, we know that an exhibition cockerel must be mated to a dark colored hen in order to hold the color of the resulting males going too bright. Mate the same male to another hen as well, a hen bright and "open" on the surface, and the males from that mating will be pretty light in color. Why all this? What the poultry fancy needs is to interest more scientists of the stamp of Professor Spillman in the Barred Rock game. There is plenty of room and the field is free.

Grandstanding or Genuine?

We have heard a lot about reform in the poultry fancy during the last few weeks or months and seen some efforts at so-called purification of the ranks. To the country at large this looks like grandstand work and the journals all seem to agree in one thing about it: That there cannot be a too high standard of morality, if you will have it that way, in the poultry business is certain. We must all make for the truth and do our share to cause it to be said that fanciers and breeders are good men with red blood in their veins and a spirit of fair play and justice well developed.

The tone of the poultry breeding business rests with you and I. We can improve it or lower it, just the same as members of other lines of business can raise or lower their standards and ideals. There are good doctors and poor ones, capable doctors and fakirs, but we all admit that as a profession they are high in their general tone of morals and man-to-man equality. What every breeder and fancier should say is: This business reputation of the fancy rests with me, not with the other fellow, hence I will make it known that the whole poultry breeding contingent is honest, not part of the time, but all the time. To occasionally get out of the path of rectitude is a fault of mankind and henists are included in mankind.

A few grandstanding stunts are not what we want to pull off every now and then, with threats to a few others. We want to sweep our own stoops and clean up our own yards and do our own businesses squarely in order to make it known that the fancy is a clean game and one in which a man may be assured a square deal. In our buying and in our selling we have but to remember that we would best do as we would be done by. The more seasons that roll 'round, the more breeders we notice offering to go more than half-way in doing well by their prospective customers. This is indeed a hopeful sign and one of the real additions to the breeding business.

For County Show Secretaries

Nothing bothers the secretaries of the shows as much as being known to "get more birds out" year after year. They realize that upon them rests the real show work. They worry and fret and sweat over their troubles and beg every man, woman and child in the county to get out their birds for the forthcoming society event. And in some places the chicken show is a fixture where winter after winter the best birds in the country

are brought out to make a real society event.

The publicity that the secretary gives to the show that is put under his management has all to do with the number of breeders he gets out with their birds and the way the public turns out to view the exhibits. It takes ginger to make a good secretary. It requires ability, brains, keenness, tact, sympathy and a list of other essentials that we will not name, fearing that it might scare some good man from the position.

There are more county poultry shows in the United States than all others combined. What we say now pertains to county shows. Let the secretaries plan to advertise them in every way. Get the editors of the local papers interested, see that the superintendent makes all exhibits clean and comfortable and that the lighting and ventilation is perfect. Have the room tastily decorated and try to get some incubator company, if only a local one, make a display of their machines. If these can be on show while they are hatching, this will bring a great crowd.

The show is primarily for exhibitors. They should be pleased with their treatment. After they have been cared for then get in the general public, as the revenue from them will make it worth the exhibitor's while to come. Do not charge too much entry fee or too much at the gate. Local shows as a rule will net more money, and the show will be known as a better local "selling" show, if a small fee is charged at the gate. We know one big state show that gets more money from its gate receipts at 10 cents than it used to at 25 cents. There is something in this.

In getting the local exhibitors out as well as those from the adjoining counties, remember that it is advertising that does the work. Personal appeal is good. Getting in touch with fanciers through the poultry papers is judicious. A secretary never knows how many fanciers in surrounding counties are watching the poultry papers for new or home shows. If a secretary thinks his show has outgrown purely local birds then let him advertise for birds by using the poultry papers. Generally speaking, it is the best plan to advertise this year's show by the show you gave a year ago. This year advertise next year's show by the treatment given to the boys who have come out with their birds.

Breeders' Tribulations

There is no time of the year that tries the breeder's patience more than during the stock selling season. The unreasonable prospective buyer sometimes gets his Standard from the shelf and quotes what it says about a certain variety and then wants to know what such a bird will cost. A breeder of white birds told us some time ago that he received a letter from some man who had heard of him asking for a \$3 bird of such and such a description, which when sized up carefully meant a fowl that would be the first one of its breed to attain perfection.

There are a number of such letters coming to breeders every year. A kind word, a letter explaining the very absurdity of such a request, written in a cheerful spirit, sometimes makes a customer of a man who has such unreasonable requests. It is not hard to drive one away from a business or hobby he is thinking of indulging in by a hasty word. Let us be considerate of the fellow who

Bodi-Tone

wants you to try a full-sized one dollar box of Bodi-Tone at its risk and expense, so that you will get acquainted with this new scientific medicinal combination, which is going to become the foremost medicine used by the American People. We want you to send us the Bodi-Tone Coupon, giving us your full name and address, and the one dollar box of Bodi-Tone will be sent to you by next post, without a penny for you to pay unless it TONES ALL YOUR BODY.

Bodi-Tone

is just what its name means—A TONE FOR ALL THE BODY and we want you to try it and see what it will do for YOUR body. Bodi-Tone is a little round tablet that is taken three times every day. Each \$1.00 box contains seventy-five Bodi-Tones, enough for twenty-five days continuous use, and we send you the full box without a penny in advance, so that you can try it and learn what it is, so you can learn how easy and simple it is to take, so you can learn how it works in the body, how it helps nature to tone every organ in the body.

Bodi-Tone

is a new remedy, but the ingredients which compose it are as old as the science of medicine itself. Its composition is not secret. Every one of the twelve valuable ingredients which go to make up Bodi-Tone are well known to all doctors of all schools; each one has a well defined, well known and thoroughly established place in the realm of medicine and is prescribed by physicians every day in the year. Among the ingredients which compose Bodi-Tone are Iron, for the Blood, Phosphate to help tone the Nerves, Lithia for the Kidneys, Gentian for the Stomach, Chinese Rhubarb for the Liver, Cascara, which restores tone to the Bowels and Intestines, and Peruvian Bark for the General System. We claim no credit for these ingredients, each of which has its own well-deserved place in the Materia Medica of all the civilized world and are recommended by all modern medical writers and teachers—we simply claim credit for the manner in which they are combined, for the proportions used, for the remedy—Bodi-Tone, which they make and which we want to send you immediately, as soon as you write for it, so you can try it and learn how it acts.

Bodi-Tone

is no new-fangled, secret, mysterious, "discovered by accident," Egyptian, Indian, Chinese, Shaker or Quaker remedy. It depends upon no superstition or romantic story to make people believe in its efficacy. It is the scientific prescription of well known and competent doctors and chemists, and is compounded in one of the largest and best known pharmaceutical laboratories in the United States. It was conceived with the purpose, which we announce to all the world, to give the people a pure and safe household and home medicine, one that has medical authority behind it, one that doctors could sanction and approve, one whose composition could be boldly proclaimed and being all this, it is destined to become the foremost proprietary medicine of the century. Though a scientific combination, Bodi-Tone is prepared from such remedies which the common people as well as the doctors KNOW TO BE GOOD, which they can place confidence in, which they know they can safely use, and most of all, is composed of things which make it a GOOD REMEDY. It is right all through, from the first to the twelfth ingredient, a remedy that knows its work in the body and does it in a way that satisfies the body-owner. It is a pure remedy that all the family, young and old can use. It contains no poisonous drugs, it contains no harmful drugs,

it contains nothing that we are ashamed to tell all the world, it contains no ingredient that your own family doctor will not endorse and say is a good thing. It does not depend on drugging the body. It does not kill pain with opium or morphine. It does not excite the body with alcohol, but it tones the body with the remedies nature intended to tone the body, or that power would not have been given to them.

Bodi-Tone

offers its valuable services to you right now, right from this page, if you are sick, if you need medicinal help, if your body is not in right, natural and normal tone. That is what Bodi-Tone is for—TO HELP NATURE RESTORE TONE TO THE BODY, to help nature restore normal health, energy, vigor, strength and weight. If there is anything wrong with your Kidneys, Bodi-Tone helps to restore tone to the Kidneys, helps to set them right. If there is anything wrong with your Stomach, Bodi-Tone helps to tone the Stomach, helps to set the wrong right. If there is anything wrong with your Blood, your Liver, your Bowels or your General System, the ingredients in Bodi-Tone, which are endowed by nature with a special action in these parts, go right to work and keep on working day after day, exerting always a well understood, definite action that produces general results of the kind sufferers appreciate. If you have Rheumatism, Bodi-Tone, a splendid eliminant, helps to eliminate the Uric Acid from the system while it restores tone to the Kidneys, Stomach and Blood, thereby exerting a continual anti-rheumatic effect which makes it hard for rheumatism to obtain or retain a foothold in the system. Bodi-Tone should be used by all women suffering from any of the various Female Ailments, for its toning properties are especially valuable in such ailments.

Bodi-Tone

is especially urged for all chronic sufferers who have tried honest, reputable physicians at home and elsewhere without getting the relief and permanent benefit desired. If your local doctor is doing you no real good, if you have given him a real and honest chance to do what he can and the medical combinations he has used have failed, then give THIS SCIENTIFIC, MODERN COMBINATION of old-time remedies a chance to show what it can do for you.

A Trial of Bodi-Tone

is yours for the asking. You need not send any money—do not send any stamps. The Bodi-Tone Company wants to spend every penny of the trial's cost, wants to send the medicine to you, wants you to give it a trial for a full period of twenty-five days before you pay one single penny. Simply fill out the Bodi-Tone Coupon, mail it to the Bodi-Tone Company, Chicago, and let Bodi-Tone do its work for you.

Bodi-Tone Coupon

Clipped from American Poultry Journal

Bodi-Tone Company, Chicago, Illinois.

I have just read the Bodi-Tone Announcement offering a \$1.00 box of Bodi-Tone on twenty-five days trial. Please send me a box by return mail, postage prepaid. I promise to give it a good trial and to pay \$1.00 if I find I am benefited at the end of twenty-five days. If it does not help me I will not pay one penny and will owe you nothing. Send the box of Bodi-Tone to the following address:

does not understand. He may not think a bird is worth an advertised sum which seems fabulous to him, but nevertheless that bird is worth that amount to the owner. If we treat the doubter right he may be a fancier some day.

Lend a Hand

Again this season we hear a great lot of talk about the high express rates on pure bred poultry. Whether or not the high rates we are forced to pay hinder the development of the fancy is more or less debatable. It is certain, however, that high rates are one of the causes of negligence in buying. We have known several cases where the prospective buyer was on the point of buying and would have purchased but decided that the rate of express would be too high on a small shipment.

It seems to us that the express companies would take the cue that sooner or later the parcels post would be a fact and not as at present, fiction. More fowls would be shipped if the rates were lowered a third or a half than are now changing hands. When the rate of postage was twice what it now is the post-office department scarcely made enough to carry it along. Today more pieces of first-class mail are being forwarded by two or three times the number than at any time when the postage rate was twice as high.

Were the leaks stopped, and more business-like methods adopted in the post-office department, the carrying of the mails would be of some profit to your

Uncle Samuel. More fanciers and breeders want to make it a point to get in touch with their congressmen on the subject of parcels post. When Uncle Sam begins to handle some of the business that goes through the express companies then will the rates of carriage for express parcels be considerably lowered. A little voters' suasion will accomplish wonders if it is concerted in action.

That Happy Medium

Breeders of Plymouth Rocks of the Barred variety are in some instances working beyond the pale of the standard that has been set for them by its makers. Just a few days ago we saw a feather sent out from the best pullet raised this year by one of the best advertised breeders and it certainly gave the impression that it was from a bird much darker than what would be termed a good exhibition color. The bars were wider than the ground color that was spaced between them. If we mistake not the Standard calls for the bars to be the width of the ground color between them and prefers narrow barring to coarse. The contrast between a bird that is narrowly barred and one that is coarsely barred, the bars on both birds being of the width of the ground color between them, is indeed interesting. One looks darker in general color than the other, the narrowest barred bird looking darkest.

There is a happy medium to attain that will be of more lasting value to the breeders and fanciers than any excursion after the extremes. It is well known

among breeders that too much attention being paid to narrow barring of cockerel bred females to be used in the breeding pens will lead to very black beaks and a general blackness of color that is hard to do anything with in the breeding yards. It has been proven safe to breed from narrow barred females that have not been so far bred to an extreme that they are bad in leg and beak color. This in reference to cockerel matings.

Generally speaking, the pullet lines have not been bred as dark as the cockerels'. The demand for bright colored pullets that approach the standard holds good. One does not hear of them being bred too dark as often as this is said of the males. Pullets may be bred with narrow barring and still not be extremely dark. The happy medium is the thing to work for and the breeder who closest gets it should be favored by the judge. Let us not be extreme in our demands.

THE BEST OF US NOT THOUGHTFUL.

We yard our stock, then fail to furnish that which nature and our best interest demands for best results.

Fowls demand a diet that is fully 25 per cent of vegetable matter, fully 15 per cent animal matter and 60 per cent of the mixed grains. No single grain to be continually fed is best or economy. Cracked corn, 20 per cent in bulk, 20 per cent oats and 20 per cent whole wheat or barley; if barley, add 40 per cent of first class wheat, bran and middlings. Now, the demands of nature are that each day that they have all these. Egg production is agriculture over and over again. When any one chemical in a soil fitted for a crop becomes exhausted, the crop comes to a standstill. Just so in an egg crop. To feed corn, in which there is not over 11 per cent of muscle growing, the balance being fat and carbohydrates, especially if meat and vegetables are withheld, means no profit. Clover is the best of all vegetable matter for fowls; alfalfa probably the next best. But in winter most of us are forced for green vegetable matter into the use of cabbage and mangel-wurzel beet or clover meal, which should be steamed, the moisture taken up with Haskell stock food of standard, in which it is a good plan to add the beef scraps. Many a hot mash that if fed in the morning will send the fowls to nest early and nearly all the eggs secured before noon each day.

There is no calling where brains and chemistry can cut so forceable a result for profit than in the care and feeding of fowls. So secure each and every day 17 to 20 per cent of protein reduces carbohydrates and fat.

A starved fowl pays no profit. The liberal feeder makes the most money. Healthy stock, punctual at feed time, with the balanced ration as above, means profit. To deviate from this demand means a diminished profit. There can be no idleness in a poultry yard, neither by the owner or the flock. They must work for what they get. The dry food gleaned from healthy scratching beds—exercise—the law of all animated nature—to fulfill the law.

"By the sweat of the brow shall ye eat bread all the days of your life." Fulfill the law and be happy and prosperous. Feleh.

MICA-CRYSTAL THE BEST GRIT ON THE MARKET

Contains Mica, Iron, Magnesium and Quartz, each in its purest and best form. It is of such peculiar formation that it will not take a polish as is the case with grit made from white quartz or marble and unlike limestone grit, or grit of like soluble substances, is not dissolved by the fluids in the crop, consequently it never loses its sharpness. It sharpens itself by contact, the only grit that does, and therefore excels all others as a grinder. Without grit the feathered tribe cannot be healthy or productive. This is a well demonstrated fact in nature. Grit is to the fowl what teeth are to other members of animal creation.

Let us prove the truth of what we say by filling a sample order for you. Manufactured only by
MICA-CRYSTAL CO. - - - CONCORD, N. H.

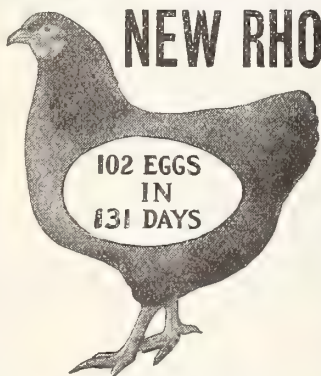

BLAKER'S BARRED PLY. ROCKS WIN

Do you want a winner for your show? We have five grand show cocks, eighteen exhibition cockerels, sixteen exhibition hens and twenty-two crack show pullets, rapidly rounding into show shape, the cream of over 500 head. They are being conditioned with the same care and skill that was used by me in fitting E. B. Thompson's great Madison Square winners during my two seasons with him as head poultryman. These birds are fit to show anywhere, are the down-to-date new standard kind; clean, snappy, narrow barred, elegant shape, low even combs, rich eye and leg color. Many are direct descendants of Madison Square Garden winners. We also have hundreds of select breeders and fine utility birds. Our 32-page page catalog tells all about us and the matings that produced these fine birds.

SUBSCRIPTION DEPARTMENT

EIGHT HUNDRED DOLLARS AT STAKE,

and yet there is hardly anybody that wants a slice of it.

Our readers evidently can make this much money a great deal easier than most people, judging by the effort they make to acquaint themselves with the terms of this offer.

Two hundred dollars cash is the amount of the first slice. One hundred dollars cash is the second slice, and then the forty-eight smaller slices decrease gradually from the third to the fiftieth slice.

This is a rough outline of our great fall subscription offer. Besides this, we give each and every agent a copy of our grand book, "Origin and History of all Breeds of Poultry," absolutely free, and a liberal commission on each and every subscription secured.

With all these inducements can we not get you to drop us a postal and ask for the complete offer?

As yet, as above stated, nobody seems to care for \$200 cash or \$100 cash, or even wants a copy of our \$1 book for nothing. We do not care who gets the money, but we do not like to see it go to an agent who does not even try to get it, and who possibly will get it for securing less than 100 subscriptions on the contest. This is the outlook at present. We hope conditions will change and that some one will at least send us more than 100 before the close of the contest December 31, 1909.

There still remain two months for some good man to get busy and make \$200 in his spare time. This can easily be done, for as above stated, there is nobody after this money earnestly.

Last year our agents were all after something big. They have exhausted their resources in their neighborhood, and as our last contest first started in the latter part of December, 1908, they cannot yet get renewals. This is a chance for a new man in a new territory to reap a harvest and get \$200 with little trouble. As above stated, our last year's agents have their fields exhausted; new men have not taken up the work and the money goes to the highest men, and if they only send in a few subscriptions.

We want you to convince yourself that this is not "hot air." We have published in the American Poultry Journal each month the letters received from our agents last year. We do not conceal their names and full addresses. We want you to write to these men and ask them if they mean each and every word they say in these letters and if they were treated right at every turn.

We are publishing in this issue a letter received from our old and trusty

agent, Mr. Thos. D. Gannaway. Mr. Gannaway has succeeded in winning two first prizes, one in 1907 and one in 1908. On our great tenth annual subscription offer, which closed June, 1909, Mr. Gannaway was handicapped, as he could not possibly devote any time to getting subscriptions, as his other duties demanded his entire time. He worked about three days on the offer, however, and won twelfth prize in that short time. He writes as follows:

Washington, D. C., Aug. 26, 1909.

American Poultry Journal Pub. Co.,
Chicago, Ill.

Gentlemen: I hope you will pardon me for being so late in expressing to you my gratitude for your fair and honest treatment of me as an agent. I

THOS. D. GANNAWAY,

Winner of two first and one twelfth prize on three subscription contests.

have been unavoidably delayed in doing so.

I haven't the slightest reason to make any complaint in either of the three contests in which I have participated. Your dealings in every case have been strictly fair and honest. I believe your firm to possess the highest degree of fairness and honesty. Any one wishing to have any dealings with the A. P. J. Pub. Co. need not have the slightest fear of getting any thing short of a "square deal." American Poultry Journal is of the highest quality and is rendering a great service. As is the journal, so are its publishers.

I heartily recommend it to any one interested in poultry.

Wishing it unbounded success, I remain,

Very respectfully,
Thos. D. Gannaway.

Now, then, don't you desire to take part in a "square deal" and get your share of our liberal offer?

We do not want anybody to work for American Poultry Journal for nothing. We pay you double for the little time it takes to get a few subscriptions; every effort on your part is appreciated by us. We help you all we possibly can, but we cannot do anything for you until you let us know you are interested in our contest by dropping us a post card.

As stated above, two months still remain before the close of the contest, and as no one has yet any commanding lead, you can get the \$200 first prize with little trouble.

Another Pleased Breeder.

Mr. L. W. Ranker, winner of the eighth prize on last year's contest, writes as follows:

Tiffin, O., Aug. 15, 1909.

American Poultry Journal Pub. Co.,
Chicago, Ill.

Dear Sirs: I hereby acknowledge receipt of your recent letter notifying me of my good fortune in having won so valuable a prize in your recent contest, having secured eighth prize (a \$20 incubator), which is more than a surprise to me, as it took very little effort on my part, having given only my spare time (and it was very limited) to the work. This, together with the many friends I have made for the A. P. J. and myself more than repays me for the little effort put forth, besides it gives me pleasure to mingle with the poultry fraternity as well as the many recruits to the cause of "Hendom," as a few encouraging chats and the contents of your valuable journal cannot help but have the desired effect. You can count on me in your next contest, as well as any you may give in the future. I am a breeder of Single and Rose Comb Buff Leghorns of exhibiting quality, and have many high class birds in my yards and have never been beaten in the show room. Have been breeding the Buffs for ten years and think they are improving each year.

Respectfully,

L. W. Ranker.

A Last Word.

Having read the above, we ask whether or not it would be advisable for some of our readers to join our many satisfied agents. We assure all a square deal and want to show you that we live up to our assurance. Challenge us by writing for particulars of the offer today and with a little effort land one of the fifty grand prizes, value \$800, besides receiving commission on each and every subscription. Address American Poultry Journal Pub. Co., 358 Dearborn street, Chicago, Ill.

POULTRY PUBLICITY

[Any of the poultry breeders contemplating to get out a new catalog and desiring further information about the cost of cover-design plates and poultry illustrations are invited to correspond with us. We can handle all kinds of art and engraving work and at prices that are reasonable considering the high quality of goods which we deliver.—Editor's Note.]

MODERN STATIONERY AND ITS INFLUENCE ON THE PROSPECTIVE CUSTOMER.

Secretary of A. P. A.

IN'T you glad, Mr. Poultryman, that everything has progressed in equal ratio in this world? Supposing everything had advanced as it has, with the exception of the letter writing proposition, which had remained the same as in the stone age. Instead of having a

typewriter rattle off about a hundred or so letters a day, as we do now, you would have to employ a gang of sculptures and stonecutters and be the owner of a good size quarry for your stationery supplies; and not only that, how would you care to carve your signature in a carload of letters every day? You would have to do some tall hustling to catch up, or the poultry show season would be over before you had a couple of day's mail finished. Even in the stone age the people were particular and nearly everybody had some kind of distinguishing mark or ornament for his writings. As we go along about a thousand years later, we find that these distinguishing marks are still in use. Long before printing and engraving was discovered decorative ornaments illuminated by hand used to embellish a man's letter and his style was recognized as his trademarks. Take even our Indians with their picture writing on bark or skins. Every one of them had some mark that made his work conspicuous. The value of a decorative design as an advertising medium was thusly recognized at an early date. It is no wonder, then, that modern times, with the great improvement in printing and engraving, have elaborated on these ideas.

Bankers, brokers or mercantile firms nowadays without their individual and specially designed and engraved letterhead are a rarity. They have recognized the convincing look a handsome design gives to their letters, and do you know, my dear reader, that this look is half the battle?

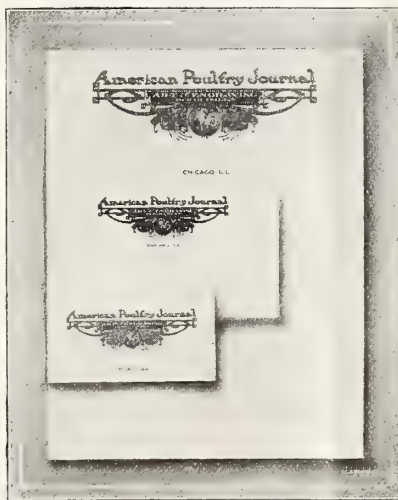

Your letter is your representative,

and meets those which you cannot see personally. It goes into places the conditions of which are unknown to you, either in the home of a millionaire or in the humble cottage of the working man, so it is best to be prepared so you can meet either. A letterhead

Stone age stationery.

handsomely designed and engraved is one of the best advertising mediums you can use. Your letter is your salesman and the better he is dressed the

How same design may be used in different forms.

more favorable will be the impression he makes on the prospective buyer. Any letter that is worth careful wording is worthy of fine stationery. Any letter that ends with the words, "Hoping to receive your valued order" ought to be printed on stationery that wins a welcome. Any letter answering

an inquiry about your stock, etc., demands stationery, which makes friends with the reader's eyes and his sense of quality. A special made to order letterhead artistically designed and suggestive of the business, printed in harmonizing colors, is the best investment a poultry breeder can make. That it pays to use fine stationery is the testimony of some of the foremost fanciers in this country. We reproduce herewith a few that are used by some of the breeders. As we explained in our article last month that colors photograph different in their value in what they appear to the eye, the accompanying cut does not show off to advantage the delicate color schemes or embossing effect used on some of the letterheads, and for that reason we have described the colors, etc., as used.

While it is not everybody's gift to be able to design a letterhead, yet some of the poultry breeders give instructions to their printers to do as well as type and cuts can make it. Some of the attempts in this line show real artistic ability of the printer as far as displaying and arranging type and cut concerns. On the other hand, we find occasionally where a printer has tried to see how many different styles of type he could use and as high as fifteen different type faces have been noticed in some of this work, the effect can be imagined. We have in mind one letterhead of a breeder in southern Illinois. The printer used ruled paper stock the lines of which came within 2½ inches of the top. The left hand corner of the paper was occupied by a cut 4 inches high, the blue lines showing in the white plumage of the bird, and to make the matter still worse the owner had scratched through the old price of \$2.50 per setting of eggs and wrote in place \$8.00 per setting, a jump of \$5.50 in the price of eggs in one season from the same stock.

Many of the fanciers make a mistake in showing a number of half tones of their birds on the letter paper. Never make a catalogue of your stationery. In the first place, good letter paper is really not adapted for printing fine half-tone cuts unless a special coarser screen is employed in the making of the engravings. Nothing looks worse than a typewritten letter on paper with a highly glossed surface. Bond or linen paper can be had in all colors and is the best paper for the purpose, and a neat design to lend individuality adds additional quality to the correspondence. There are many other uses to which a letterhead engraving can be applied. A reduced size of the same can be used for cards or shipping tags, the same design on the stationery can be used as a catalogue cover or in your circulars, the color schemes can be

changed from time to time and new effects be had.

Do not begrudge the little extra expense a special design costs, for the increased amount of sales, which this kind of advertising will bring you, will soon offset this.

[Probably no poultry artist at present in the business has designed as many letterheads and catalogues for the trade as has Mr. Stahmer. His designs are striking and convincing as well as original and artistic in execution. Poultry fanciers desiring to improve their stationery will do well to correspond with us and get our suggestions.—Editor's Note.]

DIVINIA'S BARRED PLYMOUTH ROCKS.

It has been the good fortune of the undersigned to note the progress from season to season that has been made by S. T. Divinia, Route 2, St. Joseph, Mo., breeder of exhibition Barred Plymouth Rocks. Years ago Mr. Divinia commenced to found an exhibition line of cockerel and pullet bred Barred Rocks that would breed true to type and color and barring. He spared neither money nor brains in the foundation of his flocks and today is noted among western fanciers as a breeder of energy and skill who can and does go out to the big shows to make the keenest kind of competition. Last winter Mr. Divinia won first pen and second pen as

well as winning the regular prizes in the cockerel and pullet classes. We are not sure about these ribbons, but know that they were well up to the front of a large class of cockerels and pullets. At the St. Joe show two years ago he was quite a heavy winner on Barred Rocks and all breeders who know him make the contention that he is one of the best breeders in the country. This fall we visited his flocks and were indeed surprised to see that he had again made strides forward in the breeding of exhibition cockerels. His pullets need no further introduction to the Barred Rock fanciers of the country for the simple reason that they are being bought far in advance of the supply. There is not a breeder in the central West who has not admired the splendid pullets that his flock has produced and is sending out. The cockerels are better this year than ever before, being very even in color from beak to heel, well barred in under color, strong in wings and tail and having plenty of bone and size. If any of the readers of the American Poultry Journal are wanting the correct type of exhibition and breeding cockerels they should write early to this fancier, as his supply is limited owing to a heavy egg trade the past season. In pullet bred stuff he is well fixed with breeding cockerels that have the necessary character of barring, size and shape to make them invaluable for out crosses on other strains.

Mr. Divinia is getting up a catalogue

of the stock that he has to offer. The same being illustrated with half-tone cuts of unretouched photographs. This catalogue will be sent to every breeder and fancier who asks for it and all who are interested in good Rocks should drop him a line so he can forward it. This catalogue will be issued on the highest class of paper and the best grade of the printer's art will be expended on it. Please say that you saw notice of it in the American Poultry Journal and note his advertisement elsewhere in this issue.

Amos Burhams.

YOUNG GERMAN WANTED.

The undersigned wants to get in touch with young German and wife (no children) who want a good home and comfortable living and reasonable wages for their work on small suburban place caring for poultry and other stock. Write to Amos Burhams, Waterville, Minn. Prefer newly arrived couple from old country.

Illinois State Poultry Association will hold their show at Springfield, Ill. The features are \$1 entry fee, pens to compete separate, Empire coops, mated breeding yard display, and no charge will be made at the door; the public can come in free. F. A. Bennett, Canton, Ill., secretary.

"We lead, others follow."

SAMPLES OF MODERN STATIONERY AS USED BY PROGRESSIVE POULTRYMEN

QUESTIONS AND ANSWERS

Questions will be answered in this department only when full name and address is signed by the writer.

Question: (1) How much (per day or one feeding) corn, oats and wheat should I feed 200 hens for eggs? The hens have free range with plenty of green rye and wheat? (2) Can I get good results feeding corn only when they have free range with green rye and wheat?
J. M. G.
Macedonia, Ill.

Answer: (1) This is a question that is asked more often than any other and one that cannot be satisfactorily answered, as no two flocks of fowls require the same amount of food. The only way to get this information is by practical experience, and the general practice is to give each fowl a small handful of grain at each feeding—just what they will eat up clean in five minutes. (2) No; corn is a fat producer and not an egg producer.

Question: (1) Will you please advise me how to provide feed and water when shipping breeding stock. (2) How big a hole should be punched when marking grown birds between toes?
Benson, Minn.
J. R. T.

Answer: (1) A small bag of feed should be attached to the shipping coop and a tin cup fastened on the inside in easy access to the birds, and instructions written on coop to express agents to feed and water. Feed and water is necessary only when fowls are being shipped a long distance. (2) The punches for this purpose now on the market make the proper sized hole.

Question: (1) Which breed, S. C. White Plymouth Rocks or S. C. White Leghorns, are capable of laying most eggs in a year if properly cared for?

(2) Which are the best winter layers?
(3) If penned up how many square feet of space should each bird have?
Minneapolis, Minn.
A. W. H.

Answer: (1) The Leghorns. (2) Rocks. (3) Six square feet of floor space should be the minimum.

Question: (1) Please tell me where I can obtain some "Butter Cup" chickens? (2) Are they good layers? (3) How much should I pay for about twenty-four hens and two cocks?
San Antonio, Tex.
J. E. G.

Answer: (1) We are unable to say. Watch our advertising columns. (2) Little is known about the merits of this variety. (3) We cannot say.

Question: What does it cost to feed a chicken until it is eight months' old?
Akron, Ia.
P. H. D.

Answer: About \$1.

Question: How old should the pullet be before placing it with the cock?
Galveston, Tex.
Mrs. W. F. B.

Answer: From six to nine months.

Question: (1) Please advise cause of sore head in my flock. Keep chicks in ordinary pen, feed oats, corn, cornmeal, wheat and plenty of green feed. Heads become sore and within a few days eyes are closed, apparently grew together. Also state what is the cause of this. (2) Where can I obtain a copy of American Standard of Perfection? (3) How many hens should be kept in one pen in order to obtain best results in obtaining eggs?
Stanley, N. C.
A. C. T.

Answer: (1) Sore head is caused by

the fowls being confined in filthy and poor ventilated quarters. See Dr. Salmon's book, "Diseases of Poultry," for full information about this and other diseases. (2) From American Poultry Journal, Chicago, Ill. Price, \$1.50. (3) From ten to twenty-five, according to amount of free range.

Question: (1) Would S. C. Black Minorcas be as healthy as White Orpingtons or White Wyandottes for this climate? (2) Do you think they would be more profitable as egg producers? (3) Which of the three would you advise me to get as a general purpose fowl?
F. C.
Anderson, S. C.

Answer: (1) Yes. (2) This all depends on the care and attention given them. The Minorca will probably lay more eggs. (3) There is not much to choose between the three, and a great deal would depend on your likes and dislikes.

Question: What two breeds of fowls would you name for market and egg producers, respectively? Are the Minorcas as easily kept as the Leghorns? Which have the best laying record, Minorcas or Leghorns?
S. S. C.
Valley City, N. D.

Answer: Any of the American varieties, such as Rocks, Wyandottes or R. I. Reds make good market and egg fowls. For eggs exclusively the Leghorn has proven best.

Question: (1) Which is the best all round chicken, the White Rock, the Rhode Island Red, or the Barred Plymouth Rock? (2) Would the color of either of these three make any difference in selling on the market? (3) If hens are well cared for, how much profit can one expect to the hen?
Hazelhurst, Miss.
D. T. D.

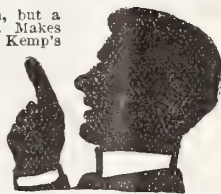

Answer: (1) There is very little to choose between these three varieties. They are all considered good general purpose fowls, and in making a selection you would have to be governed by the color and general appearance of the birds. (2) No; as they are all very popular at the present time. (3) One dollar per hen.

Question: (1) I had a Single-Comb Brown Leghorn pullet on which the skin puffed up like a rubber bag, and I opened it and let the wind out, and she seems to be doing very well now. Can you tell me the cause of this?

SPECIAL FOOD for laying hens (not sprouted grain, but a **REAL FOOD**) 12 to 17 cents a bushel. Makes hens lay in winter same as spring. Sixteen of Prof. O. Kemp's Barred Rocks fed this food laid 3,536 eggs in one year. Hundreds report equal success. **FIRELESS HATCHERIES AND BROODERS** 24 to 30 cents each. None better. Thousands in use. **FOOD-SAVING FEEDING HOPPERS** 14 cents each. Keep food clean and dry, prevents all waste. **ONE-PIECE WATER FOUNTAINS** 8 cents each. No dirty water, no wet chicks. **RAT AND STORM-PROOF COOPS** 20 cents; safe, warm and clean. One plant using 470. **HEN-PROTECTING NESTS**. Self-acting, simple and cheap. Prevent egg eating and egg breaking. **DEAD-SHOT LICE AND MITE KILLER** 4 cents a gallon. A sure killer. Over 60,000 gallons used last year. See my **FREE Booklet**. Address,

F. GRUNDY, POULTRY EXPERT, . . . MORRISONVILLE, ILLINOIS.

TO OUR SOLICITORS FOR SECURING SUBSCRIPTIONS TO POULTRY POST AT 25 CENTS PER YEAR

We must add 50,000 subscribers to our lists during the next year. To accomplish this, we will distribute among our workers thousands of dollars in cash commissions, valuable premiums and prizes consisting of typewriters, roll-top desks, graphophones, cameras, pure-bred fowls, day-old chicks, etc. You will receive premiums or cash commission for all subscribers you secure and besides, participate in the distribution of our Grand Prizes. Our offers are the most attractive and liberal ever made by any poultry journal. Write today for full particulars. Agents find it easy work securing subscriptions to Poultry Post, as it is the only popular 25c poultry journal published.

POULTRY POST

DEPT. 8

GOSHEN, INDIANA

(2) What is the remedy for chickens with the sore head? C. W. P.

Manning, S. C.

Answer: (1) Wind tumors; the cause has never been discovered. (2) Apply sulphur ointment twice a day. This treatment should also be accompanied by a thorough cleaning and disinfecting of the premises. The feeding troughs and drinking vessels should be washed daily with boiling water.

Question: (1) Will a thoroughbred rooster which has run with another variety of chickens be all right to breed from? (2) Will Rose-Comb White Bantams mix with White Plymouth Rocks? (3) Will Black-Breasted Red Game Bantams mix with White Rocks? (4) Are the Black-Breasted Red Game Bantams very quarrelsome? (5) What varieties of games are used in the pits?

Amsterdam, Ohio.

R. S. S.

Answer: (1) Yes. (2) The chances are they will not. (3) The same answer applies as to No. 2. (4) Yes; as a rule. (5) We are not familiar with the pit varieties.

Question: What was the matter with my Silver Laced Wyandotte? On Friday it seemed to be all right; the next morning when I came out to feed I found the chicken dead under the roost. At 9 o'clock I examined the chicken. The first cut I made through the skin the blood came running out. It was full of blood on the inside and right side of the chicken. I found a clot of blood two inches in diameter near the heart. I found the heart enlarged two inches in diameter and two and one-half inches in length with a very tough skin around it one-sixteenth of an inch thick. I cut the heart open and found the color inside like a tanned skin. Left side of liver was natural, right side was very much enlarged and a very light color. Gizzard was all right. Crop was all right, about one-quarter full of feed. Chicken was full of eggs. The largest one was a little baked; the second one very slightly baked; the rest were all right.

Blue Island, Ill.

J. A. S.

Answer: Hypertrophy of the heart, for which there is no cure. The bird was also suffering from a slight attack of liver trouble. See Dr. Salmon's book, "Diseases of Poultry," for full particulars about all diseases of poultry. Price, only 50 cents. No poultryman should be without a copy of this book.

Question: Will you please tell me through your paper what is the matter with my little chicks? They seem strong and healthy when first hatched, say for two or three days, and then begin to droop. No sign of bowel trouble or anything—only just droop, and in a few hours are dead. I give them boiled eggs for two days and then chick feed. Am very careful about feeding and do not feed at all for thirty-six hours.

Mrs. F. E. Reed.

Huntington, W. Va.

Answer: Lice is probably the cause of your trouble. If brooded by hens, use some good lice powder on the hen and grease the top of the heads of the chicks with lard to which has been added a few drops of kerosene oil. If a brooder is used, see that it is free

from vermin before putting chicks into it, and care should be taken that the chicks do not become chilled.

NEW BREEDS.

Sometimes fanciers, even those of us who can recall the time when many of the leading varieties of fancy poultry were unknown, begin to wonder when the end of new breeds will come. In fact, there are many who are of the opinion that we have enough kinds now and that further recognition should be frowned down. Of course, there are numerous arguments that can be advanced both for and against, but there is no doubt that quality will always be recognized.

Who knows but that there will be as much improvement in chickens in the future as in the past and many of us, who are not very well advanced in years, either, can recall the time when most of our best general purpose breeds of today did not exist. None of us dreamed what great improvement was before us, although some of us have been instrumental in originating different breeds, both in co-operation with other fellow fanciers and as an experiment alone.

There are good reasons why new breeds always will be at least considered. And right here let me say that they should always have consideration and then, if found of sufficient merit, they should be recognized when their merits are known.

In this world, in every walk of life, the new is being sought, not because it is new solely, but because usually the new is an improvement, and it should always be thus. We should not go after simply the new but the improvement, and upon worth should depend the verdict.

New is a fad, merit is a staple. In this day and age the "voice of the people" governs and is usually heard in the end. The decision generally depends upon real worth. The outcome is that everything must stand upon its own foundation. If this foundation is simply being new the structure falls to ruin and soon is only a remembrance. If it is because of merit the structure endures and is a monument in proportion to its real excellence.

Time will tell, others will come and go, and in the end the breeds which continue to be recognized will be those of proved value. The great poultry industry is only in its infancy and in the end it will have been a case of "Many, are called but few are chosen." Then the selected ones will be pre-eminent and of unquestioned superiority; then will some of the breeds now asking for recognition be among the "favored few," and then will we all realize that it was better in the end that admission was not thrust upon us but was secured after a hard fought battle in showing real merit.

S. A. Nofztger,
Originator of Partridge Plymouth Rocks.
North Manchester, Ind.

Editor Schuremann of Commercial Poultry surely gives his readers some exceptional editorials. In this we refer in particular to his article in the October issue, "Fakers Beware." This is most worthy of reading and of careful consideration.

This department is open to all readers and advertisers in the eastern territory and all are invited to send in all poultry news items that come to their attention. Address H. P. Schwab, eastern representative, Irondequoit, N. Y.

Tell not—sell not.

Faint advertiser ne'er won fair profits.

If you wish to make money, write for subscription agents' terms.

Have a look at the A. P. J. show poster before placing your order.

Some people waste a lot of valuable time in rather foolish arguments.

Our motto is to only argue for the general benefits that will go a long way toward bringing success to all.

A business can go without advertising, so can a wagon go without greasing; but in both instances it goes mighty hard.

With this month the curtain rings down on the fall shows, and ere the next is fairly started the season of winter shows opens.

The shows we have seen this season were, without exception, larger and better than the previous ones. It is safe to predict that the winter shows will show the same progress.

There is no better time than right

now to start in the poultry business. The interests and values in Standard-bred poultry have more than doubled the last few years. With this great increase at best there is only a fair sized crop in proportion to the demand, and prices are bound to go higher. The late buyer will have to pay.

A TAKE-OFF.

The more she dresses for the ball,
The more—it beats the dickens—
Does she take off; this dressing for
A ball's like dressing chickens.

Advertising is not the art of pleasing one's self by putting words on paper—it is communicating ideas to others.

Secretary Atherton is hard at work for the coming great Boston show. Boston did itself grand last year, and from what we have seen and heard and from what we know of that hustler Atherton, we look for a still larger and handsomer show at Boston the week of January 11 to 15, 1910. Write W. B. Atherton, secretary, 30 Broad street, Boston, Mass., for premium list and any other information.

The A. P. A. now has just about 1,600 members. When we consider that 150,000 breeders of Standard-bred poultry in the United States and Canada as only a fair and low estimate at best, we must stop and ask why so small a per cent of the breeders are members of the American Poultry Association?

The questions that now confront the breeders are most important. A membership of 5,000 to 10,000 should be had. Such membership would give the association untold strength and particularly at this time in aiding the efforts for the parcel post and the regulating of express rates.

Now is the time to serve the cause. The grand old association by its work is gaining in favor, and we look for it to receive proper recognition from the breeders within the next year or two.

I am a life member of the association and am very proud of it. So you will be if you will interest yourself in its work. Write to Secretary S. T. Campbell, Mansfield, Ohio. Let him enroll you; it will make you feel 100 per cent better. My word for it.

We would not be surprised to learn that the next annual meeting of the American Plymouth Rock Club will be held in connection with the Buffalo (N. Y.) show, January 25 to 29, 1910. This will be one of the big shows of the year. No efforts are being spared to make this a truly representative international show. A strong line of judges from both sides have been engaged, and it is now up to American and Canadian breeders to aid and make

this a quality representative show of the season.

Secretary A. C. Smith, of the American Plymouth Rock Club, informs us that members are coming in rapidly and that, taken all in all, he is highly elated with the club, its condition and the future prospects of the Barred Plymouth Rocks in general.

This from Mr. Smith is gladly received. The office of secretary of this great club is no sinecure. He has given his time and best work willingly, and it is most pleasing to know that success is the reward.

A great deal is naturally expected of the club that represents the Barred Plymouth Rocks. Like the variety it represents, it must be a leader. The breeders should realize this and give their aid to the cause that has labored for twenty years to make this the champion all-purpose fowl in name and in fact. For further information address A. C. Smith, Waltham, Mass.

The year it is just ending.

With two months yet to come;
We ought to "cut" out sinning
And boost our virtues some.

Also "cut" with decision
The careless little ways
That mark us for decision
And oft our friends amaze.

Hold dear your friend and neighbor,
But shun affinities;
And if your portion's labor,
Don't get a grouch on, please!

Pause in your bacchic folly,
Be temperate, be wise;
Eschew all melancholy,
Be hopeful—Advertise.

And if perchance your business
Should waver or seem sick,
No doubt it needs a tonic—
The "A. P. J." turns the trick.

To the beginner in poultry breeding reliable information regarding the different breeds is of untold value. A study of such facts reveal the breed characteristics. The A. P. J. book, "History and Origin of All the Breeds," gives this information. The A. P. J. also issues other books of equal value. Write for list and any special information you wish.

The premium list of the Williamsport (Pa.) show is out. The liberal cash and the great list of specials are the feature. The Pennsylvania association of the A. P. A. will meet there, and we look for this to be one of the big shows of the state. The dates are November 30 to December 3, 1909. Write James T. Huston, secretary, for a list and all other information.

Since we have struck out for 100,000 subscribers we mean to keep at it. The subscriptions are coming in grandly. "Our folks" are telling their friends and neighbors of the A. P. J., as they should. We have room for all. It is our aim to give them the best there is in poultry literature.

The great Rochester (N. Y.) show will be held at Convention hall at Rochester, N. Y., December 14 to 20. The Flower City Poultry and Pigeon Association was organized in 1899 and incorporated in 1902. This association has held some of the largest and best shows west of New York City, and the

coming one promises to surpass all former efforts. The judges are: Messrs. F. B. Zimmer, H. J. Quilhot, W. J. Stanton and H. P. Schwab. Write J. Drechsler, secretary, 101 Hawley street, Rochester, N. Y., for list.

A stream of opportunities is constantly going by. Pick out the one you can use and nab it.

Subscription agents are wanted for all the shows. Liberal cash inducements are offered. Write for terms, and mention the shows you can make.

In this issue will be found the inaugural address of Secretary S. T. Campbell delivered at the A. P. A. meeting. There is a great deal in this for poultrymen to consider.

The first would probably be increased membership, followed closely by the questions of parcel post and express rates. We feel assured the latter two can only be accomplished by strong united action. Here is the best reason we have to offer: Why every man, woman and child interested in poultry should join the A. P. A.

In our last issue our printer forgot to give the writer credit for the New York State Fair report. We have had some letters asking whose work this was, and in order to avoid trouble for all others will own we did it.

Philadelphia is awaiting the return of President Henry D. Riley, who is expected shortly from his trip abroad. There will be some hot times then in the old town and some grand hustling for the Philadelphia show, which probably will be held January 18 to 22, 1910. With Messrs. Riley, Moore, Jefferis, Faucett, Hickman and others the future is assured. Their three last shows have been the equal of the best and a credit to all.

An old negro man riding on a train fell asleep with his mouth wide open. A mischievous drummer came along and having a convenient capsul of quinine, he uncorked it and sifted the bitter dose well into the old negro's palate and the root of his tongue. Soon the darky awoke and became much disturbed. He called for the conductor and asked:

"Boss, is dere a doctor on dis here train?"

"I don't know," said the conductor; "are you sick?"

"Yes, sah; I sho is sick."

"What is the matter with you?"

"I dunno, sah, but it tastes like I busted my gall." H. P. Schwab.

THE PROPER CARRIAGE OF TAIL IN THE PLYMOUTH ROCKS.

Note—We lately wrote Victor Bradley requesting him to give, for the benefit of our readers, his reasons as expressed at the A. P. A. in favoring the degree in carriage of tail on the Plymouth Rocks, as adopted at the meeting for the New Standard. We here give his reply.—H. P. Schwab.

"As a study is made of the breed, especially of the distinctive characteristics of the live specimens, one cannot but note the conformity of the Standard requirements. Any breeder

desiring a revision of the wording should remember that any marked change in requirements if followed out would result in a change of the breed. But our Rock type must be maintained.

"The word 'medium' has become almost a descriptive word for the breed. That means that the bird is neither clumsy nor a weakling, but rather one of nature's 'just rights'—one that will thrive if allowed. It indicates vigor-stamina. It shows in its activities. It is characteristic of a specimen that will reproduce. The proud but dignified bearing of a typical Rock specimen is not to be depicted in outline with a listless nor dejected pose of the tail and feathers. The droop, similarly in plant as well as in both bird and animal life, seem an

admission by nature of weakness, decline or decay, and if for no other reason we would stand for the medium or modified medium upright carriage of tail in the breed we so proudly champion. Forty-five degrees for male and 35 degrees for the female are, in our opinion, wisely designated by the A. P. A.

"The outline chart showing lower carriage was, we think, aptly characterized by the gentleman from Waltham. Naturally one might assume that a whipped male is lacking in some degree the full possession of those traits which seem to have been honored by the survival of the fittest, and who dares say that any breed has demonstrated its fitness to exist more than the (Barred) Plymouth Rock?"

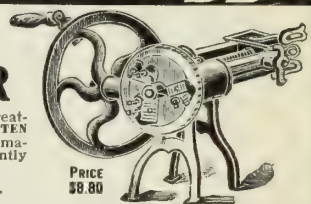

How to Get More Eggs

You can get more eggs than you ever thought possible from your hens by feeding them cut bone. It keeps them laying regularly, in season and out. The

STANDARD BONE CUTTER

is the only machine that cuts bone across the grain, securing greatest food value. Cuts green bone, dry bone, meat or gristle. TEN DAYS FREE TRIAL TO PROVE SUPERIORITY. Cut shows No. 9 machine, price \$8.80. Many improvements have been made recently in this cutter. Write for free catalogue and free trial plan.

Both cockerel and pullet bred birds, large and full of quality. My new annual catalog free for the asking, illustrated with tone to life photos.

S. T. DIVINIA :: ROUTE 2A :: ST. JOSEPH, MISSOURI

GOOD TO KNOW

by C. W. Zimmer

This department is open to all readers and advertisers in the central territory and they are invited to send in all poultry news items that come to their attention. Address C. W. Zimmer, central representative, Ft. Wayne, Ind.

Our slogan is: "We lead, others follow."

Rocks, rocks, rocks, not stones, but Barred Rocks, the "winning kind." C. E. Spaugh, Rugby, Ind., has them and will sell you good birds at reasonable prices. Yes, his ad is in A. P. J.

Better invest in a King bone cutter and feed your birds some green cut bone. It will force your pullets to early maturity and make them lay, and eggs are going to be high this winter. The King machines are cheap, yet they do good work. Address R. H. O'Neil, 12 N. Campbell avenue, Chicago, Ill.

"We lead, others follow."

Do you intend to show at Chicago? Better do so, it's going to be a hummer.

A. M. Florsheim, of Louisiana, who is starting a large poultry plant, spent three hours with U. R. Fishel one day recently, and bought one hundred and ninety-two White Plymouth Rocks. Mr. Florsheim was not long in seeing White Rocks were money makers when he looked over "Fishelton."

Owing to the short crop of poultry this year those contemplating buying breeders should buy early.

C. E. Spaugh, Rugby, Ind., is getting out a fine new catalogue of his Barred Rocks, which he expects to be able to mail you by November 15. This will be a handsome book, profusely illustrated, giving many pointers on the mating and breeding of Barred Rocks. You should have this book. Mr. Spaugh will be glad to mail it to you for ten cents to cover postage and mailing.

System spells "success." Better think about this. No business can run without some system. Can yours be improved.

We never know what we can do until we try and then we frequently find that we can't. Any way, you can't succeed in the poultry business unless you advertise in American Poultry Journal.

Yes, I'm a "booster." Are you?

"We lead, others follow."

Simmons Bros., Stockton, Ill., who breed Golden Wyandottes, made a record at Kansas City and Chicago that has never been equalled by a Golden Wyandotte breeder. Their ad appears in this issue. Look it up if you are interested in Golden Wyandottes.

L. C. Buschmann, Indianapolis, Ind., breeder of R. C. Reds, sold his cockerel, Valentine, winner of first at Indianapolis and Springfield, to W. D. Lipe, Lichfield, Ill., for a long price. Mr. Lipe will enter the field well stocked with quality in R. C. Reds.

Do you know that Coleman's Eureka Tonic and Roup Tablets are absolutely guaranteed to cure roup and colds. And that if one tablet per day is given birds in the show room it prevents their contracting contagious diseases and colds. For convenience in treating a flock they also make a roup remedy for drinking water. You should have a box. Address The Coleman Co., Desk 4, Carey, Ohio.

Mr. Geo. H. Rudy, of Mattoon, Ill., one of our prominent White Wyandotte breeders, visited the Illinois State Fair. Mr. Rudy reports a fine lot of young birds as well as some of his breeders for sale. You know he won about everything in sight last year at Chicago and several other shows.

Mr. W. E. Lachenmeyer, Mt. Pulaski, Ill., a R. I. Red enthusiast, attended the fair.

Mr. N. P. Easling, proprietor of the Parkside Poultry Farm, Pekin, Ill., breeder of high class line bred White Leghorns, attended the fair. Mr. Easling made an enviable record on his White Leghorns by repeatedly winning the cream of the prizes in several hot classes in several large shows, including Chicago. He is offering some special bargains at this time to reduce his flock quickly, so he will be ready for winter when it comes. Look up his ad in this issue.

Be a booster. You know we have the largest circulation of any poultry journal, but won't you get us just one new subscriber. It won't require much effort on your part and think what it would mean to us. We have 65,000 now, and if every reader got one new subscriber, we would have 130,000. Think of it. My, what we could and would then do for our readers. Won't you do your part to accomplish this? Won't you at least try.

Can You Buy 125 Chicks for \$2.50

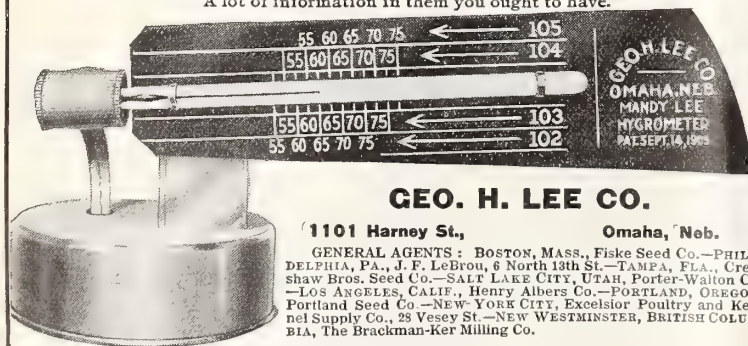

Suppose you put only 500 eggs in your incubators. If 65 per cent hatch, you get 325 chicks. You pay \$2.50 for a Mandy Lee Hygrometer, and if but 90 per cent. hatch with its assistance you would have a flock of 450 chicks—125 chicks on a \$2.50 investment. Most users say it is wonderful. It is. But it is only a mastery of a scientific principle. Operators who have been getting 60 to 70 per cent. can and do get 90 to 100 per cent. hatches with this dependable indicator of temperature and of moisture.

MANDY LEE HYGROMETER

Greatest Invention Since the Incubator Itself

NOTE—Mr. Lee, in the conduct of his own poultry farm, found he could buy no instrument that could be depended upon to correctly, or at all times accurately, register the percentage of moisture in the egg-chamber of incubators. So he invented one for his own use, but would not consent to its being placed on the market until he was satisfied, through continuous use, that it was right in every respect. All of Mr. Lee's inventions have been to serve his own needs—now he wants to share his successes with fellow poultrymen, and says that one Mandy Lee Hygrometer will be given free with each Mandy Lee Incubator—an incubator with more patented, exclusive and desirable features than have been shown on any other incubator in the past 10 years.

Send for free book, "Incubator Hygrometry," and catalog.
A lot of information in them you ought to have.

WESTERN NOTES

by Amos Burhans

This department is open to all readers and advertisers in the western territory and all are invited to send in all poultry news items that come to their attention. Address Amos Burhans, Waterville, Minn.

The forthcoming Kansas City winter snow will be held January 12-18. P. H. DePree, secretary, Kansas City, Mo. This show will be the largest that the new association has ever held and we have heard of hundreds of expressions from the breeders all declaring that they will be at Kansas City with their best birds this winter. Mr. DePree is a member of the firm of Deal & De Pree, wholesale and retail tobacconists and cigarists, who have two retail stores in the city, which are usually frequented by visiting poultrymen when in town.

During the fore part of the Missouri state fair, Mr. Tom Quisenberry, now of Columbia, Mo., secretary of the Missouri State Poultry Board, was at the exhibition working in the interest of the forthcoming state show, which will be held at St. Louis, December 7 to 12. This will be the best and biggest state show, if present indications count for anything, that the grand old state of Missouri has ever championed. Every breeder in the country who wants good comparison judging by the best judges, a fair and courteous treatment by the management of the show, should thus early commence to get his birds in line for St. Louis.

A very popular congregating place for poultry fanciers in and about Sedalia, is the Smoke House owned by the genial Cochran Brothers, who have always made fanciers and breeders welcome.

Omaha fanciers are all shouting about the larger and better show that they will hold this winter. The poultry show in Omaha is always a society event, and is known as one of the best shows at which to sell stock at good prices. This year's event will be held New Year's week, and undoubtedly will be patronized by all its former friends as well as new breeders who are wanting to get into good competition where winnings are worth making.

It can honestly be said that Missouri is always in the front ranks when it comes to initiating ideas into the poultry industry. At the late state fair the Secret Society of American Poultrymen was formed, with R. V. Hicks, Topeka, Kan., president; A. D. Burhans, of Waterville, Minn., secretary; D. E. Hale, Quincy, Ill., treasurer; A. E. Blaker, Parsons, Kan., first vice-president; Paul Coates, La Prairie, Ill., second vice-president, and board of directors as follows: C. B. Austin, Columbia, Mo.; R. F. Palmer, Topeka, Kan.; W. S. Robinson, Fayette, Mo.; E. C. Branch, Lee Summit, Mo. It is intended to hold a meeting of the association at Chicago and St. Louis, December 7 to 12, both shows coming on the same date, but the president,

R. V. Hicks, says that he will be the fore part of the week at Chicago, and the latter part of the week at St. Louis.

Russell F. Palmer, well known to the majority of poultry men in the west, has severed his connection with the Poultry Gazette, and is now on the staff of Poultry Culture.

HOW TO ADVERTISE.

THERE are a great many breeders of poultry who have overcome the elementary steps in poultry culture, such as producing good fertile eggs, raising most of their chicks, producing exhibition stock, etc. Yet they cannot make a success of the poultry business, while there are others who have not nearly as good success with their

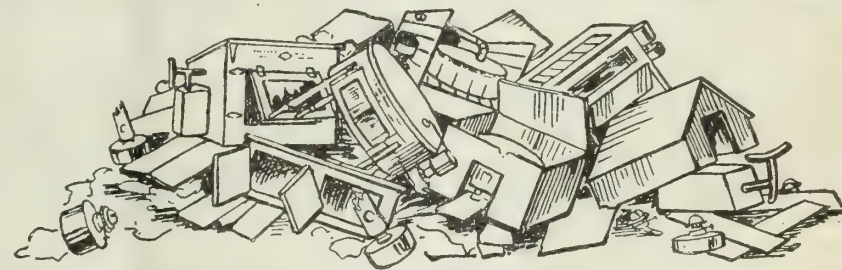

stock are making a good margin of profit out of their flock.

You will ask, Why is this? It's because we have some poultry keepers that have not got the "gumption" to advertise their stock; they hide their light under a bushel. Now, dear reader, I am not going to give you a lot of "hot air," but will strike right from the shoulder, and if this hits you then the best medicine I can give you is read it over again, again, and again. Then get out and do a little crowing yourself and don't let your chickens make all the noise.

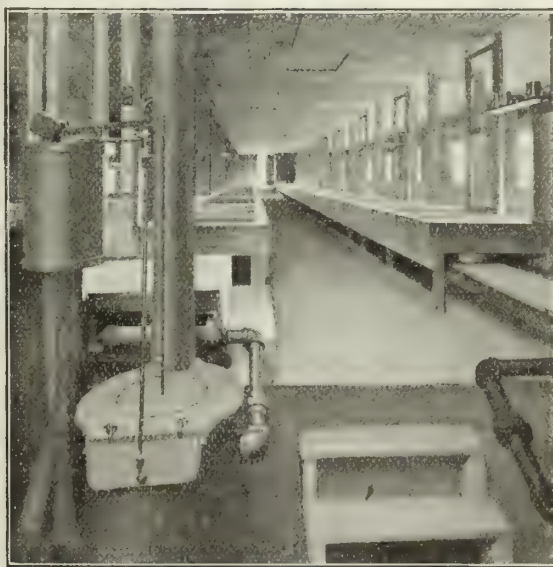

So that you may understand this better I will illustrate a case that came to my notice recently. This party, who I am going to tell you about had the chicken fever, as some call it. He was living in a city and was doing exceedingly well in the business he was in, but was just longing to get into the country and raise chickens.

So he sold out his business and bought a farm. This farm was well located, and there is every reason to believe he would have made a success of the business if he would have had the "gumption to advertise," as he spent \$50 for a breeding pen of one of the most popular varieties we have. Yes, and he got good value for his money, as they turned out to be very good stock. He raised most all of his young stock the following season. When

We take subscriptions for the new splendid National Squab Magazine (monthly). Specimen copy mailed for ten cents. **PLYMOUTH ROCK SQUAB CO.**

414 Howard Street

Melrose, Mass.

I saw him this season he had mated up six as fine pens as you would wish to see. I asked him how he was doing, and he said, "I can raise them and I have good stock, as you will see, but I cannot get any price for my eggs and stock." I asked him what papers he was advertising in. His reply was, "I used last Sunday's —," and as he paid 38 cents for a classified advertisement and got no reply of any kind except a few letters from other papers asking for his advertising business he came to the conclusion that it did not pay to advertise in the papers. I advised him to use several poultry papers, and use a liberal amount of space, tell people what he had and he would make his venture go, but no, he didn't have the "gumption" and went back to the city to go back to his former business, and he said it did not pay to raise poultry.

Now, gentle reader, don't do like this man if you are in the poultry business. First produce good stock, next show your

birds, then advertise, and keep everlastingly at it. Don't place your advertisement in February and then leave it out for March, etc., but start the New Year right by placing your advertising in January, follow it up with the same story in different words if possible in February and then don't forget that March, April and May are the best months of the year to advertise eggs. Then keep your name before the public by using space the balance of the year, follow this up with liberal space the following year, and don't expect too much from your first season's advertising, and you will make a success of the poultry business as sure as night follows day.

In conclusion let me say that you will not make a mistake if you advertise in the American Poultry Journal; it's one of the "best."

The Best Cure

Chickens' Eyes Swelled Shut.

"I consider Germozone the greatest poultry medicine ever placed on the market. I have cured chickens that had Roup so bad that both eyes were swelled shut, and it only required two treatments." F. MILLER.

B. Langshans and M. P. Ducks. Centerville, Iowa.

The experience of Mr. Miller is only that of thousands of other breeders who have found in Germozone the **one reliable cure** for this dread disease so common with poultry.

GERMOZONE

is not the product of a month, a day, or a year. For more than 12 years it has been the standard medicine of the poultry world and the fact that it is more popular to-day than ever before is the best proof of its real value.

Germozone is a germicide, a bowel regulator, a system builder. It goes to the seat of the trouble and effects a sure and permanent cure. Given in the drinking water twice-a-week it cures disease, prevents contagion, and keeps the fowls in a healthy, vigorous condition. Prepared either in tablet or liquid form and will be sent, postpaid, on receipt of price.

Germozone is the best health insurance you can have for your poultry. Cost is small, and it is sold on an absolute guarantee.

More Winter Eggs from Less Feed

This Poultry Fountain will keep water warm for 36 hours in ordinary weather. It's built like a Fireless Cooker—works like a "Thermos" bottle. When water, hot as the fowls can drink it, is kept before them in winter, the egg yield doubles and trebles. All the food goes to make eggs. None is wasted keeping the fowls warm and active. Cold water in winter chills the fowls and thus freezes dollars right off your pocket. Our **FREE BOOK** gives the experience of successful Poultrymen with this wonderful invention. Ask for it.

Weldon's Fireless Poultry Fountain and Hopper Feeder

The Hopper Feeder is the only one which allows the fowls to feed as nature intended—that is, little and often and as appetite dictates. There is no possibility, as there is with other Hoppers, for the strong to crowd away the weak and no opportunity for the greedy fowl to gorge itself to its own undoing. There are holes in the side of the Hopper just large enough to allow the grain to go through without flowing. These holes are made smaller by a metal band which slides up and down. The grain must be picked from these holes by the fowl. Every one shares alike. Dropping grain is caught in the trough. None is wasted.

Try One or Both, 10 Days At Our Risk.

Our valuable book—sent FREE for the asking—gives results from experiments so remarkable that every poultry raiser will want to make them for himself. To make this easy we will send either the Fountain or the Combination Outfit for 10 days' use at our risk, without the slightest obligation to keep it unless you choose. Say when you write whether you would like to try the outfit or read the Book first. Be sure to answer this "ad," as trial outfits must be sent out in the order requests are received. (2)

Conkey's Roup Remedy

will effect a speedy cure if this dread disease has made its appearance among your flock. No owner of fowls should be without it. It is not only a cure, but a little in the drinking water will prevent roup from attacking the birds.

Easy to Administer

Just put a thimbleful of Conkey's Roup Remedy in a gallon of water and let the fowls drink all they want. They cure themselves. Even when they are blinded by the disease, if you hold their heads in the water a moment they will inhale enough to start them on the road to recovery. A 50c box makes 25 gallons of medicine.

Don't Take Chances

by trying unreliable, so-called "roup cures." Conkey's Roup

Remedy has for years been the standard among poultrymen all over the world. We make a specific remedy for each poultry ailment—every remedy safe and reliable.

Your Money Back if it Fails

Try a 50c box of Conkey's Roup Remedy. If it doesn't do the work, send the empty box to us and your money will be returned to you by the next mail. No questions or delay. Price 50c and \$1 postpaid.

ASSOCIATIONS AND SHOWS

Secretaries are requested to send in news items of interest about their show for this department.

ILLINOIS STATE FAIR, HELD AT SPRINGFIELD, ILL.

Reported by C. W. Zimmer, Representative of American Poultry Journal.

The Illinois State Fair grounds and buildings were by far the finest it has been our pleasure to see. The poultry building was formerly equipped with stationary wooden coops, but this year these have all been removed and Empire coops installed, and the poultry and building presented a fine appearance, in fact was equal to any of the winter show rooms. The weather was ideal throughout the entire week and the attendance was greater than ever

building for next year. This is surely what is needed, and the continually growing interest of the production of poultry throughout the country justifies the State in going to this expense.

The quality of birds which we found in the showroom was certainly a surprise to everybody and was the equal of many of our large winter shows. It was strictly a show of specialty breeders, and the carload lot man was conspicuous by his absence. It has been a noticeable fact to us in our visit to several state fairs this fall that the breeders are waking up to the fact that they have to get their old birds molted out in show condition in order to exhibit at the state fairs and win. This being

honors he had won. His first prize cock and cockerel attracted the attention of every person interested in White Rocks.

The class of Barred Plymouth Rocks was second only to the Whites, having 148 entries and the quality of this class was prominent in every coop, and we assure you it took birds close up to the Standard to get a place in this class. The prominent winner of it was C. E. Spagh, Rugby, Ind. He won first and third cockerel, third hen, third pullet, first pen. Mr. Spagh will be remembered as one of the prominent winners of Barred Rocks at the late Indiana State Fair. His first prize cockerel attracted the general attention of Barred Rock breeders, as did also the birds comprising the first prize pen. Mr. Spagh reports plenty of exhibition and breeding stock for sale. Albert A. Brown, 601 Montana street, Peoria, Ill., won second on hen, a bird which attracted much attention.

The prominent winnings of the White Wyandotte class, which was likewise a hot one, went to Dippel & Pierce, 114 North Delaware street, Indianapolis, Ind., who exhibited a fine string of

Interior Coliseum Building, Chicago, where the great Mid-West Poultry and Pet Stock Association will hold their first annual exhibition December 7-12, 1909. For premium list and full particulars write to Theo. Hewes, Secretary, Indianapolis, Ind.

before, and this is saying a good deal, for the Illinois State Fair has always been noted for getting out the crowds.

O. L. McCord, superintendent of the poultry, by his zeal and energy secured a large entry of birds, some 3,000 head in all, some eight or ten classes having from 100 to 150 birds each. Mr. McCord was constantly "on the job," seeing that everything was taken care of. The building was kept scrupulously clean and sanitary conditions prevailed. His work gave such universal satisfaction that resolutions were passed at a meeting of the Illinois State Poultry Association asking for his reappointment again as superintendent for the coming year. The old building is actually too small to accommodate the classes of poultry which is possible to get out. What is needed is a new building fully twice as large. We understand the old building is to be turned into a dairy production building and that they expect to have a new poultry

case, a premium won at a show like the Illinois State Fair is equal to that of any of our winter shows.

The largest entry was to be found in the White Rock class, which consisted of some 150 birds of high quality throughout the entire class and many fine specimens justly deserving a prize in any ordinary kind of competition never got a look in at all. In this class J. A. Bickerdike, Millersville, Ill., made a clean sweep, winning first, second, third cock; first, second, third hen; first, second, third cockerel; first, second, third pullet first and second pen, winning every prize for which he entered. This is certainly a good winning and demonstrates the quality of Bickerdike Pedigreed White Plymouth Rocks. His old birds were fully molted and in the pink of condition and his young birds were up to weight and fully matured. He certainly had quality to "burn" and many of his competitors expressed their satisfaction with the awards and

birds showing splendid quality in both color and shape. They won first cock, first and second hen, second and third pullet and first pen. The Pierce strain of White Wyandottes is well known among the old breeders of this variety and have been prominent winners for many years past in the larger shows throughout the country. They report a large flock of both old and young birds for sale.

The Rhode Island Red alley, as usual, was so well filled with Reds that were red that it fairly sizzled. The Rose Combs were fully equal to the Single Combs. Of this class L. C. Buschmann, 4939 North Meridan street, Indianapolis, Ind., won first, second and third cock; first, second and third hen; first cockerel, second and third pullet, first and second pen. His birds attracted the general attention of the Rhode Island Red men and it will be remembered he was one of the prominent winners at the late Indiana State Fair, and

during this show he sold his first prize cockerel at a long price.

The Single Comb Rhode Island Red class consisted of about 130 birds of high quality throughout, many worthy specimens being left out of the money. The prominent winner in this class was W. C. Nelson, Canton, Ill., successor to F. A. Bennet, who has been one of the prominent winners for many years past. Mr. Nelson having purchased Mr. Bennet's entire flock of Reds, as well as his poultry plant and equipment, therefore it is not surprising that he won the cream of the prizes, consisting of first and third cockerel; first, second and third pullet; first cock, third hen, first and second pen. His first prize cock bird being Mr. Bennet's undefeated champion, and his first prize breeding pen was admired by all. Mr. Nelson reports having a very large flock of young birds for sale and is in position to supply you with exhibition stock as well as high class breeding stock.

The Hartman Stock Farm, Columbus, Ohio, had a fine string of birds out, which were in charge of H. B. Hark. As usual they won in all classes in which they exhibited, as follows: Single Comb White Leghorn, first cock, first and second cockerel, second hen, first pen; Barred Plymouth Rocks, first cock, third pen; Buff Wyandottes, second cockerel, second hen; Partridge Wyandottes, first and second cock, first hen, first and second cockerel, second and third pullet, first and second pen. The Partridge Wyandottes exhibited by them were very fine specimens of this variety, having the correct Wyandotte type and correct shape, color and penciling which made them easy winners in this class. They also showed Anconas, winning first and second cockerel, first and second pullet, as well as first cockerel in Houdans and second pair of Silkies.

O. W. Chase, proprietor Edgemont Poultry Farm, was on hand with a fine string of Single and Rose Comb Black Minorcas, Rose Comb Brown Leghorns and as usual won about everything in sight. In S. C. Black Minorcas they won 1st and 3rd cock, 1st, 2nd and 3rd hen, 1st and 2nd pullet, 1st and 3rd cockerel, 1st and 2nd pen. In Rose Combs, 1st cock, 1st and 3rd hen, 1st and 3rd cockerel, and he only having five entries in this class, every bird being placed. On Rose Comb Brown Leghorn he won 1st and 3rd cockerel, 2nd pullet, 2nd hen and 2nd pen. No cocks shown. Mr. Chase also won the following at the Michigan State Fair, held recently at Grand Rapids, Michigan: On S. C. Black Minorcas—1st cock, 1st hen, 1st and 2nd cockerel, 1st and 2nd pullet. R. C. Brown Leghorn he won 1st, 2nd and 3rd hen, 1st, 2nd and 3rd cockerel, 1st, 2nd and 3rd pullet, no cock shown. There were no classes at this show for breeding pens or for Rose Comb Black Minorcas. Mr. Chase certainly has the quality in all his varieties, and therefore wins wherever he shows.

J. J. Burnside, Milligan, Ind., had a large entry in many varieties and won a large number of premiums in the many classes in which he exhibited.

The Poultry Dust Bath Co., of Whiting, Ind., had a booth in which they had a display for Dustyne, which is a new material for exterminating lice and mites on poultry and in poultry houses. All of the old breeders were much interested in this material, and

many of them decided to place it in their coops. If you are not familiar with Dustyne you should look up their ad elsewhere in this issue or send to them for their circular matter. Address Poultry Dust Bath Co., Whiting, Indiana.

Niemann Mfg. Co., Mt. Olive, Ill., had on display their Portable Hen Houses, which are a model of simplicity, and should appeal to parties interested when purchasing poultry houses. They also attracted much attention with their trap-nests and other articles which they manufacture. Parties interested should send for their circular matter.

During the fair was summoned a meeting of the National S. C. Rhode Island Red Club and School of Instructions on Rhode Island Reds. This meeting was the means of bringing out a large number of enthusiastic Red breeders, some coming from distant states in order to be present. Both the meeting of the Club and School of Instructions which followed the next day were largely attended, and much interest shown. Judges Zimmer and Rountree instructed those present on the correct type and color of Rhode Island Reds, and many questions were asked and fully explained by them, so that all knew what the Rhode Island Red should be. Considerable discussion was had as to both the present Standard and the changes which are to take place next year. Many matters of importance to the Club were brought up, and among other things was election of officers, which resulted in C. W. Zimmer, Ft. Wayne, Ind., being again unanimously reelected president, also J. H. Vallier, Cedar Rapids, Iowa, as secretary and treasurer. Several new members were added to the club during this meeting, and much good was accomplished.

One of the greatest attractions of the whole fair, which was enjoyed by everyone, was the fine exhibit of game which was put up by the state. About one-half acre was netted, in which contained small artificial lakes. These were filled with some 2,500 head of game, consisting of all varieties of Pheasants, which, with their many gorgeous colors in all hues certainly presented a beautiful sight and attracted the attention of every one at the fair. Besides the Pheasants there were on exhibition many other varieties of wild birds, as well as ornamental ducks and geese. It was a rare treat for the public to see these birds, and we hope that other states will follow the lead taken by the state of Illinois. As we said before, the fair was a grand success, the weather throughout the week being ideal in every respect, and we trust the fair people will feel encouraged to keep up the good work next year.

THE AMERICAN ROYAL POULTRY SHOW.

The poultry show held in connection with the annual American Royal Live Stock Show has certainly made good in every way. Under the able superintendency of Mr. T. H. Southard, and the efficient judging of Victor Hobbs and Charles Rhodes had a great deal to do with the smoothness with which this event passed off. Mr. Rhodes is well known throughout the entire west as being one of the best all-around

Lee's Egg Maker

50 Feeds 1 Cent

My experience as a poultry raiser dictated that I needed a food that would increase egg production, and for my own use I prepared Lee's Egg Maker. There is no other poultry food with similar ingredients, and there is none other so good. Lee's Egg Maker is largely composed of deodorized, granulated blood (one pound equals 16 pounds of fresh meat), and has a protein feeding value in excess of 80 per cent. No worthless ingredients. Lee's Egg Maker is clean, wholesome, thoroughly sterilized, and free from maggots.

When to Feed

To all penned-up poultry Lee's Egg Maker should be fed every month in the year. To little chicks after they are ten days old. To hens and pullets during moulting season. And as an egg-producer during the winter months. It sells for 25c in 2½ lb. package; 50c for 5½ lbs.; \$2.00 for 25-lb. pail.

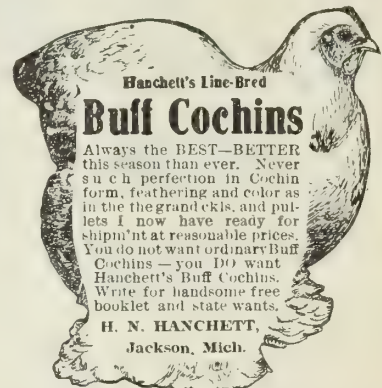

Guarantee

Lee's Egg Maker is guaranteed to pay for itself, pay required labor, and pay 100 per cent. profit on such labor.

There is no good reason why Lee's Egg Maker should not be used by any large or small poultry raiser if greatest profit is wanted.

"Lee's Chicken Talk," a book written by Mr. Lee himself, is free on request. Ask for it to-day.

BLATCHFORD'S

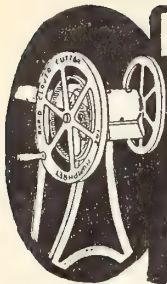

"Fill the Basket" Poultry Meats

Composed only of the best Beef, Meal, Sunflower Seeds, Coconut Meal, Albuminous Compounds, Iron, Red Pepper, Ginger, Oil and a little special shell. Just what poultry require for egg production.

—Established at Leicester, England, in 1800—

BLATCHFORD'S CALF MEAL FACTORY
Waukegan : : Illinois

For Big Poultry Results

Feed cut clover or alfalfa—the cheapest and most productive poultry food for winter feeding. Great for all poultry—especially ducks. Don't buy so-called "clover-meals"—half dirt and dust. Cut it yourself with a new

HUMPHREY Rapid Clover CUTTER.

Cuts finer, more rapidly and more easily than any other. Fine enough for young chicks—no pieces over $\frac{1}{8}$ inch. Double knives, strong and durable. Unlike any other.

Send today for "Poultry Helps," Humphrey's new book of Poultry Specialties. It's free and it's all right. Address: **HUMPHREY, NEW Street Factory, Joliet, Illinois.**

DANDY GREEN BONE CUTTERS

If you have no bone cutter, or if the one you have isn't satisfactory let us send you a "Dandy" Green Bone Cutter on 15 days free trial—without a cent in advance.

We believe that every poultry-raiser with ten hens or more should have a good bone cutter. We make the "Dandy" in sizes to suit all needs.

Cut Green Bone will make every hen more productive; it makes chicks grow faster; it keeps fowls healthy and in the pink of condition.

No addition you can make to your poultry business will earn you so much money as a "Dandy" Green Bone Cutter.

A great many poultry - raisers have never fed fresh cut green bone. They have read about it and think it may be so, but they don't know. A great many more have tried stuff sold

as cut green bone, but results didn't satisfy them and they are doubters. But no man or woman ever fed fresh cut green bone who was not enthusiastic over it. Why? Because fresh cut green bone is a natural food for fowls; it supplies what their appetites crave—the fat bug and the juicy worm. Penned-up poultry cannot get bugs and worms in sufficient quantities to satisfy them, consequently you must supply a substitute. Cut green bone is the only substitute known—it is the bug and worm in a different form, and is the best and cheapest chicken feed in the world. It costs you practically nothing—it is made from scraps that would be thrown away, but which the "Dandy" quickly turns into money for you.

Write today for free catalog, select the size you want and send us your order to ship it at once on 15 days free trial.

STRATTON MFG. CO.,
Box 17, ERIE, PA.

\$5 AND UP

THIS IS THE BOOK I WANT TO SEND YOU

You haven't **seen** my catalog—you don't **know** my Incubator or my **Plan** yet, do you?

I'm talking straight, now, to some of you Poultry Raisers who have heard me before. I got a cart-load of letters and postals last week, but a number of you who wanted my proposition didn't write. Some didn't have a postal handy; others put it off till "to-morrow" and then mislaid the paper, or forgot about it entirely. It's just human nature to put off the things that are easiest of all to do.

If I wasn't working in your interest as well as my own—if my incubator wouldn't make you fifty times more money than I make selling it—I wouldn't have the brass to keep urging and insisting on you to write me.

Regulator Detached,
Lid Raised.

But I **know** that the "QUEEN" is the best incubator on the market. I have every other kind in my experimental room. I have a stack of incubator catalogs five feet high here by my desk and I know whereof I speak; **no incubator on earth has the "hatchability" or durability of the "QUEEN."**

"Well," you may say, "I don't know whether you are right or not, Wickstrum." **Of course** you don't know. But you don't know I am **wrong** either. When you consider that I outsell my closest rival two to one and that I spend only one-half as much in advertising, you must know that the "QUEEN" Incubator talks pretty strong for itself.

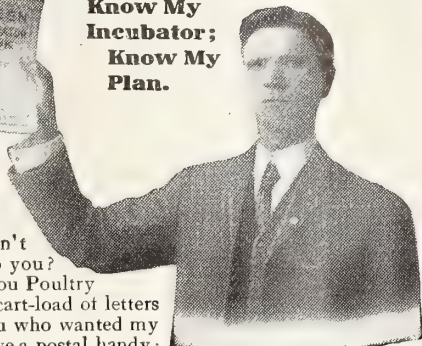

Worth investigating, isn't it? Worth a postal to know my Incubator and my Plan. My terms are outlandishly liberal—extended free trial—**freight paid**—factory prices

—5 years' guaranty that you can fix up to suit yourself and it will suit me. Do it right **now**—now **do** it—woman or man reader; send your name and address for my book on Incubators and Brooders. Don't put it off another day.

Just address me this way:

WICKSTRUM, THE QUEEN INCUBATOR MAN, BOX 4 LINCOLN, NEB.

Know My
Incubator;
Know My
Plan.

poultry judges we have. Mr. Hobbs donned the duster for the first time at this event, and his skill in placing the awards here shows us that he will soon be one of the comers in the profession. The main exhibit of the poultry department was put up by the Kellerstrass Farm, of Kansas City. Mr. Ernest Kellerstrass himself was in charge of the very beautiful display which was the main attraction at the live stock show this year. While the horse and cattle exhibit was undoubtedly worthy of inspection by the public, it would seem that the Kellerstrass exhibit centered around Peggy, the \$10,000 hen, and brought more than casual recognition to the poultry department. Mr. Kellerstrass had cooped one hundred birds and put them down in the best show shape of any string of fowls that has ever been shown at this time of the year. One would naturally think it would be hard to show a hundred head of birds in such condition, and indeed it is; but the facilities on Kellerstrass Farm for the getting up of such a string are not equaled in any other section of the country, and the time and money represented in making such a showing was certainly advertising to good advantage. Professional decorators had charge of the fitting up of the coops and the tasteful arrangement of the colored bunting that went to make the exhibit attractive. Peggy, of course, was the main drawing card, and was featured by all the daily papers, and about the first thing one would hear from the visitors would be a query asking where the ten thousand-dollar Peggy was to be found. Peggy's booth was decorated very handsomely with views of the farm that she and Mr. Kellerstrass have made famous.

The display of rare water fowl made by Kellerstrass Farm was indeed interesting. In a beautiful cage made expressly for the purpose was a small pond of water, in which were Grey Call ducks, Mandarins, Wood ducks and Pintails. The pheasants which Mrs. Kellerstrass has proven herself so successful with were also shown in this cage; these included the Reeves, Lady Amherst, Japanese, English Ringnecks, Silver and Golden varieties. Immense throngs of people were constantly about this cage, and part of the time it required a lecturer to satisfy the visitors regarding the habits of these rare birds and to name them. We almost forgot to mention that the thirty Kellerstrass Crystal White Orpington hens, from which he sold \$2,000 worth of eggs for hatching at \$30 per setting the past spring, were on exhibition, being duly placarded and labeled with the record of their performance; they interested many thousand prospective poultry raisers of pure-bred fowls in the fact that there is something more than mere fancy in the breeding of pure-bred fowls. We will have more to say of the record of these hens.

Mr. Tom Ricksecker, of Kansas City, made a very creditable show of Rhode Island Reds; in fact, there were none in the class that could hope to compete with him, owing to the good breeding and the early maturity and splendid fitting of the young birds which he exhibited. For a number of years Mr. Ricksecker has been exhibiting the best Reds in the west, and has made sales to the largest and best breeders in the country, it being common talk

that he is a very successful breeder and one who could be depended upon.

Earl Roberts, of Ft. Atkinson, Wisconsin, again showed his splendid string of all varieties and captured the lion's share of prize money and ribbons when the whole show is considered. There are no other show men in America who can show as many good birds as Mr. Roberts and keep them in such trim as he, while making the circuit of fairs and expositions.

S. T. Divinia, St. Joe, Mo., breeder of an extra quality Barred Plymouth Rocks, was a visitor to the show, but did not bring down any birds. Mr. Divinia has not grown a large number of birds this year, but what he has produced are the very best of their kind, and show the effort that he has expended in the breeding of the best class of stock.

Judge E. C. Branch, of Lee's Summit, Mo., was a visitor to the show, and reports that his judging engagements are quite heavy this winter, and that there is quite a bit of business done in Barred Rocks and Sebright bantams, his specialties.

Beal & De Pree, of Kansas City, proprietors of the famous P-B. Farm, have not grown a great number of birds this season, on account of the heavy egg trade which they were forced to accommodate last spring. They have a number of very creditable young birds, however, and say that they will be in better shape than ever to accommodate old as well as prospective patrons the coming season.

In the White Wyandotte class the Blue Ridge Farm, Kansas City, Mo., Dr. W. T. Stark, proprietor, were easily the leading exhibitors. They won second and third cock, first and second pullet, first cockerel, first and second pen, second and third hen. Geo. Tippie is now in charge of the poultry department of Dr. Stark's farm, and the line of birds exhibited at the Royal certainly showed his care and fitting.

Amos Burhaus

OMAHA, NEB.

For several years the Trans-Mississippi Poultry Association, of Omaha, has held one of the three largest shows in the west. This show is always held New Year's week in Omaha's big auditorium, about the largest building of its kind west of the Mississippi. The building being extra well lighted and in a central location, makes it a very desirable place in which to hold a large poultry exhibition. At last winter's show there were over 2,700 birds on exhibit, exclusive of waterfowl, turkeys, bantams and pigeons. The birds on exhibit were from Colorado, Oklahoma, Missouri, Iowa, Nebraska, Arkansas, Kansas, South Dakota, Minnesota, Illinois and New York state, one exhibitor showing a nice line of White Wyandotte and Barred Rocks from the latter named state. Attendance at the Omaha shows has always been extra good; in fact, we believe it ranks fourth in the United States in attendance, being led only by New York, Boston and Chicago. The management this season is made up of such men as George H. Lee, F. S. King, F. C. Alquist, W. R. Prewitt, A. Lundstrom and many other good men, all of whom are life members of the American Poultry Association. The Omaha show this year will be judged by the comparison system. This means that the best bird will win. Cash prizes, the largest and best ever offered by this show, are put up this year, together with many silver cups, trophies and other valuable special prizes. It is expected that Omaha will be the official show of the northwest branch of the American Poultry Association, this branch having already decided to offer its large gold medals as special premiums at Omaha.

The catalog giving full particulars will be off the press soon. Those desiring one should write F. C. Alquist, secretary,

Omaha, Neb. All live breeders, especially those of the west and more especially of Nebraska and Iowa, should boost this show, which, due to its central location, near the center of the United States, is destined to become one of if not America's greatest show.

All poultry publications are especially invited. A good time, plenty of business and a welcome hand is assured you.

WISCONSIN STATE SHOW.

The thirteenth annual exhibit of the Wisconsin State Poultry Association will be held at Oshkosh, Wis., January 5 to 10, 1910, and all indications point toward a bigger and better state show for Wisconsin.

This exhibition is a "fanciers' show" and is considered one of the "quality shows" of

BEATRICE.

First Columbian pullet, Akron, '09. Bred and owned by C. L. Patterson, Barber-ton, O.

the west. Besides offering large cash prizes in each class, there are also fifty silver cups to compete for and \$250 in gold specials, with other specials too numerous to mention.

The Wisconsin State Show is one of the oldest and best in the middle west, and has grown steadily year after year, until now it has no peer among state shows.

Judging will be done by James A. Tucker and W. S. Russell, two of the best known and well liked judges of the present day, who have no superiors, and their engagement alone guarantees every exhibitor a square deal for himself and his birds.

The shipping facilities of Oshkosh are unsurpassed and special arrangements have been made with all express companies to assure quick and careful handling of the birds.

The exhibition hall is a large and well lighted building, in the heart of the city, and there is cooping room for 2,500 fowls.

Oshkosh being an interurban center, prospective purchasers come from the entire Fox River valley, and the total amount of sales transacted during the state show is always very large.

The premium list will be issued December 1, 1909, and is a thing of beauty in itself, besides giving a full and complete statement of facts concerning the exhibition which are of interest to every prospective exhibitor.

If interested write to Carl H. Krippene, secretary, Oshkosh, Wis.

MISSOURI STATE FAIR.

This year's state fair for Missouri was the greatest event that has been pulled off in the line of a fall show in the southwest. While the number of fanciers in attendance was small compared to the number of them who sent choice birds, still the few who were on hand even for the short time they stayed made the show one to be remembered.

Superintendent S. J. Tetley, of Farmington, was at all moments willing to aid the breeders who showed, and Assistant Heethier, of Huntsville, who has superintended more big shows in the Southwest than any other man, had the active care of the 2,000 birds on exhibition.

The judging was done by John Hettich and E. C. Branch, who served creditably. These judges are becoming better known every season as doing their work in a way that excites favorable comment.

Nearly every journal devoted to poultry was represented.

M. S. Brady, Richards, Mo., breeder of Buff Orpingtons, won three blue ribbons, first cock, first hen, first pen old fowls—these ribbons on some extra choice birds.

Tom H. Woods, Fayette, Mo., fancier and one of the leading breeders of S. C. Brown Leghorns, was a visitor to the fair and commenced his season's advertising with us in this issue. He is breeder and owner of Missouri King, one of the greatest cock birds of the breed. Mr. Woods is offering 100 cockerels for sale of Missouri

A One-Piece Roof

The same space covered with a single roll of Ruberoid roofing would require at least 600 shingles.

600 separate pieces of wood, each inclined to warp a different way. 1,800 exposed edges—1,800 chances for leaks.

Yet a roof of Ruberoid, whether it requires one roll, or 100, is practically a one-piece roof.

For with each roll comes our exclusive product, Ruberine cement, with which the seams and edges are cemented together—sealed against warping—sealed against the weather.

A Ruberoid roof is heat proof, cold proof, rain proof. It resists acids, gases and fumes.

Ruberoid Is Fire-Resisting

And it is so nearly fireproof that you can throw burning coals on it without danger of setting fire either to the Ruberoid, or to the timbers underneath.

For the service it gives it is the cheapest of all roofings—whether used on home, barn, outbuilding, factory, warehouse, store.

The first large Ruberoid roof ever laid—a foundry roof put

on in 1892—is still weather tight, still flexible, after seventeen solid years of service.

Today there are 300 substitutes. They have names which sound like Ruberoid. Before they are laid, most of these substitutes look like Ruberoid.

Beware These Substitutes

For there the resemblance ends. For in Ruberoid, and Ruberoid alone, is used the exclusive processed Ruberoid gum. This wonderful flexible gum is the vital element which no other maker can copy.

Another Ruberoid feature is that it comes in colors—attractive Red, Brown, Green—suitable for the finest home. These colors do not wear off or fade—they are a part of the roofing itself.

Before you decide on any roofing, for any purpose, learn about all kinds of roofings.

Simply ask for our free book which tells

the results of twenty years of tests with shingles, iron, tin, tar and ready roofings.

It is a gold mine of roofing knowledge, and will be sent free to all who address Dept. 77G The Standard Paint Company, 100 William Street, New York.

RUBEROID

(REGISTERED IN U. S. PATENT OFFICE)

Be sure to look for this registered trademark which is stamped every four feet on the under side of all genuine Ruberoid. This is your protection against substitutes which many dealers brazenly sell as Ruberoid. Ruberoid is usually sold by but one dealer in a town. We will tell you the name of your Ruberoid dealer when you send for our free book.

THE STANDARD PAINT COMPANY, Bound Brook, N. J.

New York, Chicago, Kansas City, Boston, Philadelphia, Atlanta, Memphis, Denver, San Francisco, Montreal, London, Paris, Hamburg

King blood. It is almost needless to say that Mr. Woods has been the leading Brown Leghorn producer in the West for the past few years and more than deserves the heavy winnings he has made at the big shows.

W. S. Robinson was at the fair working for the Central Missouri Poultry Association's coming show in the last week of November. He has been elected secretary—a good choice.

E. G. Roberts, known for years as America's greatest showman, had out the best string of all varieties that have ever graced his coops.

Modlin's Poultry Yards were represented with an elegant line of bantams and pet stock, all of good quality and in charge of Mr. and Mrs. Modlin, two real additions to the ranks of the fancy.

A. E. Blaker, Parsons, Kan., was at the fair visiting breeders and friends and telling us that his prospects for some crack birds this fall were never better. He is one of the leading breeders in the West and is

and your winnings will be published in the catalog at this show and distributed to thousands of people without a cent's cost to you. A number of incubators will be in operation. Lots of brooders will be filled with chicks and every appliance known to the poultry world will be there. Besides the regular premiums, seven silver cups and cash specials are offered on Buff Rocks. Other varieties share equally as well and some even better. One hundred dollars in cash is offered on turkeys in addition to the regular prizes. If you are wise you will begin now to get your birds in shape and show them at the great Missouri state show at St. Louis, December 6-11, 1909. Entries close November 25. Send for a premium list. T. E. Quisenberry, secretary, Columbia, Mo.

THE CHARLOTTE, N. C., SHOW.

This association is putting forth every effort to make its thirteenth annual show the best yet held, and the indications at

old, reliable, "big" shows of the west. We have held thirteen successful shows preceding this one and have always made good; are striving to make this one the best and will appreciate your help. Owing to the fact that this show is held so early, it gives you a chance to get the opinion of one of the very best judges in the entire country on your birds before sending them to the later shows, and in this connection please allow us to state should you get "in the money" at this show you need have no fears in regard to sending your birds to any show in the country. Our premium list will be out about November 1 and we will be pleased to mail you a copy. Better give us your name on a postal right now while you think of it. A. White, secretary, Parsons, Kan.

ALTOONA, PA.

The Blair County Poultry, Pigeon and Pet Stock Association will hold their first annual show the week beginning December 13, 1909, and expect to make it the best show in central Pennsylvania.

Our premium list is now in the hands of the printer. This list contains the regular cash prizes, a number of special cash prizes and thirty silver cups, which should make all breeders look toward Altoona on the above date.

We are members of the American Poultry Association and W. J. Stanton, of New York, who is indorsed by the above association, will judge our show, which insures a square deal to everybody.

Our association has closed a contract with the Empire Cooping Company to cage every exhibit in their attractive cages, and we have secured the finest hall in Altoona in which to hold our show.

PANA, ILL.

The Pana Poultry Association is putting out some strong inducements to exhibitors to take their birds to the big Pana show to be held at Pana, Ill., December 14-18, 1909.

The interest and enthusiasm for the coming show is growing stronger each week, and the outlook now is that the Pana show will be the best poultry exhibition ever seen in this section of the country. Premiums amounting to \$500 are offered, including cash and specials. Twelve new silver prize cups are offered for best displays of the various breeds, the Paddock cup, a \$65 cup, 18 inches high, offered by the O. H. Paddock Lumber Company, Pana, for the best bird in the show.

It will pay any breeder who has good birds to sell to exhibit at the Pana show. There is a great awakening in the fancy at Pana and vicinity and there will be a good demand for stock. A winning at the Pana show will mean increased business for you. You cannot afford to miss the Pana show. Don't forget the date, December 14-18. Entries close December 11. For show catalog and further particulars address the secretary, J. A. Bickerdike, Millersville, Ill.

DELANAV, WIS.

The Southeastern Wisconsin Poultry Association is now preparing for its twelfth annual exhibition to be held at Delavan, Wis., January 24-29, 1910. The association has an active membership of over 100 and is still growing. This is encouraging the board of directors to put forth strenuous efforts to make the next show the best conducted of any in the middle west. The Southeastern is the oldest continuously organized poultry association in Wisconsin and has never yet failed to pay its premiums fully and promptly. These facts, together with the engagement of W. S. Russell to judge the birds, are proof positive that no exhibitor at Delavan next January will go away dissatisfied. For membership blanks, advertising contracts for the big premium list and all other information address the secretary at Delavan, Wis., J. M. Blackford.

RICHMOND, VA.

The fourth annual exhibition of the Virginia Poultry Association will be held January 13-19, 1910. J. H. Drevenstedt, C. K. Graham and F. S. Morrison, judges. W. R. Todd, secretary, 426 North Sixth street, Richmond, Va.

SOUTH HAVEN, MICH.

The fourth annual exhibition of the West Michigan Poultry and Pet Stock Association will be held December 14-18, 1909. H. H. Coburn, judge; Marshall H. Mackey, secretary.

S. C. Black Minorca hen "Dorothy." As a pullet she won first at the Illinois and Iowa State Shows, 1909, and this fall won second at Indiana State Fair. At West Michigan and Illinois State Fairs this fall she won first. Bred and owned by W. O. Chase, Hillsboro, Ill.

producing some grand birds. See his business announcements in the American for further particulars. Amos Burhans.

TO ST. LOUIS OR "BUST."

Let that be the slogan of every breeder of pure bred poultry east, west, north and south. We have received inquiries for premium lists from New York to California, from Canada to Mexico. We have had to secure more judges. No poultry show was ever held in a building which would surpass the Coliseum in St. Louis for size, beauty, light and convenience. The wagon entrance to the Coliseum will permit fifty wagons to drive in at one time, insuring the unloading of all exhibits under cover and prompt and careful handling. We pay the biggest premiums on the least entry fee of any show in America. We pay every premium and deliver every ribbon before the show is three days old. St. Louis offers as good hotel, express and railroad facilities as any city in this country. The show will be cooped with Spratt's patent uniform exhibition coops. This show is in time to give you the benefit of early advertising and enable you to dispose of your surplus stock. Many exhibitors sold every bird they had last year at our show. Buyers will be here in great numbers looking for breeders and exhibition birds for later winter shows. All who exhibit birds which they desire to sell, and will put the price of each one on your entry blank, this price

this early date give promise that the most sanguine expectations of the members will be realized. It is the oldest poultry association in the southern states. When the first show was held breeders of standard bred poultry in the south were few and far between, but it has gone on from year to year holding shows, each one being larger and better than its predecessor, until now, by the influence it exerts and the quality of its displays it ranks with the foremost of the country. The show will be held in the Auditorium, one of the finest buildings of the south. New coops will be used and there will be room for 5,000 birds without double decking. Fowls from all sections of the country are exhibited at these shows. Everybody who is anybody in the poultry world sends birds to Charlotte, so if you want to be in the swim and win some of the forty silver cups and other valuable specials besides the regular cash premiums to be competed for, join the throng and use the association's slogan as found on thousands of stickers scattered broadcast over the country, viz.: "I will meet you there, Charlotte Poultry Show, Auditorium, January 14-18, 1910. Come!" E. G. Wardin, secretary.

PARSONS, KAN.

The Tri-State Poultry Association will hold its fourteenth annual exhibition December 6-11, 1909. Branch, judge. This show is not an experiment, but one of the

MARSHALL, MO.

The Central Missouri Poultry Association will hold its tenth annual exhibition at Marshall, Mo., on November 23-26, 1909, and we are glad to say they are hanging out the following prizes in cash, guaranteed to be paid before the show closes: First pen, \$8; first on single entries, \$2.50, with singles and pens competing. Catalog will be mailed November 1 to anyone if you will send your name to the secretary, W. S. Robison, Fayette, Mo. Judge E. C. Branch will place the awards on every variety bred. The new as well as old breeds are given a chance to win from first to fifth premiums at this show. Many of the specialty clubs will hang out specials. Meet with them and you will be a winner if you have good birds.

DAYTON, OHIO.

Dayton, the place to show, will give one of the best shows in Ohio December 28, 1909 to January 1, 1910, inclusive. Liberal cash premiums and many elegant cups will be offered, also many specialty club ribbons and medals will be offered at this show. W. C. Pierce, poultry judge; George Ewald, pigeon judge. If interested send for catalog. Meet me at Dayton. Frank M. Betz, poultry secretary, Dayton, Ohio.

PEORIA, ILL.

The Illinois Valley Fanciers' Association will hold its annual show December 14-18, 1909. Keeler and Stanfield, judges; Frank E. Rue, secretary, 420 South Adams street, Peoria, Ill.

BUTLER, PA.

The Butler County Poultry and Pet Stock Association will hold its sixth annual show February 1-5, 1910. A. F. Kummer, judge; F. E. Puff, secretary.

IRA M. CROWTHER, WILLOUGHBY, OHIO.

Mr. Crowther is located on the edge of a beautiful valley on the outskirts of Willoughby, and we found him putting up a large new poultry house to accommodate a large flock of young birds which he has produced this year, and same being necessary because of the greatly increasing demand for Mr. Crowther's "Aristocrat" strain of Rhode Island Reds. The new building is 14x64 feet and will accommodate six hens and feed room. Mr. Crowther will equip it with all modern conveniences, and the best sanitary conditions for the stock will be found here. No necessary expense will be spared in making it convenient and the birds comfortable.

In the large field in the rear of this house we found 500 head of the most promising young Rhode Island Reds we have ever seen. These birds have not been culled, and we saw but very few birds that it would be necessary to discard from the breeding pens, and many birds showed a typical red color and shape that would fit them for any of our largest shows. To say this was a superior flock of young Rhode Island Reds is stating it but mildly, for we were both surprised and pleased with the quality which we saw here; however, this was really to be expected, with the past experience and grand reputation which Mr. Crowther has made as a breeder of high class Rhode Island Reds.

The old stock which had been used for breeding was somewhat ragged at the time of our visit, being in their molt, but their color and shape were in evidence and we handled several grand specimens which were all that could be desired; oblong type with long straight back on both males and females was prominent, and these birds were all actually free from smut and had good wing and tail markings.

At the Willoughby Show, 1909, Mr. Crowther in a hot class of Reds won a handsome silver and gold loving cup, all varieties competing, winning also every first prize, two seconds, four third, two fourths and two fifths.

At the Cleveland (Ohio) show in a hot class he has won in all three firsts, six seconds, three thirds, three fourths, four fifths and Challenge silver cup for best display.

At Geneva, Ohio, he won four firsts, one second and one fourth.

At Painesville, two firsts, three seconds.

He has also won many special ribbons offered by the Rhode Island Red Club of America, National Single Comb Rhode Island Red Club, for both color and shape.

Mr. Crowther's Reds not only have been winning for him for many years past, but also in the hands of his customers. He enjoys the respect and confidence of his fellow breeders and was elected president of the Ohio branch of the Rhode Island Red Club of America.

We cheerfully recommend Mr. Crowther and his birds to our readers. He reports having just made a sale through American Poultry Journal of a pen of birds consisting of six hens and a cockerel to go to Honolulu.

You will find his ad elsewhere in this issue, and if in need of show birds of high class we suggest you write to him for his prices, which you will find very reasonable.—Zimmer.

Your Copy of "Lee's Chicken Talk" Is Waiting for You!

"BOB WHITE"

A fresh, new edition of *Lee's Chicken Talk* just out! This book has scored a tremendous "hit." Every sentence expresses a good thought—a valuable idea or a startling secret. No matter how big your poultry profits have been heretofore, the "Chicken Talk" Book will enable you to increase them.

SUCCESSFUL EGG FARMING

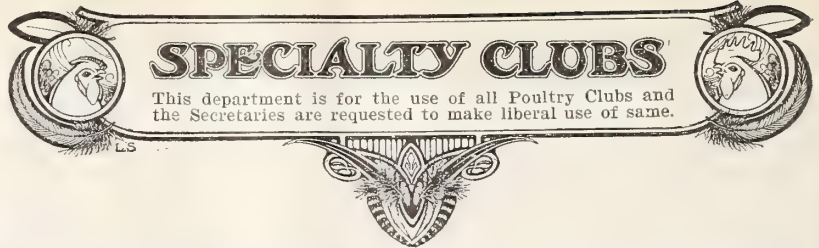

**200 Eggs
a Year
Per Hen**

HOW TO GET THEM

THE seventh edition of the book "200 Eggs a Year Per Hen," is now written, enlarged, and in part rewritten; 96 pages. Contains among other things the method of feeding by which Mr. S. D. Fox of Wolfboro, N. H., won the prize of \$100 in gold offered by the manufacturers of a well-known condition powder for best egg record during the winter months. Simple as a.b.c., and yet we guarantee it to start hens to laying earlier and to induce them to lay more eggs than any other method under the sun. The book also contains a recipe for egg food and tonic used by Mr. Fox, which brought him in one winter day 68 eggs from 72 hens; and for five days in succession from the same flock 64 eggs a day. Mr. E. F. Chamberlain, of Wolfboro, N. H., says: "By following the methods outlined in your book I obtained 1496 eggs from 91 R. I. Reds in the month of January, 1902." From 14 pullets picked at random out of a farmer's flock the author got 2,999 eggs in one year—an average of over 214 eggs apiece. It has been my ambition in writing "200 Eggs a Year Per Hen" to make it the standard book on egg production and profits in poultry. Tells all there is to know, and tells it in a plain, common-sense way.

Price 50 cents; or with a year's subscription to **AMERICAN POULTRY ADVOCATE**, both for 75 cents; two-years' subscription and book for \$1.00, or given free as a premium for two yearly subscriptions at 50 cents each. Our paper is handsomely illustrated, 44 to 84 pages, 50 cents per year, 3 months' trial, 10 cents. Sample free. CATALOGUE of poultry books free.

AMERICAN POULTRY ADVOCATE,
629 Hogan Block, Syracuse, N. Y.

This department is for the use of all Poultry Clubs and the Secretaries are requested to make liberal use of same.

TO BREEDERS OF SILVER PENCILLED WYANDOTTES.

We wish to again call the attention of the breeders and admirers of Silver Penciled Wyandottes to the benefits to be derived by becoming a member of the National Silver Penciled Wyandotte Club. This is a newly organized club and has no connection whatever with any other club formerly in existence. It has been organized to enlighten and instruct breeders and fanciers with the high excellence, superior laying and market qualities of Silver Penciled Wyandottes, to disseminate reliable and useful information and to further the interests of every breeder and lover of this most beautiful and useful variety of the Wyandotte family.

In union there is strength; co-operation is the key to success. Will you join us and assist us in elevating and maintaining the position to which Silver Penciled Wyandottes justly deserve?

We are going to offer handsome club badges at all the leading shows of the country, to be competed for by club members only. Final arrangements have not been definitely decided for the annual club meeting. If you wish to have a voice in the selection of a location join the club at once and state your preference. Every suggestion for the welfare of the club will be considered and complied with as far as practicable.

Brothers, "get busy." Make a noise like a wideawake, progressive Silver Penciled Wyandotte breeder. Send \$1 for membership and \$1 for annual dues to the secretary, which will entitle you to all the benefits and privileges accorded each and every member of the club.

We can and will help you and help the breed. Will you help the breed by joining the club?

E. S. Carver, president, Columbia City, Ind.; James Wason, secretary and treasurer, Grand Rapids, Mich.

SILVER LACED WYANDOTTE CLUB OF AMERICA.

There will be a surprise in store at the coming winter shows for every lover of the Silver Laced Wyandottes. I have a dozen letters from breeders saying they have them better this year than ever before.

The club meeting will be held in connection with the Chicago show and special cash prizes to the amount of \$50 will be offered. At the Missouri State Show, which will be held in St. Louis, December 6 to 11, 1909, cash specials to the amount of \$40 will be offered. In addition the club ribbons, acknowledged to be the handsomest offered by any club, will be offered at every show where proper announcement is made in the premium list.

All these prizes, however, can only be competed for by members of the Silver Laced Wyandotte Club.

The club now has over 100 active, wide-awake members. Club catalog and blank application will be mailed free to all inquirers. The dues are \$1 per year. Write to E. S. Tarbox, secretary-treasurer, Yorkville, Ill.; Prof. Waldo H. Dunn, corresponding secretary, University of Wooster, Wooster, Ohio, or the undersigned for further particulars. Henry Steinmesch, president Silver Laced Wyandotte Club of America, St. Louis Mo.

INTERNATIONAL ANCONA CLUB.

The new International Ancona Club, which was organized recently for the purpose of developing our latent and dormant forces of Anconism, is meeting with remarkable success, which already assures prosperity for the club, thus meaning a great advancement for the Ancona fowls, as well as worthy, profitable and advantageous benefits to their energetic promoters. The officers of the new club are as follows: President, H. C. Sheppard, Berea, Ohio; vice-presidents, Dr. Guy Blencoe, Alma Center, Wis.; B. C. Neely, Denver, Colo.; H. E. Beebe, Waterford, Conn.; sec-

retary-treasurer, W. P. McNary, Bannock, Ohio; auditor, Rev. Bockstahler, Booneville, Ind.; executive committee, Henry Gers, Elgin, Ill.; H. M. Bedford, Strongsville, Ohio; Ira N. DeLine, Olympia, Wash.; Canadian vice-president, W. M. Coats, Vancouver; English vice-president, J. W. Sykes, Bury, Lanc; Mexican vice-president, Dr. Fye, Durango. In the state secretaries' positions a majority of the appointments have been made, although a few vacancies yet remain, but will be speedily filled with capable men. Financial matters were placed on a sound and substantial foundation before launching the club, which means much to its members. The first Year Book is now ready for distribution to all interested upon request. The club is offering ten exceptionally fine ribbons at every poultry show; hundreds of these special offers have been mailed. Secretaries, if you have not received the notice, write to me at once. Breeders, these ribbons, open to competition by members only, is but one of the many benefits that you will derive from membership, the cost of which is \$1 for one full year, so do not delay in joining—the quicker you do so the more beneficial it will be to you personally. W. P. McNary, secretary-treasurer, Bannock, Ohio.

THE NATIONAL GOLDEN WYANDOTTE CLUB.

The successful campaign of this club has placed it among the other leading clubs of the day and arrangements are being made and, in fact, carried out already whereby the breeders of Golden will be much more benefited by membership. The list of special silver cups, cash prizes and ribbons to be given at their National Club meeting at the Chicago show December 7 to 12, is a very large one, and is an assurance of the largest class of Golden ever exhibited. The club is requesting that all show secretaries place the following special ribbon offer in their premium list and notify the club secretary at once in order that he may forward the ribbon forms:

"The National Golden Wyandotte Club offers five special ribbons, one each for best cock, best hen, best cockerel, best pullet and best pen, to be competed for by club members only, without any other restrictions or reservations placed upon the awarding of them. Membership fees and dues are \$1, payable to W. G. Smith, secretary-treasurer, Bannock, Ohio, which amount pays in full your fees and dues for one year from date you make application for membership. All Golden Wyandotte breeders should join at once in order to be in a position to compete at our show for these special ribbons, which is but one of the many benefits to be derived from membership."

NOTICE TO SHOW SECRETARIES.

The White Plymouth Rock Club offers the following to all shows whose secretaries comply with the following rules, viz.: Printing this notice in their premium lists and mailing a marked copy of same to Charles H. Ward, secretary, Bethel, Conn.:

"The W. R. P. Club offers five (5) handsome ribbons, one each for best cock, hen, cockerel, pullet and pen, to be competed for by club members only whose dues are paid to July 1, 1910, at least three days before the show. There must be two or more members competing to secure award of ribbons, which will be sent direct to winners on order of show secretary. Dues are \$1 per year. For application blanks to join club write the secretary-treasurer, Charles H. Ward, Bethel, Conn."

AMERICAN BUFF LEGHORN CLUB.

This club offers a special prize to every poultry show in the United States and Canada that will publish in their premium list and send copy of the same to the undersigned the following notice: Orders for ribbons will be sent free on request from the secretary, George S. Barnes, secretary, Battle Creek, Mich.

AMERICAN WHITE ORPINGTON CLUB.

The American White Orpington Club has just issued a club book on White Orpington fowls, and it is one of the handsomest and best arranged that has yet been compiled. It contains several timely articles on this grand breed, and anyone interested in White Orpingtons should certainly have a copy. It tells all about the breed that one should know. Copy will be mailed by the secretary, F. S. Bullington, box 328, Richmond, Va., upon receipt of request and 10 cents in stamps. The American White Orpington Club is offering a handsome silver cup at many of the other shows throughout the country. These special club prizes are open for competition to members of the club only who are in good standing, and if you are a breeder of White Orpingtons you should certainly become a member of this live organization, which has as its officers the leading breeders of Whites in the country. Their dues are: Initiation, \$1, which includes first year's dues; year's dues are \$1 or life membership \$10.

SECRETARIES OF ALL POULTRY SHOWS, ATTENTION!

In order that all may be notified, I take this opportunity of requesting all show secretaries to print in their premium lists the following notice and send one to me: National Silver Penciled Wyandotte Club offers a set of ribbons for the best cock, hen,

PRIZE BIRD AT MISSOURI STATE POULTRY SHOW, TRENTON, MO., DECEMBER, 1908.
—VIC HOBBS.

cockerel, pullet and pen. These ribbons will be of handsome silk with beautiful half-tone photograph of Silver Penciled Wyandotte on a button at the top. Only members whose dues are paid before the show starts can compete. The secretaries will send me list of S. P. W. exhibitors, with winners, and I will mail ribbons to all winners. Initiation fee, \$1. Yearly dues, \$1. James S. Wason, secretary N. S. P. W. Club, Grand Rapids, Mich.

AMERICAN CORNISH CLUB.

The annual meeting and election of the American Cornish Club will be held in connection with the great International Show at Buffalo, N. Y., Thursday, January 27, 1910. New club catalog and other important matters will be brought before the club. We earnestly request every member to attend this meeting and bring his birds with him. H. C. Hayes, secretary-treasurer, Eureka, Ill.

A CORRECTION.

In our October issue, on page 884, we called the attention of our readers to the new 30-page catalog just issued by the National Black "Leghorn" Club. This should have read National Black Langshan Club. M. S. Barker, Thorntown, Ind., is secretary of this club. Write him for further information.

ILLINOIS LEAGUE OF POULTRY ASSOCIATIONS.

The Illinois League of Poultry Associations will hold the following shows: At Quincy, Ill., November 29-December 4, 1909; Russell, Ill., December 4, 1909; Quincy, Ill., December 11, 1909; At Kewanee, Ill., December 6-11, 1909; Warwick, Ill., December 11-12, 1909; At Princeton, Ill., December 13-17, 1909; Warnock, Ill., December 13-17, 1909; At Princeton, Ill., December 13-17, 1909; Warnock, Ill., December 13-17, 1909; At Princeton, Ill., December 13-17, 1909; Warnock, Ill., December 13-17, 1909.

ENTERPRISE

Meat and Food Chopper

The only true Meat Chopper—the only chopper that has a razor-edge, four-bladed steel knife and perforated steel plate that actually cuts meat, fish, vegetables, fruits, bread, etc., without crushing or mangling.

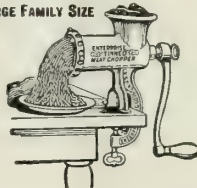

The "ENTERPRISE" is the strongest chopper made—has the fewest parts—is the simplest in construction. Easily cleaned. Cannot rust.

For Sale at Hardware and General Stores Everywhere.

No. 5, Small Family Size Chopper, \$1.75. No. 10 Large Family Size Chopper, Price, \$2.50.

"ENTERPRISE" Meat and Food Choppers are made in 45 sizes and styles for Hand, Steam and Electric Power. We also make cheaper Food Choppers but recommend the above. Illustrated catalogue FREE.

No. 10
PRICE \$2.50
LARGE FAMILY SIZE

Sausage Stuffer and Lard Press

The quickest way, the easiest way, the cheapest way to make the best sausage and lard is to use the "ENTERPRISE" Sausage Stuffer and Lard Press—two machines in one. It is an absolute necessity at butchering time.

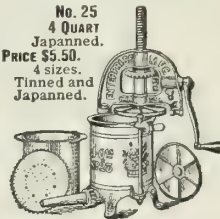

It is strongly made and every part does its work without a hitch. Plate fits perfectly and cylinder is bored absolutely true. Pressure will not cause meat to rise above plate. The patent corrugated spout prevents air entering the casing, thus assuring perfect filling and preservation of sausage.

Can be changed into a Lard or Fruit press in a jiffy.

Sold by Hardware Dealers and General Stores everywhere.

Write for catalogue.

No. 25
4 QUART
Japanned.
PRICE \$5.50.
4 sizes.
Tinned and Japanned.

Bone, Shell and Corn Mill

A necessity to farmers, poultrymen and all who keep poultry. A splendid general, all-round mill. Grinds poultry feed and makes bone meal fertilizer.

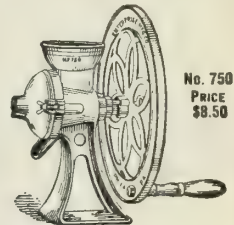

Grinds dry bones, oyster and other shells, corn, etc. Pays for itself in a short time. Size shown in illustration (No. 750, Price \$8.50, weight 60 lbs.) grinds 1½ bushels corn per hour.

Look for the name "ENTERPRISE" on the machine you buy.

We also make other household specialties—all bearing the famous name "ENTERPRISE"—Coffee Mills, Raisin Seeders; Food Choppers; Fruit, Wine and Jelly Presses; Cherry Stoners; Cold Handle Sad Irons, etc., etc.

Ask for them at Hardware and General Stores.

Illustrated catalogue on request.

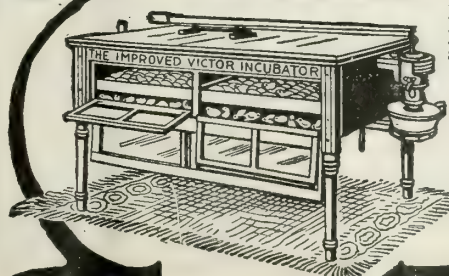

No. 750
PRICE \$8.50

The "Enterprising Housekeeper" is a valuable book containing over 200 selected recipes as well as numerous kitchen helps. Sent anywhere for four cents in stamps.

THE ENTERPRISE MFG. CO. OF PA., Dept. 33 Philadelphia, Pa.

Start Early

The greatest profits are from the first and best spring chickens on the market. Do not be satisfied with old, easy going methods. Get the best equipment—produce the best—and make the most money.

Write for our catalogue telling why our machines turn 90 per cent of the eggs into chickens and why our prices are lowest. We will send you names and addresses of people in your vicinity using Victor Incubators and Brooders so that you can get first-hand information about us and our machines.

Please tell us whether you are interested in beginners' outfits or larger machines. If you know of neighbors who expect to get new incubators we will be glad to send them our catalogue.

GEORGE ERTEL CO.

Established 1867

INCREASING THE EGG YIELD.

It is most important that the poultry keeper should, as much as possible, increase the yield of eggs from his flock when prices of eggs are high. It is also equally important that he should keep his birds in good condition during the fall, winter and spring, when they are more liable to sickness, and if he shows his birds at the local or national shows he must, of course, have them in first-class shape.

In accomplishing these purposes a high-class tonic food, a food that adds to the ordinary feed supplemental and additional tonics and nutriment that enables it to build up all the component parts of the body symmetrically and uniformly to a perfect bird in perfect egg-laying condition is one of those articles the poultry raiser should always be on the lookout for.

Experience has shown that only a true supplemental food can accomplish this; it

is impossible to get the desired results out of a food of which the base or main ingredient is mill feed. A supplemental food must consist of supplemental materials such as iron, ginger, oil, beef meal, sunflower seeds, albumenous compounds and red pepper, with perhaps a little special shell.

Blatchford's "Fill the Basket" Poultry Meats has been thoroughly tested and tried. The manufacturers assure us that no expense or trouble has been spared to bring it right up to date and in full accordance with the latest findings of the various agricultural experiment stations and the largest and best scientific breeders and feeders of poultry, and that from their new plant at Waukegan, Ill., it is being shipped in better quality than ever before.

We understand that Blatchford's "Fill the Basket" Poultry Meats is thoroughly mixed and prepared for digestion and the materials are carefully selected of the best quality only and from the extent of the

business in it and from the testimonials received showing the satisfactory results obtained from feeding it, we recommend all poultry raisers to give it a trial.

Letters or postals addressed to Blatchford's Calf Meal Factory, Waukegan, Ill., will procure valuable particulars free which every poultry raiser should have. This firm has been selling and dealing with the farmers, stock owners and poultry raisers for over 100 years and their business must be firmly established in giving good values.

ADJUSTABLE FEEDER.

Elsewhere in this issue will be found the ad of the National Adjustable Feeder Company, P. O. Box 83, Cincinnati, Ohio. These people come to us highly recommended and as their feeder is an entirely new article on the market and needed very badly by everyone in the poultry and pigeon business, we feel sure that our readers will be greatly interested and will write them for full information.

It is the only adjustable feeder that has been brought out, and, while this is the first advertising, the article has been in use, with the best of results, for some time.

This feeder not only saves the feed from waste by the fowls but keeps the feed dry under any conditions, adapting it for use both as an inside and an outside feeder better than anything else on the market. It is easily adjusted for any kind of dry feed, and effectually prevents the waste and contamination of the feed by the fowls, not only saving in feed but increasing the health and growth of the fowls. Is carried in stock in several lengths, and can be furnished in any extra length required.

Mr. C. L. Patterson, Columbian Wyandotte specialist, Barberton, O., writes as follows: "Owing to limited quarters, I have moved my entire poultry plant onto a large range, where all local conditions are the best that nature could provide in requirements that are conducive to good poultry raising. My place is situated in the western part of Barberton, O., within one mile from town. Here I have unlimited range for growing young stock—a fine wooded lot and fresh spring water at all times. The ground slopes southeast, and the colony system will be carried out for both summer and winter quarters.

"I have enjoyed a fine business in Columbians this fall. All sales for exhibition purposes for the past two months have proven their merits in the hands of my customers throughout Ohio, eastern Pennsylvania and New York states.

"I have spent a long time, coupled with great care and expense, in building up a strain of Columbian Wyandottes that are equal to the best in this country. Difficulties have been surmounted in the past, and I was not satisfied until I had in my possession birds nearly equal to the Light Brahma markings.

"It has been my policy to remain quite from the poultry fraternity at large, and the press until I had produced the ideal in a large degree. My experience in poultry raising dates back some sixteen years, in the palmy days of popularity of Buff Rocks, at which time our business was conducted in the name of James E. Patterson & Son. "My new home and plant will be known as 'Grey View Poultry Yards,' and my strain of Columbian Wyandottes is the 'Grey View Strain'—a trade name justly earned through persistent efforts and painstaking. A square deal and full value is my motto with all."

P. M. Wickstrum, the Queen incubator man, Lincoln, Neb., reports a large increase in the output of Queen incubators and brooders last season over any former season. Surely the Queen Incubator Company is coming rapidly to the front—and well it should, as Queen machines are giving the best of satisfaction in every part of the country. A copy of the Queen Poultry Guide and catalog will be mailed free to all who request it. Write to Queen Incubator Company, Box 4, Lincoln, Neb., and get one of these big free books and special price lists.

Workshop Notts, Eng., Sept. 28, 1909.
Milton W. Brown, Cheviot Poultry Farm, Cincinnati, Ohio.

Dear Brown—I am sending you by the SS. Arabic, which sails from Liverpool October 2, thirty-four White Orpington pullets and eight cockerels. I doubt if you could find similar quality in any poultry yards in England. I do not hesitate to say that they are the finest lot of White Orpingtons that have ever been exported from this country. I say this to you with the utmost confidence. Faithfully yours,

Frank Sissons.

BARRED PLYMOUTH ROCKS

Large and prolific laying strain. Bred for eggs. Size and perfection for eighteen years. Let me prove to you the quality of my birds and their great laying qualities by placing an order for a pen, trio or a fine cockerel, good enough for the winter show. Hundreds for sale cheap. Circular free. Wm. J. Davis, R. R. 1, Eaton, Ind.

Davidson's Rouen Ducks, Toulouse Geese and Buff Rocks

Pioneer breeder of Mammoth Exhibition Rouen Ducks and Toulouse Geese. The finest flock in the country fit for any competition for sale at let live prices. Buff Rocks a specialty for ten years. Pittsburgh and State Fair winners. Write today. Can please the most exacting.

ROBT. PARMENTER : : KNOXVILLE, ILLINOIS

GOLDEN WYANDOTTES

At the Great Chicago Show, December, 1908, we won second cock, first cockerel, first hen and third pullet, and at Kansas City, January, 1909, first cock, first cockerel, first hen, and first and second pullets. Isn't this proof that we have the goods? Hundreds of choice young birds for sale. We always guarantee satisfaction.

Simmons Bros. : Box 880, : Stockton, Illinois

Orpington Importation

We have just imported from Frank Sissons what he calls the best White Orpingtons that ever left England—the equal in type to our wonderful Blacks. We will sell twenty of these birds. Here is a golden opportunity to reach the king row at a bound. We also have several hundred American bred cockerels in Buff, White and Black at extremely moderate prices, quality considered. Cata. free.

Cheviot Poultry Farm, Brown & Coleman, Cincinnati, Ohio

CLARK & PIKE, WILLOUGHBY, OHIO, BREEDERS OF WHITE PLYMOUTH ROCKS.

In conversation with these gentlemen we were convinced that it was not quantity but quality for which they were striving, and their bird must be high ideal otherwise it is discarded as unfit for their use or to sell to their customers. Last year they bred from five carefully mated pens, and each male demonstrated his ability to go out in home competition and win, otherwise they would not have used him. One cock bird had 11 first prizes to his credit. At the Willoughby show last year in hot classes of good birds Messrs. Clark and Pike won three firsts, four seconds, four thirds, also a silver cup and four other specials including White Rock Club ribbons, and their first prize pullet, "Princess," received a score of 94½ points, being cut one-half point for weight and one-half point for broken flight feather. This bird was much admired by all White Rock breeders and was considered a most splendid specimen. They have about 125 head of birds for sale, many of which are sired by their champion cock bird, winner of 11 first prizes. All birds purchased of them are guaranteed to be as represented and if unsatisfactory they can be returned and money will be cheerfully refunded. You will find their ad. appearing regularly in our columns and we suggest you look up same and write to them if in need of White Plymouth Rocks. Their address is Clark & Pike, Willoughby, Ohio.

AT NEW YORK STATE FAIR.

In reporting the New York State Fair in our October issue we failed to make any mention of the grand winning made by J. F. Van Alstyne, Niverville, N. Y., who made only four entries and won first on young pen of Columbian Wyandottes, first on young pen of Silver Wyandottes and first Silver pullet, and second cockerel. This winning was made in strong competition. Mr. Van Alstyne and his stock is well known to our older readers, as he has been an advertiser with us for several years, but to our new subscribers we wish to say that Mr. Van Alstyne does business on honor and his stock will be found just as he describes them, and as he has some of the very best Columbian and Silver Wyandottes, he

can supply the wants of either breeder or exhibitor. Write him for prices and particulars, and mention American Poultry Journal.

FREE LEG BANDS.

It is not very seldom that an advertiser actually offers articles of value for nothing as the Kemiform Company, of Cleveland, Ohio, are doing this month. Without any charges whatever they give

First prize Golden Wyandotte cockerel at Chicago, December, 1908, and Kansas City, January, 1909. Bred and owned by Simmons Bros., Stockton, Ill.

away fifteen of the well-known Champion leg bands for marking poultry with each box of Kemiform, the world's most useful poultry remedy. This splendid preparation is guaranteed to be the safest and quickest cure for almost all common poultry diseases. A tablet placed in the drinking water occasionally fortifies the system and keeps the whole flock in a tip-top money-making condition. Whether your birds are sick or well,

you should keep Kemiform always on hand. It is just the thing to save the little chicks next spring. All fowls need it. Look up the Kemiform advertisement in this issue and take advantage of this most liberal offer, as it may not appear again.

BROODING SYSTEM.

In the Candee brooding system we have a new principle of hover arrangement with hot water heat and automatic temperature regulator, which insures against loss of chicks, waste of time, labor and money. This system of brooding chicks is not a theory, but has been in successful operation for the past seven years.

These people have recently issued a very neat catalogue which gives full particulars about this system and shows in plain figures just what you can save by installing this system. It will not cost you anything to get a copy of this catalogue, and we suggest that you write for it today, and mention American Poultry Journal.

DON'T MISS THIS CHANCE.

Just out—the only pencil on the market that supplies you with paper instantly for taking down memorandums, etc. Be the first one to have one of these paper supply pencils in your neighborhood by getting it at the special introduction price of 25 cents for the pencil and two extra rolls, each containing six feet of paper for pencil, packed in a box. This price will be for only a limited time. Send your order at once with 25 cents in coin or postage to the O. K. Supply Company, 11 J., Sacramento Blvd., Chicago.

Z. D. Struble, Bascom, Ohio, breeder of S. C. Buff Orpingtons, starts a display ad with us this month. This is the breeder that went to Madison Square Garden last winter and won first pen with fifteen pens competing. The writer had the pleasure of looking over this pen while at the garden and must say that it was without doubt one of the best pens of Buff Orpingtons ever exhibited. He is now offering birds bred from this pen and will ship them C. O. D. What more could you ask? He must have faith in the quality of his stock or he would not make this offer. If you want good Buffs write him for full particulars, and mention American Poultry Journal.

PUBLISHED BY
AMERICAN POULTRY JOURNAL,
222 Dearborn Street,
CHICAGO, ILL.

WHY POULTRY PAYS AND HOW TO MAKE IT PAY

A book for the beginner in poultry raising and for those engaged in it who are interested in securing from the business the greatest profit obtainable. This book tells you how to start right, how to succeed with poultry, how to line breed, how to win at the shows, how to breed and prepare fowls for market, how to feed for the production of eggs. Also contains a chapter on Poultry Diseases and simple remedies for same. Gives instructions on incubators and brooders and much other valuable information, and is profusely illustrated with ideal drawings of Standard fowls.

We are selling this book at the popular price of **50 cents**. This book and one year's subscription to American Poultry Journal for only **75 cents**. Send all orders to

AMERICAN POULTRY JOURNAL PUB. CO.

SINGLE COMB WHITE LEGHORN
SPECIALIST.

J. E. Graham, of Key, Ohio, enters the columns of our journal this month as a display advertiser. He has enjoyed a reputation for many years past as a "square deal" man, and his winnings in the show

SCIENCE AND POULTRY.

Why is it that in every poultry paper you pick up you find articles, sometimes column after column, about the ways and means of exterminating lice and mites? Why is it, too, that in those same papers you see column after column devoted to talks on

ing and keeping of fine stock must be done by the right methods. They know that freedom from lice and freedom from filth are the A B C of right methods.

The Poultry Dust Bath Company struck the key note of scientific poultry raising when it offered Dustyne, its sanitary dust bath, to the poultry world. Dustyne combines in itself all of the elements necessary for the fight against vermin and filth. It is a louse powder sold so cheap that it can be used as a dust bath. It is an absorbent material without an equal to promote cleanliness and general sanitary conditions in poultry houses.

The manufacturers of Dustyne will gladly answer any questions on scientific poultry raising and keeping. They have a poultryman of experience in charge of their information department. Write to them for information, also circulars, testimonials, etc., of Dustyne. Address Poultry Dust Bath Company, Whiting, Ind.

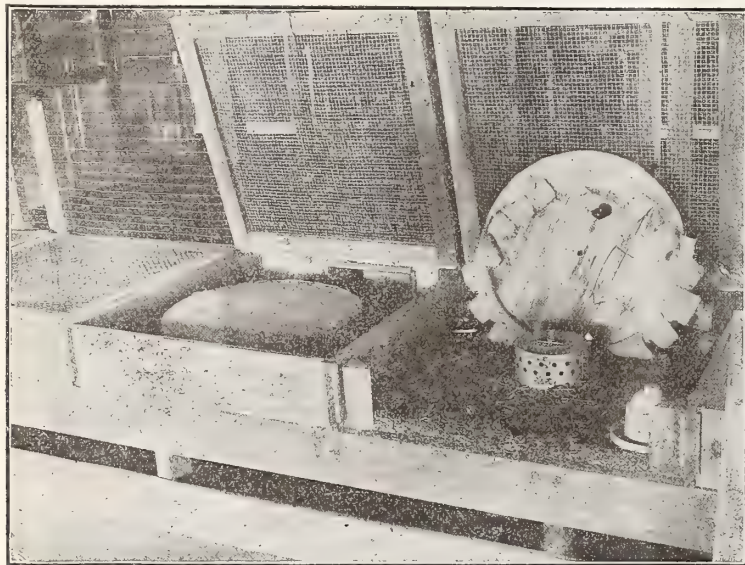

SANITARY CONCRETE NESTS.

The time of year is at hand when the poultry raisers are putting their stock in winter quarters and are getting ready for the laying season. One of the most important problems which each one has to face is the matter of nests. One of the most simple and satisfactory nests is one made of concrete from the plans issued by the Clarke Specialty Company, Westboro, Ohio. This nest is absolutely indestructible, is mite and vermin proof, and can be made at home at very little expense from the plans and directions issued by the above company, whose ad is to be found in another column.

As for Mann's latest model bone cutter, the more poultry keepers know about that the better for them. It is making money right along for thousands of progressive poultry keepers and will make money for anyone having a dozen hens or more.

The fact that it is sent to any responsible party on a wide-open, free trial offer, without any money in advance or any deposit, is plenty of proof of its satisfactory qualities. But to return to the book, "Worms and Bugs," don't fail to send for a free copy. Address F. W. Mann Company, Box 56, Milford, Mass. It will take you out of a class who consider a shortage of eggs a necessary evil of winter.

Augustus W. Schroeder, Chestnut, Ill., at the late Illinois State Fair on his Silver Laced Wyandottes won 2d cockerel, 1st pullet, 3d pen. No old stock shown.

CANDEE HOT WATER BROODER.

The above cut of hover and interior view of house shows how the system is installed, and how the brooder is ventilated; also how they guard against bottom heat.

room has proven his birds to be of exceptional quality. He always carries away his share of the first prizes at such shows as the Ohio State, Pittsburg, Cincinnati and the West Virginia State Fair. At the present time Mr. Graham is offering fifty high-grade cockerels of the famous D. W. Young strain at a very low figure. Those writing him will kindly mention the American Poultry Journal.

sanitation and sanitary conditions in poultry yards? The reason for this is the same reason which has made the hospitals of our country models of hygiene and asepsis. It is because this is a scientific age. Science has entered into the methods of every progressive industry of the day. Our poultrymen have not been slow to appreciate and use science in the breeding of their birds, and they realize keenly that the rais-

THE PEERLESS "RINGLETS"

True to Their Tradition, Are Again Great Winners at New York

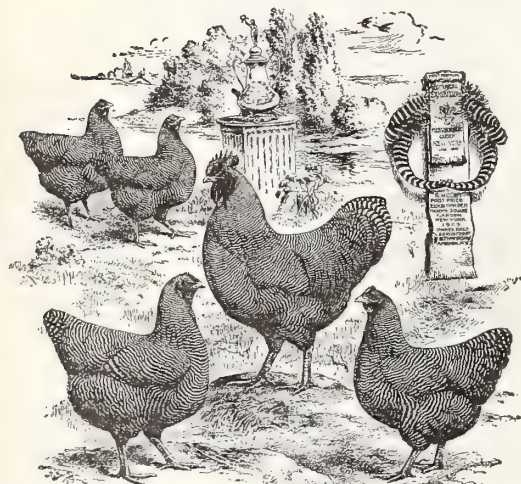

At the Imperial Madison Square Garden Show, 1909
E. B. Thompson's Barred Plymouth Rocks

win First, Third and Special Prizes on Exhibition Pens; special prize Cock; special prize Cockerel; numerous specials on hens and pullets, and the Harding \$50 Challenge Silver Cup offered for best exhibition pen. The race at this 1909 New York Show was a Marathon for speed and quality, and my First Prize Silver Cup Exhibition Pen was declared by expert opinion to be the finest ever exhibited—a paragon of perfection—and created a sensation as the finished achievement in modern Barred Rock breeding.

The "Ringlets" are always imitated—but never equalled. They are first in record, first in quality and first in popularity. Their record at New York for 22 years is **GOLD LINED**—it is a calendar of successive victories demonstrating step by step their irresistible advance towards the world's absolute leadership.

The Enormous Prestige of the "Ringlets" Created by Superlative Quality Has Made Them the Standard by Which All Other Barred Rocks are Judged

I now have on my farm the largest and finest lot of superior exhibition and breeding birds I ever owned; they show the "Ringlet" barring and the sharp contrasting colors that win under all judges.

"Ringlet" First Prize Exhibition Pen and Winners of Sweepstakes Silver Cup at Madison Square Garden, New York, 1909.

Richly illustrated 58-page catalogue mailed upon request: it is full of original pictures of New York winners from life. 1000 grand breeding and exhibition cockerels for sale. Elegant hens and pullets in any number. Show birds fit to win in any competition. You may have the product of my skill, reaped by 30 years' experience, at reasonable prices. Your wants will have my very best and personal attention.

RIVERDALE FARM, WHITE PLYMOUTH ROCKS, H. W. HALBACH, PROP., WATERFORD, WIS.

Reported by C. W. Zimmer, Representative of American Poultry Journal.

You can reach the Riverdale Farm by taking the Milwaukee Electric Railway to Waterford, which is 20 miles southwest of Milwaukee. The farm is located on the edge of the town and derives its name from its proximity to the Fox River, and presents a pleasing view to the eye, especially as Mr. Halbach now has it arranged with one continuous long house about 18x160 feet. This is divided into 16 pens, 10 feet each, with yards 185 feet long on which is planted sufficient fruit trees to furnish plenty of shade. We found these yards sown down in rye for green food.

In addition to the main hen house are about six colony houses 10x14 feet, besides 25 colony coops are used for young stock. In a two-story building, which is connected with the main house, is located a feed room, work room, where coops are built for shipping purposes, etc., and upstairs is a large training room which is almost a show room within itself, having tiers of coops done up preparatory to shipping out.

A modern waterworks system furnishes water to all houses and yards and the stock never suffers for an abundance of fresh water at any time. The farm lies sufficiently rolling to drain well and the soil being very fertile clover and alfalfa grow in profusion. Mr. Halbach has several fields and puts up a large quantity of alfalfa every year which is fed to his large flock of White Rocks during the winter, furnishing them an abundance of green food.

The colony houses for young stock are placed in fields of alfalfa so that conditions are ideal for the production of large boned, healthy, vigorous birds. The incubating capacity of the farm is about 1,000 eggs with ample brooding capacity for same, but Mr. Halbach also raises a large number under hens.

The Halbach home consists of a handsome modern residence of ten rooms in which are to be found all the comforts

that any home requires. Mr. Halbach also showed us three large handsome silver cups trophies, same having been won in hot competition. Mr. Halbach having spent ten years in breeding this strain and being a close observer, it is to be expected that he would now be producing birds of high quality. In addition to these cups, ribbons and other trophies in large numbers were shown us and the great winning made by Mr. Halbach at the Chicago Show last year should convince anyone that Riverdale White Rocks are pretty close to the Standard.

At Chicago last winter his winnings were first and fourth cockerel, first, third pullet, second, fourth cock, and second, fourth and fifth hen, also a grand prize for first pen and the much coveted prize for best display. This wonderful record was made in one of the hottest classes of White Rocks ever gotten together and should convince you of the foregoing statement.

We saw large numbers of both old and young birds having typical Rock shape with long, straight back which Rock breeders now demand, good yellow legs and bills, a plumage that is white to the skin. Mr. Halbach has some 600 head of young birds, many of which are sufficiently matured to grace any show room, and should you need exhibition or breeding stock you will do well to look up his ad. elsewhere in the columns of American Poultry Journal.

Mr. Halbach not only breeds high class White Rocks but is also a fancier of Holstein cattle, having a small herd of these thoroughbred animals. Besides this Mr. Halbach, with his brother, is owner of a large general store, employing as many as ten clerks, in Waterford. He is, however, ably assisted in producing his White Rocks by his son William, who is a fancier and very enthusiastic about their birds, as well he may be. It is he who looks after all the little details of seeing that the birds are properly watered, the coops properly cleaned, the eggs gathered, etc. He is a big help to his father, in fact he would not be able to get along without him.

Mr. Halbach also has two other sons, each one having his own particular work to do in the running of the farm. Our stay was made very pleasant by the whole family, not forgetting Mrs. Hal-

bach, who provided good things to eat. Not only were we made welcome at Riverdale Farm but we assure any prospective buyer he will receive a cordial welcome and be similarly entertained.

You will also find Mr. Halbach's ad. in every issue of American Poultry Journal. His handsome catalogue can be secured by addressing H. W. Halbach, Box A, Waterford, Wis.

W. R. Graves, Southboro, Mass., the well-known breeder of White Plymouth Rocks and White Wyandottes, entered a few of his birds at the late Tri-State Fair, Memphis, Tenn., where there were over 2,500 birds competing, and won as follows: On White Plymouth Rocks, with six entries, 1st cock, 1st hen, 1st and 2d cockerel, 1st pullet, 1st pen; \$25 special for best cock, hen, cockerel and pullet; \$50 cup for best pen, all Rocks competing; special for best cock in the show; special for best pullet in the show. On Wyandottes—2d cock, 1st hen, 1st, 2d, 3d cockerel, 1st and 2d pullet, 1st pen; grand prize of \$100 in gold for best fifteen birds of any one variety in the show; \$25 special for best cock, hen, cockerel, pullet and pen; \$50 cup for best pen, all Wyandottes competing; \$10 special for best and largest display. This was certainly a remarkable winning, and especially so if one stops to consider the distance the birds were shipped before entering the show room. This is the place to get your show birds for the coming season, as they report having a large number of same quality as above winners. Write today for full particulars, and mention American Poultry Journal.

G. D. McClaskey succeeds Otto Barth as advertising manager of the Queen Incubator Company, Lincoln, Neb., and in him the Queen people have secured a valuable man. Mr. McClaskey knows the printing trade, and having been a poultryman all his life and being an advertising and newspaper man by profession, he has all the qualifications necessary for success in his present field. For five years Mr. McClaskey has officiated as judge at mid-west poultry shows, and he informs us that he will continue to take on a few shows each season. He will also devote some of his time to writing for the poultry and farm magazines.

You Ask What Breed

First Prize Cockerel, Indiana State Fair, 1909
The type the new Standard calls for

to take up when about to buy a few fowls to furnish eggs and meat for your table; or to stock your country place; or to embark into the poultry business as a business. No variety will meet all these requirements and make your venture a success as will

U. R. Fishel's White Plymouth Rocks

There is sold annually from our farm more White Plymouth Rocks than there is reared, all told, of some varieties. The cause for this large demand is the excellent quality of our White Plymouth Rocks. Our winnings at Indiana State Fair, 1909, of every prize offered but 3d cock is surely proof enough that the quality of our birds is better than ever before. Everyone who has tried the U. R. Fishel White Ply. Rocks admit they are

The Most Beautiful and Profitable

of all fowls. We have SEVERAL THOUSAND to sell. EXHIBITION BIRDS good enough to win anywhere. SELECTED BREEDERS that will produce winners for you. UTILITY FLOCKS that will produce the high priced eggs for you.

Send two dimes for 56-page catalog, the most elaborate poultry catalog ever issued. Remember, we give you blood lines in the Fishel White Rocks that no other breeder can give you.

THE U. S.

OFFERS THE GREATEST OPPORTUNITY

in the world to makers of industrial or denatured alcohol. Those who start this production now are bound to come to great rewards. The field is practically untouched, and by starting now you can have things very much your own way. **THE UTILIZATION OF WOOD WASTE BY DISTILLATION.** A general consideration of the distilling apparatus used and the principle involved, also methods of chemical control and disposal of the products; first edition illustrated by seventy-four engravings, 156 pages. This book is cloth bound; it will be sent to any address, postpaid, on receipt of \$3.20. Every farm, ranch and merchant needs a 5-gallon tax-free denatured alcohol distillery apparatus; price \$125.00. A 100-gallon distilling apparatus costs \$700.00. May we have the pleasure of your early reply? We are sincerely yours,

Satisfaction guaranteed or money returned. Circulars free.

GEM INCUBATOR CO., Box B, TROTWOOD, OHIO

Coleman's Eureka Tonic and Roup Tablets

The greatest discovery of the age in the poultry remedy line. These tablets are positively guaranteed to cure **roup and colds**, will build up the fowl's system, guaranteed to prevent the loss of birds due to the exposure and disease contracted in the show room, will put the fowls in the finest possible condition for exhibition. No matter what the disease Eureka Tablets will save your birds.

Don't take our word for it, but read the following unsolicited testimonials from the greatest authorities in the country:

Loring Brown, eminent poultry judge and manager of Belmont Farm, Smyrna, Ga., the South's largest poultry farm, writes: "Please send the tablets by return mail. I have lost no less than \$200.00 worth of birds by not having your valuable remedy."

H. B. Hark, manager of the Hartman Stock Farm Poultry Yards, Columbus, Ohio, the world's largest poultry farm, writes: "They are the very best thing I have ever tried to put a bird that is out of condition into good shape quick. At the Kentucky State Fair a friend came to me with a cockerel that was all in, could not hold up his head. I gave him two of your pink pills. The next morning he stood up like a fighting cock and took one of the first prizes."

Dr. S. R. Harrison, Shelby, Ohio, writes: "Your tablets have saved birds for me that were more than half dead. I cannot find words to speak too highly of this wonderful remedy."

What more proofs of the wonderful power of this remedy could be asked for.

Write today. A liberal sample box will be sent for stamp, or better still, send 25 cents for a full size box containing 65 tablets, postpaid, or 5 boxes for \$1.00.

It pays to be careful in buying roofing, for most prepared roofings look all about alike before they are laid—pretty hard to tell the good from the poor. Many roofings are simply experiments—been on the market so short a time that you can only guess how long they'll last. Better let some one else "try these" new and "improved" kinds, and you pay your money for a kind that has actually proved that it is long lasting—economical.

You can have no better guide than the reputation of the makers and the record of the roofing.

PAROID ROOFING

was one of the first prepared roofings put on the market and from the start it has been the best. In all parts of the world we can point to thousands of Paroid roofs that to-day are as good as new, after years of service. Judge PAROID by its record.

Progressive experience of over 93 years in this one line of business has taught us how to make roofing. We have learned how to make better roofing felt than any other manufacturer—but that is only one secret of PAROID durability.

The felt in a roofing is like the foundation of a house—it's of greatest importance—yet most roofing manufacturers buy their felt where it can be bought cheapest. We make PAROID from start to finish ourselves. We even make our own caps for laying PAROID because the ordinary tin cap is not good enough. Our cap is rust-proof and being square has more holding surface than a round cap.

OUR GUARANTEE is that we will replace every square foot of roofing that proves to be of defective manufacture. If a stronger guarantee than this could be made we would make it. Dealers everywhere sell PAROID Roofing.

FREE BOOKS

For the Man About to Build.

"Practical Farm Buildings" will show you how to save roof money and worry.

"Comfortable Homes" will show you how our NEPONSET WATER-PROOF BUILDING PAPER will save one-third of your coal bill each winter.

If it's a cottage or bungalow our "Prostate Roofing Booklet" tells how to get a more attractive roof than shingles at about one-half the cost.

Write to-day and tell us the kind of building and we will send you the right book and samples.

The Schild Poultry Supply Co. - - - Cleveland, Ohio

"I have seen somewhere about a kind of calico that is made in pretty patterns and will not fade. I can't remember the name. Can you tell me what dress goods they were?"
Anxious Inquirer."

You very likely saw the advertisement

in this paper of Simpson-Eddystone prints, made by the Eddystone Manufacturing Company, Philadelphia, and that is undoubtedly to what you refer.

I can say from experience that these goods make extremely stylish dresses. The

material is of excellent quality, and it is perfectly true that the colors will not fade, even with repeated washing.

Simpson-Eddystone prints are supplied by dry goods stores in almost every community.

Get Our Book of Bargains

Select Whatever You Want in it—Take a Year to Pay

We have just issued a mammoth book, picturing 3,000 new style things for the home. Your copy is waiting. Ask us to send it—Free.

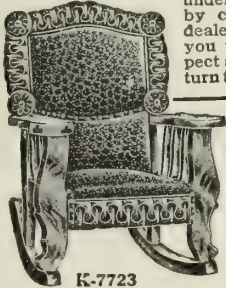

This book shows an endless variety of everything any home needs. And every article has been purchased by us, in one way or another, at remarkable prices.

Factory Cash Prices

We buy up whole factory outputs to get prices which none can compete with. For there are 500,000 homes which buy their furnishings from us. Our output is far larger than the combined output of all other concerns in our line. Our buildings for storing and shipping these goods cover six acres of ground. Our combined capital is \$7,000,000.

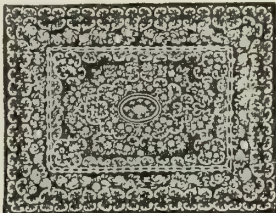

Such buying power enables us to under-buy everyone else. Then we add to our cost just our one small margin of profit. And we sell on credit exactly as low as for cash. No other concern in America does that.

So we guarantee a saving of 15 to 50 per cent under any prices quoted by catalog houses or dealers. If we don't save you that much, we expect and invite you to return the articles to us.

K-7723

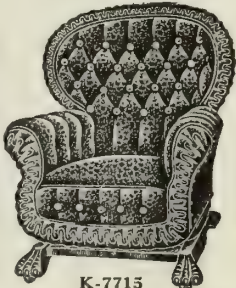

Solid Oak Upholstered Rocker. American quarter-sawn oak. Fabric cord leather, spring seat.
75c first payment; **50c** monthly payments. Total price, **\$4.50.**

\$1.50 first payment; **75c** monthly payments. Total price, **\$8.75.**

K-7715

Luxurious Turkish Rocker. Upholstered spring seat and back tufted and ruffled. Guaranteed fabric cord leather. Very large.
\$1.50 first payment; **75c** monthly; total **\$10.95**

E-3824—Victor Empire Hot Blast. 10-inch firepot. Burns all fuel.
75c first payment, **50c** monthly payments. Total price, **\$4.95.**

E-3794—Marvel Empire Base Burner, with 12-inch firepot. Self feeding.
\$3.75 first payment, **\$1.75** monthly payments. Total price, **\$24.95.**

E-2490—Mutual Empire Steel Range, with 6 covers. Blue steel body, a asbestos lined; 14-inch oven; high closet; porcelain lined reservoir.
\$3 first payment; **\$1.50** monthly payments; total price, **\$21.95.**

Long-Time Credit

We will sell to you on credit without any red tape or publicity—on our open account credit plan. No interest, no security. You may have from 8 to 14 months to pay.

You pay a convenient amount each month while you use the goods and en-

joy them. That is the plan on which nearly all house furnishings are sold to city people. Almost nobody pays cash down. We bring to you, wherever you are, these modern credit conveniences. Yet we sell you at prices which stores cannot possibly quote—often below what they pay.

Don't make the mistake of buying things for your home before you see this book. Write for a copy now.

3,000 Things For the Home At Factory Cash Prices On Credit

Furniture	Silverware
Carpets	Chinaware
Rugs	Graphophones
Draperies	Washing Machines
Stoves	Sewing Machines
Ranges	Baby Cabs
Pianos	Lamps and Clocks

30 Days' Trial

K-7754—Handsome Turkish Couch. Carved quarter-sawn oak frame. Biscuit tufted French Velour covering. Guaranteed steel construction.
\$1.50 first payment; **75c** monthly payments. Total price **\$9.25.**

Sent on Approval

Whatever you select from this mammoth book will be sent to you on approval. You may keep the article 30 days before even deciding to buy. If you are not satisfied in every way—with prices, style and quality—you may send the article back. We will pay freight both ways on it and return your first payment in full.

In this way we offer you absolute protection. You have a whole month to judge the article before you decide to keep it. This applies to everything we handle—to 3,000 things for the home.

Four Free Catalogs

Our General Catalog pictures and describes over 3,000 new-style things for the home. It contains furniture of all kinds, rugs, carpets, draperies, and a full line of household goods except stoves.

Our Stove Catalog shows 70 styles of Empire Stoves and Ranges, costing from 89c up. These stoves are the famous fuel savers, and they pay for themselves in short order.

Our Piano Catalog shows all styles of the Beckman Pianos, at \$100 to \$150 below regular prices.

Our Graphophone Catalog shows Columbia Graphophones and records—all sold on credit.

CONGO

NEVER LEAK ROOFING

Our Guarantee

THE advantage in buying Congo Roofing (3-ply) is that you can be absolutely sure of getting protection from sun and rain for ten years. There is no guess-work about it. With every roll of 3-ply Congo comes a blank Surety Bond Guarantee numbered and ready for our seal and signature as soon as your roof is laid. The guarantee states that if you need a new roof inside of ten years you will get it free and that the National Surety Company will see to it that you get it (or its equivalent in cash). It is legally binding and instantly enforceable document—a real contract such as your own lawyer would draw up for you. Every possible contingency is provided for. Every fair protection is given you. It is the only such guarantee that applies to any ready roofing today! Other guarantees are mere non-enforceable statements that would prove worthless in a lawsuit. But the Congo guarantee is a real guarantee, and it makes you absolutely sure of the amount of service you will get for your money.

When you buy other roofings you buy roofing material whose probable durability is vague and indefinite. When you buy Congo (3-ply) you buy ten years of assured protection, and the guessing does not begin till after the guarantee term expires.

Why buy a Roofing Riddle when you can (just as cheaply) buy a Congo certainty?

UNITED ROOFING & MFG. CO.

Chicago San Francisco

YOU CAN OWN A SMALL FARM

in bounteous southern New Jersey, which, if properly handled, will earn you a good living and provide a happy, healthy home for your family. The cost is moderate; the payments easy. This section famous for successful raising of squabs, poultry, vegetables, fruit, berries, truck, to which soil is best adapted and markets most demand.

5 ACRES \$100
PAYABLE \$5 MONTHLY

Climate mild and seasons early, forcing choice products early into New York and Philadelphia markets when best prices rule. Quick shipments to consuming centers by two main line railroads. Near Atlantic City, and other famous Jersey resorts. Twelve million people within 150 miles and they all must be fed. Pure air and water. Large manufacturing town nearby. Industrious workers with comparatively little capital can make a success in this prosperous, healthy section. Title insured. Booklet free. White people only.

DANIEL FRAZIER CO.
691 BAILEY BUILDING
PHILADELPHIA, PA.

A VALUABLE POULTRY BOOK FREE.

The trouble with the ordinary poultry book, as a medium of information is the conflict of opinions which leave a man right where he started and still unconvinced. One article will be written by a Mr. Jones, who advocates blue spectacles for stimulating egg production, while on another page Mr. Brown recommends tread-mills upon which the fowls can exercise. That may be a trifle exaggerated, perhaps, but it illustrates the fads that, if followed, lead a poultryman to failure and disgust. A mighty good idea is to steer clear of the flighty opinions of the poultry cranks.

A book which no owner of fowls can afford to be without is the brand new 1910 enlarged edition of Conkey's Poultry Book, for it is full of practical directions boiled down to ordinary common sense by men who know the poultry-raising business from A to Z. It goes at the subject without gloves and rips the false, the frivolous and the nonsensical from the solid facts and gives you good, practical, money-making suggestions for all that the poultry raiser needs to know. It don't mix it up with scientific terms that need a professor of Greek to understand. It treats the poultry-raising question as a dollar-making proposition and not as a fad, a theory or an amusement. It is worth ten times its weight in dollars to a man who hunts the inside track of how to do—when to do and what to do!

The poultry-raising industry is advancing with leaps and bounds. What was a law but a little time ago has given away to more advanced and more practical facts, and one has to keep up with the times or lag behind. The old Conkey book was welcomed to the tune of 2,000,000 copies, but this latest book takes its place because it has advanced with the industry and is right up to the minute.

It tells the whole of it—Housing for profit—Feeding for different purposes—Breeding for money—Egg production for lining your pocketbook—Incubation—Brooding—Care of little chicks—it is all for the profitable end of it, and that means keeping on the right track. You cannot find one bit of "chicken" information left out that would be worth the reading. Had we made the book three times as big we might have used three times as many words, but the addition could not have added a single good practical suggestion—the book is complete.

This valuable work is sent absolutely free if you will pay the postage and name the party from whom you purchase your poultry supplies. Send 4 cents in stamps for postage. The edition is limited and they are going like hot cakes. The name and address of the firm issuing them is The G. E. Conkey Company, Dept. 18, Cleveland, Ohio.

CATALOGUES RECEIVED.

The 1910 catalogue of The Ferris Poultry Farm, George B. Ferris, proprietor, Grand Rapids, Mich., is just off the press. This catalogue contains thirty-two pages and cover and is well printed on good quality enamel paper, which shows off the illustrations of his Single-Comb White Leghorns to good advantage. Mr. Ferris has succeeded in building up a magnificent strain of this variety and is now in a position to supply exhibition or breeding stock of the highest quality. Write him today for a copy of his new catalogue, and mention American Poultry Journal.

CATALOGUE.

Have you received a copy of the new catalogue of the River Home Poultry Yards, Perrysburg, Ohio? If not you should send for one at once. It is without doubt the handsomest and most up-to-date catalogue that has come to our desk for many months. It contains fifty-two pages and cover, printed on the very best of enameled paper, well illustrated with excellent half-tones and original sketches, and is full of interesting reading matter about their noted Light Brahmas. This catalogue will make a valuable addition to your poultry library, and is sent to any address for 6 cents in stamps. Better send for one today, and mention American Poultry Journal.

John O. Willard, Linden, Mich., breeder of S. C. Buff Orpingtons, won again at Cadillac, Mich. On five birds he won: 1 cock, 1 hen, 1, 2, 3 pullet, \$7.75 in cash, a \$5 silver cup and a \$50 loving cup for the pen of highest scoring birds, all varieties competing. This and their other numerous winnings is convincing evidence they have the quality. See their ad elsewhere; they have lots of birds to sell.

Write for free treatise, "Helpful Hints on Poultry." Address

THE KEMIFORM CO.
2451 St. Clair St., Cleveland, O.

AGENTS WANTED

A LUCKY STRIKE.

Lucky Strike Poultry Farm, Huber Bros., proprietors, at Kenosha, Wis., is situated about one mile from the city of Kenosha. On this farm nothing but high class S. C. White Leghorns are bred. The attention of the proprietors has been given to building up a strain of combination-utility-exhibition birds. How well they have succeeded can be judged from their present results. From one flock of 150 hens, many of which were prize winners, and not any of them scoring less than 92 points, they received from the ten pens of fifteen hens each 25,612 eggs for year ending September 1, or an average of 170 112-150 per hen. The pen registering the highest was No. 2, with a total of 2,688; pen 1 was next, with 2,628, and pen No. 8 third with 2,617; the lowest pen average for fifteen hens was pen No. 10, with 2,483. Every bird they raise is farm bred. This year they tried branch farms to some extent and farmed out some 200 or more birds, and with one exception it proved a great success. However, they are now contemplating on securing a larger farm, and will breed a greater number of birds next year than ever, and will also strive for higher egg records still with trap nests. The winning qualities of their birds can be judged from the following: At Milwaukee, one entry, fifth cockerel; Delavan, one entry, first cockerel, scoring 95; special highest scoring bird in show-room, best shaped bird, best colored bird; Marinette, one entry, first cockerel; Oconomowoc, six entries, first pen, first cock, first, third and fourth hen; Zion City, first pen, first cockerel, first and second hen, third cock, fourth pullet; at this show they won over several Chicago winners; there were sixty-one S. C. W. Leghorns competing; Kenosha County Fair, first pen, second, third and fourth hen, first, second, third, fourth pullet, first and second cockerel, first cock. Last year was their first year making the show rounds. This year will see them at some of the largest shows in the country, and we believe they will make an account of themselves.

At the present time they have hundreds of grand cockerels to offer our readers which are particularly strong in color and long backs, which every Leghorn breeder is striving to obtain. It will pay our readers to write them. Their big breeding house is

80 feet long by 10 wide, with several other colony houses in use. Buildings will be greatly increased next year after the new location is settled. Huber Bros. commenced their first ad with American Poultry Journal in this issue and will be with us hereafter to the end.

THE CONGO GUARANTEE.

Tired of having people suspect that every guarantee was simply an advertising dodge, the makers of Congo roofing recently set to work to devise a guarantee for their roofing which would be legally binding and easily enforceable. It was not an easy task to devise such a guarantee, but one finally was produced in which the best lawyers could see no loophole or chance of escape for the company in case Congo roofing failed to make good.

The guarantee involves the issuance with every roll of Congo roofing of an insurance bond of the National Surety Company of New York. After the roofing is laid the buyer fills out the blanks and sends in the bond for registration, and after that he has absolute protection. Congo three-ply is guaranteed for ten years, and the makers will gladly send on request to anyone who is interested a booklet telling all about the bond and a free sample of the roofing itself. Address the United Roofing & Manufacturing Company, Philadelphia, Chicago, San Francisco.

J. A. BICKERDIKE AT SPRING-FIELD.

Mr. J. A. Bickerdike, of Pleasant View Poultry Farm, Millersville, Ill., made an enviable record with his pedigreed White Rocks at the Illinois State Fair last month. His birds won 1st, 2nd, 3rd cock; 1st, 2nd, 3rd hen; 1st, 2nd, 3rd cockerel; 1st, 2nd, 3rd pullet; 1st, 2nd pen. Mr. Bickerdike had but two pens entered, winning every ribbon competed for with an entry of seventeen birds. Competition was keen, as it always is at the Illinois State Fair poultry show, the fair association giving it the title of the "Greatest Fair on Earth."

Mr. Bickerdike is to be congratulated on his success with breeding and exhibiting his pedigreed White Rocks. His methods of

breeding are unique among poultry breeders. The trap nest is used exclusively in his breeding yards, a complete accurate record is kept of each bird, both as to the eggs laid and the chicks produced, thus tracing the individual ancestry of each bird produced, and a complete pedigree goes with each bird sold.

This method of breeding has proven a great success with Mr. Bickerdike, and he has now on his farm a flock of White Rocks that for real quality cannot be equaled anywhere. He has a grand bunch of stock for sale, both old and young, and anyone wishing to secure White Plymouth Rocks either for exhibition or for breeding will do well to write Mr. J. A. Bickerdike, Box A, Millersville, Ill., before purchasing.

A POULTRYMAN'S NECESSITY.

According to men who know—poultry keepers who are practical and successful—there is nothing of greater value in the feed room than a good, easy-working, always-ready bone cutter.

Cut green bone, freshly cut, of course, is as much part of the regular ration as corn. Consequently the necessity of the machine.

Many may claim to be good; but there is quite a difference in construction and ease of operation, and this is most apparent when one is familiar with the Crown bone cutter, made by Wilson Bros., Box 600, Easton, Pa.

This handy machine works quickly and simply, turning out the bone-shavings in just the shape for quick digestion by the fowls.

One of their catalogues, sent on request, will explain the principle and give you valuable information on egg laying. Write for it.

World's foremost White Wyandottes as bred by J. H. Jackson, of Hudson, Mass., have won the very highest honors at New York, World's Fair, Boston and other leading shows for him and he has sold prominent winners for every leading show from Madison Square, New York, to Seattle and Canada to Texas; many have not only won first but specials for best in the show, including every breed. All stock purchased from him can be returned at his expense if not satisfactory.

COOKING SUGGESTIONS.

Valuable Book for the Young Housewife and All Enterprising Housekeepers.

"The pie that mother made!" How many of us have said that and laughed at someone's expense when the crust was heavy or the "stuffs" not cooked. The young housewife looks tearfully at the bread that won't raise or the biscuits that are so heavy and wonders what "the lord of the manor" will say when he sits down to an incomplete meal.

Eating ranks first among the indispensable daily occurrences and the vital necessity for properly prepared foods is unquestionable. Everyone would rather pay the butcher than the doctor. Enough money is spent each year curing indigestion and dyspepsia to support innumerable families, and the real reason for this is the large amount of improper cooking.

A valuable little book called "The Enterprising Housekeeper" has proven of great benefit to thousands of good housewives who have had to contend with the unexpected visitor, the "finicky" appetite and the many other little things that tend to make her life miserable. This book was published to sell for 25 cents, but for 4 cents in stamps, to cover the cost of mailing, the publishers will forward it to you. Address the Enterprise Manufacturing Company of Pennsylvania, Dept. 33, Philadelphia, Pa.

It contains 200 recipes of the sort that proves so beneficial to the housewife and makes the practice of economy easy. Many helpful suggestions are made for teas and luncheons. Numerous illustrations of household utensils run through the book. Altogether the book is the best of its kind seen for some time and should be in every household.

HAVE HIGH PRICED EGGS.

New Method of Poultry Feeding, Guaranteed to Increase Winter Egg Production.

A plentiful yield of eggs when winter prices are highest, that much desired condition of things from the poultry raiser's point of view, seems at last to be an easy possibility. It is only necessary to feed the proper quantity of cut green bone, properly prepared. The bone must be finely cut, however, to produce the best results.

Those who have used the Standard Bone Cutter, made by the Standard Bone Cutter Company, of Milford, Mass., report an increase in egg production that is simply astonishing. This machine is built on a new principle, and is said to be superior in every respect to all other bone cutters. In fact, the makers guarantee this to be the case, send the machine on ten days' trial, and allow the customer to decide for himself.

Standard Bone Cutters are the only bone cutters that cut bones across the grain, putting it in the best possible condition for feeding purposes. They are easy to run, cannot clog, and have positive automatic feed. Made in eleven different sizes. The makers, the Standard Bone Cutter Company, Milford, Mass., will send illustrated catalog and free trial order blank to any address on application.

NOTICE OF SALE.

F. A. Bennett, owner of Quality Hill Poultry Yards, Canton, Ill., who has made a specialty of S. C. R. I. Reds for several years, exhibiting in hot competition in many of our large shows, has sold his entire poultry plant, including ground, buildings, all equipment, and his entire flock of Bennett's famous S. C. Reds to W. C. Nelson, also of Canton, Ill. Mr. Bennett having purchased a large tract of land in Montana, will locate there. Mr. Nelson has been breeding Bennett's strain of S. C. Reds for several years, having been a neighbor of Mr. Bennett's, therefore he is perfectly familiar with them and the business in general. He is thoroughly reliable, and has a large flock of Reds to sell. He just won the cream of the prizes at the Illinois State Fair in a hot class of Reds. You will do well to look up his ad in this issue.

C. E. Spangh, Rugby, Ind., whose Barred Rocks were large winners at Indianapolis, again demonstrated their quality at Springfield, Ill., winning in a class of about 150 birds of the best quality Barred Rocks to be found anywhere—1, 3 cockerel, 1 pen, 3 pullet, 3 hen. He has 200 hens that go at \$2.50 each, also lots of young birds.

1 Piece or 60?

You can get a modern cream separator—a Sharples Dairy Tubular—with nothing in the bowl except the piece shown here on the thumb.

Or you can get an out-of-date separator with 40 to 60 disks in the bowl, as shown below; or one filled with other contrivances—all needless in a modern machine.

For easy cleaning, durability and efficiency you'll take the Tubular. World's biggest separator factory. Branch factories in Canada and Germany. Sales exceed most, if not all, others combined.

H. M. SHEER, 400 HAMPSHIRE STREET, QUINCY, ILL.

FOUR OPINIONS SELECTED FROM OVER A THOUSAND ON THE SUBJECT OF ARTIFICIAL HATCH- ING AND REARING OF CHICKS.

It is doubtful if there is a subject on which more different theories have been advanced than that of artificial incubation. And this is quite natural, for there are few subjects any more mysterious or difficult of reduction to a scientific practical solution of its delicate processes than changing the egg to a chick.

Men have spent years of effort and expended a great amount of money in an endeavor to reduce this great problem to a scientific, positive and successful basis. Much has been learned of practical value, but there is yet much to learn.

No one has yet been able to exclaim "Eureka, I have found it," and until this is accomplished the wisest thing for those who are anxious to achieve the greatest results from their own personal efforts by way of producing the most chicks from their eggs and raising the highest percentage to a marketable point, thus making the most profit, is to follow the examples of their more successful fellow poultry raisers.

"Experience is a wise teacher," and when you can profit by the experience of others it is a most economical one, too. In our advertisement in this issue of the American Poultry Journal we give four opinions - four experiences on this deep subject from

actual, practical standpoints. Turn to page — and read them. They are from North, South, East and West. They are four out of over a thousand we could give, voicing the universal satisfaction and practical successful workings of Prairie State Incubators and Brooders. We don't claim our machines are perfect, but our customers' words prove they are nearer perfect than any others. Read the opinions and judge for yourself.

We have a rare treat in store for the poultry public this year in our coming 1910 catalog. It will be the most prized book you ever read of its kind. When it gets into circulation we look for an avalanche of requests for it, so if you would make sure of getting a copy promptly write and ask us to reserve one for you now. Address Prairie State Incubator Company, 000 Main street, Homer City, Pa. Do it now lest you forget.

KEEP THEM LAYING.

Winter is coming along and a lot of poultry keepers will, as usual, resign themselves to seeing the egg crop drop to a mere fraction of what it ought to be. We don't want to see our readers resign themselves to any wrong condition of things, and shortage of eggs in winter is a wrong condition. Proper care, in the way of housing, etc., and proper food will keep hens laying in winter as well as in any other season.

Proper food is what most hens lack in

winter, especially because they don't get the worms and bugs which they pick up in the spring and summer, and which affords them the fresh, juicy, animal food needed in the production of eggs. But you can supply them with something just as good all the year round, and that is fresh market bones, cut into a fine, soft mash, with bits of meat, gristle and marrow included. That is the ideal egg-making food, containing every element the hen needs to produce eggs, and in quantities four times greater to the pound than grain.

Those who don't fully appreciate the value of this food ought to read the little book we have before us called "Worms and Bugs and Your Poultry Profits." It is published for free distribution because it advertises Mann's bone cutter, but it presents the common sense of poultry feeding in a way that ought to be worth a lot of money to any keeper of fowls. It is not only a guide to more eggs, when eggs are worth most, but a guide to more fertile eggs, larger, stronger, quicker growing chicks and more vigorous, profitable poultry generally.

The Winona Farms, Lansdale, Pa., report the following winnings this fall on S. C. R. I. Reds: At Allentown, Pa., 3d cock; at Trenton, N. J., 1st cockerel, 3d cock; at Montgomery County Fair, 1st and 2d cockerel, 1st pullet and 1st pen. They also breed S. C. W. Leghorns of the highest quality. Write them for prices and particulars.

Make Your Hens Lay

When Eggs Are Worth Most

A FREE
BOOK
FOR YOU
ON
MAKING
HENS LAY

HENS relish juicy bugs and worms because these supply the protein feed they require to make eggs. The craving for meat and bone food—protein feed—is simply nature working out the egg-laying proclivity. Hens **must** have food rich in protein or egg-making elements, or it will be impossible for them to lay.

Our little book tells you all about the how and why of this. It makes you master of egg-getting. It's a book that opens up to you the real possibilities with poultry.

It's simply a matter of knowing what food to supply and how to prepare it. It is now established beyond all doubt that raw, green bone, with adhering meat and gristle, cut fine, is the ideal egg-producing food. Its cost is a mere trifle and its preparation is easy with a

Mann's Latest Model Bone Cutter

Sold On 10 Days' Free Trial—No Money Down

It turns easily and rapidly, cutting green bone, with adhering meat and gristle, wasting nothing.

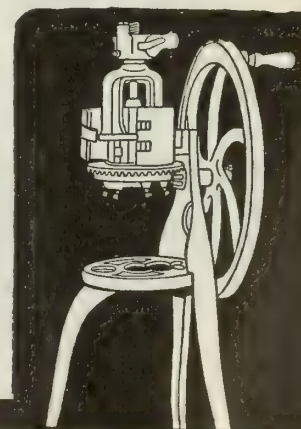

Its self-governing feed automatically adapts the cutting to your strength, so that anyone can use it.

Its open, hinged cylinder is easily cleaned, and it takes in large bones. It is strong, durable, and requires few repairs. We want you to try one.

We will send you a Mann's Latest Model Bone Cutter on 10 Days' Free Trial—no money down. If satisfied after the trial, buy it. If not, return it at our expense.

You want our good books, at any rate, send for them. We'll forward by return mail.

F. W. Mann Co., Box 56, Milford, Mass.

RICKSECKER'S SINGLE COMB RHODE ISLAND REDS.

When it comes to good Single Comb Rhode Island Reds there is one man in the West who can be depended on ever and always to put up the best kind of a showing. He is not one of the fanciers who has been breeding birds for "twenty" to "thirty years," but nevertheless goes on producing them from season to season that are of the highest quality and excellent individuality. This man is Mr. Tom Ricksecker, Rosedale, Kan., Route 5. It was about five years ago that I first heard of him, in the show room, and ever since that time he has been an exhibitor who has won his share and more of the honors that go with consistent mating and breeding of good Single Comb Rhode Island Reds. We do not recall his first exhibit, but suffice to say it was a good one. Early this fall the Ricksecker Reds commenced to win out at the Kansas State Fair at Hutchinson. They won first cockerel, first cock, first, second, third hen, first and second pullet, first and second pen and sweepstakes for the best cockerel in the American class in competition for this honor with about 300 birds. At the Missouri Valley Interstate Fair their winnings were first and second cockerel, second pullet, first pen, first and second hen and second cock. At the American Royal, Kansas City, October 11-16, in competition with the best birds of the country, Mr. Ricksecker won first, second, third cockerel, first, second pullet, first, second pen, first and second cock, first and third hen. Mr. Ricksecker's flock was never in better shape to care for the early trade. His birds are early hatched and in the pink of condition and when we made a little trip of inspection to his farm we did not see one chick out of health. Mr. Ricksecker has been selling winners for the leading shows to breeders who are in every way satisfied with their trade with him. We have known him personally for a long time and can recommend his business methods as being perfectly open and above board. If you want good Reds, Reds that are red, free from smut and gray, let him have

a chance to fill your order. Mention American Poultry Journal when corresponding with him.

SUCCESS WITH POULTRY.

Mr. Poultryman, if you wish to make a success out of your poultry business, get the best stock that money can buy and then don't be afraid to let people know that you have it. Use liberal space in as many

One of Geo. Barkdoll's prize winning White Wyandottes, West Unity, O.

poultry journals as you think necessary, then when you begin getting your orders and inquiries "be prompt" in answering all letters, and by all means don't write on any kind of stationery.

Invest a few dollars in printed stationery illustrating your breed. You will find it the best investment you have made. You will notice those who have made the greatest success with poultry are those who have invested the most in "printer's ink."

If you have not yet got your supply of printed matter for the shows and the coming season, now is the time.

If you will write to the W. A. Bode Printing Company, Box 176, Fair Haven, Pa., they will gladly send you samples for the asking. They make a specialty of poultry printing and can fill your every want.

GUY DAILY, JEFFERSONVILLE, INDIANA.

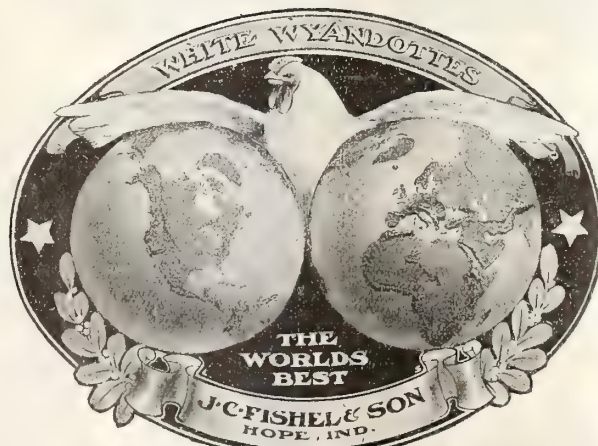

Guy Daily is located about three miles out of Jeffersonville, Ind., on a farm of fifty acres of rolling land, well adapted to poultry raising. The farm is conveniently reached by the Indianapolis & Louisville traction line. Mr. Daily has been many years breeding a quality of his White Rocks and has been winning his share of the ribbons in many of our prominent shows. The stock is raised on free range, and even his breeding yards are 75x75 feet. Nothing but high class birds are placed in his yards, at the head of which is a winning male. Last season in three shows he won seven firsts, seven seconds, six thirds, and nineteen special prizes on thirty-four birds, and with one or two exceptions different birds were shown at each one of the three shows. Mr. Daily is state secretary of the White Plymouth Rock Club and therefore enjoys the confidence of his fellow breeders. We refer you to his ad, which appears elsewhere in the columns of American Poultry Journal.

At the Vermont State Fair H. C. Franklin, Townshend, Vt., exhibited his Rose-Comb Brown Leghorns and won first on pen of fowls, first on pen of chicks and special for best display. Mr. Franklin makes a specialty of this one variety and has bred them up to high state of perfection, and is now in a position to supply choice exhibition and breeding birds. Write him for full particulars, and mention American Poultry Journal.

ORPINGTONS Buff, Black and White

Your order is solicited in view of these liberal assurances. Bear this in mind for your present or future requirements. To avoid inconvenience and delay, be sure and specify the quality desired. My catalog and Fall sale list is free. I won more prizes on Orpingtons at 1908 Chicago shows than any other exhibitor. There's a reason. Start right and you'll succeed.

C. S. Byers : Orpington Specialist 11 Years : Hazelrigg, Ind.

J. C. Fishel & Son Box J Hope, Ind.

TANNENBAUM FARMS, WILLOUGHBY, OHIO, CHARLES A. OTIS, PROPRIETOR; A. H. TRYON, MANAGER—BREEDERS OF BARRED ROCKS AND COLUMBIAN WYANDOTTES.

The farm consists of some 800 acres of land beautifully located on an elevated plateau. Mr. Otis has a grand residence on the farm, surrounded by gorgeous beds of flowers and elegant shrubs and trees of all varieties, the lawn and everything about his home and entire farm being kept in perfect condition all of the time. In fact, the whole farm presents the appearance of a park. Even the cornfields are as clean and free from weeds as a flower bed. It is truly a beautiful place. Maple and birch trees abound along the road and around the several residences, furnishing plenty of shade. No expense has been spared anywhere, and it would be hard to imagine a prettier place than Tannenbaum Farms.

Here also are bred, besides Barred Plymouth Rocks and Columbian Wyandottes, the Dual-Purpose Shorthorn cattle, Berkshire hogs and Shropshire sheep. Each department has an expert at the head of it and, in fact, is practically on a separate farm. The whole is under the general supervision of Mr. A. H. Tryon, who in a very capable manner superintends everything. Mr. Tryon is particularly interested in fancy poultry and devotes considerable time among the chickens, which are directly under the management of Mr. Freshley. Mr. Freshley has been a breeder for many, many years, and has for a good many years past been breeding some fine Barred Rocks which have been winning in his hands and in the hands of others in some of our hottest shows.

Mr. Otis, in starting his flock a number of years ago, spared no expense in buying the best birds obtainable. One hundred dollars was willingly paid for a single bird, several specimens having been bought at this price, and many at \$50 and \$75 a head, in order to get the required quality. Therefore you will readily see it is a cinch they succeeded in getting just what they wanted, and that they were wise in the selection of their stock and mating of the birds is in evidence in the quality of the hundreds of youngsters which we saw. Understand—we say that we say hundreds of them, Barred Rocks, of that clean-cut, narrow, snappy barring in the cockerels, and the pullets also showed exhibition color, with quality sufficient to go out and win the blue in hot competition. Plenty of type was to be found throughout the flock.

These birds were housed in colony coops in an orchard with some three acres of free range. Even back near the cornfields were to be found several colony houses, also used in housing young stock.

The flock of Columbian Wyandottes was also a very promising bunch of youngsters, as proven by the fact that at Columbus, Ohio, in the hottest class of Columbian Wyandottes the writer has ever seen together, Tannenbaum Farms won on four entries—first and second pullet and second cockerel. These birds show wings, hackles and tails with the black and white markings just about what is asked for in the Standard of Perfection. We cannot praise these birds too highly, for they were as nearly perfect as any Brahma you ever saw, which is saying a good deal for the Columbian Wyandottes, as it is a new breed.

Some of the past winnings in Barred Rocks made by birds owned by the Tannenbaum Farms are first prize pen, Cleveland, 1906; third and fifth prize pen, Cleveland, 1907; same pen won first at Geneva and Painesville, 1907, and they also won first pen at Cleveland, 1908. Many other prizes and prize winners purchased from others are also found in their flock and were used in the breeding pens. The first prize hen at Willoughby, Ohio, in a hot class, also first cock at Ashtabula (score 92½) as well as the fourth cock and third hen at Cleveland, Ohio (1908), are in their yards.

We found most of the breeding birds right in their moult at the time of our visit, but quality was easily seen, and Mr. Freshley has an eye for barring that is hard to beat. In fact, he has been recognized as an expert on Barred Rocks throughout this section of the country, which has been his home for many years. We predict that Tannenbaum Farms' Barred Plymouth Rocks and Columbian Wyandottes will be heard from in many show rooms the coming winter.

As we said before, no expense has been spared anywhere, either in procuring the best stock obtainable or in buildings and equipment. The main building is 20x235 feet, with an ell 20x75 feet, the ell being two stories in height, having an incubator room for 1,100 eggs and brooder capacity for the same. The office is also upstairs in this building, as well as the grain room, which has spouts leading to the first floor, where the grain is drawn as wanted for feeding. They have ample feeding capacity, with a brooder house, and are contemplating enlarging this part of their plant before next spring. This building is constructed of the best material throughout and the alleyways are all cement. All equipments are of the best, with an idea in mind for labor-saving devices. The yards of this house are very long and are sown down to rape and the birds alternated so that rape is kept growing. All stock was in the pink of

condition, not a sick bird to be found anywhere.

Besides this main house, which is used for the breeders, is another 14x40, still another 14x72, and seven large colony houses, besides the chick colony houses, etc., etc.

You will readily see that the buildings, equipment and stock at Tannenbaum Farms is the very best and we can assure you is in the hands of competent men and that you are safe in placing your order for either Rocks or Wyandottes with them. We wish particularly to call your attention to the fact that they have a large number of Barred Rock cockerels that have quality and will do you good.

Our visit at Tannenbaum Farms was made most pleasant by both Mr. Tryon and Mr. Freshley, and we shall be pleased to have the opportunity at some future time to call again. Zimmer.

There's Only One Best

—and that's the GREAT MAJESTIC—they are the only ranges made exclusively of Malleable and Charcoal Iron—outlast three ordinary ranges—don't break, crack, or rust. Malleable Iron allows absolutely air-tight riveted joints in a MAJESTIC and these combined with pure asbestos lining, save half your fuel bill and give you a dependable cooker, a perfect baker—every day.

The MAJESTIC is equipped with a 15-gallon, all-copper reservoir—it touches the red hot fire and heats water in a jiffy.

The Great and Grand MAJESTIC Malleable and Charcoal Iron RANGE

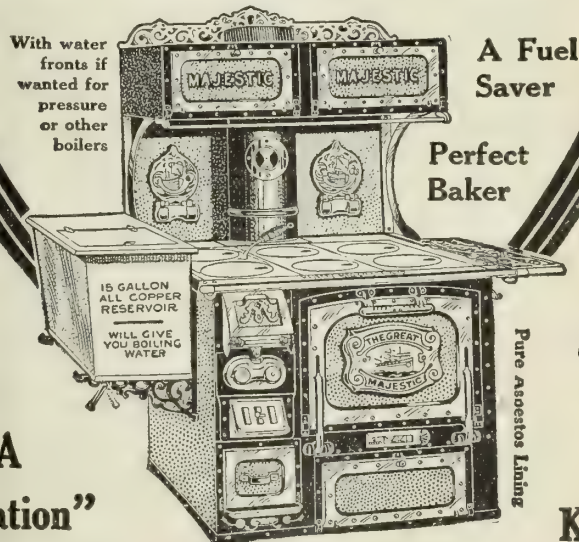

has an oven door, which when dropped, forms a rigid shelf strong enough to bear any weight—oven rack slides out automatically, holding anything, that happens to be on it, securely. Other attractive MAJESTIC features are the open end ash pan, acting as a shovel and the ash cup under it.

No muss or danger of fire from red hot ashes with a MAJESTIC.

Each exclusive MAJESTIC feature makes this range more practical more serviceable, more durable—the best range your money can buy regardless of price. MAJESTIC Ranges are sold in nearly every county in forty states. If your dealer doesn't carry MAJESTIC Ranges, write us for the name of a dealer in your locality who does, and we'll send our booklet:

"The Story of Majestic Glory"

CLASSIFIED ADS

UNDER this heading ads will be inserted for six cents per word each month for less than three months, and **four cents per word each insertion for three months or longer.** Changes in copy allowed every three months. Numbers and initials count as words. All ads will be inserted under **classified headings.** No ads accepted at less than an average of fifty cents per insertion. Terms, cash with each ad. Count the words carefully to avoid delay in publishing. Write your copy plainly, as upon this the correctness of your ad largely depends. When placing your ads remember that advertisers of Classified Ads get better returns from AMERICAN POULTRY JOURNAL than from any other poultry journal—none excepted. On writing any of these advertisers mention A. P. J.

ALL COPY FOR CLASSIFIED ADS MUST REACH US BY THE 19th OF THE MONTH PRECEDING DATE OF ISSUE

LYMAN H. HILL, Sta. 3, JACKSON, MICH.

CHAS. A. CYPHERS' NEW "BUFFALO"**Incubators and Brooders**

are the Standard of Excellence at Half the Standard Price.

For thirteen years I have made the highest priced goods on the market.

By using a metal case on the incubators, and my new waterproof fibre material on the brooders, and cutting out the high cost cabinet work, I find I can make just as durable and efficient hatchers and rearers at half the former price.

The former hatching and brooding principles are retained, but I give you a new burner—a "blue-flame oil burner," throwing a strong heat with low consumption of fuel, and which does not need attention but a couple of times a week. This is both a money and labor saver.

Send for catalogue.

BUFFALO INCUBATOR CO.
477 ELLICOTT SQUARE

DARK CORNISH AND WHITE INDIAN GAMES

1st Cornish cock and 1st pullet, Allentown, 1909. 1st White Indian ekl., 1st pullet, 1st pen. Young and mature breeding stock. Prices right. Let me know your wants. Eggs in season. Mention A. P. J. when writing.

JOHN A. MILLER : NAZARETH, PENNA.

POULTRY QUEEN FOUNTAIN

will keep water warm in winter without fire, therefore will not freeze. It will keep water pure and fresh until used. As the fowls drink from the cup the water flows automatically from the reservoir. It is impossible for dirt to get into the water. Where the production of winter eggs is desired this fountain is indispensable. As a labor saver it pays for itself in a short time. In watering young chicks you don't have to carry water every day. By replenishing the water once a week the water will be clean and pure.

What
E. H. Harriman
 has to say of
"The Only Way"

"The 'Alton' is today the best railroad physically in the state of Illinois; the service it renders is far ahead of most of the railroads in the state; it has been made 250 per cent better for two-thirds of its original cost; it is a perfect physical property, wisely managed and run in the way to give the people the best possible service. You may quote me in this respect."

"RINGLETS" STAND ALONE, VICTORS OF THE FIELD . . .

At America's Imperial Show, Madison Square Garden, New York, Winters of 1908 and 1909

E. B. THOMPSON'S BARRED P. ROCKS

As usual win the leading prizes and achieve the highest honors that can come to any breed. First prize on cockerel, first prize on cock, the Great National Silver Cup presented by the American Plymouth Rock Club for best cock, cockerel, hen and pullet. Double the number first prizes of any competitor. Special for best shaped male, special for best headed male, special on hen, special on pullet, the Sweepstakes Special in Gold for best Plymouth Rock on exhibition of either sex and any variety. The Imperial prize of the show, special for champion male.

At the 1909 New York Show my 1st Prize Sweepstakes Cup Exhibition Pen was Declared by Expert Opinion to be the Finest Ever Exhibited, A Paragon of Perfection, and created a Sensation as the Finished Achievement in Modern Barred Rock Breeding.

For more than twenty years at New York my "Ringlet" victories have been complete. Exhibited by me personally they have won a grand total of 127 prizes, 69 of these being firsts and specials, being more first and special prizes than won by any competitor in the history of the show. These include the \$100 Champion Challenge Trophy, won three times; the \$100 Association Cup, won three times; the \$100 Sweepstakes Cup offered by the President for best Plymouth Rock cock, cockerel, hen and pullet, any variety.

The "Ringlet" world's record at New York four years in succession is a page of history. The "Ringlet" record of first on exhibition pen three years in succession is the undisputed Champion. My clean sweep of FIRST, SECOND, THIRD, FOURTH AND FIFTH PRIZES on pullets has never been approached in Madison Square Garden, and stands alone and unequalled.

One thousand grand breeding cockerels for sale; elegant hens and pullets in any number. Show

EGGS from the world's finest exhibition matings, one setting \$6; two settings \$11; three settings \$15; four settings \$18. Address

PINE TOP POULTRY FARM

Breeders and Exhibitors of Barred Plymouth Rocks and Single Comb White Leghorns

At the great Tri-State Fair (Tennessee, Mississippi and Arkansas) held at Memphis, Tennessee, September 28th to October 2d, we won more firsts in Barred Plymouth Rocks and Single Comb White Leghorns than all our competitors combined; winning in Barred Plymouth Rocks, 1st cock, 1st cockerel, 1st and 3d pen, 2d pullet and 2d hen; and in Single Comb White Leghorns, 1st and 2d pen; 1st and 2d cockerel, 1st and 3d pullet, 3d cock and 3d hen and many specials in both classes. All these birds were cooped for four days and traveled from New York to Chicago, to St. Louis, to Memphis, 1,500 or 1,600 miles. We can well boast of our stock. Our utility stock is of the same quality and we guarantee everything that leaves our place. Send for information. Come and examine our exhibition and display at Madison Square Garden Show, December, 1909. Breeders and show birds for sale at all times. Eggs for hatching and day-old chicks.

**THE KIND
THAT PLEASES
AND PAYS**

Our birds have given satisfaction THIS SEASON to hundreds of customers. THEY ARE UP-TO-DATE and rich in strong, vigorous breeding qualities, especially suitable for foundation stock and "new blood."

We have a choice lot of UTILITY BREEDING COCKERELS from which to make selections for our customers this year. Price \$5.00 each. They are worth the money. Cheaper birds do not pay. Buy the right kind and be rewarded by good results. Our shipments have always pleased. We guarantee them satisfactory. Trios or mated pens carefully selected from either young stock or year-old stock at reasonable prices.

WE INVITE CORRESPONDENCE FOR EXHIBITION BIRDS for this year's shows or for exhibition breeding birds. We have the quality that makes good in the show room. Our winnings last year included 26 prizes at Portland and 8 prizes at Boston and A. P. A. Sweepstakes, Gold Medal for best cockerel any variety. We have an exceptionally fine lot of exhibition pullet breeding cockerels this year and can make selections that will do you good at moderate prices.

The NEXT BREEDING SEASON is nearly here. Keep in mind that we have some of the best stock and one of the best equipments in the world from which to sell hatchable hatching eggs and vigorous day-old chicks and that we know how to handle and ship both. NOTE THAT WE HOLD THE RECORD FOR SUCCESSFUL LONG-DISTANCE SHIPMENT of day-old chicks, 2,600 miles. Also remember that the demand on us for both eggs and chicks taxes our capacity and it will pay you to book your orders early. Now is the time. We have orders for several thousand eggs already booked.

DO YOUR BUSINESS WHERE IT IS APPRECIATED and where every effort is made to please you. Write for free illustrated catalog and testimonials. Address

PLEASURE AND PROFIT

Breeding and Showing Pape's Strain of SINGLE COMB BLACK MINORCAS

LADY CHARLOTTE
96½ First Prize Chicago 1909 Pullet

Illinois and Indiana 1909 State Trophy winners for beauty, size and color. Recognized as wonderful producers of large white eggs and many of them. To get you started right and right away I have "a special" on a pen consisting of one male and four females that will interest you.

Mr. Poer's Unsolicited Letter is Self-Explaining:

Gwynneville, Indiana.
My Dear Sir:—It might interest you to know that from the pen of five birds I purchased of you last season I raised to maturity one hundred and six fine large birds, valued at \$318.00, besides still having the original pen and amounts received for eggs for hatching. Have sold several pens at \$15.00 per pen. My purchases from you have certainly proven to be excellent investments and I recommend Pape's strain of Single Comb Black Minorcas for large white eggs and many of them. Very truly yours,
Jacob E. Poer.

Satisfaction guaranteed and birds to arrive safely regardless of distance. Write today.

Diseases of Poultry

—BY—

D. E. SALMON, D. V. M.

Chief of the United States Bureau of Animal Industry

Every poultryman should have this book in their poultry library. It contains 250 pages, and every disease to which fowls are subject is treated in a most thorough manner. The cause, symptoms and cure of each disease is put before the reader in such a manner as to be understood at a glance. With this book in hand you can be your own poultry doctor. Better order one now and not wait until your fowls become ill.

THE PRICE IS ONLY FIFTY CENTS

Will send this book and American Poultry Journal one year for only 75 cents. Send all orders to

SUPERIOR TO SHINGLES!

Special Offer to Readers of American Poul. Jnl.

Fill in carefully coupon below. Mail it to the Chicago House Wrecking Co., Chicago, at once. We will send you, free of all cost, samples of the very best roofing, ceiling and siding made. These samples are large and generous enough to give an idea of the quality of the large sheets from which they are taken. Or drop a postal saying, "Send free samples of Galvanized Iron Coverings as advertised in American Poul. Jnl." Sign your name and address, carefully, in full. These samples are absolutely free. Send no money or postage. Our galvanized rust proof iron (see No. 1) is made of the very best grade of specially manufactured iron sheets. The galvanizing process protects these sheets from rust for all time. This thorough coat of non-corrosive metals—tin, lead and zinc—called spelter, is made a part of each sheet through the special dipping process employed. This gives the heaviest possible coat of galvanizing necessary for any covering purpose. Galvanized iron roofing has been used for over 60 years. It has always been and is today the best material for covering buildings made. Keeps buildings warmer in winter and cooler in summer. Positively does not taint your rain water — is never injured by contraction or expansion.

Many fires originate on shingle roofs. The natural life of a shingle is less than ten years, besides requiring constant attention. The quality of shingles grows poorer each year.

Excels Ready Roofings in Every Way!

Compared to ready roofing, whether rubber surface or felt, cost considered, metal roofing will outlast it 8 to 1. Patent, prepared or composition roofings crack and curl with age. Tar roofings rot and spoil. Most ready roofings soften in the warm air and sun. They stick to your feet when walked upon.

Better than Slate. Slate weighs seven times as much and will break from freezing and thawing.

Suitable for Farm Houses, Barns, Stores, City Dwellings, Poultry Houses, etc.

Galvanizing is the life of a metal roof. Our light weight sheets with their heavy galvanizing give better service, besides saving considerable in freight. Do not require painting. Have a mottled, sparkling effect, pleasing to the eye.

Anyone can lay our galvanized rust proof coverings. Ordinary hatchet or hammer are the only tools needed. No experience required.

Illustration No. 1 is Corrugated (galvanized rust proof iron), an all around covering. It is the best. Suitable for ceiling, siding or roofing. Corrugation $\frac{1}{2}$ inches apart — inch closer than others. Makes a firmer and better looking sheet.

Illustration No. 2 shows the "V" Crimped Roofing (galvanized rust proof iron) suitable for roofing only — makes a splendid water-tight roof — requires "V" sticks to put on.

Illustration No. 3 shows Standing Seam Roofing (galvanized rust proof iron), requiring set of tools furnished at low price. Makes first-class covering for any kind of a building.

Illustration No. 4 shows Plain Flat Sheets (galvanized rust proof iron), suitable for many special purposes, such as lining, ceiling, roofing sheds and buildings and innumerable purposes independent of roofing, siding or ceiling. It can be soldered.

Illustration No. 5 — Beaded Ceiling or Siding (galvanized rust proof iron) makes a handsome ceiling or siding. Easy to apply — suitable for stores, etc.

Illustration No. 6 — Brick Siding (galvanized rust proof iron), an exact imitation of regular brick — most suitable exterior for buildings of any kind. Easy to apply, requiring only nails and hammer.

**GALVANIZED RUST
PROOF IRON**

**GALVANIZED RUST
PROOF IRON**

(NO. 6 BRICK SIDING)

\$1.60 to \$3.25 PER SQUARE!

Our Galvanized Rust Proof Iron Coverings

These six galvanized rust proof iron coverings come in sheets all 6 feet long. Can supply sheets 2, 3 and 4 feet long. Flat sheets are 26 inches wide. All others 24 inches wide, sold by the square of 100 square feet, not including lap. Prices as follows

Flat, per square \$3.00
Corrugated and all other designs, per sq. . 3.25

When ordering mention lot No. 18

Our Semi-Hardened Steel Roofing

(Not galvanized)

In addition to this galvanized iron, we have a plain light-weight steel roofing of superior quality. It is good for general purposes and can be painted after it is on the roof. Sheets when flat are 24 in. wide and either 6 or 8 ft. long. All other patterns, except the brick siding, are 24 in. wide and either 6 or 8 ft. long. Furnished either painted or unpainted. Prices as follows:

Flat, per square \$1.60
Corrugated and all other designs, per square, 1.85

When ordering mention lot No. 19.

SPECIAL FREIGHT PREPAID OFFER!

At above prices we'll prepay freight in full to all points east of Colorado in the U.S., except Oklahoma and Texas. 15c per sq. additional for these two states. To all points west of Colorado in the U.S., 50c per sq. additional.

Mr. D. J. LAMBERT, Professor of Poultry Culture at Rhode Island State College, Kingston, R. I., says:

Permit me to say that I never hesitate to recommend Farm-Poultry to any one inquiring about poultry papers. I have long admired your editorial policy, and believe that you present facts as you see them, without fear or favor. Of course we appreciate every good word you say for the Agricultural Schools, and think that you recognize the poultry schools as one of the trio of forces that is helping to increase the welfare of this industry. The poultry press and the shows the other two. D. J. LAMBERT.

When a poultry publication is recommended by the foremost poultry instructors of the times you can safely pin your faith to that paper. For twenty years Farm-Poultry has been teaching everything that is sane and trustworthy about Incubating, Brooding, Rearing, Feeding, Mating, Housing, Exhibiting, Killing, Dressing, Marketing, etc., of poultry. Full show reports is a feature, and as Mr. Lambert says, its editorial policy is "without fear or favor." Farm-Poultry is a monthly, fifty cents a year. Sample copy sent free on request.

**For Sending Six Subscriptions to American
Poultry Journal, the oldest Largest and
best poultry journal in the world : : :**

You Get \$1.60
In Value

We Get \$1.50
In Value

This is how it is done

of our new book, "Origin and History of All Breeds of Poultry." Regular price \$1.00. This is the greatest book on poultry ever published, and no poultryman or beginner should be without it. It contains 200 colored illustrations of fowls painted from life by one of the best poultry artists in America. By these colored illustrations the beginner is able to know the exact color, markings, shape and comparative size of every recognized variety of chickens, ducks, geese and turkeys, (something no other poultry book contains, not even the Standard.) It also gives a complete history and origin of all varieties, together with a complete description of each variety. Also tells how to mate the different varieties for best results. This book is better for the beginner than even the Standard.

The giving of this book for six subscriptions is for a short time only, to introduce our book, as you can readily see we cannot afford to continue this indefinitely. As soon as introduced this book cannot be obtained for less than \$1.00 cash. Therefore start right now and get six subscriptions at 35 cents each; keep 60 cents as your commission; send us \$1.50 and we will send you the book on receipt of same. This offer is for the first six subscriptions only.

But this is not all

ward winning any of the big prizes.

Below is the Great Fall Subscription offer of American Poultry Journal and besides getting \$1.60 in value for these six subscriptions we will also count these to-

American Standard of Perfection

LATEST EDITION

No poultryman can breed fowls intelligently without this book. It tells you what the different varieties of fowls must be to conform to the regulations of the American Poultry Association. This book is the guide by which all poultry judging is done.

It contains ideal drawings of the different varieties of fowls, gives the Standard weights, colors, markings, etc. In fact, is the poultryman's encyclopedia.

Order one today and learn to your own satisfaction if your fowls are up to Standard requirements.

ONE PRICE, \$1.50

American Poultry Journal Pub. Co.

358 DEARBORN STREET

CHICAGO, ILLINOIS

A LIVING FROM POULTRY

\$1,500.00 from Sixty Hens in Ten Months on a City Lot 40 Feet Square

TO the average poultryman that would seem impossible and when we tell you that we have actually done a \$1,500 poultry business with sixty hens on a corner in the city garden forty feet wide by forty feet long, we are simply stating facts. It would not be possible to get such results by any one of the systems of poultry keeping recommended and practiced by the American people, still it is an easy matter when the new

Philo System

is adopted.

The Philo System is Unlike All Other Ways of Keeping Poultry

and in many respects just the reverse, accomplishing things in poultry work that have always been considered impossible, and getting unheard-of results that are hard to believe without seeing.

The New System Covers All Branches of the Work Necessary for Success

from selecting the breeders to marketing the product. It tells how to get eggs that will hatch, how to hatch nearly every egg and how to raise nearly all the chicks hatched. It gives complete plans in detail how to make everything necessary to run the business and at less than half the cost required to handle the poultry business in any other manner.

Two Pound Broilers in Eight Weeks

are raised in a space of less than a square foot to the broiler without any loss, and the broilers are of the very best quality, bringing here three cents per pound above the highest market price.

Our Six-Months-Old Pullets Are Laying at the Rate of 24 Eggs Each Per Month

in a space of two square feet for each bird. No green cut bone of any description is fed, and the food used is inexpensive as compared with food others are using.

Our new book, the **Philo System of Poultry Keeping**, gives full particulars regarding these wonderful discoveries, with simple, easy-to-understand directions that are right to the point, and fifteen pages of illustrations showing all branches of the work from start to finish.

Don't Let the Chicks Die in the Shell

One of our secrets of success is to save all chickens that are fully developed at hatching time, whether they can crack

the shell or not. It is a simple trick and believed to be the secret of the ancient Egyptians and Chinese which enabled them to sell the chicks at ten cents a dozen.

Chicken Feed at 15 Cents a Bushel

Our book tells how to make the best green food with but little trouble and have a good supply, any day in the year, winter or summer. It is just as impossible to get a large egg yield without green food and is to keep a cow without hay or fodder.

Our New Brooder Saves Two Cents on Each Chicken

No lamp required. No danger of chilling, over-heating or burning up the chickens as with brooders using lamps or any kind of fire. They also keep all the lice off the chickens automatically or kill any that may be on them when placed in the brooder. Our book gives full plans and the right to take and use them. One can easily be made in an hour at a cost of 25 to 50 cents.

Testimonials

Bellevue, Ohio, June 7, 1909.

Mr. E. R. Philo, Elmira, N. Y.
Dear Sir:—I just want to tell you of the success I have had with the Philo System. In January, 1909, I purchased one of your Philo System books and I commenced to hatch chickens. On the third day of February, 1909, I succeeded in hatching ten chicks. I put them in one of your fireless brooders and we had zero weather. We succeeded in bringing through nine, one got killed by accident. On June 1, one of the pullets laid her first egg, and the most remarkable thing is she has laid every day since up to the present time. Yours truly,
R. S. LaRue.

Valley Falls, N. Y., September 10, 1909.

My Dear Mr. Philo:—I want to tell you how pleased I am with my use of the Philo System during the past year. The fowls laid exceptionally well in the New Economy Coop. much better in proportion than those in my old style house. The fireless brooder has solved the problem for me of raising extra early chicks. I am going into your methods more extensively this coming year. Wishing you success, I am, Sincerely yours,
(Rev.) E. B. Templer.

Osakis, Minnesota, June 7, 1909.

Mr. E. R. Philo, Elmira, N. Y.
Dear Sir:—You certainly have the greatest system the world has ever known. I have had experience with poultry, but I know you have the system that brings the real profits.
Yours,
Jesse Underwood.

Brockport, N. Y., Sept. 12, 1908.

Mr. E. R. Philo, Elmira, N. Y.
Dear Sir:—I have had perfect success brooding chickens your way. I think your method will raise stronger, healthier chicks than the old way of using lamps and besides it saves so much work and risk.
Yours respectfully,
M. S. Gooding.

South Britain, Conn., April 10, 1909.

Mr. E. R. Philo, Elmira, N. Y.

Dear Sir:—I have followed your system as close as I could; the result is a complete success. If there can be any improvement on nature, your brooder is it. The first experience I had with your System was last December. I hatched seventeen chicks under two hens, put them as soon as hatched in one of your brooders out of doors and at the age of three months I sold them at 35 cents a pound. They then averaged two and a half pounds each, and the man I sold them to said they were the finest he ever saw, and he wants all I can spare this season. Yours truly,
A. E. Nelson.

Send \$1.00 direct to the publisher and a copy of the latest revised edition of the book will be sent you by return mail.

E. R. Philo, Publisher, 14 Third Street, Elmira, New York

The Poultry Review A monthly magazine devoted to progressive methods of poultry keeping. \$1.00 a year. Edited by E. R. Philo, author of the Philo System book. Results of experiments on his poultry plant are given each month. Rev. W. W. Cox, associate editor, is handling a six-hen plant by the Philo System and will give full particulars each month of every step taken to secure the largest returns from six hens. Also a review of the best poultry articles from other publications. The price of the Review is \$1.00 a year for twelve copies by mail, postpaid. Or with the Philo System book for \$1.50.

A Longfield Winner **Longfield Poultry Farm**
Box 321 : Bluffton, Indiana

Ferris S. C. W. Leghorns

Winners at Chicago, St. Louis, Toledo, Detroit, Grand Rapids and the Michigan and Indiana State Fairs

This fine male is not one of my winners, though good enough to be—it's the kind I sell at \$7—one that I actually sold at this price to Mr. C. E. Maisner of Louisville, Kentucky, and the kind I will send you for the same money.

I want to tell you more about these exhibition-breeding cockerels at \$5, \$7 and \$10. They have typical Leg, horn shape—the good heads, full breasts, long bodies—well spread tails and snow-white plumage that have made FERRIS LEGHORNS the highest type of show birds. They are large and vigorous and will breed true for they have been line bred for many years.

Whether you breed for eggs or exhibition you need FERRIS LEGHORNS. They are bred to lay; only healthy, vigorous, productive birds can enter my breeding pens. They are bred to win; consider the list of winnings above, and the fact that they are winning in our customers' hands at practically every show in the country.

Remember that all stock is sold on approval; if the birds are not just what you want return them at my expense—I'll refund your money at once.

My 1910 Catalogue is Ready

It describes fully the hundreds of cockerels and pullets of all grades that I have to sell at very reasonable prices. Gives a complete list of winnings and explains clearly and concisely why FERRIS LEGHORNS are such PROFITABLE winners. This 32-page catalog is free. Write for it today and tell me what you need.

King Green Bone Cutters

AND FEED CHOPPERS have sold faster than all others combined at largest poultry shows in the West for three years. Built on a new principle, they are the cheapest, easiest to run and clean, have greatest capacity, and are unbreakable. However, I am not in any combine, and am now unable to get enough castings to fill the demand, or to make much profit. Therefore, I ask people who desire my advertising matter to send 35 cents to pay for same, and I will pay the freight on my bone cutters within 500 miles. My booklet, "Green Bones and How to Cut Them," may convince you that you cannot afford to be without a bone cutter, even if you cannot get the "King" promptly, and so have to buy an old fashioned bone cutter.

R. H. O'NEILL 12 NORTH CAMPBELL AVE. CHICAGO, ILLINOIS

Ricksecker's S. C. R. I. Reds

The sensation of the East, West, North and South. Only a few more birds to sell. Biggest business in years. Never have our birds failed to win more than their share. Mating list December 15th. Eggs for hatching.

Our Wonderful Book Offer

Successful Poultry Culture, Only 50 Cents

American Poultry Journal has just closed a contract with the publishers of "**Successful Poultry Culture**," which enables us to offer this book for one-half its regular selling price, \$1.00. This is such a really good offer and such a bargain that we want every reader to read this ad carefully and take advantage of this great bargain offer. This book has always sold heretofore for \$1.00, and thousands of copies and two editions have been sold at that price, and not one kick has ever been received.

Mr. Clarence Ward

the author of "**Successful Poultry Culture**," is a son of C. J. Ward, the founder and for eighteen years the publisher of American Poultry Journal. He was brought up in a hen coop, and is one of the best experts on poultry culture in the country.

Successful Poultry Culture

contains 128 pages and 30 handsome illustrations of fowls and practical plans for building poultry houses. It is a thorough and scientific treatise on raising poultry for profit; and is especially designed for the beginner. If the instructions in this book are followed success will surely crown your efforts. The publishers have sold thousands of copies of this book to satisfied buyers all over the country, and they can show testimonials by the hundreds from people who would not take fifty times the price of the book if they could not get another one. The chapter on "Scientific Feeding" is alone worth many times the price of the whole book as it actually tells how to

Save Three-Fourths Your Feed Bill

This system of feeding is the greatest and most valuable discovery made in the twentieth century to the poultry man. It will actually double and triple your profits from the start, and has been tried in many large and small poultry plants with the greatest success, and in every case it has placed these poultry plants on a large dividend-paying basis.

The largest item of expense in raising chickens is the feed bill, and if you can reduce this bill three-fourths, it stands to reason that the matter of big profits is solved.

The revised edition of this book,

Successful Poultry Culture

contains a chapter on Scientific Feeding that fully explains this method of feeding. It is based on a fundamental law of nature and is a correct and scientific principle of feeding chickens and ducks that will **save three-fourths the feed bill**, and at the same time will make your young chickens grow faster, lessen the mortality, make young pullets lay at four and five months old; also mature young cockerels for market and show room at the same age. It will make your hens lay in midwinter every day, when market eggs are bringing the highest prices; will keep your laying stock in perfect health in close confinement, and your hens will lay fertile eggs that will hatch strong, vigorous chicks that will live. In fact, with this method of feeding you can

Double and Triple Your Profits in the Poultry Business

This is not a patented or prepared food sold by some manufacturer at a high price. If you know how, all you have to do is to buy one bushel of common grain at the market price, take it home and make **four bushels**, which four bushels will contain more and better food value than the original bushel of grain.

No expense in preparing it; no machinery of any kind needed; no fire or cooking, and it takes less time than to cook a mash and is as easy to feed as common grain. The 128-page new and revised edition of

Successful Poultry Culture

contains this valuable information, and is worth a hundred times its price to every poultryman and stock raiser. It makes no difference whether you keep only a few chickens and one cow or a thousand of each, you cannot afford to be without it. Remember, we guarantee it will tell how to **save three-fourths your feed bill**.

Buy the Book, Price Reduced to 50 Cents

Do it today, for you will need it when you want to sell eggs at high winter prices and at the same time **save three-fourths your feed bill**. If you keep only twenty hens this book will save you twice its price in a few weeks' time after getting it. If you keep more it will **double and triple your profits every day in the year**. Send all orders to

are receiving your orders for **ORPINGTONS** are receiving your orders for **W. WYANDOTTES**

WHY? and **THREE** times as many orders as we ever received at the same period

It is a pleasure to answer this question, for there are such a lot of things we **know**. We have won consistently in the hardest shows of the country. We had without question the best stock for foundation stock that this country ever saw. We have sent hundreds of our birds over this great country to our respected customers and they have won for them and have formed the foundation of hundreds of successful strains of Orpingtons. There is no doubt that our **satisfied customers** have been the active means of this enormous increase of our Orpington trade. Then, we have improved our strain by leaps and bounds by good breeding. We have had the best skill in the breeding of Buffs this country ever had applied to the particular case, namely, Buff Orpingtons, so it is not strange that Mr. Owen and Mr. Delano feel pretty good when they say at this present writing, November 14, that they have twelve better Buff Orpington cockerels than they ever exhibited fit and ready for New York. Large, big-boned birds, and fully finished, so we know whereof we speak, with scores of others that are wonders, and we are positive that we can satisfy you all along the line. This is the one point, too, in which we allow our customers the final word. We satisfy you or there is no sale. One of the things we **know** is, there is no farm in America that will more surely send you a \$10.00 bird for \$10.00. If you are expecting a \$25.00 bird for \$10.00 you will not get it from Owen Farms. But you can know the reverse will not happen. You will **never** get a \$10.00 bird for \$25.00. I guess that is what the public is looking for, their value for the money. Now, my conclusion about Buff and Black Orpingtons is this. I never actually wanted your trade as I want it this year. Because I have the goods and I know they are better than ever and in goodly quantity and especially because I believe I can do for you in Buff Orpingtons what no one else can do.

WHY? and **FOUR** times as many orders as we ever received at the same period

I believe the reason for our large increase in the receipt of our orders in White Wyandottes is because of the many friends and interested people who have seen our birds. The old saying is that "seeing is believing" and when we have shown two pullets (all that we did show) at Madison Square in the largest class of pullets ever shown and won first and second, they being two pullets that were as near alike as any two ever shown, and when they looked all along our string and found the same type and perfect head it was convincing and the same way about our cockerels. We won first New York with one bird; sold that bird right there at the show and had a better one left, certainly better at the day he was shown at Chicago, and each and every time these birds are producing the same identical quality that makes them win. Grand heads, absolute perfect whiteness, good combs, fine station, very bright red eye, and altogether a style of their very own. Scores of times every day people in writing us say, "Do not quote us on a bird unless he is something really remarkable. We have plenty of good birds now. What we want is something that is more than good." How glad I am to answer every single individual inquiry for a Wyandotte because I feel that when our inquirer asks for just such a bird that we are perfectly prepared to give him entire satisfaction and in every case the price will fit the bird. My only regret is that you cannot see these birds as we see them day by day, but I promise every White Wyandotte enthusiast and every inquirer for this breed very particular attention and if we have what he wants there will be no doubt about his getting it if we agree on the price. That is the only difference that there could possibly be between us and we will try to be reasonable in that. Write us, therefore, freely about White Wyandottes.

Owen Farms'

You will be reading what I am writing on this particular subject in December and I believe that this is the time of all times in the year when you should commence to think very seriously of what you are going to do in eggs for hatching. Perhaps I speak with far more feeling and certainty concerning this matter because of my own experience. Year after year I have been a little late in getting our pens mated, our hatching operations started and in commencing to bring forward the chicks which were afterwards to prove the winners of our next Year's shows. This last year, however, we came very near the mark which we set and this year I am positive that we shall reach it.

Make your plans for some chicks early, particularly if you have trade for the fall shows. You cannot get fully furnished cockerels and pullets that are ready to show in September unless you get your birds out very early. We have made some experiments and I am positive that we shall be able this year to send eggs right through the winter to the southern half of the United States so that they will reach you in good shape and hatch well. They will be packed with extreme care and handled at this end so that when they start we will know they will go to you in good condition if the express companies are

Owen Farms Owen Farms

are receiving your orders for **WHITE P. ROCKS** are receiving your orders for **BARRED P. ROCKS**

WHY? and THREE times as many orders as we ever received at the same period

WHY? and SIX times as many orders as we ever received at the same period

Who has guaranteed to win for their customers in Chicago, Pittsburg, Baltimore, Philadelphia, Boston, Providence, Buffalo, Omaha and scores of other cities and made their guaranty good? That is the question. It is these continuous wins of ours for our customers and the hammering upon hammering that we have been doing all the time on the White Rock that has made our business what it is. I have felt for years that there was an individual character as to the color and type of our White Rock that was entirely different than anyone else's and superior to anyone else's. I have felt this strongly. I never was more convinced of it than at Madison Square Garden last year. There were 26 White Rock pens along the Garden for judging. They were right in the center of that very large hall. On the second day of the show a Western purchaser came to me and said: "Mr. Owen, I have been studying for twenty-four hours these White Rock pens. I am willing to say after the most careful study that in your pens alone do I find the whiteness and luster which makes them stand out so entirely by themselves. I have even gone so far as to feel of your birds as compared with other pens and they have more delicate, velvety feeling to the touch than any other pens." My reply was, "I believe you have hit the nail on the head. Our White Rocks have a whiteness and a smoothness and softness of feather that no others have, and coupled with their perfect type and excellent head points it is really what makes them win." If the United States was not so large and our customers so widely separated I should be inclined to say to you as one of the great automobile builders has been saying for years, "Ask the man who owns one," and leave the question of whether you would be interested in Owen Farms White Rocks entirely to that test, but I know the conditions will not permit it and I find it necessary to say to you a great many things about our White Rocks that I wish I could show you instead. Always remember we will fit for the show and we will guarantee to win any show you name.

I am perhaps more pleased to tell you my reason for our large trade in Barred Rocks than in any other variety. It touches me personally in a tender spot, namely, our public's confidence in Owen Farms. To a fair extent we are really being weighed in the balance as regards Barred Rocks, certainly in the minds of a very great many people in the United States. We have been breeding some fine birds for many years, but we have never shown them. We have acquired, and that fully and completely, the best flock considered from both standpoints of the male and female that we believe existed in the United States, namely, the Gardner & Dunning flock. They have been under the care of and mated by Mr. Newton Cosh and our Mr. Delano, in whom we have unlimited confidence, and the interesting question that is going to be answered very soon is whether Owen Farms has made good with these Barred Rocks. Well, now, I am going to say one thing in advance of the New York Madison Square show: that as far as we are concerned we know that we have made good. We have better cockerels than we ever commenced to show considering all of the old prestige of the Gardner & Dunning flock. We have better females than we believe they ever showed. We believe it is true that never in the history of Madison Square Garden have the cockerel and pullet which took the premier honors in a single year been bred by the same individual. I wonder if it will happen this year? There are some people that I know of who are confident they have a good chance this year for both the premier honors in cockerel and in pullet. At any rate, we know that we are going to put forward for competition at New York the best string that Owen Farms believes ever went there and we shall certainly hope for great success. It is a far different proposition to go to the State Fair at Syracuse in Barred Rocks or White Wyandottes than to go to Madison Square Garden and ask for the same blue ribbons. In Barred Rocks this year we made a wonderful win at the State Fair. There were thirty ribbons in all: five in six different classes, for they had a class of pens made up of old birds and of pens made up of young birds. Twenty-two out of those thirty ribbons Owen Farms won. I could not go into the matter at length except to say that our birds were in fine feather and did themselves great justice, winning grandly. That I can furnish you Barred Rocks in cockerel matings and in pullet matings this year second to none in this country and at the right price I am as positive as I ever was of any statement I have ever made.

Eggs for Hatching

not unduly severe in their handling of them. Furthermore, we are going to be prepared to give you information concerning the eggs earlier than ever.

After the most careful consideration on the part of Mr. Delano and myself we have decided fully this year that we shall sell from the run of our pens, giving everybody an equal opportunity of raising some of the very best of the year at a medium price. Only the very best birds that we own will be used in our matings, both in the male and the female line. Our price will be a uniform one: 75c per egg when ordered in a single sitting; 60c per egg when ordered in fifties; and 50c per egg when ordered in hundreds. We shall have no other price than this price for our eggs during the season of 1910. We guarantee three eggs out of every four to be fertile. We solicit your correspondence and our mating list, which will tell you all about it, will be duly mailed you upon request.

At the New York State Fair, September, '09
J. H. Drevensstedt, Judge

Martin's White Wyandottes

again carried all before them and for the fourth time won best display and final possession of the \$50.00 Hodgkins cup. The Eastern States and Canada were scoured to find birds to beat me and the competition was terrific. In a class of 166 birds I won twice as many firsts and seconds as all my competitors combined. Pens (old)—First, second and third; pens (young)—first, second, fourth and fifth; cocks—first, second and fifth; cockerels—first and fifth; pullet—second and also first display (the coop containing my exhibition birds was lost for three days by the express company and arrived when the judging was just about over, putting them out of the running.) I did not have to pick up birds from all over the country to win. Every one of my entire string of fifty birds was personally bred by me on my farm at Port Dover. 1,000 young birds of the same breeding for sale. Let me book your order for winners. I have them. Free booklet telling all about the Regal strain.

75 CENTS
 Regular Price, \$1.50

American Poultry Journal is the oldest, largest and handsomest poultry paper in the world, and is conceded to be the leader in all things pertaining to poultry. Is copied by both old and new poultry publications. In fact, it has no equal. Now in its 40th volume.

Farm-Poultry, published at Boston, Mass., is one of the oldest and best poultry magazines published in the East, and is now in its 20th volume. This magazine is always full of valuable information pertaining to thoroughbred poultry, and covers the Eastern field in a most thorough manner.

Western Poultry Journal, published at Cedar Rapids, Iowa, is in its 21st volume, and is one of the most up-to-date poultry magazines published in the West. The two, together with the old reliable American Poultry Journal, thoroughly cover the entire field of poultry literature, and make a poultry library in themselves.

The Greatest Combination Ever Offered

and especially so when you take into consideration the fact that American Poultry Journal contains from 60 to 150 pages of interesting matter, any number of which is worth more than we are asking for one year's subscription to all three magazines.

This offer is for both new and renewal subscriptions. Cut out the coupon and send in your order today. Address all orders to

SILVER-LACED WYANDOTTES

Our Silvers won last year in the hottest competition. They are better this year; they scored 93½ to 95 under such judges as Tucker, Mulinix, Emmel and McClave, in competition. Utility breeding birds, full brothers and sisters to our winners, \$1.50 each. Fine exhibition pullets and cockerels, \$3 to \$10.

Clare E. Hoffman : : : Allegan, Michigan

Blanchard's White Leghorns

are no experiment, having been carefully selected and bred for over twenty years. No labor or expense has been spared in building up and perfecting this strain, and while the production of large, pure white, fancy market eggs has been the main object, **standard qualities have not been neglected.** They are large, vigorous, active and handsome. Good winter layers and keep at it all summer. Unexcelled as foundation stock or for introducing new blood. Stock for sale, both old and young. Illustrated circular free.

WINNERS AT MADISON SQUARE GARDEN, N. Y., 1903-1904-1905-1906-1907

A. M. SHAW - SUCCESSOR TO H. J. BLANCHARD - Box 997, GROTON, N. Y.

EXHIBITION COOPS

Now ready for immediate delivery. Prices, single size, \$1 each; \$5.50 per half doz.; \$11 per dozen. Pen size \$2 each, two for \$3.50 or six for \$9. Furnished complete with the proper size tacks, nails and cloth to cover. All coops are stained a rich mahogany color unless ordered without any finish. **Free with each order of one dozen single coops,** we will send without any extra charge one coop, pen size, or for \$6.50 we will ship one-half dozen single and one pen size. Our coops are all machine made. The single coops are 24x24x30 inches and the pen coops 24x48x30 inches as called for in the American Standard of Perfection. Coops of any other size are very apt to be set in the back row at many poultry shows. The dowels are of the best yellow pine and the door slides all the way up, which will allow the bird to be removed without breaking the feathers. This means POINTS in scoring. All coops can be shipped flat and be set together in a few minutes. They can be as easily taken apart after the show and packed away in a small space. Our coops are built strong and can be shipped from show to show with birds enclosed in perfect safety. Order direct from this ad or send for our new illustrated catalog, showing how our coops are made, with pictures of the machines that make them. The catalogue shows the different styles of coops we make and also tells about our popular I. C. Trap-Nests, feed boxes, shipping coops and other poultry supplies. We make a specialty of cooping shows and make a special 3-section coop that is just the thing for poultry associations.

SAGINAW, MICHIGAN, U. S. A.

YOUR HENS WILL PAY BIG PROFIT

Keep only your laying hens! Your non-layers, barren hens, drones, etc., eat up the layers' profits faster than the useful hens make those profits by steady egg laying. You must get rid of the hens which can't pay their own board bills, to say nothing of egg profits.

But, of course, you don't want to kill a hen that, though it is a non-layer now, still possesses egg-laying qualifications. How are you going to tell whether the hen will ever lay again?

That's just what the **Potter System** teaches in ten minutes. You'll quickly know how to tell the absolutely eggless hens in your flock. You take the non-layers away, keeping only the hens that pay profit. Then you sell the non-layers to market—more profit.

Thousands of poultry keepers and farmers are making their flocks pay big because they are using the **Potter System.** Their success is yours, too. Send us that coupon in the lower right hand corner and enclose two red stamps for postage.

"Don't Kill the Laying Hen"

Reveals the simple way of making money by eliminating non-laying hens from your flock. The method of telling whether a hen will ever lay another egg is laid bare.

Our Book Tells You

- 1st—How to avoid killing the hen that is laying.
- 2d—How to pick out the hen that is not laying.
- 3d—To know about how far advanced the hen is toward the laying point.
- 4th—How to avoid wintering hens that are not likely to be good winter layers.
- 5th—To know how to select the hen having strong laying powers for breeding purposes.
- 6th—How to know the hen that has entirely lost her power of egg production.
- 7th—To know how to sort out the hens in summer or fall that have ceased laying.
- 8th—How to know the hen that has become weakened in her laying powers.
- 9th—To know how to buy hens in the early winter that will make good winter layers, and dispose of them at a large profit after receiving their crop of eggs.
- 10th—How a very close estimate of the number of eggs the hen lays in a week or month may be made without the use of trap nests.
- 11th—How overfeeding before egg development has started tends to reduce the egg production.
- 12th—How, when and why the laying hen should be educated.
- 13th—How to arouse and stimulate the laying organs of the hen.
- 14th—How to know the pullets that will make, and are, strong layers.
- 15th—Roup, and how it affects the laying organs of the hen.

This Splendid House, Only \$40

This Potter Portable Sanitary Poultry House, shown here, is eight feet by ten feet in size, completely equipped with two Potter Hennerly Outfits, six nests, etc., two pens, room for fifteen to eighteen hens each. It is complete, convenient, sanitary, neat and attractive. If in need of a house of this style and size, you can't beat it for \$40.00. The house shown here is but one of the dozen different styles and sizes which we make. We recently bought out the business of the Sanitary House Company of Lemont, Illinois, and now manufacture the complete line of Portable (K. D.) Poultry Houses, Broods, Coops, Pigeon Lofts, etc., formerly made by them. If you want a complete up-to-date and cheap house we can supply it. Large 100-page catalog fully describing our houses, fixtures and supplies will be sent.

**BLAKER'S BARRED PLY. ROCKS WIN**

Do you want a winner for your show? We have five grand show cocks, eighteen exhibition cockerels, sixteen exhibition hens and twenty-two crack show pullets, rapidly rounding into show shape, the cream of over 500 head. They are being conditioned with the same care and skill that was used by me in fitting E. B. Thompson's great Madison Square winners during my two seasons with him as head poultryman. These birds are fit to show anywhere, are the down-to-date new standard kind; clean, snappy, narrow barred, elegant shape, low even combs, rich eye and leg color. Many are direct descendants of Madison Square Garden winners. We also have hundreds of select breeders and fine utility birds. Our 32-page page catalog tells all about us and the matings that produced these fine birds.

FOUR FOR \$1.00

Four First-Class Poultry Publications, Published in Different Parts of the U. S., at One-Half Price

American Poultry Journal - - - } \$1.00
American Poultry Advocate - - - }
Poultry Item and Commercial Poultry } Regular Price \$2

AMERICAN POULTRY JOURNAL needs no introduction, as it is the oldest, largest and best poultry paper in the world. Is the leader of the poultry press, and is now in its 40th volume. No poultryman can afford to be without it, as it has no equal.

AMERICAN POULTRY ADVOCATE, the great New York state paper published at Syracuse, and full of good reading matter, is always welcomed by the subscriber. Now in its 18th volume. It is conceded to be one of the best poultry papers published in the east.

POULTRY ITEM, published at Sellersville, Pa. Now in its 12th volume, and although a young publication compared to the others embraced in this offer, it is safe to state that Poultry Item is rapidly pushing toward the front. Full of valuable information and complete show winnings.

COMMERCIAL POULTRY, published at Marseilles, Ill., is now in its 18th volume. True to its name, it instructs the reader on poultry as a business. Its volumes contain articles by excellent writers who contribute regularly and make it interesting for the reader.

When reading this do not lose sight of the fact that American Poultry Journal contains from 60 to 166 pages of interesting reading matter; that it has a strong corps of field men who report on conditions in their territory each month so that it contains the "newsiest" news of the poultry world. A single copy is worth more than we ask for one year's subscription to all four.

\$2.00 VALUE FOR ONLY \$1.00

This offer is for both new and renewal subscriptions. Cut out the coupon and send in your order today. Address

Crescent Poultry Farm, Frank Foy, Prop., Des Moines, Iowa

Foy's Big Book---Money in Poultry and Squabs

Describes and illustrates all the leading varieties of pure bred fowls and Homer Pigeons for squab raising. "Tells you all about how to raise poultry for profit, how to feed and mate, all about diseases and remedies and a great mass of useful information." "Gives plans for building poultry houses, describes and illustrates the best incubators and brooders and the famous Crescent Poultry Farm, which is the largest poultry farm in this country devoted exclusively to the rearing of pure bred poultry and pigeons." ***IMPORTANT ADVICE**—Tells you how to start the business in a small way and grow big. My specialties are thoroughbred fowls of a high quality, and Homer Pigeons for raising squabs. "I can supply eggs for hatching from all leading varieties by the single setting or in large lots for incubators. My prices are low. The quality is high. All who want to keep posted in the poultry business, or contemplate purchasing anything in the above line, should send for this book. Mailed to any address for 4c in stamps. Write your wants; mention A. P. J.

ORIGINATORS : OF ALL THE

For information on the origination of all the Orpingtons and valuable hints on poultry keeping, send 6c for our new illustrated catalogue.

If you want the best Orpingtons you must send to their originators, who naturally have the best, as proved by our many unbeaten show records. 12,000 firsts and specials won by us. 90 firsts, 68 seconds at five showings at Madison Square; more than six times as many firsts as any other Orpington breeder. Convincing facts, these.

We guarantee safe delivery and satisfaction, which is backed by a reputation of 36 years standing; this should mean something to you.

Several thousand stock birds always for sale. Every order receives Mr. P. A. Cook's personal attention. Advice free. Inspection invited. Trains met, 19 miles from N. Y. City.

Thorniley's Mottled Anconas

HAUPT'S ORPINGTONS

Greatest winter layers on earth, carefully bred for winter egg production and all standard requirements. Show birds for sale at all times. Utility stock cheap. Write for prices and new circular. : : : : :

Willard J. Thorniley, R. D. No. 1, Marietta, Ohio

In Single or Rose Comb Buffs, Whites or Blacks are conceded the best. Ten years an Orpington specialist, having won hundreds of prizes, specials, cups, diplomas, etc. Does that stand for anything? Have started more successful Orpington breeders than all others. Winners at New York, Phila., Allentown, Jamestown Expo., Va., Easton, etc. Our latest success at Pa. State Show: 1st pen W. Orps., 1st pen Blk. Orps., 1st S. C. Buff cock, 1st R. C. Buff cock, 1st R. C. Buff hen; 5 possible 1st prizes on 6 entries. For stock, eggs or chicks, write us. We guarantee all our dealings.

FAIRVIEW FARM - J. S. HAUPT - EASTON, PENNA.

Barred Ply. Rocks and Columbian Wyandottes

Barred P. Rocks which are bred from a list of winners at the hottest shows in this part of the country for the past 12 years. We offer for sale both old and young stock, singly, in pairs, trios or pens for pullet or cockerel mating. Books now open for egg orders. : : : : :

Col. Wyandottes which have never been without a place in the show rooms for the past 4 years. We only offer for sale a number of fine shaped, blocky cks. with good markings. Orders for eggs should be booked early, as we will have only a limited number of Columbian Wyandotte eggs. :

Tannenbaum Farms : : Willoughby, Ohio

IF YOU ARE LOOKING

For exhibition birds that will land the ribbons for you at this Winter's shows, or for good breeders for next year's matings, do not overlook the fact that

First Prize Pullet, Illinois State Fair, 1909

Bickerdike's Pedigreed White Rocks

are unequalled for quality in both fancy and utility. Our birds are trap-nested and bred for egg production with individual records of 240 eggs per year. As for their exhibition quality they

Always Win the Lion's Share of Ribbons

at the largest shows. Our winnings given below proves conclusively that the Bickerdike Pedigreed White Rocks stand in the lead in the show room:

Illinois State Fair, 1907—1st, 2d and 3d cock; 2d and 3d cockerel; 2d and 3d hen; 1st and 3d pullet; 1st and 2d pen.

Missouri State Show, 1908—On five birds entered: 1st cock; 1st hen; 3d and 4th pullet.

Illinois State Show, 1909—On five birds entered: 1st cock; 1st and 2d pullet; 3d hen.

Illinois State Fair, 1909—1st, 2d and 3d cock, 1st, 2d and 3d cockerel; 1st, 2d and 3d hen; 1st, 2d and 3d pullet; 1st and 2d pen.

These winnings were no accident, but "**There's a Reason.**" Our birds are **pedigreed** with the trap nest system, and pedigree goes with each bird. Be sure you know what is back of the bird you buy. When you buy Bickerdike's Pedigreed White Rocks, you get individual blood lines that can be had from no other breeder in America. For quality buy pedigreed birds. We have a grand bunch of stock for sale. Before buying your show birds or breeding stock, write you wants to

METAL MOTHERS

OUR NEW DISCOVERIES MAKE

POULTRY KEEPING EASY AND PROFITS SURE

OUR MACHINES were used exclusively in the original PhiloSystem plant where over \$1500 FROM 60 HENS IN TEN MONTHS. has been cleared from the sale of eggs, baby chicks and fowls raised on a city lot 40 feet square. One of the largest hatching plants in America saved over \$700 this year by using our system of brooding. We sell the best brooder ever made for only \$2.50.

One party hatched and raised \$500 worth of poultry last year with four Metal Mothers, and hundreds of others are delighted with our machines and our new way of raising poultry. Our combined machine hatches and broods perfectly at the same time with only one lamp and one-fifth the oil used in other machines. Once filling the lamp completes the hatch. It runs as steady as a clock in any room from cellar to garret, and our Long Burning Safety Lamp runs on for weeks without attention. It is the only machine that airs the eggs in the natural way and applies the heat to the chickens like the mother hen.

THE BROODER-HATCHER

OUR 1909 PATTERN METAL MOTHERS are the perfected results of the latest discoveries in artificial incubation. They will hatch hens, ducks, turkey and goose eggs equally well and at the same time. Regulation of moisture and heat entirely automatic. One Metal Mother complete \$7.50; two, \$14; four, \$24. One Hatcher complete \$5; two, \$9; four, \$17; six, \$24. Catalogue free.

The Cycle Hatcher Co., Elmira, N. Y.

Dear Sirs:—As per your letter I will send you an order for six machines in a few weeks. Am hatching with the one I now have. Got 47 chicks from 50 eggs. Have abandoned all my 200-egg machines. Am practicing in my store with a view to starting my 40-acre poultry plant near town here. Think I can sell a lot of these machines next year.

H. W. White, 311 Ada St., Yankton, S. D.

The Cycle Hatcher Co., Elmira, N. Y.

Gentlemen:—The hatcher we bought of you last May is all right. We took off two hatches with it; one of 43 chicks and one of 46 chicks. All good ones. Yours respectfully, G. W. Simpson, Austin, Pa.

The Cycle Hatcher Co., Elmira, N. Y.

Sirs:—You people may be interested to know what an experiment with one of your Metal Mothers has done for us. On the 17th of Oct. we put 40 eggs in your machine, 38 of them being fertile, and when hatching time came we were surprised to find 38 chicks from our 38 eggs. This we think an excellent record, for the machine had been placed out in the open weather, the only protection being an old tin covered box. Yours respectfully,

J. P. & L. L. Hollinger, R. I. Red Farm, Witner, Pa.

Cycle Hatcher Co. - 214 Wm. St., Elmira, N. Y.

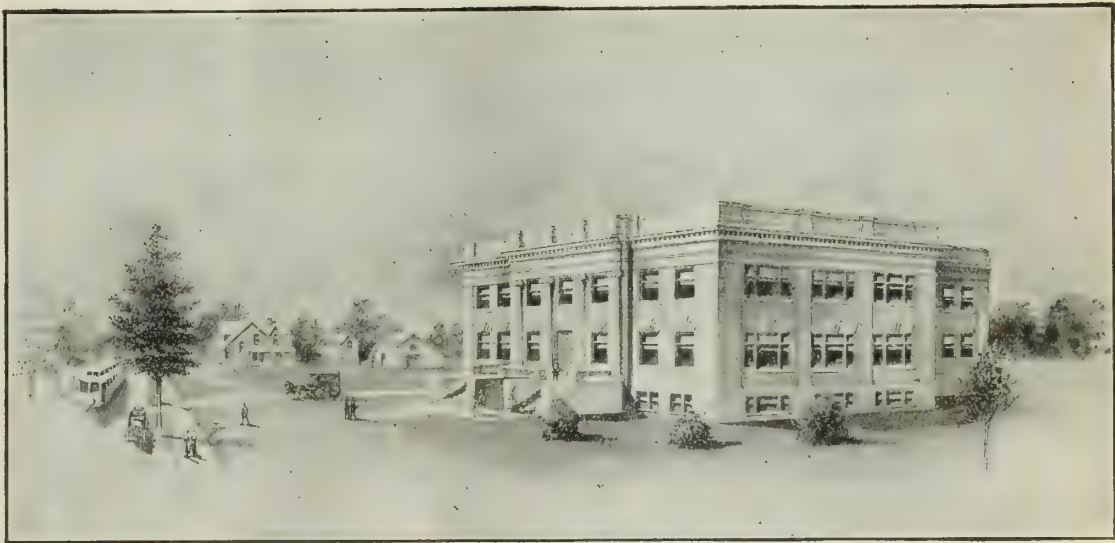

PHILO NATIONAL POULTRY INSTITUTE

LEARN TO MAKE POULTRY PAY

We teach poultry keeping in all its branches by mail, or by demonstration at the greatest Poultry Institute in the world.

PHILO SYSTEM

Fresh laid eggs are considered the most perfect food and any one can learn to produce them at a profit. With the improved methods taught in our schools

PHILO INSTITUTE BUILDING

A Successful Business and Good Living

may be had on a city lot or small plot of ground in the suburbs or in the country. Poultry keeping is really a science. To get the greatest returns all branches of the work must be thoroughly understood. A short course is all that is necessary to make the business a success and to avoid the mistakes so common with those who do not understand the work.

We Can Teach You Scientific Poultry Keeping

by mail or at our National Poultry Institute, where thousands of the finest birds are raised annually. With the improved methods it is possible to handle the business with a very small capital, or students can get employment at good salaries.

Write for full information about our course of instruction in methods of poultry keeping.

OLD HOMESTEAD FARMS - J. H. McDANELL Prop. - R. R. 2. WARSAW, KY.

MICA-CRYSTAL THE BEST GRIT ON THE MARKET

Contains Mica, Iron, Magnesium and Quartz, each in its purest and best form. It is of such peculiar formation that it will not take a polish as is the case with grit made from white quartz or marble and unlike limestone grit, or grit of like soluble substances, is not dissolved by the fluids in the crop, consequently, it never loses its sharpness. It sharpens itself by contact, the only grit that does, and therefore excels all others as a grinder. Without grit the feathered tribe cannot be healthy or productive. This is a well demonstrated fact in nature. Grit is to the fowl what teeth are to other members of animal creation.

Let us prove the truth of what we say by filling a sample order for you. Manufactured only by
MICA-CRYSTAL CO. - - - CONCORD, N. H.

CREGAR'S GOLDEN ROD STRAIN S. C. BUFF & WHITE LEGHORNS

CHARLES PARSONS & SON :: CONWAY, MASS.

Burhans' "Quality" Exhibition Barred Plymouth Rocks

Champions of the Northwest Captured the lion's share of honors and the glory for the strongest exhibit ever made in the Twin Cities. See former ad for winnings. I am now offering a few crack exhibition cockerels and pullets bred the same as they, with a few yearling hens cockerel bred. These are the sort of cockerels that impress their likeness on their chicks. Large size, red eyes, yellow legs and beaks, shapely and smooth in finish, barred to the skin and clean cut and bright on the surface. They will please. Priced low for the quality. Wings and tails barred right. Come early as they are few but selected. Eggs, coming season at five, ten, fifteen, twenty-five and forty-five dollars per setting. Are they worth the money? Ask my customers.

Amos Burhans Box A Waterville, Minnesota

A Tip For You

"LIKE BEGETS LIKE." If you want winners your stock must be raised from winners. Come to headquarters. For years

Fishel's White Wyandottes

have been winners at the leading shows; Chicago, Cleveland, Indianapolis, Nashville, St. Louis World's Fair, and this season in the hands of our customers at Alaska-Yukon-Pacific Exposition and many other great shows of note. They breed well, grow well, lay well, are strong and healthy and are BRED WHITE; raised under natural conditions by common-sense methods. They are profit makers, whether kept strictly for fancy or as a market fowl.

"The World's Best"

We have over three thousand to choose from and can supply your needs in quality and quantity. Let us furnish you winners and put them in show condition for you. Send us a dime today for our catalog which we wish to send to every reader of this journal who is interested in White Wyandottes, and quote them prices. Do not delay; write us now while we can give you the pick of the flock.

Coleman's Eureka Tonic and Roup Tablets

The greatest discovery of the age in the poultry remedy line. These tablets are positively guaranteed to cure **roup and colds**, will build up the fowl's system, guaranteed to prevent the loss of birds due to the exposure and disease contracted in the show room, will put the fowls in the finest possible condition for exhibition. No matter what the disease Eureka Tablets will save your birds.

Don't take our word for it, but read the following unsolicited testimonials from the greatest authorities in the country:

Loring Brown, eminent poultry judge and manager of Belmont Farm, Smyrna, Ga., the South's largest poultry farm, writes: "Please send the tablets by return mail. I have lost no less than \$200.00 worth of birds by not having your valuable remedy."

Dr. S. R. Harrison, Shelby, Ohio, writes: "Your tablets have saved birds for me that were more than half dead. I cannot find words to speak too highly of this wonderful remedy."

T. N. Davis, Wholesale Grocer, Topeka, Kansas, writes: "I have tried about all Roup cures but I find that none of them are of much force but yours, and it is a truly **ROUP CURE**, so please find enclosed one dollar (\$1.00) for which send me five (5) boxes of your tablets at once."

H. B. Hark, manager of the Hartman Stock Farm Poultry Yards, Columbus, Ohio, the world's largest poultry farm, writes: "They are the very best thing I have ever tried to put a bird that is out of condition into good shape quick. At the Kentucky State Fair a friend came to me with a cockerel that was all in, could not hold up his head. I gave him two of your pink pills. The next morning he stood up like a fighting cock and took one of the first prizes."

What more proofs of the wonderful power of this remedy could be asked for?

Write today. A liberal sample box will be sent for stamp, or better still, send 25 cents for a full size box containing 65 tablets, postpaid, or 5 boxes for \$1.00. Please mention American Poultry Journal when writing.

The Cyphers Folks Know What the Chicken-Raiser Needs and How to Help Him

YOU will find that Cyphers folks are practical poultry-raisers like yourself. We know the difficulties you are up against—and the way out of them. Been a lifetime at it; and our ideas and help, based on actual knowledge and long experience, ought surely to be *worth getting*.

We've built up the greatest incubator, brooder and poultry-supply business in the world.

And we've done it by giving the chicken-raiser a square deal, taking a personal interest in his success.

—Cutting out his troubles, and guiding him right on every point.

We want to get on that same basis with *you*.

Let us help you to real success!

What we have done—are doing—on

Our \$40,000 Poultry Farm

—others can do. It's having the right materials—going at it the *right* way.

We want to tell you about the Cyphers Incubator, because it is the incubator you are going to own some day—the sooner the better for you.

It is the *logical* incubator for every thinking, progressive, successful poultry-raiser.

Used by more Government Experiment Stations, by more Agricultural Colleges, by more practical poultry plants, by more famous fanciers, than all other makes combined.

And it's

The Best Incubator for the Beginner

—no matter how small a scale he's starting on.

We want you to learn about the Cyphers Incubator from your own experience—we want you to put it to hatching your chicks—see how big a percentage you hatch—see how strong, healthy and vigorous they are.

Our guarantee is big enough and broad enough to give you that privilege.

COUPON FOR YOUR CONVENIENCE

Cyphers Incubator Co., Dept. 30, Buffalo, N. Y.

Gentlemen:—Please send me your 1910 Catalog without obligation to me. I am interested in a size incubator (or) a size brooder.

Name

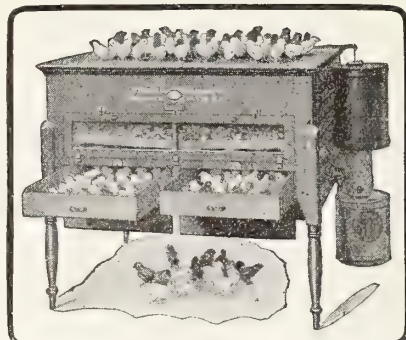

Address

You Have 90 Days—4 Hatches —To Prove It Out In

—Time enough to fully demonstrate the merits of any incubator.

Other incubators are "guaranteed to be as represented." Our guarantee is to you *personally*. That means that *you* must be satisfied. Your word will be accepted by us. You can return it if dissatisfied after a *fair trial* within 90 days, and your money will be refunded.

Go right through the Cyphers Incubator and compare it with other incubators—note the special patented Cyphers features which they cannot offer—and you will see why it is better to own the Cyphers *first* than to "educate yourself up" to it through the trials and troubles of the inferior kinds.

The Cyphers is made of the best material that ever went into an incubator—genuine Michigan white pine. It is the wood that Nature made for incubator purposes. It is light—workable—the best resistant to heat and moisture. The Cyphers is a hot-air machine. That means no tanks to rust out, spring a leak and spoil your hatches.

Our Patented Diffusive Principle

It is the greatest invention ever introduced into an incubator to insure constant, thorough, even heat in the egg-chamber, without air currents or direct drafts.

It does away with moisture troubles! You do not have to fuss around supplying it with extra water.

It is self-ventilating, self-regulating.

Ten minutes a day is positively all the attention the Cyphers Incubator requires. Our special drop bottom is for extra ventilation

Address Nearest Office

in warm weather and tropical climates.

Our patented nursery drawers, for the larger-size machines, are the handiest things that ever happened in an incubator.

You can see how much ahead of the times we are when you know the Cyphers was

The First Labeled Insurable Incubator

The first incubator to conform to the rigid requirements of the National Board of Fire Underwriters in heater, lamp and entire construction; first to receive their unequalled approval and insurance-inspection label.

Every Cyphers Incubator and Brooder bears this inspection label, issued in serial numbers. (See fac-similes below.)

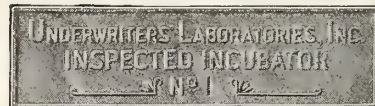

Get Our Big, New Catalog for 1910

Tells all about the new Cyphers Insurable Incubators and Brooders, from popular sizes up to the Mammoth Compartment machines and latest poultry-plant equipments. Tells all about the many Government Experiment Stations, Agricultural Colleges, leading poultry fanciers and practical chicken-raisers who are having great success with Cyphers Incubators. Gives their actual letters about the Cyphers—every one *signed* and *dated*.

Describes over 70 Cyphers poultry specialties. Tells the interesting story of the new Electrical Hatching and Brooding Devices originated and patented by us. Usable anywhere where there is a constant electric current for lighting or heating purposes.

Contains chapters telling how Cyphers Incubator Company hatches, broods and feeds thousands of chickens on its \$40,000, fifty-acre poultry farm. Stock and eggs for sale.

Clip the coupon and mail it *today*.

Form of Brass Label to be found (in serial numbers) on every 1910 Standard Cyphers Incubator.

Form of Brass Label to be found (in serial numbers) on every 1910 Standard Cyphers Brooder.

Cyphers Incubator Company, Dept. 30,

Buffalo, N. Y.; New York City; Chicago, Ill.; Boston, Mass.; Kansas City, Mo.; Oakland, Cal. (2,000 selling agents.)

"Quality" Chickens—Quality in Incubators—Combine the Two and Win Success

Some people still have the idea that incubator-hatched chickens are not as good, are not as healthy and fine as those hatched by hens. They could not be worse mistaken. Other things being equal, chickens hatched the right way, *in the right kind of an incubator* will excel the hen-hatched kind every time.

Mr Kellerstrass

Proof is Not Far to Seek

The highest-valued and highest-priced fowls ever raised and sold were hatched in Standard Cyphers Incubators—an astonishing claim, but the truth. We challenge the world

to disprove this statement.

Victor, the Black Minorca cockerel sold by Geo. H. Northup for \$1,000, was hatched in a Standard Cyphers Incubator. So was Prince of Indiana, the White Plymouth Rock cock bird sold by U. R. Fishel for \$800. So was the famous White Orpington hen "Peggy," which the owner, Ernest Kellerstrass, valued at \$10,000. And the same is true of every bird in the lot of five Crystal Strain White Orpingtons that Mr. Kellerstrass sold last year for \$7,500 cash to Madame Paderewski wife of the world-famed pianist.

U. R. Fishel

These are not exceptional cases. Hundreds of winners of highest honors at New York, Boston, Chicago and other great shows of the United States and Canada have been hatched in Cyphers Incubators and raised in Cyphers Brooders. The truth of this claim is known to thousands of poultrymen exhibitors.

Another World's Record

Now comes another triumph—another world's record for *Cyphers-hatched fowls*.

Last season Kellerstrass Farm, Kansas City, Mo., sold 1,024 Crystal Strain White Orpington hatching eggs at \$2.00, straight, per egg, or \$2,048 for the lot. These eggs were laid by thirty hens, *netting the owner \$68.00 per hen* for eggs sold. Besides this, these same hens laid more than 3,200 additional eggs during the year.

Every hen but one in the thirty WAS HATCHED IN A STANDARD CYPHERS INCUBATOR, also the THREE GRAND MALE BIRDS that headed these pens. Twelve of the hens are shown herewith; also the three big, fine male birds.

These two-dollar eggs, 1,024 in number, were sold to eighty-four (84) customers, men and women living from Connecticut on the east to California on the west, and hatches of *from seven to twelve chicks* were obtained in almost every case.

Read Mr. Kellerstrass' own statement:

Certificate of Mr. Kellerstrass

"Kansas City, Mo., October 26, 1909.

"To Whom It May Concern:

"This is to certify that during the hatching season of 1909 I sold 1,024 eggs to eighty-four (84) customers, receiving two dollars (\$2.00) straight per egg, or \$2,048 for the total number; that these eggs were laid by three breeding pens, each pen containing ten females and a male, and that every bird in the three pens, males and females, excepting one hen, were hatched by me in Standard Cyphers Incubators, manufactured by Cyphers Incubator Company, Buffalo, N. Y., U. S. A., as are all other Crystal Strain White Orpington fowls hatched and raised on Kellerstrass Farm.

[Signed] "ERNEST KELLERSTRASS."

Note, please, that all fowls produced on Kellerstrass Farm are hatched in Standard Cyphers Incubators. This has been true for several years, yet the Kellerstrass White Orpingtons are widely famous for *size, vigor and vitality*, as well as for finest show points.

World's Greatest Specialty Farm

To U. R. FISHEL, owner of 120-acre "Fishelton," Hope, Ind., home of the "Best-In-The-World" strain of White Plymouth Rocks, belongs the credit of building up the greatest one-variety, standard-quality poultry farm in the world. Mr. Fishel, after twenty years of steady climbing, now does an annual business of \$40,000 in the sale of exhibition-breeding stock and eggs for hatching. He raises and sells Standard-bred White Rocks *by the thousand* every year.

One would naturally think that by this time Mr. Fishel must have found out the

best and most profitable way to hatch and rear these thousands of fine-quality fowls—and he has.

Let him tell you, Reader, all about it—in his own way, word for word:—

"Hope, Ind., October 29, 1909.

"Cyphers Incubator Co., Buffalo, N. Y.:

"I am pleased to say that all of my winners at Indiana State Fair, 1909, were hatched in Standard Cyphers Incubators, and reared in Standard Cyphers Brooders. At this Fair I won all firsts, all seconds and four out of a possible five thirds—competition open to the world.

"We reared on the home farm this year over three thousand White Plymouth Rocks, and every one of them was hatched in Cyphers machines. We never had before as large, strong, vigorous birds as we have this season.

"The first and most important thing to get good, strong chicks is to have vigorous breeding stock; then use good, reliable machines to hatch and brood them in. With these three essentials no one should fail to rear good birds.

"Yours very respectfully,

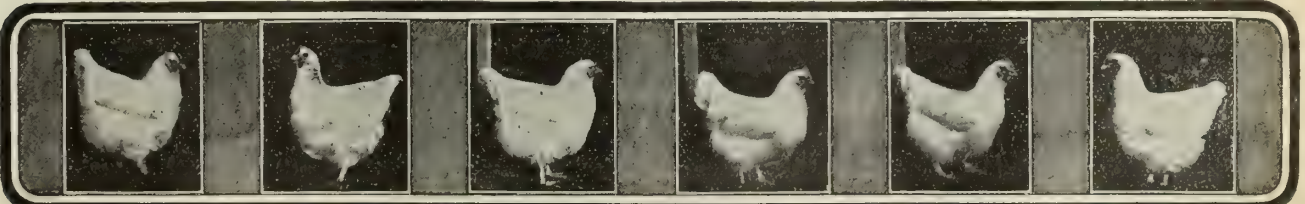

"U. R. FISHEL."

These are "Big Breed" Eggs

Please note that these highly successful poultrymen are not breeding the kind of fowls *whose eggs are easiest to hatch*. Orpingtons and Plymouth Rocks are in the big-breed class. But eggs from these general-purpose fowls hatch well, hatch profitably if entrusted to the right kind of an incubator—if placed in a Cyphers, the Standard Successful Hatcher of the World, *proved so in every clime, by every practical test.*

Notice, also, that these well-posted and experienced poultrymen employ *no other means of hatching* on their great farms. They dare to put all their eggs in one basket! *And it is safe to do this* if you pin your faith to Cyphers Incubators and Brooders—the kind that are guaranteed to you, *personally*, on ninety days' trial. It is *success* with the Cyphers *after a fair trial*—this, or your money back.

Write today for 160-page Complete Catalogue and Poultrymen's Guide for 1910; now ready for mailing, *FREE, postpaid*, if you use coupon on opposite page and mention this paper. Address nearest office.

POSSIBILITIES OF THE POULTRY BUSINESS

What It Is, Has Been, and a View of What the Future Has
in Store—The Supply and Demand—The Value of
Standard Bred, and the Question of Variety.

Written by H. P. Schwab, Eastern Representative A. P. J., Irondequoit, N. Y.

Part One.

FOR those that are now interested in poultry, as well as for those that possibly may, or should be, there exists a real live illustrated condition of facts today, that is worthy of careful and special attention. From facts procured in every possible way, and from a careful study of conditions, it must be evident that the demand for both poultry and eggs is far from being supplied. The prices that now prevail for these necessities are the best excuse we have to offer for this article on the possibilities of the poultry business. Were the supply doubled at this time, it is safe to say it would not effect the prevailing prices, as the demand is even now in excess to such a condition. One dealer (at Rochester) told the writer within a week, that they were now receiving from 600 to 700 cases of selected eggs per week, and with these they barely supplied one-third of the orders they had for this grade. This is the same old, old story over again; we have heard it for years, and year after year it becomes stronger, more intense, and all this time prices soar higher and the limit is not near reached as yet.

In these articles we have but two objects in view. The one is to show the conditions as they are, thereby to seek to get the present breeders to enlarge their plants, to broaden out, and to reap more of the profits due them. Second to properly place these questions before others, that are seeking investment and a business that promises so much for all, in health as well as in better conditions and living.

If there are those among our readers, looking for a business with an insured profit, let them consider these few quotations taken from the papers and averaged from November 1 to 12, 1909. New York, chicks from 18c to 24c per pound, fowls from 16c to 22c, selected eggs from 55c to 65c per dozen. Boston, the same on dressed poultry, eggs averaged 60c. The Philadelphia market very similar, and also Pittsburgh, with Chicago but a little below these prices. At Rochester, which is close by, poultry is selling from 17c to 23c, and the best grade of eggs are 50c. Here is a clear statement from figures that we have every reason to believe, as regards poultry they are the wholesale quotations, and the same on eggs with but one exception, the last, which is the retail price now paid. While these prices are the limit for this time, they are not the limit of possible prices to be had. Here at home we have not sold an egg in three years for less than 35c per dozen, and very few at that; the price has ruled from 40c to 60c with us, with the demand several times the supply; increase our plant as we will, the demand is in excess to our best efforts.

We have oft heard the remark, the poultry business would be overdone some day, and that cheap prices would spell failure for the breeder; that is a condition we never expect to see. Twenty-seven years in this line with an ever increasing demand bids fair for the future. The rise in prices as well as the increased demand have been gradual, and at no time have the opportunities for success been more promis-

ing than right now. The calamity howlers of some years ago were effectively hushed by the returns of gold for all those that believed in and have grown up with the poultry business.

Many striking examples of these exist, to tell of their success, as well as of the future prospects. While the value of poultry and eggs produced each year doubles itself, or at least nearly so, the demand increases at a rate at least one-third greater; these, and these alone, are the facts upon which we base our claims for the future. The value of these products for food alone has always been underestimated, and in this age as they become fully known, with the demand for eggs in the use of the arts increasing year after year, it must be evident that there really is something to this worthy of consideration. Still the end is not yet, for as the world grows, so will this demand, which is largely placed on necessity, confidence and principle. As time passes it will ever increase, with promises of safe producing profits for all time to come.

The yearly importations of poultry and eggs, eggs in particular, is one other item to consider in this. At this time we haven't the latest figures of the value of the importations, or the amount, at hand, but they must be enormous. Those of three years ago show that we send millions of dollars each year abroad for these products that should and can be kept at home, to the advantage of our own people. It is positively silly to admit that we can't produce here enough poultry and eggs to supply our home demand, and that at a good profit to our home breeders in excess of that warranted by any other business; we can if we will. If the practical side of this industry becomes properly known, the conditions clearly stated, and if this industry is given but half the attention it should receive, then we will see a boom in this line that will produce all our own demands for both quality and amount.

Standard Breeds the Best.

Before going further, we wish to call particular attention to the value of Standard bred poultry. Our ideas, as well as all of our claims are based on the value, and the returns to be received from Standard bred poultry. Every detail should be considered, so that every advantage can be taken, and all possible income secured. We therefore advise above all, as well as at all times the Standard breeds only, with the assurance that the highest possible gain comes only through them. The breeders of Standard bred poultry can at all times find ready sale for choice breeding and show birds. There is no limit for prices to be obtained for extra quality exhibition birds, while vigorous breeders bring prices that are from five to ten or more times their value at market prices. This is the most profitable side of the business; it is also the one to grow up with, if you desire to attain the reputation with the best of quality and reap the highest prices. Still any one, and in any section, can breed thoroughbreds and sell his surplus of valuable breeders at a profit upwards of 100 per cent above the market value.

While the one object of these articles is to show the possibilities of the practical side of the industry, the above is only mentioned as one argument in favor of the Standard breeds, bred pure. It should be well understood that the practical and fancy breeding combine themselves to the greatest advantage as shown above. If we had other desires in this, and we have, it would be to extend the hand of welcome to all recruits, wish them well and promise them every aid. We can at least at this time assure them that we won't let them go wrong if they will but come to us with the questions they do not understand. The question

and answer department of the American Poultry Journal is a source of valuable information, and is open to you.

Next in importance is the question of meat, its grain, flavor, etc. These questions must be considered in this, as well as the shape, and general condition of the carcass. Just plain appearance is an important factor here. The very best of quality, with the high average sameness, is only obtained from the Standard breeds. We have seen a load of this kind of poultry sell at the Rochester market for 4 cents a pound above the regular retail price. They were all of the same quality, color, shape and size. This man carried home dollars more than his neighbors did, while the cost to him was no more. It was simply a case of additional profit for the quality produced.

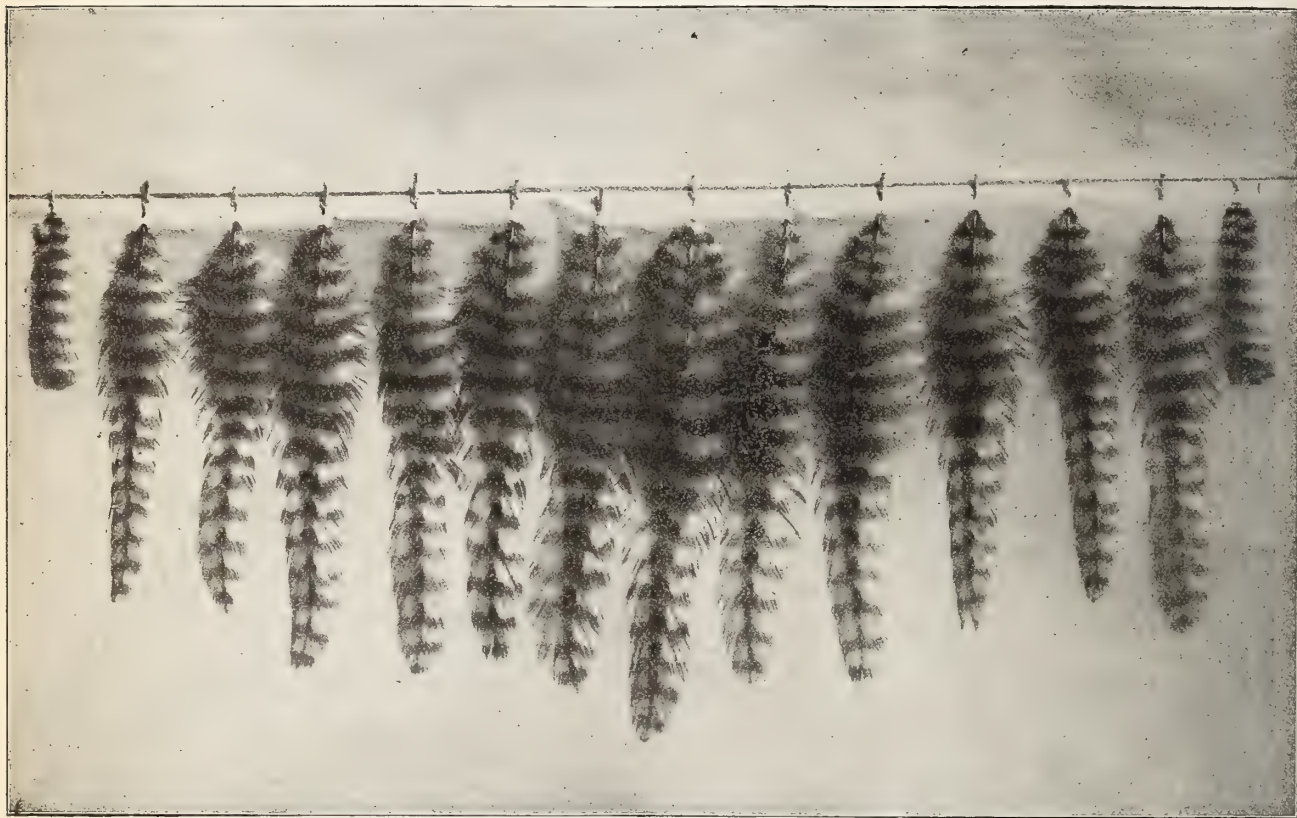

Standard bred poultry has other advantages to consider. They are more uniform and will attain any given size and weight in much less time, and therefore at less cost than the mongrel hen. It is their nature to mature early. This stands for them to begin laying at an early age. Every egg gained, as well as every ounce of weight gained, adds to the individual value, as well as profit to the owner. It is this worth that is with them, a characteristic, and warrants the greatest number of eggs per head per year.

It is to Standard bred poultry that we look with confi-

varieties. They also have their reasons, and the result in their cases are satisfactory, and just as convincing, as any special argument that could be made in favor of any one breed or variety. Results speak for themselves. It is the general success we wish attained, so will not, at this time, go further into the question of variety. Location along with personal fancy will best answer this question in a general way at least.

There are also other sources of income from poultry. Feathers, if dry picked, or at least properly dried, sell at paying prices, while the droppings find ready sale and their value to the garden, or the corn lot, will be found in excess to any other fertilizer.

If poultry only barely paid with us, we still would fancy and breed it for the love and "out of door" work it affords. Here and in this we feel free. The love of nature that is born in all persons, is best satisfied with out door work. Healthful and invigorating, with enough variety to please, is to be found in breeding poultry. The work, while exacting, is light and clean, and at all times affords a study of nature that is delightful. One of the great breeders of the day, lately told us: I find my greatest enjoyment among my poultry, and am happiest when working with and for them.

BARRED ROCK FEATHERS FROM BIRDS BRED BY KING BROS., OSHKOSH, WIS.

dence for the greatest possible egg production, and well we may. The makers of the Standard are practical men, who have made a life's study of the characteristics and conditions of the different breeds. They have followed nature's laws in this, and having found its desires, have improved along those lines for years, with a care that has brought results beyond our fondest expectations. With this very important proof in full view, we offer our best argument for the Standard breeds, and with a confidence gained by a life-time spent with them.

What Breed?

The question here now arises—which is the best breed for general purposes? This would largely depend on several other questions, as well as on conditions, so our reply to this question under general circumstances would be "the variety or breed you fancy." There are several varieties of Standard bred poultry that are practical breeds and will meet every requirement. In this we believe that if individual taste is followed here in this, that then success is best assured. We personally bank on the Barred Plymouth Rocks, and so do thousands of others. Still there are others, and great numbers have made prominent success with other

We shall follow this article with at least one more in our next issue. In that we hope to give some interesting figures to prove all the claims we may make for the future possibilities. For this we wish to collect information from some others, which has been written for. We do not care to quote from personal observation only. We feel that our purpose can best be served by including the success of others and making this more general in character.

There are breeders, both of fancy and practical poultry, in every state of the union, that have made the greatest possible success, and whose income today compares favorably with that of bank presidents. There are thousands upon thousands of others whose homes are yearly supplied with the fruits of successful breeding. Your home, dear reader, would add but one more to this great number, while the fruits would also tend to bring more contentment for many.

After all is said and done, still bear in mind: There is today a crying want for more poultry and eggs. In this there is room for all, with profit assured. There is positively no danger of overproduction, in our day, or in time to come. Present conditions were never more favorable, nor the future brighter, than now.

FIRST PRIZE PEN W-WYANDOTTES
NEW YORK STATE FAIR 1909.

J. S. MARTIN PORT DOVER ONT. CANADA OWNER & BREEDER

A. O. Schilling
1909

BEAUTIFUL CANADIAN WHITE WYANDOTTES

The time seems now at hand when a winning at a fall fair will carry as much prestige as one made at a prominent winter show. The progress made in cooping, classifying and general management at such fairs as the New York State Fair has placed these events practically on a par with our best winter shows. When such breeders as John S. Martin are contestants in the classes, one never doubts the quality. For a number of successive years Mr. Martin has won the lion's share of the prizes in the White Wyandotte classes and this year was no exception. The above photographic study, representing the first prize pen is a fair example of the Royal Strain of Wyandottes. We recall this strain as winners of many first prizes at the best shows held in the United States and Canada. Although he is not represented in the above group, we cannot refrain from mentioning the first prize cockerel owned by Mr. Martin. This bird seems to be brimful of quality and we predict a season of victories for him if he can be kept in show condition. Such specimens are models and are Standard makers. They reflect great credit on the breeder as an example of a fancier's skill.—A. O. Schilling.

PRIZE ARTICLE DEPARTMENT

We would like to have all of our readers compete for the prizes offered each month in this department. Send as many articles each month as you desire. For the best article we will pay \$3.00 and for the second best \$2.00. Make your communications about a column in length, which is about 600 words. They should be timely and appropriate to the season. Articles describing appliances and houses and accompanied by rough drawings are especially desirable. All the communications must be accompanied by a letter stating that they have been sent in for competition in the Prize Article Department. All articles must be written on one side of the paper only. Articles received after the 15th of the month will be too late for competition in the month following, but will be entered the next month. No manuscript will be returned, but all who send meritorious articles will be given a year's subscription to AMERICAN POULTRY JOURNAL, whether the article is published or not.

The first prize in the contest this month has been awarded to A. V. Meersch, Poughkeepsie, N. Y., and the second prize to Lina S. Luxford, Shinglehouse, Pa.

ARTIFICIAL INCUBATION.

THIS is a subject of great importance to all who are interested in profitable poultry keeping. The number of incubators manufactured and sent to all parts of the globe shows how general the artificial mode of hatching has become. Yet there are still many farmers and others who grow poultry in large numbers who do not avail themselves of the assistance of incubators.

The advantages are many. Among these are the avoidance of the nuisance of waiting for broody hens early in the year; of the trouble taking the hens off the nest daily; of feeding them and seeing that they go on again before the eggs are cold; or broken eggs and trampled on chickens; and of the insect vermin that comes to the little chicks from their mother.

It is stated sometimes that chickens are more delicate and more difficult to bring up when hatched artificially than to me that he had purchased one incubator and he wished to

A reader of the American Poultry Journal wrote recently know what kind of nest he was to make in the machine!!!—to hold the eggs—and also he ought to put the eggs in hot water before starting them in the incubator! This instance will show how some people fail to work the machines successfully, and yet are perhaps loud in their complaints that artificial incubation is useless. It is important to choose a satisfactory place in which to accommodate the incubator. It should be well ventilated, the temperature should be as equal as possible, and there must be no slamming of doors or sudden jars or there will probably be some crippled chicks. The floor must be level. It is necessary to understand the thermometer and to see that it is correct. A good way to test the thermometer is to place the bulb in the mouth and to close the lips. If it then registers between 97 and 99 degrees it is practically correct.

The temperature will fall for a time when the eggs are first inserted, but it will soon rise again. After a very little experience the capabilities of the machine will be learned. Many excellent machines are now on view in full work at the exhibitions held each season in all parts of the United States, and the intending purchaser cannot do better than visit an exhibition and have the details of the various incubators explained to him. He will find the prices most moderate.

Poughkeepsie, N. Y.

A. V. Meersch.

OUR FIRST EXPERIENCE.

UP to two years ago my only experience with chickens had been in cooking and eating them. Suddenly without any premonitory symptoms the chicken fever attacked my husband and I in its most severe form.

Chickens! chickens! was what we craved without regard to "breed" or "strain"; we invested in eggs from different breeders that did not hatch even when we bought widely-advertised incubators for the purpose; then we tried

NINETY-FIVE TOULOUSE GEESSE ON THE POULTRY FARM OF C. C. SHOEMAKER, FREEPORT, ILL.

brought out by the hen. But this is not the case. In fact, many people who employ both methods are of opinion that if there is any difference, the strongest and hardiest chicks are those that are hatched by the incubator. These machines have been so much improved of recent years that it is the fault of the purchaser if there is any failure.

Clear directions for working the incubator are sent out by the maker. These must be marked before the eggs are inserted, and the incubator must be tried first to see if the proper temperature can be maintained. There is nothing in these instructions that anyone of ordinary intelligence cannot understand. But unless these instructions are understood and followed it is useless to attempt artificial incubation.

baby chicks, of which about 10 per cent survived at the end of the first month.

After six or eight months of these hap-hazard methods, we awakened to the fact that much money had gone and all we had to show for it was some very "scrubby" looking stock that wouldn't grow into broilers in proper time and shape; then we "sat up and took notice"; we still have chickitritis, but not of the virulent type with which we were first attacked.

The first real advance toward sanity was when a friend (taking pity on us, I presume,) sent us a splendid pair of thoroughbred fowls, both prize-winners; then we began to count the cost of past indiscretions and thought:

If all the money we had spent
Had to some poultryman been sent,
We might have had a dozen pairs
Of chickens we could show at fairs.

We are now on the slow but safe and sure road toward success, for we are buying as we are able a few good fowls from which we intend to breed; with two or three small incubators in commission we can set the eggs before they become old, and may reasonably expect good results. We, of course, may look for some discouragements, but none to compare with our first experience.

May I tell some things I have learned in caring for little chicks?

Our first two broods were left with the hens that hatched them until they were three weeks old, then they were put in Philo brooders; the next, and all others we hatched, were placed in the brooders as soon as hatched; they were a joy to care for, as they knew no fear. How they grew! They were fed bread and egg the first day or two, then bread soaked in milk and squeezed until nearly dry, and pinhead oatmeal added in equal quantity; also fine grit from the first. At three weeks old I gave them fine chick feed.

One day when I went to one of the coops I saw that

they would "peep! peep!" in an easily-understood way to go to bed, so I would put them in the brooder and cover them with the little blanket, and no more was heard from them until morning.

At three weeks old they were strong and well grown, when they were put in the large brooder with the older chicks. Many things I have learned in this eventful year, which will be helpful in the future, but may not write more now.

Lina S. Luxford.

Shinglehouse, Pa.

WHAT CONSTITUTES AN EXHIBITION BIRD?

THE show season is upon us. We are receiving letters nearly every day asking prices and descriptions of birds suitable for the show room; or else with the distinct statement that the inquirer does not expect an exhibition bird. What shall we tell our customers in describing our fowls, especially when the letter received shows that the would-be purchaser is not very familiar with the type of bird he inquires for, or else that he is probably going to expect a high-scoring exhibition bird for about one-third what

"Tannenbaum Farm" Poultry Department. This view shows most of the 240-foot breeding house located in the midst of a beautiful apple orchard. Barred Rocks, Columbian Wyandottes. Tannenbaum Farms, Willoughby, Ohio.

some of the chicks had diarrhea; remembering something I had read on the subject, I set out in search of charcoal; this I found in a partly-burned rubbish pile. Pounding some up, I gave it to the chicks, who devoured it greedily. I repeated the dose next day and the disease completely disappeared without the use of medicine. I found this remedy to be effective in several similar cases. It may be interesting to some beginner to know how I took care of four chicks—sole and only product from ninety-six eggs placed in an incubator. They were three White Orpingtons and one little black fellow of no particular breed.

These little things were too small to be placed with the next in age who were two weeks older than they and too few to be put in a Philo brooder coop. I had a small brooder box that had soft litter in the bottom; into this I put the chicks until I could feed them, which was when they were two days old. I gave them for their first meal bread crumbs, grit and charcoal. On the third day I took another box, 18x18x10 inches deep; in the bottom of this I put about an inch deep of dirt in which was a good share of sharp sand; this was their daytime home. I covered the box with a wire screen and on sunny days put it upon the porch in the sun; how the little feet worked in the earth to find the little bits of food and grit and how they enjoyed the sun bath! Toward evening, when their little crops were full,

he is worth? What constitutes an exhibition bird? How much should an exhibition bird score? Or is there any especial score for a show bird? Is a bird that scores only 86 points a show bird? Is a disqualified specimen ever a show bird?

The writer would like to give some of his own ideas on these questions, and then he would like to hear what some other breeders think about them.

First, he does not consider any disqualified specimen a show bird, at least not until the disqualification is removed, when it can be done legitimately. He does not believe that twisted combs, side sprigs on combs, crooked backs, wry tails or crooked breastbones can be removed legitimately.

Suppose a twisted comb, or a comb with side sprigs is doctored and the job is done so well that even an expert could not detect it. Suppose this specimen scores well up, say 95, such a bird would be worth to a purchaser, innocent of the surgical operation, say \$25, when, if he knew of it, he would not be worth \$1. I should not consider such a bird an exhibition bird, but a disqualified one, and without remedy.

There is not much danger of crooked backs, wry tails, or crooked breastbones being treated for deformity, so we can leave them out.

Take the weight clause. A bird disqualified on weight

may soon have this defect overcome by an increase in fat, or by natural growth if a young specimen, so I consider weight one of the easiest faults to remedy, and it can be done perfectly legitimately.

GOLDEN WYANDOTTE HEN.

Winner of first at Chicago, 1908, and first at Kansas City, 1909. Bred and owned by Simmons Bros., Stockton, Ill.

I should prefer a young bird disqualified on weight in preference to a bird disqualified on any other point, color included.

Bare middle toes in a Cochin, or feathers on legs of a

A TYPICAL "RED SKIN."

This R. C. Red cock won second at the 1909 Buffalo show. He is one of the best I have seen. A model for shape, very brilliant color, low fine black tail, long and deep body, weight 10 pounds. Bred and owned by Simmons & Crittenden, Geneva, Ohio.—Note by Ira M. Crowther.

Plymouth Rock disqualify; pulling the feathers from the legs of a Rock is faking, pure and simple; such a specimen is a cull and can never be made a show bird, no matter how well the job is done.

Now for my last point, and here is where we have room for all kinds of argument, because it is where most of the doctoring is done: and that is color.

Taking Partridge Cochins to illustrate, the same principle will hold good in other varieties, the only disqualification for white in plumage is mentioned is white at base of the tail in cockerels. But white in other sections requires heavy cuts. In neck, tail of cocks, wings and feet, the bird cannot be disqualified. Now suppose these are all pulled out, is that faking? I shall not answer the question, because there are too many listening; but white pulled from base of the tail of a Cochin is positive faking. How do I make a distinction? Because in the one case your bird is disqualified; in the other he is not. Leave the white anywhere except at base of the tail of your cockerel and he will get through; leave it in the tail and he is thrown out. Very simple thing is it not? A P. C. cockerel with white in the tail will most surely have still more of it as a cock, but then he will not be disqualified. That may be good Standard, but it is not good sense.

Lastly, is an 86-point bird an exhibition bird? Suppose a P. C. cockerel weighs just seven pounds and still scores 86 points, four more pounds put on him would make him score

RED KING.

The grandest Red in the West. Was champion of Kansas and Missouri, winning first at both state shows, first cock and shape special at Kansas City, January, 1909. Bred and owned by T. L. Ricksecker, Kansas City, Mo.

90 points, provided it did not injure his shape in some way. I should prefer such a bird for a breeder to one scoring 95 points, with the side sprigs cut off his comb, and the white feathers pulled from his tail, even if such a specimen weighed ten pounds. So I shall say the 86-point bird in such a case was a show bird, but the 95-point one, though he won first at a big show, was not.

Is pulling a black feather from a Barred Plymouth Rock faking? If black in the plumage is a disqualification, then pulling out the black is faking.

My point is just this: Any defect that is a disqualification and that cannot be removed in such a manner but what it would probably be propagated in the progeny is most certainly faking.

A person does not want to buy a high-scoring specimen for a breeder that has been faked for the show room, and then have three-fourths or perhaps all his chicks disqualified, and when such a thing happens it is prima facie evidence that the bird was really disqualified and he ought to have some recourse on the seller.

Dr. H. F. Ballard.

WHO'S WHO IN HENDOM

THE bleak November winds are seeking to chill me to the marrow; the air is full of falling leaves and the wild ducks are winging their way south. In yonder poplar the blue-jays are screaming, knowing that the first touch of winter is soon to hasten on us and they are preparing for their migration to a warmer climate.

The beautiful colors on that sloping timber will be wasted on the flocks of blackbirds that rise and fall rhythmically as they flee before the coming Snow Mistress. There is tragedy in the air, one feeling that this tragedy of Nature is upon us. The day being dark and dank (poet's license, not an A. P. A. judge's license) we feel gloomy; thoughts naturally repressed on a bright and cheerful day come flowing through the siphon of the soul no matter how hard we try to divert them.

So then, tragedy being prevalent, let's write one. Dull care to the crisp November winds as we fall into the mesh of the drama. We're off:

The Non-Advertiser's Dilemma.

Time: This day and age.

Scene: Anywhere.

Cast.

Cantseeit: A man who has put time and money into the poultry business, but cannot see that it pays to advertise.

Fieldmen for the poultry papers, Breeders, Advertisers, Artists, Editors, Specialty Clubs, Fanciers Judges last but not least Many Chickens.

Argument.

A breeder who is wise of his day, grows a fine lot of stock and then advertises them to the trade, the trade "cleaning him out." Other breeders do the same, profiting by the experience of the former. Old Cantseeit has been advised with, lectured to by the editors, breeders and fieldmen; been given the facts regarding advertising campaigns devoted to the sale of pure-bred fowls, but refuses to come into the journals on the ground that it is a needless expense. He declared that advertising is an expense and never an investment.

Scenario.

Act I. The Advertisers Rejoicing.

The asbestos rings up, a chorus of cackles and crows swelling from every corner of the land. The curtain proper rises on a scene of great festivities. Breeders from all sections of the land, from the big plants of the country to the smaller poultry yards of the fanciers who are the backbone of the business, shipping stock as fast as they can prepare it for the shipping coop.

The crop of birds has not been heavy, but the quality is good and the fanciers are pleased with the way business has opened up. They are all letting their lights shine in the journals and the mail is pouring in on them mighty thick and fast.

The sound of hammers nailing coops together, the splash of water as the white birds are being washed and rinsed, the fires in the drying rooms, the shouting of the drivers of the express wagons as they are getting their carts properly backed up to the loading platforms, postmen delivering thousands of letters. Stenographers busy making their machines click a great deal louder and more merrily than this one, and undoubtedly to better financial advantage. Poultrymen's wives busy here and there helping care for the details of the work both in the shipping rooms and offices. Where the breeder has not built up as yet a large business one can plainly see that he has hopes. He is drying birds in the kitchen and the overflow is sitting over the furnace radiators in the dining room and bedroom downstairs.

A breeder who has finished shipping his last order for the day lights his Thirty-seven Minutes in Havana and taking a rocking chair in his hand walks down to the footlights and renders that delightful song, the chorus of which is indulged

in by all the members of the fancy in the background: "Who Said That Business Was An Accident?"

Another successful advertiser draws up his chair and enthusiastically slaps the shoulder of his friend. "Who would ever have sent us a piece of business," he exclaims, "if we had not been advertising in the journals? Where would all of the boys, who have grand flocks this fall, get off this season on the selling proposition? Everyone but Cantseeit is having a brisk trade. Why, I saw a neighbor of his who does not carry much space at all, sell a nice bird and a trio right under his nose. He showed over there at Roosterton last winter, but the man who knew he made a

good winning thought he was out of the business because he didn't advertise in any of the journals. They soon forget a winning if you don't keep after them every month; eh, old pal?"

"Your argument is right square on its pins, my fellow-fancier," replies No. 1. "Just look at the farms all over the country doing a good business. They made winnings and then advertised the fact that they had that grade of stock for sale. Would Sheppard be the Ancona king if he did not advertise? Who would know that Cornish bred good Reds? Pittsfield Farm would go out of business if they could not use the journals. Pine Top Farm would be a has-been and Williams & Co. a firm that scarce echoed throughout the empty halls of hendom if they did not keep at their advertising. Would people know that Shaylor lived at Lee as well as others, if he did not let folks hear about it? Lester Tompkins and C. F. Thompson & Co. would be down and out if their advertising lagged and their ideas become as cramped as Cantseeit's. Advertising is the life of trade. It is the life blood of the fancy. Colonel Foster puts out Black Orpingtons by the hundred, but who would have his business if he dared to let up for a season or two? Who, I ask you, would have it? The other fellow, of course. Charley Vass, Wyckoff's Farm, Blanchard's strain of White Leghorns, and even our dear little lady Fluffy Ruffles would be forgotten if they quit using printers' ink and printers' art."

"Those sentiments are mine, too," chimes in another breeder who has just joined the pair. "Down in my country there is a White Rockist who has made good winnings at Chicago right along, but he never rests till everybody knows it. His name is Halbach, and he is doing a great business. Rock Hill Farm, Lloyd Mishler, Greystone White Rocks, Martin's White Dottes, Charles McClave, Tannenbaum Farm, Northrup's Minoreas, Covert's Barred Rocks, Harmon Bradshaw's White Leghorns, Lakewood Farms, Lyman Hill, Sunny Brook Farm, and D. W. Young's White Leghorns would not all be easily called to mind if they were not hammering away from month to month telling us what they breed and what they have for sale."

Curtain.

Act II. The Death of Cantseeit.

The rising curtain discloses a pathetic scene. Poor old Cantseeit comes into his chicken yards that are full of fine birds and tosses feed on the ground by the pailful. He has evidently grown gray carrying the feed pails without enough "coming in" to buy grease for the gate hinges. The birds fly upon his pails and appear to be lusty and full of fire. They are apparently anxious to be off into the world making their mark.

A neighbor puts his head over the division fence and asks Cantseeit how business is. "Rotten," is the reply. "A farmer was along here a couple of hours ago and wanted a big cockerel for 50 cents. He said he had just sold a load of birds at an average of 35 cents and thought 50 was a big price. That fellow from Hensfoot Corners came over to say he would give me \$2 for a breeding pen of good birds. Business is simply rotten and I am going out of the game."

Neighbor says in an aside, "I thought you would be out of it long before this, you old bufflehead." Then he says directly to Cantseeit, "Why don't you put some advertising in the journals?"

Home of Chas. C. Wine, Mt. Sidney, Va., the originator of the Old Dominion strain of Barred Plymouth Rocks.

"Advertising be hanged. I never seen a dollar coming back to me that I ever put into advertising."

"How much advertising did you ever do?"

"I spent a dollar once for a little breeder's card in a chicken paper. Another time I spent \$2. I never got any orders, so I gave up trying to sell chickens that way. That

S. C. R. I. RED.

Second hen at Indiana State Fair, September, 1909. Owned and bred by Longfield Poultry Farm, Bluffton, Ind.

kind of business is made for men with more money than I have. How's business with you?"

"Can't complain. I got an order this morning from my ad. in the Beatmal Poultry Journal. Yesterday I got a nice little order for three birds from the American. The mail is always giving me some inquiries for stock and if I keep up

the lick I have started I shall soon be sold out and have all my room for the matings. I want to get them ready early this winter, as it looks to me like a great season coming for eggs— Say, did you see my ad. in the Wildandwooly? They certainly take good care of the way a fellow wants his ad. set up."

Enter a stranger who hands a card to Cantseeit, introducing himself as the fieldman for the Squeedunk Poultry Journal. Cantseeit looks up at him and says he has advertised all he is ever going to. Fieldman suggests that a small ad. in the Squeedunk will bring him returns. Cantseeit suggests that the returns will be bills. "I didn't want your ad. anyway, as you would not take care of the business our subscribers might want to send you." Departs with a sarcastic bow and "Good day."

Neighbor suggests that Cantseeit ought to give a good ad. to some of the journals and sell the stock. "There's a great trade this winter and fall in Columbians and you have some good ones to sell," continues neighbor. Goes back to his work.

The front walk gate is heard to snap as it closes off stage. The editor of the Henville Bladder enters and steps up briskly to Cantseeit and shakes hands with him before the latter can resist.

A TANNENBAUM PULLET MATING COCKEREL.

A splendid type bird with fine undercolor. Note the head points. Tannenbaum Farm, Willoughby, Ohio. Barred Rocks, Columbian Wyandottes.

"So you are another one of them chicken-paper fellows, are you?"

"That's who I am," says the editor. "Fine flock of Columbians you have here."

"Yes, I won a lot of prizes on them the last couple of years."

"Are you doing any advertising this fall, Mr. Cantseeit?"

"Nope. It never paid me and I cannot afford to put more money into the business."

Editor sizes up the codger as being a tough old nut, so he looks about and inquires if there are other chicken growers hereabout and then departs.

Scene 2: Cantseeit is asleep in his arm chair, pipe gone out and ashes spilled on the floor. In the dim background as the clouds take shape there appear fieldmen, editors, solicitors, fanciers wearing diamonds, advertisers with smiles on their faces, judges, artists, et al. Cantseeit is dreaming, a dream that is true to life. The shapes in the clouds use their voices in glad refrain: "Maybe You Got the Goods, But You Better Advertise."

Tableaux.

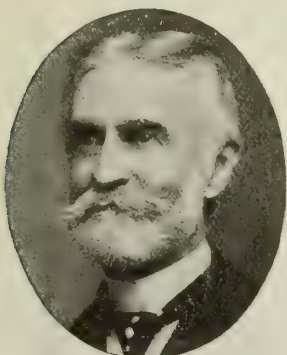

Curtain.

Additional vociferation: You solicitors who cannot budge some of the dead ones, better file your orders for copies of this American and mail them where they will do you the most good.

EXHIBITING S. C. BLACK ORPINGTONS

How I Care For and Prepare My S. C. Black Orpingtons for the Show Room
—Feeding, Housing and Yarding—Making Them Moults—How
Young Orpingtons Look When First Hatched

Written for American Poultry Journal by D. N. Foster, Fort Wayne, Indiana

D. N. FOSTER

The first thing is to get the right kind of foundation stock and then to be able to mate them for the best results. You must have your male strong where your females are weak and your females strong where your male bird is weak.

Next comes the feeding, the housing and the yarding of the young stock. This is just as important as the selection of breeders. Young growing stock should have all the feed they wish to eat and a variety of it. I self-feed my young stock in self-feeders, changing their feed every few days. Soaked and sprouted

oats I find is a very cheap food, as it goes two or three times as far as the dry oats and is relished by the fowls very much. Still corn and wheat are my foundation feed. Another feed I find gives me very good satisfaction is stale bread that I buy in Chicago, Ill. I also feed a liberal quantity of cooked meat and prepared beef scrap. The beef scrap I keep in a self-feeder before them all the time.

This is what makes feathers and keeps them moulting all the while, and the more times you can make a Black Orpington moult the better will be its color. Maturing stock properly fed will moult three to five times before being developed. About once a week I let them go for one day without anything to eat. This is to keep them from getting off their feed and becoming dumpy.

I give my birds plenty of house room and plenty of range. Especially the young, growing stock, as I do not believe in crowding. They have the range of a 50-acre grove in which they are out of the hot sun in summer and away from the cold winds in the fall and winter. They also have the free range of a 10-acre pasture which furnishes them with plenty of green feed. I would rather have a few fine birds than a lot that have been in cramped quarters and poorly kept. The minute you crowd birds in a house then they commence to snuffle, their eyes commence to swell and the first thing you know you have roup in your flock.

The old birds I do not feed heavy through the summer or the breeding season. Then about the last two weeks of August I give them but very little feed but grass and water. Then comes heavy, rich feeding all at once and all they want of it and they commence to moult right away. All through the moult I feed them all they wish to eat, as this is a very critical time in the life of a fowl. During the moult they are very liable to take cold and die if not properly fed, as the getting of new feathers takes all the life out of them. During the moult they will need and eat twice as much feed as when out in full feather. I also feed cooked meat and prepared beef scrap at this season the same as to my young, growing stock.

Now by this time the show season commences and my birds need but little more to fit them for the show room. Two days before the show I shut up all my stock and pick out the best matured and the most promising birds and compare them and then sort again. These are then taken and their feathers are polished with a flannel rag and then with a silk cloth. Sometimes if their legs are a little rough they are scrubbed with a brush and good warm soapy water. Then their heads and legs are greased with a little carbolated vaseline, being careful not to get too much on their heads so they will not spoil their plumage. This makes their heads redder and their legs blacker.

How to Enter Birds.

It is a very good plan to enter several birds of each kind, as no two judges judge alike, and by so doing you are more liable to come within the judge's idea of what a Black Orpington should be. This is only human nature and you must abide by the judge's decision regardless of what you think about the matter.

How Young Orpingtons Look When First Hatched.

Young Black Orpingtons when first hatched are as a rule about half white and their beaks and legs are very often white, black and yellow. The tips of their wing feathers are almost always white till they get their last set of feathers, at which time they almost always come in a solid black.

New beginners very often become discouraged and feel they have been sent cull stock when they see so much white in the young birds. The whiter the chick the blacker and better it will be when matured has almost always been my experience.

Some of My Recent Winnings.

At the Tri-State Fair held at Fort Wayne, Ind., September 14-18, 1909, in a class of over 100 S. C. Black Orpingtons and where four other breeders competed I won all firsts, all seconds but one, all thirds but one and specials for best shaped and best colored male bird and best display in English class.

One of the most sensational birds that I have shipped this season was a cockerel sold to Eugene Lewis, Pulaski, Tenn.,

TANNENBAUM FARM POULTRY DEPARTMENT.

This photograph shows one of the best, most complete and expensive homes for fancy poultry in the world. The two-story house in front contains incubator room, cook room, feed bins, water system, brooder section, general office for manager and room fully equipped with exhibition cages for training show specimens. Extending from this house is a 240-foot breeding house, divided into eighteen pens, fitted with all modern equipments. Interior all sealed and painted white. This plant managed by A. H. Tryon, and the breeding handled by Will Freshley, who is one of the best authorities on Barred Rocks and Columbian Wyandottes in this country, and is sure to come to the front in the breeding of these two varieties which are their specialties.

which won first at the Nashville (Tenn.) State Fair over birds two and three months older and weighing two to three and one-half pounds heavier. This makes him champion

GOOSE FARMING

THE time is fast approaching when goose farming generally will be quite as popular as turkey culture. The fact that dense population will in time largely stamp out the growing of turkeys due to the fact that they cannot be grown in confinement. Turkeys will always be a very

This fine S. C. Red cockerel was used in the school on Reds at Springfield, Ill., to show the correct shape for Reds. Owned by T. H. Marshall, Sheridan, Ill., R. R. 53.

popular fowl and will only be forced out by increased population. In Europe today geese are as popular as the turkey are in America, all because of the thickly populated country. It is almost next to an impossibility to raise turkeys in parts

of Europe for the lack of sufficient range. However, as previously stated, turkeys will always be very popular in this country and will disappear only by force of dense population. Geese can be grown in close confinement more successfully than turkeys. Of course the more range they have the better it is for the growth and development of the geese, but in many instances geese can now be grown on many American farms that are not giving any attention to geese whatever. The venture will prove a profitable one and the revenue will be far beyond your expectations. There are thousands of acres of wet waste lands in this country that could be utilized for goose farming. Wet and low soils are unfit for turkeys, but ideal grounds for geese. I am reliably informed that in Europe, where every inch of soil is valuable and wanted for the growing of crops, the canals, large water basins and small ponds are converted into goose culture. If it can be done in Europe it can be done in America as well. Geese are very profitable due to the fact that they do not require any grain feeding scarcely at all and will thrive and do well on watered

WHITE PLYMOUTH ROCK.

First cockereel and special at McKeesport, Pa., December, 1908. L. J. Mess, owner and breeder, Box 1515, Pittsburg, Pa.

lands that is almost useless for any other purpose. If this country would give goose culture a little consideration, "we" would soon discover that "we" have pasture and water lands without limit suitable for the business—lands, too, that would not conflict with the growth of any other fowls or live stock. Almost every farm in this country has more or less waste or wet land, making it possible to grow geese most successfully without any, or but little extra expense. This being a fact makes it certain that geese will naturally increase in population as time rolls on and population increases. Land is becoming so valuable everywhere that it will soon be found necessary to convert these waste lands into profitable industry, and there is nothing to my mind that will bring as great a revenue as the growing of water fowls on them. A well-managed flock of geese or ducks on these waste lands will surely bring great profits to the owner, regardless of the nonvalue of the land for any other purpose. Perhaps, if you have never launched out into water fowl culture, you will be rather slow to comprehend the real value of a well kept flock of geese. If so, procure a few pairs of well-bred geese, either the Embden, Toulouse or African, and you will soon be convinced that the growing of geese is very profitable. They render a two-fold revenue in

the production of feathers and meat. Geese if properly managed, are just as profitable as turkeys. I could not conscientiously give any preference to turkeys, although I am an enthusiastic turkey breeder, as I would be compelled to place geese and turkeys on an equality, viewing them from a profit viewpoint. However, in a thickly settled community geese are far more desirable than turkeys, for the reason it would be impossible to keep turkeys from trespassing on your neighbors, as turkeys have a wild nature to roam over large territory in search of insect life, while the nature of geese is quite different, all they require is plenty of green food, one acre is sufficient to grow a large number of geese if it will produce a sufficient amount of pasture to keep them contented. Some land is fertile enough to grow quite a large number of geese to the acre, but as a rule such land is more valuable for growing crops, preferring to give the waste and swamp lands to the growing of geese. Even then they would not require as much territory as do turkeys. It is a fact geese will render their surroundings much more filthy if permitted the free use of all quarters than turkeys. But it is wisdom to give each particular variety of fowls or live stock attention along the line of each special characteristic requirements, and you will have but little trouble in keeping everything in first-class sanitary condition. But few Americans I will admit understand raising geese in large

hundreds of fine birds are utterly ruined for show purposes, and takes away every chance that the bird might have had previously to win a prize in these days of strong competition, even at the smaller shows.

SILVER LACED WYANDOTTES.

Como, Jr., first cock at Detroit, 1909; at Grand Rapids, Mich., same year, and winner of many other firsts. Property of Clare E. Hoffman, Allegan, Mich.

numbers as they do over in China and many other foreign lands, but we are learning the science of goose farming very rapidly, and I will venture to say that the time is not far distant when we will be producing geese that will compare favorably both in numbers and quality with any country in the world.

J. C. Clipp.

PREPARING BIRDS FOR EXHIBITION

Important Pointers About Exhibition Birds—Instructing the Beginner in the Breeding of Exhibition Poultry—The Danger of Overfeeding

Written for American Poultry Journal by Rev. C. E. Petersen, Bridgton, Maine

THE common idea among beginners regarding the preparation of birds for exhibition is that a week or so before the show opens all they have to do is to select the birds and send them off to the show and let the judge do the rest.

Owing to this mistaken idea I venture to say that annually

S. C. R. I. RED.

First hen at Indiana State Fair, 1909. Bred and owned by the Longfield Poultry Farm, Bluffton, Ind.

The breeder of fancy poultry is looking out for exhibition birds from the time they are running with the hen until the time they are ready to go into the show room and it is this continuous care that has as much to do with the breed-

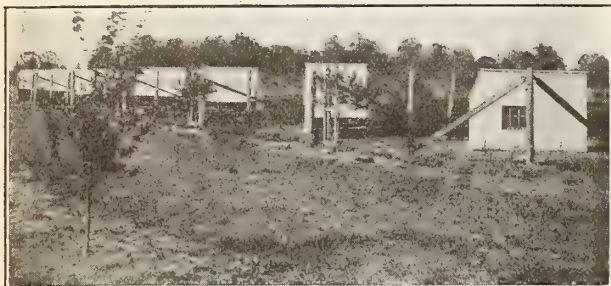

An Allison Buff Plymouth Rock, true to shape and a prize-winner. Bred and owned by E. C. Allison, Edinburg, Ind.

ing of exhibition stock as almost the quality of the blood itself.

We have handled birds at shows that showed very strong

points of excellence, but showed equally as well that they had been neglected for some length of time, plumage rough, shanks dirty, and of the kind of dirt that washing will not remedy, poor in flesh, and unfinished in plumage, undoubtedly good blood, but unfitted to meet competition of birds that showed their owner's care and consideration for them and himself as well as to win with these birds was his avowed purpose.

Row of colony houses at Tannenbaum Farm, Willoughby, Ohio. Barred Rocks. Columbian Wyandottes.

Where eggs have been purchased at high prices from a breeder of exhibition birds the owner has a right to expect that some of the chickens hatched should be fit to exhibit, but he must equally as well remember that there is a great deal left for him to do in the rearing of his flock, for the best blood in the world will not grow up into fine exhibition specimens if left to themselves and neglected from the day they were hatched and subjected to all kinds of wrong treatment, one day fed to repletion and the next day left without any food whatever, having access to dirty runways and manure heaps, those that come out alive in the end may be hardy, all right, but not much good for exhibition. It is

ANNABELLE.

Second hen at Illinois State Fair, 1909. Bred and owned by Edward Brown, R. R. 37, Mendota, Ill.

for the purpose of instructing beginners in the breeding of exhibition poultry that this article is prepared and in as plain language as we can master backed up with a long experience in the matter of both breeding and preparing birds for show purposes.

It is taken for granted that the breeding back of the stock purchased is of paramount importance and in every instance where stock is to be bought must first of all be taken into consideration and so for this reason select a breeder from

whom to make the purchase who himself has been able to maintain in the largest show rooms that his strain is of exhibition quality.

This may seem easy at first sight, but it is not such an easy matter as it seems, for nowadays birds for exhibition are bought by men who on the strength of such winnings will sell inferior stock and the amateur is seldom expert enough to tell whether he is getting all he is entitled to for his money, but after visiting shows and getting more and more familiar with the breed he is sure to find out, though oftentimes too late, that he was buncoed out of his money.

It is a safe proposition that the person who promises a great deal for a very little money either does not know what he is doing or is simply talking so as to secure your patronage, and on the other hand we have known of at least one person who would ask exorbitant prices on the strength of some previous winnings and then send out stock of the most inferior quality.

A fair price must be paid for breeding stock so mated that it will produce exhibition specimens, and a trio of birds that can be relied on in this respect cannot be bought for

A TANNENBAUM HEN.

This grand hen has done much to place the young stock on Tannenbaum Farm toward the top of Barred Rock fame. She is one of the grandest type hens I have ever seen and she is barred to the skin. Tannenbaum Farm, Willoughby, Ohio.—Note by Ira M. Crowther.

less than \$15 and from that and up higher, according to quality.

There are breeders of every breed and variety of breed that stands at the head of all others and whose stock, word and honesty can be fully relied upon, men that have been breeding their respective breeds for many years, whose names are synonymous with extra fine quality of stocks and such men will always satisfy the expectations of the amateur and can be fully trusted to send out birds of the right kind, even though the purchaser is a tyro in the business, for even though he himself may not know all there is to be known about the breed, there are others that will, and no breeder with a reputation to sustain will send out stock that he is ashamed to own as his product.

Be willing to pay a reasonable amount of money for a good start, for in the end it will pay the best, many a breeder has paid out enough money for inferior stock hoping against hope that he would get something worth while from it, so that if all that money had been paid out in the first place he would have saved himself loss and much vexation. It is hard enough to breed exhibition birds from extra fine stock, but it is an impossible proposition to do it from inferior and worthless birds that have been bred in all sorts of ways without any system or pedigree or reckoning with the future.

There are a certain sort of people that will never succeed with fancy poultry nor will produce stock of quality, the people that buy dollar birds and dollar eggs and year after year go the rounds of the different breeders expecting to get quality for nothing.

Exhibition birds are hard to produce, and as the quality demanded by the Standard and individual taste gets better and better, fine specimens demand fine prices and there are always more of a demand than the supply.

There is another way of beginning the breeding of fancy poultry that needs some consideration, namely, the purchase of eggs for hatching, and where eggs from first-class matings can be obtained extra good results can be gotten for very little money, for a setting of eggs from an extra fine yard of birds sold from \$5 to \$10 is little money when it is taken into consideration the skill of the breeder and the years of knowledge behind this mating and that a single specimen may be worth ten times the price that was paid for the setting.

But here, as in the case of the stock birds, complete confidence must be had in the breeder from whom the eggs are purchased, for absolutely nothing but experience and experience covering years of toil and disappointment culminating

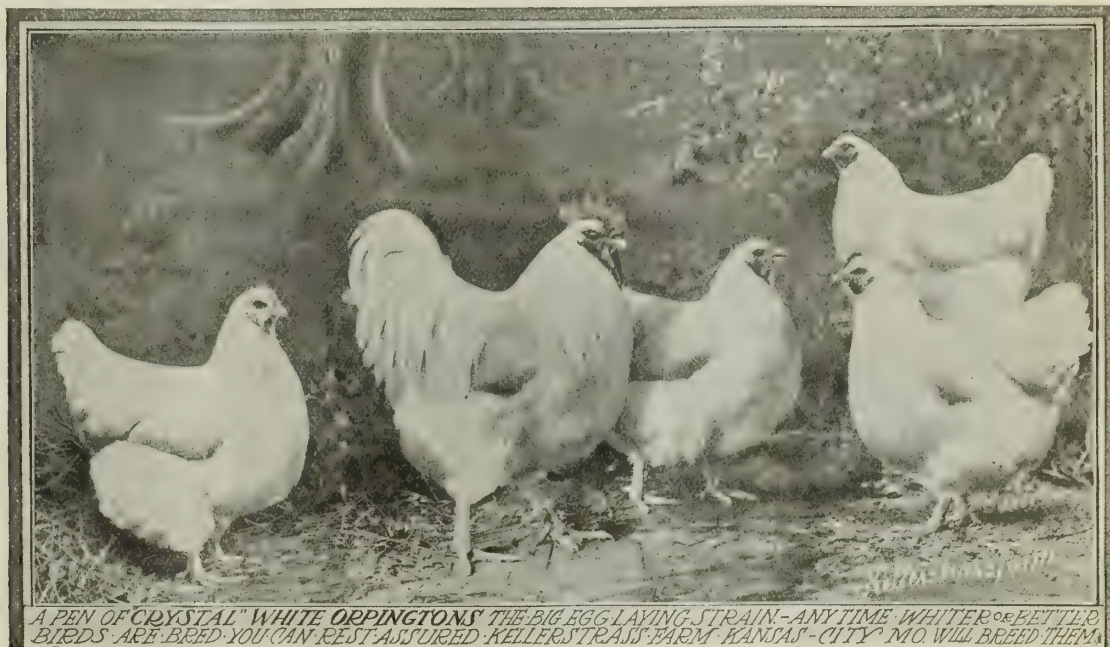

Don't worry because they do not start in laying the next day after their arrival; it may take a full week or sometimes two, for when a bird has been removed from its old quarters and put under new care and management it takes a little time to get it started again.

Avoid the danger of overfeeding by giving careful attention to the amount of food given, for when only a few fowls are kept together it is an easy matter to give too much. An overfed cock bird will fertilize but few eggs, though he is not put to anything like the same amount of suffering as a hen is when similarly treated.

Overfed hens lay few eggs, they may lay well for a time, but presently soft-shelled eggs will appear, and eventually the bird will cease to lay altogether.

Very often the cause of soft-shelled eggs is misunderstood and insufficiency of lime, oyster shells or such like materials that go into the making of the shell is given as the reason, but though sometimes this may be the reason ninety-nine times out of a hundred overfeeding is the chief cause and where once a hen has been overfed to the extent of filling her full of fat deposits she is ruined for breeding purposes.

Don't feed breeding stock on soft food or what is generally called mash, increased size of the liver and indigestion

in success can mate birds up in such a way that success can be assured with a reasonable certainty.

Eggs for hatching should be ordered early in the season, as the men producing the best in their respective varieties of a necessity mate up small breeding yards, and when eggs are wanted for March and April delivery December and January will not be too early to place the orders, and exhibition stock should be hatched during these months, for size cannot be obtained in any other way, nor full maturity in the breeders.

Suppose we have decided to purchase a trio or a pen of birds to make a start with; the quicker the purchase is made the better, as it will take some time before the birds will get used to their new quarters and, for that matter, their new owner, change of food and conditions will stop any kind of hens from laying and if the purchase is deferred till spring the delay will work somewhat against success, as eggs are needed then for hatching.

When the birds arrive put them into the place selected for them and do not change them again to another place, but leave them to themselves and very shortly they will feel at home.

will be the result and as stamina is much to be desired in exhibition stock where line breeding must be resorted to, the best food to be used is hard grain and a chance to work it out of the litter which should cover the floor.

Have everything in the pen scrupulously clean, the pen as well as the birds, go over them every now and again with some good insect powder and give particular attention to the male bird, as he seldom seems to care to dust himself and takes from the hens most of the vermin and a lousy male bird will very soon peter out as a breeder.

It lessens the vitality of the birds and strong vitality is needed in the breeding yard more than any other thing, it must be there and in full measure, and we know of no other means by which it can be reduced so quickly as by a sufficient supply of lice.

What I have thus far stated is the rudiments in the breeding of exhibition birds and must be adhered to if success is to be expected, though there is a long road ahead before real show room success can be attained, but to make matters more easy and point out some of the things to avoid and others to follow, I will do in another article on the same subject.

Look at the date upon your wrapper. Many subscribers write to ask when their subscription expires and many complain because we discontinue sending the JOURNAL at the expiration of time for which it is paid. The date when your subscription expires is found on the wrapper each month.

AMERICAN POULTRY JOURNAL is the oldest poultry paper in America. It has a national and world-wide circulation. The best writers on poultry matters contribute to its columns. It receives the patronage and endorsement of the foremost representative breeders of standard poultry and manufacturers of poultry appliances in the country.

Advertising rates are sent upon request.

60,000 A. P. J.'s for December, 1909.

State of Illinois, County of Cook, ss.

J. G. Budde, secretary and treasurer of Regan Printing House, Chicago, being duly sworn, certifies that the American Poultry Journal has contracted for printing and binding sixty thousand copies of the December, 1909, issue.

J. G. BUDDE.

Subscribed and sworn to before me this 22nd day of November, 1909.

[Seal.]

Harry E. Wright,
Notary Public.

OUR GUARANTEE.

We guarantee our subscribers against loss due to fraudulent misrepresentation in any display advertisement appearing in the American Poultry Journal, providing the subscriber when ordering the fowls or merchandise states that the advertisement was seen in the American Poultry Journal, and places the order during the month or months in which the ad is inserted in our columns and notifies us of the fraudulent misrepresentation of the advertiser, giving full particulars, as soon as it occurs.

George G. Bates Retires

At the annual stockholders' meeting of the American Poultry Journal Publishing Company, held November 15, 1909, Mr. George G. Bates, who for a number of years was the principal stockholder in the company, retired, as he had sold his stock to James W. Bell, who now succeeds him as president and manager of the company. Mr. Bates had been connected with American Poultry Journal for the past fifteen years, and during that period had become closely identified with the fancy poultry industry, but on account of poor health during the past eighteen months has not been active in the management of the business, these duties being performed by Mr. Bell, who has been connected with American Poultry Journal for the past twenty-three years, and who is perfectly familiar with every detail of the business and thoroughly competent to carry on the good work, being a breeder for many years and a practical printer. He has held various positions in the company, during the past twenty-three years, among them being vice-president, secretary-treasurer, advertising manager and general manager for the past year, therefore has a thorough knowledge of the business and is well qualified to take up the burden laid down by Mr. Bates.

Mr. Bell has gathered around him a force of assistants that are second to none and with their co-operation intends to make American Poultry Journal better than ever. Mr. C. W. Zimmer, who has been the central representative for American Poultry Journal during the past year, becomes secretary-treasurer, associate editor and advertising manager. Mr. H. G. Eisert, who has been connected with American Poultry Journal for the past two years, is now vice-president of the company and has charge of the subscription department. Mr. Louis A. Stahmer, the well known poultry artist, has charge of the art department. Mr. H. P. Schwab, the well and favorably known poultry judge and breeder of Barred Plymouth Rocks, is Eastern representative. Amos Burhans, one of the best writers on poultry in the country, is Western representative. W. E. Stanfield, breeder and judge, will represent American Poultry Journal at various shows this season.

Besides these men there are many writers on our staff of national reputation, including such men as I. K. Felch, C. L. Peterson and Dr. H. F. Ballard.

We justly claim that the American Poultry Journal is the oldest and best and has the largest circulation of any poultry publication, and with the above force we intend to keep it there.

We have many good things in store for you in the future and we desire your assistance and co-operation in the good work of furnishing reliable information on the breeding of fancy poultry and promoting interest in same. Your interests are our interests. If you like the American Poultry Journal tell others; if you have any criticisms, tell us.

Parcel-Post and Express Rates

Below we publish in full the letter received from Mr. S. T. Campbell, secretary of the American Poultry Association. While we appreciate and thank Mr. Campbell for his very kind reference to our efforts, we make the further request that others also take hold and lend their

aid for this cause that promises so much good to all.

Mr. Campbell has long labored along these lines, his position has been known, we have always found in him an advocate for all that has stood for the betterment and progress for poultry, but neither he, I or anyone else can hope to win in this cause without the general support of the breeders throughout the land.

There is a crying need for reform of rates, and the addition of the parcel post. The success of these questions only depends on concentrated effort and action. Now can we have this?

Editor Schureman in the November issue of Commercial Poultry has taken hold of the express rate question in a masterly manner and devotes nearly two pages to this subject that every poultryman should read. There are still others we hope to hear from, as we have every confidence that the poultrymen will see in these the need and value of one general effort.

Our pages are open for the full and free discussion of these subjects. Following is Mr. Campbell's letter:

Mansfield, O., Nov. 12, 1909.

Mr. H. P. Schwab,

Irondequoit, N. Y.

Dear Judge: When one does a good thing for the community and the poultry fraternity in general he should be commended. Your article on parcels post and express rates in the American Poultry Journal is entitled to favorable consideration by all poultry people. We need more sound, practical arguments of that kind. I have heard nothing for a long time that has attracted so much favorable comment. The sooner the poultry journals take up these subjects and hammer away at them the sooner will we have united action among the poultry fraternity, demanding consideration on these most important questions, which are vital to the welfare of every branch of the poultry industry. I hope you will continue these subjects in the American Poultry Journal until the fraternity is aroused from the dormant state that seems to exist. Rest assured that I shall do my part to bring about these much-desired reforms.

With all good wishes, Fraternally,
S. T. Campbell.

Water Fowls in Demand

Once upon a time there was a run on in Pekin ducks, and I think we all remember something of it. Some folks call it the great Pekin duck boom that almost ruined them, but it didn't. Booms cannot hurt a bird as good as the Pekin. Their excellence only calls to mind that there is a great chance for big waterfowl farms in several parts of the country, where the breeding of birds that are capable of winning ribbons at the fairs and big shows could be made gradually into wonderful businesses.

Let some good waterfowl man take the work up with a determination to win out at it, showing and advertising, and in a short time he would have more business than he could do. The country is becoming more and more wealthy every year, and there are being built every season more and more large homes on estates of more or less importance. These homes, as well as the public parks here and there located, are all going to be buyers of first-class waterfowls.

For breeding purposes, as well as for ornamental service, Pekins, Rouens, Crested, White and Gray Calls, Aylesburys, Indian Runners, all breeds of geese and swans, turkeys and peafowl

WHY
NOT
NOW

We Lead, Others Follow

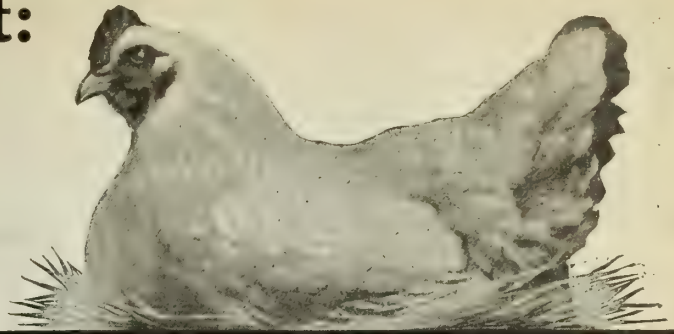

Just figure this out:

Last year, on a small egg-farm, 1953 hens made for the owners a clear profit of

\$6.41 each

\$6.41 multiplied by 1953 makes—what?

Read the story below.

IN 1905 two men named Corning, father and son, were trying to find a paying business for men in poor health and with small capital. Although they had no experience in that line, they decided to raise eggs. They took a few acres at Bound Brook, N. J., and began with only thirty hens.

Last year these men had 1953 hens, and made a clear profit of over **twelve thousand dollars**. Next year they expect to have 4000 hens. Will they make *twice* \$12,000? Get the **FARM JOURNAL** and you will see.

The CORNING EGG-BOOK

(entitled "\$6.41 per Hen per Year") tells the whole story of that little egg-farm, and just **HOW** the Cornings made their splendid success. It is deeply interesting to every one who wants a safe, paying business, that can be built up with little capital and without years of training. There is a strong demand in all cities for "near-by, selected fancy eggs," and those who can furnish an unfailing supply, winter and summer, get very high prices. This the Cornings learned to do, and the **Corning Egg-Book** describes their methods, as tested and proved by experience.

The book tells where they find their market, how to keep hens laying regularly in winter, when to hatch chicks that are to do their best work in December and January, how to mix the feed that produces the most eggs, how to prevent losses, etc. It tells why they fixed on a certain breed as the best for producing eggs, and how their whole system works to that end. It gives photographic pictures of their plant, and plans of their buildings, which can be built in sections, large or small, as needed.

The Corning Egg-Book is sold in combination with the **FARM JOURNAL** to increase its subscription list to **ONE MILLION** for next year

Farm Journal has for thirty-three years conducted a poultry department known the country over for the ability of its editors and the value of its contents. All its other departments are ably conducted and widely quoted. It is the standard monthly farm and home paper of the country, with already more than 600,000 subscribers. It is clean, bright, intensely practical; boiled down; cream, not skim-milk. It is illustrated and well printed on good paper. It has not a medical or trashy advertisement in it. More than half a million of its subscribers pay five and ten years ahead—a very remarkable fact.

Here is Our Offer:—We will send, postpaid, **The Corning Egg-Book** and **Farm Journal** for five years, **BOTH FOR \$1.00**, cash, money order or check. And if you send order and money within **TEN DAYS**, we will send also "Poor Richard Revived," a splendid 48-page **FARM ALMANAC** for 1910, full of wit and wisdom for the rural home.

would soon make a big business. The scale on which a farm or plant of this sort would be founded would not necessarily have to be large. It should be laid out so that it would be easy to enlarge the operations as the business grew, for rightly managed it will grow fast and sure.

We are in position to know that there is a growing demand for stock of this sort. Just a week ago a millionaire country gentleman was asking us where he could get some black swans, and a few days before there was a breeder told us he had a call for some Canada geese, which he could not fill. Another northern fancier of waterfowl said he had experienced a great season in the sale of eggs for hatching from his Gray Call and domesticated Mallard ducks. From the east we hear the same stories of prospective buyers asking for something they are having a hard time to discover. We repeat: The time is ripe for big variety waterfowl farms.

Poultry Shows

Considerable space in this issue of American Poultry Journal is devoted to notices of poultry shows, and we wish that we had more space that we could devote to this part of the greatest industry on earth. Poultry shows do more towards creating interest in the industry than any other one thing, and therefore it is the duty of every poultry magazine to give as much space as possible to the poultry shows. A poultry paper, like American Poultry Journal, that has a large circulation in every state in the Union, cannot "boom" any particular show in any state or locality, therefore we endeavor to treat all alike, and no notices that are sent in to us are thrown in the waste basket, but are given publicity at the earliest date possible.

During November, December and January, which are the poultry show months, these notices are given preference over other reading matter in our columns, as we believe this matter is of more interest to the average reader than anything else we could present at this season of the year. We urge our readers to read these show notices, send for catalogues, become an exhibitor, attend as many shows as they can and thereby assist in creating a still greater interest in the breeding of fancy poultry in their immediate vicinity.

The English Dairy Show

The largest and most important English show to be held early is the Dairy show. It is the event that gives more or less of an index to the successful breeders of the season, especially those who have been fortunate with their early birds. We have seen a few reports of this early show, and all writers say that it is not up to the average of Dairy show quality, as the season was not well for large and forward birds, this term meaning birds that matured early in the season.

Among the birds that are mentioned in the reports of this show as being of particular note are a Langshan pullet and an Old English Game bantam pullet. The former was said to be the best bird in the show and took the gold medal for her prominence. We have made it a practice here to award this prize to some bird in the popular varieties classes, but Langshans cannot be said to be in the popular variety class at present in England. They

FARMER JOHN'S MONOLOGUE, DATE DECEMBER 1, 1899.

Morning, Mr. Spaugh. You have some of your fine chickens, I see? You are going to ship them clear to Calverney! Crackey, that's a long ways. And what did you get for them? Two hundred dollars for them ten chickens! You don't mean it, Mr. Spaugh? Why, my Martha only gets 50 cents fer hern and I don't make \$200 in a year off my whole eighty. How did you learn to breed those thoroughbred chickens? Oh! you read the American Poultry Journal, and it tells you how; and now you advertise in it and sell those ten chickens for \$200. Blamed if I don't subscribe for that ere American Poultry Journal and see if me and Martha can't learn how tew.

(Continued in our next.)

also give more attention than ever to the Wyandottes and Orpingtons.

The little game pullet was adjudged the best clean-legged bird in the show. Here again the popular varieties were overlooked and the prize placed on a purely ornamental fowl. Doubtless at other times the specials would be given to other breeds, but these two instances only go to show that as fanciers the English are strictly fanciers with a big F.

Many birds changed hands at the show for £50 each. Of course it was nothing new for this to happen at the Dairy show, but it points the way to what the American fancy will be at no greatly distant day. There are not a great number of birds in America's largest shows changing hands at \$250 each.

Nearly 500 Orpingtons faced the judges, the Blacks and the Whites being most popular in point of numbers. The Wyandottes were a big class, but not so many shown as formerly. The Rocks were out 182 strong. They are gaining in the motherland. In dressed poultry there is always a lot of competition in the big English shows, and classes devoted to various methods of fattening, for professionals and cottagers, who were bona fide rearers of the birds which were killed in ordinary flesh (this meaning without their being crammed), always make a nice showing.

The Massachusetts Field Meeting

Massachusetts has long been the cradle of the eastern fancy. Her poultry interests have been diverse and manifold, the examples after which many of similar nature have been modeled in other states. A few seasons ago she inaugurated, through her state poultry association, an annual field meeting, to which all fanciers, breeders and poultrymen were invited and in which most of those present

took part. An annual field meeting will do much to keep alive the spirit of the fancy and cement good fellowship. Anything that helps the fancy aids the individual who is part of it. Monthly meetings that are billed in advance stimulate interest and draw the breeders toward more unanimous effort. Associations are primarily formed to hold shows. Whatever bolsters the show idea from season to season is worth working out.

The last Massachusetts State Poultry Association field meeting was held at the state agricultural school. The program included a business session, lecture on the anatomy of the fowl by Dr. Paige, this with a demonstration; a talk by Professor Hurd on growing crops for poultry, caponizing demonstrations by Henry D. Smith and J. H. Curtiss, talk by Mr. Duston on the history and characteristics of White Wyandottes, talk on Rhode Island Reds by Lester Tompkins, another on Barred Rocks and Brown Leghorns by A. C. Smith, both gentlemen giving the details of double mating; lecture by Professor Sears on fruit crops to combine with poultry growing, and lastly a fine lantern or stereopticon lecture by Professor Rice on "The State and the Poultryman."

The attendance was about 130. As the meeting lasted over two days many could not remain and expressed regret at having to leave an interesting field meeting. A. C. Hawkins and C. E. Hodgkins, who were to talk on Columbian Wyandottes and White Plymouth Rocks, respectively, could not attend, but it goes without saying that their time was well taken up by others on the program. Massachusetts has pointed the way; the time is now.

One man reports 68 inquiries last month from a one-inch advertisement in American Poultry Journal. Take heed and do likewise.

We Sell Everything that you use, eat or wear.

Our large, new catalogue, No. 78, shows our full line. All the goods shown in this advertisement and 125,000 other articles are fully described in the big catalogue. You may order any goods from our Chicago house at prices here quoted, or you may send for a free copy of the No. 78 catalogue and read full particulars of all these goods and many more you will want. Try to make your order reach 100 lbs. or more in weight, and have it sent by freight. That is cheapest for you. Where we quote postage it means that if you order a single item by mail that amount of postage should be sent in addition to the quoted price. If you order that item to be sent with other goods by freight or express you'll save the postage.

NOTICE: We have stores in Chicago and Kansas City. If you live west or southwest of Kansas City write for our special Kansas City catalogue and order from our store in that city, from which point only you will pay freight. All others will send to our Chicago house and pay freight from Chicago. With any goods you order, ask us to send you a large, new catalogue No. 78 and we will help you save some money. Send for the free Catalogue, anyway.

Notes of the Month

After we have been promised the new Standard in 1910 comes the statement that we probably will have to wait for it until the fall of 1911. Fanciers the whole country over are demanding the new Standard for delivery early enough that they can prepare with its help for the shows of 1910-11. Explanations never explain, so let's have the Standard on schedule time, the fall of 1910. The artists have had time, the revision committee is practically through, and all we need is the illustrations ready for the annual meeting, August, 1910.

English fanciers have been worrying a deal of late over the probability of the Crystal Palace being wrecked to make room for another building. The official title of the Crystal Palace is the Grand International Poultry Show. One live manufacturer of appliances says that he will make the greatest display ever at this year's Palace show, and adds that customers and prospects will have their carriages, autos and aeroplanes properly cared for by his attendants, having stables, garages and alighting spots conveniently at hand.

Blue Orpingtons and Cuckoo Orpingtons soon make their bow to the public in the mother country, and undoubtedly it

rive" here in America. They are championed by Wm. Cook, son of the world-famous deceased breeder of that name who made Orpingtons popular.

Kentucky breeders are at work now framing a bill for presentation at the next meeting of their state legislature. They are going to ask for \$10,000 and are laying plans to storm the legislature a great deal as Missouri did.

The Secret Society of Poultry Progress is the name of a new secret fraternal society formed at the Missouri State Fair. The objects being to more closely bind poultrymen together, to promote and advance the interests of fancy poultry. A meeting will be held in connection with both the St. Louis and Chicago shows. Better come to the Coop and look into the Roost. Perhaps when you know, you will become a "jiner."

Have you noticed our cartoon, Farmer John's Monologue? This is one of the new things which we promised you. It will be an illustrated story continued from month to month, showing you how Farmer John some ten years ago became interested in fancy poultry and what it did to him and for him and his family. This will prove an interesting feature of the American. Be sure and look for it every month.

A PLAIN TALK BY A PRACTICAL MAN.

An Honest Common-Sense Answer to a Question Every Poultryman Asks, "Will I Use Incubators and Brooders or Hens for Hatching and Rearing Chicks?"

(By P. M. Wickstrum, the Queen Incubator Man, Lincoln, Neb.)

Taking the practical side of the poultry business, the biggest profit comes to those who raise their chickens in the country—in the villages, suburban towns and on the farms. Nearly all of my incubator and brooder customers live outside the big cities, and they raise chickens to sell to the city folks, and they make money by doing it.

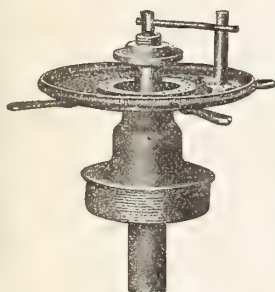

It has not been so very many years since eggs were selling in the spring throughout all the west central states for 10 cents a dozen, and in the extreme eastern and western sections of the United States they were down to 20 and 25 cents. Quite a change, though, in late years, especially so the last two years. I don't know of the market price of eggs at Lincoln being below 20 cents during this time. Chickens have been so scarce and the price so high that I could not have enjoyed many chicken dinners had I not made broilers out of some of my chicks hatched for exhibits and in my experiments.

These good prices have come to stay. In every part of the entire country, poultry raising, for eggs and market, can be carried on successfully. It is not much work to raise a profitable bunch of chickens if you have good incubators and brooders. The work, drudgery and disappointment come from raising in the old way with hens or with cheap, unreliable machines. It is true, some care and patience is needed. There is only one way you can get money without having to do something for it, and that is to have it left to you by a rich relative. People who are in the poultry business find the work of hatching the chicks and raising them, and in gathering the eggs, sending them to market, etc., very pleasant. Lots of people who, on account of their health, can't do hard work, find that the outdoor life that poultry raising affords improves their health, furnishes a great amount of pleasure and yields a nice profit besides.

The only way to raise chickens in large numbers in a short space of time and have them at the right time to get the biggest prices for them is to use incubators and brooders. By use of the hen for hatching and brooding, enough chickens cannot be raised in a season to make it pay. Many of my customers tell me that they would rather take care of 100 chicks in a brooder than to care for one old hen and her brood. You can set as many eggs in a medium sized incubator as you can put under ten sitting hens. With the machines, you have absolute control at all times; no lice to fight; no danger of eggs being broken or chilled during incubation. Eggs and chicks perfectly safe at all times. No work at all compared with the work that ten fussy old hens would cause you.

Reader, if you want to raise chickens—show chickens or market chickens—either for pleasure or profit—you will be better satisfied if you use incubators and brooders. During a year's time I get letters from thousands of poultry raisers, who tell me how they raise their chickens, and the methods they have found the

ANNOUNCEMENT

Acme Alcohol Burner

My improved line of Incubator and Brooder supplies is now ready, and embodies some of the most remarkable and valuable improvements in the history of artificial incubation.

My very latest invention is my Acme Alcohol Burner, designed exclusively for Incubator and Brooder use. This burner will fit any lamp bowl. It burns the cheap denatured alcohol, the new fuel, clean, safe, smokeless and odorless. Denatured alcohol is rapidly taking the place of gasoline and kerosene for lighting, cooking and heating.

It is not only the coming fuel for heating Incubators and Brooders, it is the right now fuel. My Acme Alcohol Burner is perfectly simple, and simply perfect, and is absolutely fireproof. Burns a beautiful blue flame, and is always under perfect control. This burner will fit any of my lamps, also any ordinary lamp bowl. Denatured alcohol is now on sale at all drug stores, but if you can't get it at your local dealer, I am in position to supply you direct at wholesale prices.

My Improved Acme Automatic Lamp. Air feed. No valve, float or other mechanism to get out of order. Oil level in wick chamber always same depth, insures uniform flame, even heat.

My New Acme, Jr., one of the neatest and most convenient lamps ever devised. My improved Acme kerosene burner, with automatic flame controller, the best and safest kerosene burner in the world for Incubator and Brooder use.

My New Tandem Thermostat Regulator. Twice as powerful, accurate and sensitive as any other. Equipped for combined damper and flame regulation. Fits any incubator. I also make many other styles of regulators.

The Famous Peerless Incubators. Automatic regulation of heat, moisture and ventilation. Hatches the largest percentage of fertile eggs, with least expense. Over 25,000 in successful operation.

My New Lamplless Brooder, the greatest brooder invention of the age. No lamp, no tank, no attention required, yet it raises chicks like the old hen.

I manufacture a complete line of Incubator and Brooder supplies and fixtures, consisting of lamps, tanks, heaters, regulators, legs, trays, etc.; in fact, everything to repair or remodel your old machines or to build new ones.

Illustrated plans for building the famous Peerless Incubators and Lamplless Brooders. These plans are complete in every detail, with numerous photographic views, showing step by step every stage of construction. Catalog and full particulars FREE. Send today, right now, while you think of it, and remember if you trade with me, both you and I will be making money; if you don't trade with me, we both lose. It's up to you. Address

best. If I didn't know from my own experience that artificial hatching and brooding gives the best satisfaction, the letters I get would soon make me know it.

WINTER COURSE IN POULTRY HUSBANDRY.

A twelve weeks' course in poultry husbandry is offered by the Pennsylvania State College. It is in charge of Mr. Homer W. Jackson, who was recently elected instructor in poultry husbandry at this institution. Mr. Jackson has been a poultry farmer at Cambridge, Ohio, for a number of years, during which time he has carried on a large amount of investigational work. He has had the editorial management of the poultry department of one of the leading agricultural journals of the country, has been a farmers' institute lecturer in Pennsylvania and Ohio during the past two years, has given lectures in poultry husbandry at the Ohio State University. Mr. Jackson comes to

the institution with a large amount of successful, practical experience in poultry raising and a thorough knowledge of the problems in poultry husbandry.

In this course in poultry husbandry, which begins November 30 and closes February 25, lectures are offered on the history and characteristics of the various breeds and the care, management of poultry, on the production of broilers and capons, on preparing fowls for market, on diseases and parasites, on poultry and colony house and incubators and brooders. There is practice in judging and scoring, in preparing fowls for market, in constructing poultry houses and appliances of various kinds and in running incubators. The course in poultry husbandry is intended to furnish such instruction and practice as will enable young men and women to become successful poultry keepers, either as a regular business or as a very profitable branch of farm work. Hence the students in poultry husbandry receive lectures in gen-

eral agriculture, animal husbandry and dairy husbandry. There are lectures in agricultural chemistry, soils, manures and fertilizers, crops, veterinary science and bookkeeping, or if the student desires he may combine work in poultry husbandry with instruction in horticulture.

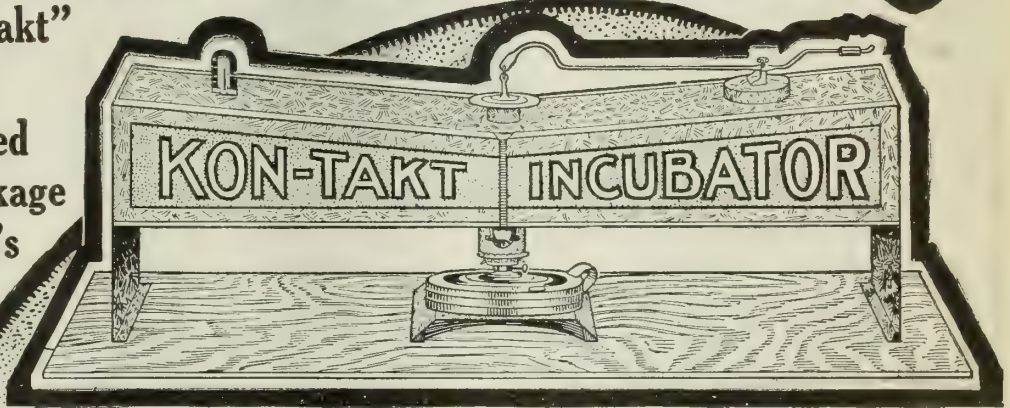

Address School of Agriculture, State College, Pa., for descriptive circular.

Have you heard the news from Buffalo? The great International show will be held there January 25 to 29, 1910. Here America and Canada will meet with their best on common ground. "Go to it, boys." The secretary, Mr. C. J. Standart, 309 Brisbane building, Buffalo, N. Y., will send list and any special information on request.

Never let your advertising overshoot the mark. Don't be like the grocer who placed this sign on a tub of butter: "It can't be approached."

Both Given Away

1. A "Kon-Takt" Incubator.
2. A Full-Sized \$1.00 Package of Wilbur's Poultry Tonic.

The Wonderful "KON-TAKT" Incubator

The "Kon-Takt" incubator is the best ever made, because it comes nearest to nature. It hatches every egg that the best setting hen could hatch. The heat is distributed and regulated perfectly, is uniform at all times and in all parts of the egg trays. There is no moisture problem. The moisture is absorbed into the air that comes in contact with the eggs in the most natural way. Instead of dry air that absorbs moisture from the eggs, as in other makes, the air in the "Kon-Takt" incubator carries just sufficient to the eggs to keep them in the natural, normal condition for incubation.

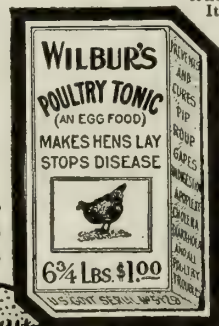

In the "Kon-Takt" we have for the first time practically reached the perfection of nature's method in incubation. The "Kon-Takt" is the most convenient of all incubators. It can be placed on a shelf, table, or in any convenient location, and can be easily moved from place to place. A half gallon of oil will complete a hatch.

Our Great Introductory Offer

In order to introduce Wilbur's Poultry Tonic, we will give away a complete "Kon-Takt" Incubator, together with a full size \$1.00 package of Wilbur's Poultry Tonic, to every person who accepts our offer and mails attached coupon at once.

Send the coupon now and get complete description of the "Kon-Takt" incubator, and full particulars how to get it without costing you a cent.

WILBUR STOCK FOOD CO.,
749 Huron Street,
Milwaukee, Wis.

What Wilbur's Poultry Tonic Is

A perfectly healthy hen will lay. She is an egg machine. When her system is kept toned up to its normal activity the food she eats is turned into egg production.

Wilbur's Poultry Tonic keeps hens in healthy, normal, active, egg-producing condition. It has been used for 25 years by tens of thousands of poultry-keepers, and is now the most popular of all poultry tonics, because it never fails to give money making results.

It keeps young chicks growing, making early broilers. It keeps cocks vigorous, insuring fertile eggs. In short, it keeps the whole flock in the pink of health and condition, with the natural result—highest production.

POULTRY PUBLICITY

[Any of the poultry breeders contemplating to get out a new catalog and desiring further information about the cost of cover-design plates and poultry illustrations are invited to correspond with us. We can handle all kinds of art and engraving work and at prices that are reasonable considering the high quality of goods which we deliver.—Editor's Note.]

POULTRY ADVERTISEMENTS— HOW TO PREPARE THEM— A SCORE CARD FOR ADS.

Selling the birds he raises is naturally the object of every fancier in the business. Raising a flock of high grade birds is one thing, but getting the price they are worth is a horse of an entirely different color.

Many of the best fanciers in the business—some that are known from one end of the country to the other for the excellence of their birds—do not get the financial results from their advertising they should. Some of them will blame the medium which carries the advertising, while others will blame the class of subscribers which the medium has.

They say, "We get quite a few inquiries, but don't make very many sales; the paper is no good." A close inspection of the methods in handling these inquiries would bring to light the reason sales have not been made. All inquiries should be handled promptly and answered the same day they are received. In answering same, let your reply cover the matter thoroughly, and answer the prospective customers' questions in detail, so there will not be chance for misunderstanding. An inquiry on a postal card should have the same attention as you would give a letter.

Always keep a copy of your letter for ready reference, and above all, do not misrepresent your stock. Frequently, you will hear a breeder complain he is not making any sales or getting any replies from his advertisement in the different papers. Sometimes, perhaps, the medium is to blame, but in nearly all cases the advertiser himself is the main reason for not getting the results he is looking for out of his ad.

Poorly worded advertisements, occupying too small a space, will not bring results, no matter how good the medium, or how good the fellow's birds.

Always remember that there may be from 50 to 100 competitors in an issue of a paper in which your ad. appears, and each one is bidding for the same trade for which you are looking. It naturally follows, then, that the advertisement that puts forth the claims in the most forceful manner will have a better chance of landing the order than the poorly constructed advertisement.

It is not every poultry fancier's gift, however, to raise fine stock and write convincing advertisements to dispose of the same, at the same time. For the benefit of those who have not the experience, we will offer a few suggestions herewith. We have often wondered if a score card for advertising could not be made somewhat on the same order as we have for chickens. This card could show the difference in values of the construction of an ad.

As we have something in mind at the

present time, we offer same herewith for the benefit of the readers. In the illustration herewith it will be noticed that we have divided the card up into four

A good likeness of Louis A. Stahmer, our artist, who will attend the important shows this winter in the interest of American Poultry Journal. He is thoroughly posted in all branches of art work and engraving pertaining to the poultry trade.

sections. The main section we have named "Attraction." This is one of the main parts of an advertisement, as you must get the prospective customer's attention

before he will start to read the rest of your ad.

We value this section at 50 points. To gain the attraction of a prospective customer, we can employ different methods, and for this reason we have subdivided the section into "Design," "Originality," and "Display." An original design will catch a customer's eye quicker than anything else, and if the wording of the ad. is displayed right, it will induce the customer to look further and read the rest of the matter.

Originality is the spice of an advertisement, presenting something different than the average, will make the customers look for your ad. each month.

Section "two," we have named "Argument." This section is almost just as valuable as section one, convincing the customer that he need not look any further for better stock or prices, must be the aim here.

The subdivision of this section gives us "quality" and "price." Some breeders are looking for *quality* only, no matter the price. Others are looking for *both*. Still another class considers *price* only. So in wording your ad., try to take care of the particular kind of trade which you desire.

Section "three" belongs to "Space," and has 10 points of value. This matter is not handled intelligently by many of the fraternity. Some fanciers run the same sized ad. year in, year out, without change of copy. If the space would have been used in proportion to suit the different selling seasons, better results would have been obtained.

The plan of running the same size ad. always is perhaps permissible when the customer has preferred space and his ad. occupies always the same position. In this manner it will become recognized as a sort of landmark and become valuable.

Sections one and two as well as the size of the ad. are points that must not be overlooked even here. "Position," section four, has a lot to do with effectiveness of an advertisement; thus it will be easily understood that a very small display ad. without any special design to distinguish it from other ads. and put on the same page with larger ones that happen to advertise the same variety has a very good chance of being overlooked entirely.

Poultry magazine publishers as a rule try and give the advertisements of their customers as good position as is possible.

The American Poultry Journal is the oldest and best poultry paper in the world. It is in its 40th volume, and some of the advertisers have been with us for 20 years or more continually. The guaranteed circulation of 60,000 copies each month insures the greatest distribution of your ad. in this country. Our little booklet, "What Others Say," containing hundreds of testimonials of our advertisers, is sent free upon request.

A score card of this kind filled out in the proper manner will prove a complete record and guide for the advertiser. By changing his copy from time to time and taking the above sections for a guide will soon give him the knowledge which kind of copy produces the best results, and will enable him to judge his advertisements before he sends them to the publisher.

Which Way Do YOU Do it ?

We put you on the best road to poultry profit without spending one cent. This book has done it for others and will do it for you. Edwin C. Powell's "Making Poultry Pay" is not based on theory—it is the written experience of a man who has made money by raising poultry. He wrote this book embodying his successful methods. Now we offer you, without any expense whatever, this information and advice, which will be an unfailing source of profit.

\$1.00 Profit From Every Hen

Mr. Powell in detail gives the income and production of an average hen. These figures are the result of many years' experience. Before writing his book he confirmed his ideas by years of actual tests. It is an authentic work by a real poultry grower.

What the Book Tells

What profits to expect
How to take care of fowls
How to select eggs for hatching
How to get eggs in winter
How to pick the best layers
How to feed fowls and chicks
How to hatch and raise chicks and turkeys
How to make big, fat capons
How to build poultry houses
The best breeds to keep
How to keep eggs 10 months
How to keep ducks and geese
The secrets of turkey raising
How to raise squabs and pigeons and

OVER 100 ILLUSTRATIONS

Powell's Plan is Practical

He has studied the principles of the poultry business, has applied them to his entire satisfaction, and the increase of his bank account. *Not a line of theory, but a book full of sound, practical, tried-out advice.*

THIS GREAT POULTRY BOOK } All for \$1.00 and FARM AND HOME 3 Years }

or "Farm and Home" One Year and Book 50 cents

Farm and Home is just what its name indicates—a spicy, practical, up-to-date, twice-a-month magazine. It covers everything that pertains to the farm or garden—big or little, in country or village. The best and most reliable information on household problems, cooking, home-made contrivances, fashions, dressmaking, embroidery, etc. It interests and meets

the requirements of the entire family.

Farm and Home is published the 1st and 15th of each month at 50 cents a year. You can thus appreciate the

big value in our offer.

If your order reaches us before February 1, 1910, you will also receive our great **POULTRY ANNUAL**, covering every phase of the industry, which appears on that date and exceeds in quality and quantity any 300 page book, which would sell for \$1.00 to \$2.00.

The regular **Poultry Department** in every number of **Farm and Home** is invaluable to all interested. The **seventy-two numbers** in a three years' subscription to **Farm and Home** make three volumes of over 2000 broad pages.

No better proof of the popularity of this semi-monthly can be offered than its immense circulation—upward of three million readers. **Your money back if not satisfied.**

Remit by post office or express money order, check or draft at our risk; or if more convenient send dollar bill or one-cent stamps. Address office nearest you.

SUBSCRIPTION DEPARTMENT

December, the last month of the year. The holiday season approaches nearer every day, and so does the real poultry show season.

Now is the time to prepare your birds for the show room. To win a ribbon is the pride of every breeder.

There is also something else drawing nearer every day besides the holiday and show season, and that is the closing of our great fall subscription contest. If you desire to participate it will be necessary for you to get started at once, as only one month remains before the finish, December 31, 1909.

Send us at least six subscriptions at the reduced price of 35 cents and get one of our grand \$1 books, "Origin and History of All Breeds of Poultry," containing the colored illustrations of 198 different fowls. We send you this book absolutely FREE in addition to giving you a liberal commission or other valuable premiums.

We have told you each month regarding our great contest, and have given you testimonials to read in every issue.

Have you tried to get a single subscription? If you have you will know that it is very easy work to get the first six, which entitle you to the best book on poultry ever published.

Read what these people say who received this book as their premium for sending us six subscriptions at 35 cents. Then let us send you a copy for your six and receive a commission in addition:

Bloomington, Ind., March 1, 1909.
American Poultry Journal,
Chicago, Ill.

Gentlemen: We received a copy of your book the "Origin and History of All Breeds of Poultry" today, for which we thank you.

It is far ahead of anything else we have seen in this line, and we shall be glad to recommend it. Yours very truly,

Oakes Mfg. Co.,
Per L. R. Oakes.

Adrian, Mich., Jan. 25, 1909.
American Poultry Journal.

Dear Sir: I received the book all right, and am well pleased with the same.

Yours fraternally,
H. R. Beck.

Breeze, Ill., March 21, 1909.
Dear Friend: I will take the opportunity to drop a few lines in regards to leave you know that I have received the book which you send me, and I am very thankful for it, and I am well pleased with it.

Very truly yours,
Ben J. Koch.

South Williamsport, Jan. 30, 1909.
Gentlemen: Your book and letter at hand and am well pleased with it. I will try to get some more subscribers. Thanking you for the past favors, I remain,

Yours very truly,
Herman Sonder,
1025 Mt. Ave., South Williamsport, Pa.

Malone, N. Y., March 2, 1909.
American Poultry Journal.

I received your book all right and it is a nice one, thanking you very much for the same.

Yours truly,
A. J. Bonna,
48 S. Pearl St., Malone, N. Y.

American Poultry Journal Co.
Sirs: Got my book and it is a fine piece of work and just what everyone should have.

Yours,
W. N. Tatroe,
810 Greenwood Ave., York, Neb.

Besides receiving this grand book and commission you also can win one of the fifty large grand prizes we are offering.

B. R. JONES.

Winner of a \$50 pen of E. B. Thompson's "Ringlets" on last year's subscription contest.

Our last year prize-winners were all well satisfied, and we publish below a few of

PERRY B. LUDDEN.

Winner of a \$30 pen of Duston's White Wyandottes on last year's subscription contest.

their letters, which should prove to you that American Poultry Journal prizes are worth your time and trouble.

Read these letters and consider if you had not better start now and win a prize. Many large prizes have been won in thirty days on former contests, and we feel that the large prizes will be won by agents who start now and work with energy until the close, December 31, 1909, and there is no reason why you cannot be one of the large prize-winners.

American Poultry Journal.

Gentlemen: In reply to your letter notifying me that I had won fourth prize and that I was entitled to buy a \$50 pen of chickens (any breed) from any advertiser in the American Poultry Journal, was a very happy surprise to me.

As I have been a breeder of Barred Rocks for twenty years it was an easy problem for me to solve, which breed to select. As I have been acquainted with E. B. Thompson's strain for several years, I gave the order to him and it was only a few days until I was notified the pen of chickens was at the express office for me.

And now I wish to express my thanks to the American Poultry Journal for their courteous treatment and prompt delivery of such a fine pen of birds. Also to Mr. E. B. Thompson for such a fine selection, as I have won first premiums on these birds at the county fairs where I have shown them.

These birds will be shown at all the poultry shows in central Ohio this winter and I shall take a great interest in showing these birds and explaining to people that they are the American Poultry Journal premium. Again thanking you, I remain,

B. R. Jones,
Kirkersville, Ohio.

A Few Words As How I Solicited So Many Subscriptions for the American Poultry Journal.

It being my first endeavor to solicit for a poultry paper, I took the following plan: I would approach a person who was interested in chickens and tell them what poultry paper I was soliciting for, and ask them for a year's subscription, it being so small, they at once would say, put my name down and would hand me the money. After they had received two or three copies, I would say to them, well, how do you like that poultry journal? Of course, they would say fine.

(Never had anyone say anything else.) Then I would approach them for a three years' subscription, telling them where it would benefit me. And nearly everyone would make it three years.

This, you see, was a good thing for me and also the American Poultry Journal.

It was very easy work for me, as you can see, as I sent in all subscriptions from a territory not over ten miles square.

Wishing the American Poultry Journal great success, I remain,

B. R. Jones,
Kirkersville, Ohio.

Portville, N. Y., Sept. 7, 1909.
American Poultry Journal.

Dear Sirs: I received the \$30 pen of White Wyandottes from Arthur G. Duston promptly at the close of the contest, and I must say they are the finest pen I ever saw. At this writing I have chicks hatched from them, they are strong, fine looking little fellows and I expect great results from them. I have been breeding White Wyandottes for seven years and have birds in my yards that score 95 points. I expect to dispose of all of this stock and make a specialty of pure Duston White Wyandottes. I wish to thank you for the premium and also Mr. Duston for the fine selection. Thanking you again for my premium and special premiums I received during the contest, I am, yours truly,

Perry B. Ludden.

A Letter from Johnson

LAST December I sent out a big batch of circulars announcing my new, annual "OLD TRUSTY" Catalog. Have been too busy to repeat it this December; so, instead, I am going to use up this whole page, and I hope to get a request for catalog from every interested subscriber.

The 1909 Old Trusty

It was a year ago about this time that I put my improved, metal-covered incubator on the market. I had, at that time, several thousand all-wood incubators in storage. The improved, metal-covered machine made such a record, ran so steady on such a little oil, that I covered the wood machines with metal instead of trying to sell them as they were. It cost me something; but, in the end, I gained. I have, on file, over 40,000

testimonials for the 1909 metal-covered "OLD TRUSTY" Incubator.

The 1910 Old Trusty

The 1910 "OLD TRUSTY" is still better; the incubator is now covered with asbestos board and again covered with handsome sheet-metal. Instead of a five-year guarantee, I am now making it ten years. The average hatches, on good eggs, were above 80% for 1909. I am guaranteeing it for this coming season; am using pure asbestos between the California Redwood case and the metal covering this year, instead of the combination paper.

The Old Trusty 1910 Catalog

There are over 350 photographs from all parts of the world in my 1910 Catalog. Everyone of them shows the "OLD TRUSTY" making big hatches for my customers. Poultry-raisers have told me thousands of times that I put out the best incubator catalog. My new 1910 book, which is now ready for mailing—and free—is the best one I ever had. It has poultry and egg record tables, incubation tables, a common-sense practical treatise on Mr. Small Chick, winter eggs, broilers, different varieties of poultry, egg farms, broiler raising, how to secure special markets, and page after page of useful poultry information. The book will be worth more to you than any \$2 poultry book.

Fill out the attached coupon and mail it to me, or drop me a postal card or letter and I will send it to you by first mail. I will also make you a special price of less than \$10.00, freight paid by me. If you don't want an incubator until later on, or next year, let me send you the catalog right now. It will help you in your poultry business and I want you to have it. Address

Wakeman, Ohio, July 7, 1909.
Editor American Poultry Journal,
Chicago, Ill.

Dear Sir: Yours of July 6th at hand and contents duly noted. Your kindness in sending premium was duly appreciated and I feel sure that there is no better drinking fountain in use than the Banty Sanitary Fountain, simply made, strong, and easily cleaned, and it must appeal to all who see them as the drinking fountain par excellence. Thanking the American Poultry Journal Publishing Company for their kindness in sending the premiums so promptly, I am,

Yours truly,

C. H. Figners.

Breeder of White Wyandottes, S. C. Buff Orpingtons and White Holland Turkeys.

West Point, N. Y., July 3, 1909.
American Poultry Journal,
Chicago, Ill.

Dear Sir: I received the poultry punch and I am well pleased with it; it works

subscribers to help us and get just one subscription. If you cannot interest yourself in the contest send American Poultry Journal to one of your many friends. Make him a Christmas present of it. A present such as this is accepted with thanks and is not forgotten for one whole year.

For every subscription you send us at 50 cents we will send you 50 beautiful embossed gold finished holiday post cards absolutely FREE. Make your friends happy, yourself happy and us happy with each subscription you send.

Believe us, you cannot select a better gift for a fellow fancier. You cannot obtain 50 post cards such as we send for the price of one subscription.

SHORT COURSE IN POULTRY HUSBANDRY.

Following the custom of the last eight years the Connecticut Agricultural College announces a special winter course in poultry husbandry. This course covers a period of six weeks, beginning Tuesday, January 4, and terminating February 11.

The instruction given will be of a practical nature, and aside from the strictly poultry topics will include more or less work in the allied lines of horticulture, soil management, etc. The cost of the course is low, \$40 probably being sufficient to meet the necessary expenditures while at the college. There are no re-

View showing field for small chicks, brooder house, etc. Ridge View Farm, Willoughby, Ohio.

fine. Many thanks for it. I did not expect anything as I was in hospital since March 1 from an operation for appendicitis. Hoping I may be in the future contests.

Very truly yours,

M. Wilson.

Having read these letters we will ask you to send us as many subscriptions as you can. Six will doubly repay your effort. Remember, you can take subscriptions at 35 cents and remit 25 cents to us and win a prize. Won't you get at least six today?

An Appeal.

We want to double our present mailing list and want everyone of our present

You cannot get better value for 50 cents than one year's subscription to American Poultry Journal and 50 beautiful holiday post cards FREE.

We appeal to your charitable self. Christmas time is near, we need your assistance to double our list. Assist us with *only one* subscription. You need not leave your own fireside to do so, and yet you will receive 50 beautiful Christmas cards, the thanks of your personal friends and our gratitude for the services you render.

"We lead, others follow."

restrictions as to residence, the work being open to residents of other states as well as those of Connecticut.

A copy of the bulletin describing the poultry course will be mailed on request. Address Prof. F. H. Stoneburn, Storrs, Conn.

The crowded condition of the college makes it necessary to limit the number of students admitted to this course, so early application is desirable.

You will notice the difference if you advertise in American Poultry Journal. It pulls.

ORPINGTONS

Buff, Black and White

If stock ordered is not satisfactory, advise me promptly and tell me why, and I will replace it or refund your money. I am not in the business for pecuniary gain only.

Your order is solicited in view of these liberal assurances. Bear this in mind for your present or future requirements. To avoid inconvenience and delay, be sure and specify the quality desired. My catalog and Fall sale list is free. I won more prizes on Orpingtons at 1908 Chicago shows than any other exhibitor. There's a reason. Start right and you'll succeed.

C. S. Byers : Orpington Specialist 11 Years : Hazelrigg, Ind.

ALL the world is waiting for the fellow who delivers the goods. Now, I have the stock. I know that no breeder in the States can and will give you more value for your money than I can and will give you at this time. My complete stock of carefully line bred birds, including hundreds of exhibition specimens, means something, and an enviable show record awaits the early purchaser of this show stock, which I will condition for your show if desired. Your better interests will be guarded, not forgotten the moment your money is received if sent this way. At \$5, \$7.50 and \$10 each I will sell you as good birds as any breeder, large or small, can possibly supply at these prices. More money will get you exhibition stock that will win in the keenest competition. I want your order, and when I get it the treatment accorded you will merit a continuance of your valued patronage.

Giant Bronze Turkeys .. Best .. Part. Wyandottes

At the GREAT MADISON SQUARE GARDEN SHOWS of 1907, 1908 and 1909, our Bronze Turkeys and Partridge Wyandottes won more premiums and more points than any competitor. At the above 1908 show our birds won MORE FIRST PRIZES THAN ALL COMPETITORS—a record seldom equalled. THE CHOICEST YOUNG TURKEYS AND WYANDOTTES WE EVER RAISED FOR SALE NOW. REMEMBER, all stock found not as represented may be returned at our expense and your money will be cheerfully refunded. All birds farm raised, vigorous and cannot be excelled for utility purposes. Write what you want. We'll try to please you. Catalog for stamp.

A. J. Hallock, Prop.

BROOKSIDE FARM
Center Moriches, L. I.

Speonk, Long Island, N. Y., Oct. 29, 1909.

Cyphers Incubator Company, Buffalo, N. Y.

The Mammoth hot-water Incubator that you installed for me in January 1908, has given excellent results. The machine requires very little attention, as your regulators on the heaters do the work satisfactorily. We consider that we save over 50% in fuel and 70% on labor in operating as compared with the old-style lamp-heated machines. This saving of labor is quite an item on a plant as large as ours, as it enables the incubator operator to superintend the nurseries and rearing for the first six weeks.

With the eighty-three old style lamp-heated incubators we formerly used it required one man's entire attention for the filling and trimming of lamps, regulating the machines and turning and cooling the eggs.

The odor in the cellar with lamp-heated machines was very noticeable, while with the Cyphers Mammoth there is no appreciable odor nor vitiated air to stunt the growing embryo.

We hatched 49,000 ducks in the Cyphers Mammoth Incubator this year and we would have hatched more if we had had enough eggs on the home farm to keep it filled.

While we have a large capacity, we decided to increase it for next season and therefore have given you our order to install another thirty compartment section of 10,640 duck egg capacity. We are going to keep a proportionately larger number of breeders.

After using the Cyphers Mammoth for two seasons, my ordering thirty additional sections is surely ample proof of my faith in the work of the machine and I do not hesitate to recommend the Cyphers Mammoth Incubator to any one wanting a capacity of six thousand eggs or more.

Yours very truly, A. J. HALLOCK.

NEXT DOOR to Atlantic Farm Cyphers Incubator Company has installed a forty-compartment CYPHERS MAMMOTH for E. O. Wilcox, a man of twenty-five years experience in growing ducks for market on Long Island. Mr. Wilcox saw what Mr. Hallock's CYPHERS MAMMOTH was doing as a fuel and labor saver and SUCCESSFUL HATCHER, then discarded forty lamp-heated incubators of a popular make and put in the CYPHERS MAMMOTH. We are now installing three other Mammoth machines on Long Island and several of them in New York State proper, in Massachusetts, Ohio, Illinois, etc.

TEN OR A DOZEN MORE!—We shall be in a position to supply ten or twelve more Cyphers Mammoth Incubators this season, but not a larger number. These machines are a demonstrated success. Automatic in regulation, in ventilation and in moisture supply. Guaranteed equally successful with hen or duck eggs; both can be hatched at one time. Blue-prints furnished free with each machine. Full particulars on request. Address all correspondence on subject of Cyphers Mammoth Incubators to home offices of

Cyphers Incubator Company, Buffalo, N. Y.

CHICK CHATS

by H. P. Schwab

This department is open to all readers and advertisers in the eastern territory and all are invited to send in all poultry news items that come to their attention. Address H. P. Schwab, eastern representative, Irondequoit, N. Y.

December—with snow, winds and Xmas—welcome.

* * *

Show your birds, there are advantages in both victory or defeat. The first is apt to make us very happy, while the other will bring future success if the lessons are well learned.

* * *

What a long list of shows there are for this month, exhibit and attend.

* * *

There is nothing that will lead to success as quickly as will the exhibition of your stock; make the shows, have your birds compared with those of other breeders. If you win the foundations of a reputation is started. If you lose you will find out where and how to improve, and come back next time with success assured.

* * *

Ask the judge. He is the one person to go to for such information as you may wish, a talk with him is most liable to be worth dollars to you. He will not let you go wrong if he can help it. Confidence in the judge is a feature we would like to see more generally displayed, if there is a difference of

opinion, a comparison of notes will be of advantage to both in most cases.

* * *

The enemy of advertising is the enemy of advancement.

* * *

Intending advertisers should send to the A. P. J. for a copy of the booklet just issued, "What Others Say." The opinions of the "Others" are worth your time to read, and to think over.

* * *

The annual meeting of the American Plymouth Rock Club will also be held there. Secretary A. C. Smith, Waltham, Mass., writes us that the club membership is rapidly increasing, and that the annual club catalogue to be issued soon will contain the best list of members ever published.

* * *

The premium list of the New York show is out. Long lists of specials are again a feature, with others still to hear from. Still it is not the money or specials that make the New York show what it is, it is the value of those awards, a try for them is worth several times the chance to anyone. The judges are G. H. Burgott, C. M. Bryant, W. C. Denny, J. H. Drevenstadt, H. B. Glee-

zen, D. A. Nichols, G. H. Northup, Fred Huyler, Richard Oak, J. H. Quilhot, W. J. Stanton, Eugene Sites, T. F. Rigg and H. P. Schwab. The entries close December 11. Mr. H. V. Crawford, Montclair, N. J., is the secretary.

* * *

Now for the road, with many long trips ahead of us, the future only promises hotels and sleepers; but, then, we shall be with the poultrymen most of the time until April, having only reserved Christmas week at home.

* * *

We shall have more to offer soon in regard to the Parcel-Post and Express Rate questions. This matter will NOT down.

* * *

We are pleased to see that Editor Schureman in the November issue of Commercial Poultry also has out his hammer and is using it with effect on these same questions. We believe there are still other poultry papers issued. Let's hear from them all.

* * *

In this issue will also be found a letter received from Secretary S. T. Campbell, of the A. P. A., which speaks for itself. We want more like this, for an organized effort will bring results that are most urgent and desirable. Let the poultry interests get together on these questions; then we will get the Grangers, probably then your Uncle Sam will sit back and listen.

* * *

One of the best bits of news we have had in a long time comes from Mr. F. W. Briggs, part owner and manager of the Pittsfield Poultry Farm Company, of Pittsfield, Me. Mr. Briggs in his

**PRACTICAL REDS
LAY-WEIGH-PAY**

Our strain of Practical Reds have been bred for years with the object in view of securing a strain of birds in which the great commercial values, so well represented in a Red should be magnified to the greatest possible degree for

Every Chicken Reaches the Table Sooner or Later

We have succeeded and now offer you the result of our labors in our strain of Practical Reds. They have proven extraordinary layers, mature extra early, having large size from the start, carrying lots of breast meat with an exceptionally long body. In producing my strain of Practical Reds I have not lost sight of "show points" and my selected matings will produce birds close to the Standard requirements. :: :: ::

We send you eggs that hatch. Price only \$6.00 per 100, from our utility pens and \$10.00 per 100 from our selected matings. Place your order early. Write today.

RIDGE VIEW FARM

WILLOUGHBY, OHIO

letter to us of November 12 says: "We look for much the biggest business we have ever had next season. All of our eggs since September 1 have been sold for hatching, and some of the orders were for more eggs than the ordinary plant would sell in a season. We have now orders for several thousand eggs booked for delivery next spring, including an order for 8,000 to one party who was also a customer of ours last season. One of our large orders this fall for 8,000 eggs went to Alabama, and they have reported very satisfactory results. This last season we sold over 17,000 day-old chicks and were obliged to turn down orders for several thousand on account of not planning for such large business. This year, however, we are planning to start our machines early and to run them later, in this way we hope to take care of all orders as they come in. Our business in breeding birds increased many times this season and, although we have many birds to dispose of each fall, very few females and no males have gone to the market this year. The quality of our stock is much better than ever before, owing to the very successful matings last spring. As for our exhibition stock, we have the best of the show birds and breeders of last year still on hand, and shall use them together with the best of the young stock in our matings next season. We really look for a big increase in our business for 1910. It appears to me that the poultry business is entering an era of great prosperity."

The above needs no comment, and but little explanation. The Pittsfield Farm Co. is one of the largest poultry plants in our country. We paid them a visit last spring and wrote them up in the May issue. To overtax the capacity of this plant as above stated surely bears out all we claim for the future possibilities of the poultry industry.

This is but the story of one; others have met with the same conditions, and we hope to visit more of these plants in the near future and to offer further proof of the poultry conditions as they are.

Never put off till tomorrow the advertising you should do today.

Advertising incites confidence, excites action, and invites prosperity.

The A. P. J. list of advertisers includes the names of all the prominent breeders of the several varieties, you can find in its columns what you are looking for, and when writing these, be sure and mention that you saw their ad. in this paper. While we do not doubt the integrity of one of them, still we guarantee all buyers, when mention of this paper is made.

From the information we have, we believe that the crop of poultry in the United States today is but little if any larger than last year, in particular there is a shortage in the early-hatched birds. This condition is bound to affect the price of choice breeders, exhibition birds have always made their own price according to quality, so should the breeding birds, instead of on quantity. First cost for choice breeders is a mere trifle when time and quality are considered.

AMERICAN PLYMOUTH ROCK CLUB.

There will be a meeting of the Midwest members of the American Plymouth Rock Club Wednesday, December 8, at 4 p. m. All breeders of this variety are invited to be present.

The Illinois State Cup of the club will be contested for at this show and will be awarded for best cock, hen, cockerel, pullet and pen shown by one exhibitor. It is to be hoped that every breeder of

this variety will be on hand and join in a general discussion relative to the advancement of the joint interests of the club and the breed.

Meeting will be called to order by Matt W. Baldwin, of Sioux City, Iowa, one of the National Vice-Presidents.

Be sure you are wrong before you give up.

Business neglected is business lost.

GOOD TO KNOW

by C.W. Zimmer

This department is open to all readers and advertisers in the central territory and they are invited to send in all poultry news items that come to their attention. Address C. W. Zimmer, central representative, Ft. Wayne, Ind.

A new drinking fountain that will keep water warm for thirty-six hours, being built on the lines of a fireless cooker, is attracting the attention of the up-to-date fancier. They are built with a feed hopper on top of the drinking fountain. Warm water in winter is a good thing for chickens, and the manufacturers are so confident you will want it once you try it that they will send it to you for 10 days' free trial. See advertisement elsewhere. Address Andrews Wire & Iron Works, Sub-Station C, Rockford, Ill.

The J. W. Miller Company, Freeport, Ill., are preparing for a big trade next spring by making up a large stock of incubators and brooders now.

An ounce of prevention is worth a pound of cure. One of Coleman's Eureka Tonic and Roup Tablets will prevent colds, chickenpox, etc. Better have a box handy and give a bird one before shipping, also to give in the show room to prevent contracting disease.

Better look up the advertisement of C. C. Shoemaker, Freeport, Ill. He has a new incubator that is cheap and does the work. An incubator circular sent on request.

Eventually you will advertise in the American Poultry Journal. Why not now?

Josh Billings says: "I don't mind how much a man talks, jes so he sez it in a few words." This is the right way to advertise. Say it in a few words, hit the nail on the head every time, and while your about it clinch it.

C. E. Spaug, Rugby, Ind., is issuing a fine catalogue containing much valuable information on Barred Rocks, being profusely illustrated with cuts of his birds. It will be sent you for five 2-cent stamps.

If it's a good thing it's in the American Poultry Journal.

Anything you want to know about advertising ask Zimmer.

Yes, there is some money in poultry. Four hundred thousand dollars was the amount paid to the farmers' wives in the state of Missouri during the last year. Better start now and get some of this money, don't you think so?

W. D. Holterman, fancier, Ft. Wayne, Ind., breeder of "Aristocrat" Barred

Rocks, reports many promising youngsters coming along in fine shape, many of these being sired by his "Prince Ringy."

We wish to call our readers' attention to the advertisement of Chas. G. Pape, Ft. Wayne, Ind., breeder of the Pape strain of Single Comb Black Minorcas, which are not only well and favorably known in this country, but foreign countries as well. Mr. Pape is vice-president of the National Single Comb Black Minorca Club.

Mr. Advertiser, you should be interested in advertising, and the experience of others should have some weight with you. Well, then, drop us a card for a copy of "What Others Say" about their returns from American Poultry Journal.

"I am an old man and have had many troubles in my lifetime, the most of which have never happened." Your troubles will be less if you advertise in the American Poultry Journal.

The Scripture says: "He that tooteth not his own horn the horn of the same shall not be tooted." Therefore advertise in American Poultry Journal.

D. W. Davis, Zion City, Ill., a breeder of Rhode Island Reds, reports he has a pullet that commenced to lay at four months and twenty-one days old. This is a good sample of what the Reds are doing.

G. P. Boehland, Rockford, Ill., has some fine R. C. Reds for sale. See his ad elsewhere.

The New Globe Incubator No. 10

The great merit of the Globe Incubators has been so well known to the poultry raisers of this country for the past fifteen years, that we feel the only introduction that the New Globe Incubator No. 10 needs is a plain statement of the fact that in this machine we offer to the public an incubator of Globe merit built on plans that greatly lessen cost of production so that we are able to offer a

200-Egg New Globe No. 10 at \$13.50

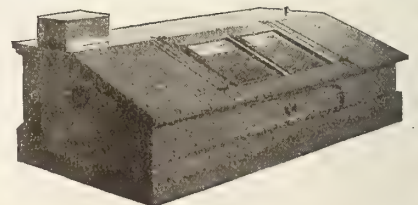

Positively the best in the world for the money—This machine is fitted with the best double compound water regulator, the same as used in all higher priced machines and is honestly and substantially made throughout and will render efficient and satisfactory service and produce the best possible percentage of strong livable chicks that will grow and mature when placed in our famous

GLOBE BROODERS

200-Chick Size \$11.75—A brooder built on scientific principles that have been proven correct by actual practical use.

Get These Machines and Raise Your Chicks

The price of eggs is high now, but they are going to be higher. Better get your flock in laying condition and reap your full share of the "Golden Harvest."

IOWA POULTRY SHORT COURSE, IOWA STATE COLLEGE, AMES, IOWA, JANUARY 3-15, 1910.

The second annual ten-day special course in poultry husbandry at the Iowa State College, Ames, Iowa, will be held this winter, January 3 to 15.

The success of the first course and the interest already manifested in the second course indicates a large attendance. Coming during the winter vacation of the regular college year enables the instructors to devote all of their time and equipment to the short course students.

The poultry farm, where much of the instruction will be given, is the largest college poultry farm in the United States. The equipment for instructional purposes includes poultry buildings, colony houses, fattening houses, brooders, incubators, trap nests, charts, photographs, lantern slides, models, cranning

machine, etc. The stock consists of several varieties of standard bred poultry, including a Madison Square first prize pen of Single Comb White Leghorns, Chicago first prize White Cornish cocks and others of equal merit.

This course is designed for poultry keepers and farmers who are actually engaged in raising poultry but wish to learn of the latest and most improved methods.

The ten days available for instruction, therefore, will be filled with clear, practical talks and demonstrations upon the most important points in poultry management. Some of the topics discussed will be: "Building of Poultry Houses," "Feeding for Meat and Egg Production," "Selection of Breeding Stock," "Incubation, Brooding, Raising Young Stock," "Killing, Dressing and Marketing of Poultry," "Preparing for the Show, Diseases and Parasites," and other topics of equal interest.

To partially cover expenses a fee of \$3 is charged for the student who is a resident of Iowa and \$5 to non-residents.

For illustrated circular and further particulars address Poultry Department, Iowa State College, Ames, Iowa.

THE DECIMAL SCORE CARD.

Argument Made by Mr. D. J. Lambert at the A. P. A. Meeting Favoring the Adoption and Approval of the Decimal Score Card System.

Kingston, R. I., August 19, 1909.
Mr. H. P. Schwab, Irondequoit, N. Y.

Friend Schwab: In reply to your favor of the 14th, permit me to say that I judge the two cards, the Standard and the Decimal, by comparison and find the latter the best way to score. The Standard has fourteen or fifteen sections to consider of assorted valuations, while the Decimal has only ten sections of uniform assessment. The simpler we can make any system of judging the better it will be understood, the quicker the work will be done the better for all concerned.

The Standard is very emphatic as to its instructions "To the Poultry Associations of America and Instructions to Judges," to have them follow the Standard literally, but some of its officers have been known to judge shows by the Standard score card and ignore the use of symmetry, while the Standard says that this allows the exhibitor "the privilege of protesting the decision, and such protest is to be entertained and properly disposed of by the local association."

Not long ago I was one of four judges at a show where the Standard card was used. Three of the four judges were members of the American Poultry Association. At the end of the first day I noticed that two of the judges were not discounting for lack of symmetry and the third seemed undecided about it and when I questioned him he said: "I started in this morning to cut for defects in symmetry, but wish I had let it go by now." Doesn't this make you think we need a different scale of points?

The Decimal Card is not a new thing. It was gotten up several years ago by I. K. Feleh, the originator of the scoring system, as an improvement on all previous methods. It has now been in use throughout New England for years and the only objection that any who have used it can find with it is that it

is not recognized by the Standard. I think the adoption of the Decimal scale would check the growing opposition to the score card shows. If the American Poultry Association wants to see comparison replace the score card at shows it can no doubt bring it about by refusing to adopt improvement in the method of scoring. The only improvement in the 1910 scale is the reduction in the value of symmetry. Even now every judge who passes this section will score the bird on a valuation of 96 points instead of 100, and every judge who makes a stereotyped cut of $\frac{1}{2}$ or 1, as is sometimes done, will be defrauding

I Have Ten Hens and Get Ten Eggs Each Day

by feeding "Lee's Egg Maker." Without waiting another day, go out and count your hens—count them carefully. For a week keep an accurate daily record of the eggs you get. The guarantee below means you.

WE GUARANTEE

that no matter what you are feeding, and regardless of the number of eggs you are getting at the present time, if Lee's Egg Maker is added to the daily ration—made a portion of it—the increased egg yield resulting therefrom will more than pay the cost of the Egg Maker, cost of labor required, and 100 per cent profit on said labor.

We don't care what your hens are doing now, we ask you to buy Lee's Egg Maker on our guaranty of an increased egg-production at a reduced feeding cost. Could we make you a better proposition?

The amount of good digestible protein is what counts for results in poultry feeding, and America's big feeders say Lee's Egg Maker contains more digestible protein than any other poultry food they can buy.

Lee's Egg Maker is almost entirely a meat food and with an actual tested protein feeding value in excess of 80 per cent, and you'll find in it the essentials entirely lacking in other prepared poultry food. The best feeding authorities in the country endorse it—and use it. You can't afford not to feed it, whether you have 10 hens or 1000, the proportionate profit would be the same.

Price: 2½ lb. pkg., 25 cts., 25 lb. pail, \$2.00. Ask your dealer or send direct to us. We pay freight in 100 lb. lots.

Hatch Chickens By Steam

The most satisfactory incubators on the market are the Wooden Hen and Excelsior. They not only solve every problem of heat, moisture and ventilation, but hatch a chick from every fertile egg. The simplicity of construction and economical operation of the

Excelsior Incubator or WOODEN HEN

make them the most popular incubators—run themselves. Send for free catalogue on growing incubator chicks, fourteen colored views.

GEORGE H. STAHL,
Box 968 Quincy, Ill.

the better birds of their just dues. When using the A. P. A. Card we must know what symmetry is and how to apply it or we have no business to act as a judge, whether we have a license or not. Very few birds are perfect in symmetry. If we cut we must know what we do it for, so as not to discount twice for the same defect. If we are questioned we must be able to tell why we cut $\frac{1}{2}$ for this and 1 for that and $1\frac{1}{2}$ for the other, and so on.

Instructors at agricultural colleges and poultry schools are not slow to see that the Decimal scale is the best way to teach students the science of scoring and the coming fanciers will demand its adoption by the powers that (will) be. Yours truly,

D. J. Lambert.

The poultry crop in Indiana is fully 30 per cent short of 1908.

THE THIRTEENTH COMMANDMENT.

"Thou shalt not kill thy neighbor's chickens by poison, by strangulation, by bleeding, by wringing their necks, by shooting, by decapitation, by clubbing them or stoning them or in any other manner whatsoever causing them to pass in their checks unless thou art willing to pay the penalty of thy transgression against thy neighbor. Having done so thou mayest appeal to the unwritten law (Stanford White-Harry Thaw law) Thaw did, but then thou knowest Thaw had a mental derangement in his cranium, else he would not have loved Evelyn Nesbit.

The unwritten law does not say thou cannot get mad when thou seest two or three of thy neighbor's old hens with a brood of her offspring nestling themselves down in the dirt for a sun bath in

thy onion bed. It does not say thou shalt go without chicken with hot biscuits and gravy for thy Sabbath (Sunday) dinner, and if thy neighbor's chickens trespass in thy garden or flower bed thou need not say Shoo! Shoo! Shoo! Shoo there, you old blankety —

— If thou gettest mad thou had best express thyself (perhaps in thine own house, where no one but the cat can hear you) in a suitable manner, like a safety valve letting off surplus steam. Else in like manner thou wilt burst, and great will be the noise and damage done thereby.

If thy dearly beloved wife has a pet pussy cat in which all her affection is centered (to the exclusion of yourself and you wish she were dead, the cat, not the wife). Then when thy neighbor's chickens do trespass (and then only) you may have a (Thaw-Hains) "brain-storm" and behead thy neighbor's chickens or in some other manner send their souls to the terrestrial sphere known as the happy hunting grounds.

Under such provocation you may forget the fourteenth commandment, which says, I, by decapitation, by shooting it more than eight times, as it only has nine lives, nor shall you drown it, chloroform it, asfixicate it; however, you may kidnap it, if you are willing to await your reward (in heaven?) However, if thy neighbor has little chicks that fly like birds and look like birds to your wife's cat you can't be expected to provide glasses for her cat to correct his catship's optical delusion (many of us have them, you know). Therefore if the aforesaid cat should playfully catch thy neighbor's thoroughbred chick just to play with it and only accidentally deprive it of the power to continue respiration thy wife's cat can't be held accountable under the law, because this was your cat, not his. Still thy neighbor may have seen a Madison Square Garden winner in this self-same chick, and he may blinkety blank your wife's dearly beloved cat, failing which he may have a (Hain's) brain-storm and insist on snuffing out at least one of the nine lives possessed by your wife's cat. In which case be thou content, thy reward is yet to come, for the good book says, "Verily, verily, I say unto you, from him that little is given little shall be taken, and from him that much is given much shall be taken." And the thirteenth commandment does not say, "Because thou lovest thy neighbor as thyself thou must also love thy neighbor's chickens (even if they are thoroughbreds)—except in pot pie. Verily I say unto you revenge is sweet, and if thine appetite for chicken—any old time—is uncontrollable, if thy neighbor's chickens disappear thou need not incriminate thyself—thou knowest nothing. So be it."

The Boston show dates are January 11 to 15, 1910. Entries close December 25. Write to W. B. Atherton, secretary, 30 Broad street, Boston, Mass. for premium list and other information, and make this Beauty show.

"We lead, others follow."

ROSE COMB RHODE ISLAND REDS

At the recent big Tri-State Fair, Trenton, N. J., won first cock, second hen and second pullet on three entries. At Red Bank, first hen, first and fifth pullet, second cock and third cockerel on five entries in the strongest competition. Twenty-five cockerels, choice birds, \$3 to \$10 each. We can please the most exacting.

POULTRY AT THE FALL FAIRS:
RARE VARIETIES.

Written for American Poultry Journal by
Dr. H. F. Ballard.

NEXT to the poultry journals and the winter shows, there are probably no factors which enter into the upbuilding of the thoroughbred poultry business like the numerous county and state fairs all over the Union.

The poultry department at the very smallest county and district fairs is always crowded with visitors; everybody knows everybody, or if they don't they soon become acquainted, because there is nothing like the poultry business to create and maintain a fraternal spirit. If there is anything that a chicken crank likes better than chickens, it is another chicken crank. If they happen to be breeders of the same variety, they are full blooded brothers and sisters to start with, and if of different varieties, they are cousins and uncles and aunts at the very farthest.

But the greatest benefits are to the amateurs and "strangers in the gates." More people are inoculated with the hen fever at these small fairs than at the winter shows, because there are so many people who attend them. Most of the farmers and all the farmers' sons and daughters visit the poultry department. I have seen boys twelve to sixteen years of age standing and listening to discussions between two breeders with as much concentrated interest as any old veteran could display; yes, and some of the youngsters can run an argument of their own that would make even the veterans take notice. Our average farmer boy is

as wide awake an American as the city fellows in these days of automobiles, rural mail carriers and flying machines. (Indeed, you will remember that the very first inventor of a flying machine was a farmer's son, Mr. Darius Green of immortal fame, though his machine did "caflumox"; the idea was there, and would probably never have been thought of but for him.)

Then the huckster, much maligned and ridiculed though he be, has done much to start the poultry ball "a rolling." With a hundred dollars' worth of stock of perhaps twenty or thirty varieties,

PRACTICAL REDS.
View at the Ridge View Farm, Willoughby, Ohio.

Mr. Huckster does not carry off as many of the \$1 and 50 cent prizes as he used to; it will take from \$7 to \$10 per pair to buy birds to win with at most picked up over the country, he has done a great deal to educate the people as to the numerous varieties of both land and water fowls. And he is still much

in evidence; but he has to show a better grade of birds than he did in the 80's and 90's. Many of the farmer boys have become experienced breeders, and of our county fairs, and among the more popular varieties birds at those prices are often left out of the race entirely.

What I should like to see is enough good breeders in each county in the majority of varieties that would shut out entirely the man with the long line of cheap stuff. Many people are the owners of fine birds who never show at the small shows, or who do not show at all. It will pay to show, even at the smallest fairs. Many sales of stock and eggs can be made there if the birds show up nicely and the owner is there to point out their good qualities. Of course every person thinks he has the best, but there are enough varieties in taste to accommodate all the varieties in color and shape. The more varieties that can be shown at a county fair the better. I

The Best of All Bone Cutters

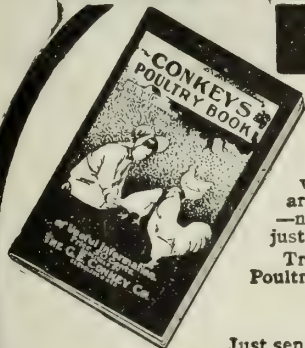

Best, because it's the *only* cutter made that cuts bone across the grain. And the most successful poultrymen know that bone cut in this way is easily assimilated by the hens and produces the best results. The

CONKEY'S POULTRY BOOK

A mine of valuable information that no poultryman can afford to be without. The work of men who have devoted their lives to the poultry business—who have made a success of it, and who can tell you how to make a success of it.

The old Conkey Book was recognized by over two million poultry raisers throughout the world as the standard work of its kind. This new edition, containing many new and instructive articles, is meeting with even greater favor. It is written by men who know, and contains facts—not theories or opinions. It solves all the problems which worry the poultryman, and tells you just what to do and how to get the best results.

Treats fully such subjects as Best Way of Housing, Feeding, Increase of Egg Production, Care of Poultry in Sickness and Health, Incubation and Brooding, Care of Chicks, and many others.

IT'S ABSOLUTELY FREE

Just send us the name of the man from whom you buy poultry supplies and 4c in stamps to cover postage. The number of available copies is limited, so fill out the coupon below before it is too late.

CONKEY'S ROUP REMEDY

has been for years the one recognized reliable remedy for this dread disease. It has cured affected birds even when they were in the last stages. Mix a thimbleful with a gallon of their drinking water and watch them perk up. A little should also be given to well fowls every now and then, for it will absolutely insure the flock against this poultry scourge.

Our Money-Back Guarantee

Use a box of Conkey's Roup Remedy according to directions. If it doesn't do the work, if it doesn't satisfy you in every way, return the empty box to us, and we will refund your money immediately. Could anything be fairer?

A 50c Box Makes 25 Gallons of Medicine

Try it today under our guarantee of "No cure, no pay." Don't forget to send at once for your free copy of Conkey's Poultry Book.

If you can't obtain our remedies from local dealer, write direct to us. (4)

Dealer's Name _____

have been writing a series of articles on some of the rarer varieties of poultry. for one of our western journals, with the idea of stimulating some persons to take up the breeding of such fowls.

I believe more money can be made and am sure as much interest can be kept up in raising them as in overcrowding three or four varieties. Every paper you pick up is filled with ads and booms for Plymouth Rocks, Wyandottes, Orpingtons and Leghorns, while many others just as good are neglected. The amateur can stand a better chance with one of these

rare varieties than with a popular one. A little three-for-a-dollar ad is completely lost in the Wyandotte or Rock column, but a Polish, Creve Coeur or Brahma ad has some show. And they are just as good as the more common ones, if you only think so. So to the amateur I would say, take a rare variety, show at the county fair, advertise it in some good journal, push it and write for it and boom it at every opportunity, and you will come to the front in half the time you will with one of the popular varieties, where the competition is heavy

and it takes a millionaire to beat it. Watch the journals closely and you will find there are a few old line breeders who have stuck to some of their old fowls through thick and thin, have been very successful with them and would not change to any up-to-date, combination kind of a bird for anything. Dorkings, Creve Coeurs, Javas, Polish, Black Spanish, Hamburgs and La Fleche can be successfully raised, shown and sold, and at less expense than many others.

How Does It Look to You?

While in a barber shop the other day we saw a sign which read, "Life is just one damn thing after another."

Now we prefer to think life is just what you make it. At least that has been our experience. If you let yourself feel out of sorts with everything and everybody you are apt to find it just one damn thing after another, but if you wear a smile and strive to do your duty as you find it, you will see the pleasant things in life and will have that self-consciousness of at least having done your duty. Try it and remem-

Chas. A. Cyphers

My Promise to You

I promise you that my new low-priced 1910 BUFFALO INCUBATOR equals any high priced incubator, yet it will be sold for about half the price.

In my 20 years experience as a manufacturer of highest grade incubators, I have never talked price, but always quality. Now it is quality and price.

Often have I been urged to put a cheap incubator on the market, but I could never see the honesty of offering two grades. Invariably I have replied, "When I can make as good a machine as has always been associated with my name and sell it at a low price, I will stop manufacturing the high price machine."

That time has come. It is here. The new Buffalo IS such an incubator. New material and new methods of manufacturing have made the new low cost Buffalo a possibility.

My old wood-working machinery was scrapped. In order to reduce every item of manufacturing cost to the minimum, I even secured a new factory site, thus in proportion. My new factory is built with the sole view of giving the new Buffalo Incubators and Brooders, Chas. A. Cyphers quality, at half the former cost to my friends and customers.

Construction of the Buffalo.

The New Buffalo Incubator is made of sheet metal and fibre board, indestructible and fire proof, instead of built-up wooden panels—a saving of one third in labor and one half in factory room and machinery. This tremendous cost reduction means big price saving for you and gets an incubator as substantial and as well insulated as any I ever constructed.

Tested Principles Retained.

I have retained the diffusive heating and ventilating system made famous by my former non-moisture designs. The regulator combines the best principles of former regulators; if anything, it is still more accurate and reliable.

The lamp has a self-feeding fount. The burner is on the lines of the notable blue-flame oil burners, and it is seldom necessary to touch this burner oftener than once in three days—a saving in time and labor.

Outdoor and Indoor Brooders.

In addition to the New Buffalo Incubator I am manufacturing a complete line of Colony Brooders—the best I ever made, irrespective of cost. Yet they cost one-third less than any I ever made before. The temperature in the nursery is regulated automatically—a thing I have never been able to accomplish in other brooders. I predict that the New Buffalo will be the most popular brooder ever offered poultrymen.

Note These Prices — Atway Below

What You Ever Before Paid for My Incubators and Brooders.

* 50 Egg Size Buffalo Incubator	\$ 8.00	Buffalo Colony Brooder	\$10.00
* 100 " " " "	11.00	Buffalo Indoor Brooder	7.00
* 200 " " " "	15.00		

*The incubators are underrated somewhat, as I give half a square inch per egg more than in my previous machine.

Write me about my complete line of portable, waterproofed Colony Houses, Incubator Houses, Brooder Houses, Summer Cottages, Garages — and everything for the best and cheapest poultry equipment that can be put up.

I want every one of my quarter of a million poultry friends and every owner of a Model, Cyphers or Prairie State Incubator to write me today for my advance circular on my new Buffalo Incubators and Brooders. I will inclose with it Bulletin No. 2, which tells of a new poultry discovery.

CHAS. A. CYPHERS, President Buffalo Incubator Co., 4700 Ellicott Square, Buffalo, N. Y.

Second prize White Wyandotte pullet at Indianapolis, 1909. Bred and owned by Geo. Barkdoll, West Unity, O.

ber the old saying, "If at first you don't succeed, try, try again."

A Warning.

Ninety-three chickens were killed in two nights recently by a weasel at the farm of Alexander Wilson, living just north of Crawfordsville, Ind. On the first night the weasel killed seventy chickens and twenty-three on the following night. The chickens averaged about one and a half pounds each. The weasel simply sucked the blood from their throats, many of them having only very slight marks to show where the animal had sunk his teeth.

A Freak Egg.

We know a breeder who lately had a hen lay a freak egg. It was a large, fine egg, rather long, and one end of the shell was very dark brown and the other end quite white. The two colors met in the center and each one met in a distinctly perfect line around the egg. How do you explain this?

BUFF, BLACK AND WHITE ORPINGTONS.

By R. J. Knisley.

Just at this time of the year, when many poultry raisers are thinking of buying new stock and the amateur is considering the question of starting in the poultry business in a limited way, and knows not which of the many good breeds to select, a few words about one of the newer breeds and a character study of the Orpingtons may not be out of place.

Because I breed the Buff, Black and White Orpingtons I do not say they are the best. There are many good breeds, and any fowl rightly handled will bring good results. Although there has been a great deal written about this popular breed, many are still seeking information

R. J. KNISLEY, YORK, PA.

as to the relative qualities of the different varieties. We see so much about the older breeds and so few really fair and conservative articles on the newer breeds, that it seems to me a few remarks on this subject will be apropos and very acceptable to those who are already keeping Orpingtons, or are contemplating thus doing.

The Orpington breed was originated in England about twenty years ago by William Cook, the greatest English poultry authority at that time, and was the result of many years of careful breeding. Mr. Cook, believing there was room for a new fowl and one that was hardy and would mature early, and that would lay more eggs than any other existing breed, also handsome in appearance and full of good table meat, set about to produce such a bird. The result is conclusive proof that he was successful. The black variety was established first, followed by the white in 1889, and the buff in 1896.

The rapidity with which they were taken up, both by the fancier and the general public alike, speaks well for their popularity. The Black Orpington was produced by mating the sports from the Barred Plymouth Rock with the Black Minorca, the pullets from this mating then being mated to Black Langshan cocks. The white variety was made by mating the Black Hamburg and the White Leghorn, the resulting pullets being mated to White Dorking cocks. So

This Is Why You And I Can "Trade"

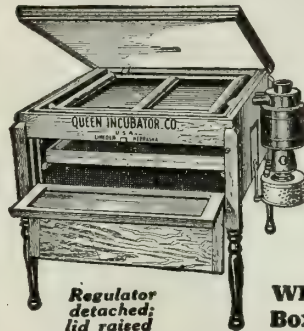

Where I make one dollar on a QUEEN, the buyer often "cleans up" \$500.00 in a single season. You will realize this, too, before you elect to keep the incubator. I am satisfied with my small profit and more than pleased with my method of pleasing folks.

After you have tried my QUEEN Incubator for full 90 days, you, man or woman reader, will be more anxious to "trade," to close up the deal, than I will.

I say this because I know you can appreciate a real bargain as well as the thousands of other good people who have purchased incubators of me on my generous plan.

Now, I don't care how many incubators you have experimented with or how many catalogs you have, I want you to see **my** Catalog. "Know my incubator, know my plan," that is my message to you. It costs you a **one cent** postal to get this information; it costs me almost one dollar to prepare it and mail it.

I meet you **more** than half way in getting my book, plan and prices before you. Then, I will be equally liberal in sending you a "Queen" to try. If, after 3 months, the deal falls through you shall not be out a cent. If you **close** the deal, I'll give you my written guarantee to protect you 5 years, or, you can frame up this guarantee to suit yourself and it will suit me.

Regulator detached; lid raised

I make you this offer because of my faith—my conviction—my knowledge of the great work Queen Incubators **have done and can do**. No wild claims about the "Queen"; no "knocks" on other incubators. You will find nothing like that in my catalog. I stick to business and tell you what the "Queen" has **done**, how it is made, the material it contains and what one will cost you.

Get off a postal or letter to me now for my 1910 Incubator Book. I'll be most pleased to tell you all about my Incubator and my Plan, and to include one of my Handy Poultry Record Booklets, Free. Please address me

MORE PROFITS ON HOGS

My friend:—Have you hogs? Will you accept \$100 extra for feeding them?

Jones fed his hogs the same amount of corn that Smith did. Jones made his gain from 160 to 260 pounds. At 7½ cents a pound this made \$2.25 difference per hog that Smith got out of his feeding over what Jones did, just because Jones did not know how. He was not progressive and Smith was.

Jones' 50 hogs brought him \$975, while Smith's 50 hogs brought \$1,087.50. Smith's knowledge therefore was worth to him \$112.50. It shows that knowing how makes success not only for the farmer as well as the lawyer and banker; it enables them all to make money. This tip ought to be worth something to you; some will make it worth \$100 this fall.

It isn't what the hog eats; it is what he digests that makes the money. Experience is our best teacher. We are all in a school, learning. We could preach you a great sermon on this; but you have no time for words or arguments. You want quick money. It costs the man who first proves an undiscovered fact (which, of course, always existed), but the man doing so is a benefactor as well as an educator of his fellow-farmer.

The principal cost of producing pork is the feed. Prof. Dietrich says "90 per cent of the farmers have nearly everything to learn about how to feed a hog to get the most out of him at the least cost." We can help every one who will be helped to progress; the others will continue to lose the hundred dollars a year.

"For \$1 we will send you the American Swineherd, the aggressive and progressive acknowledged leader, devoted to the swine industry, for 4 years, and will give you as a premium the Progressive, Scientific Feeding Formula for increasing the gain while feeding, fattening hogs, a half pound a day per hog over the customary way of feeding from the same feed given. This hygienic secret made the discoverer a fortune fattening hogs.

It is simple, sensible and just as easy feeding as the old way. Yet it is progressive and scientific. It is of such real value that no sensible man can ignore it. It has been proved so conclusively and repeatedly that we have an abiding faith in it and agree to make good or give money back, making you absolutely safe.

This fair offer is good for 10 days.

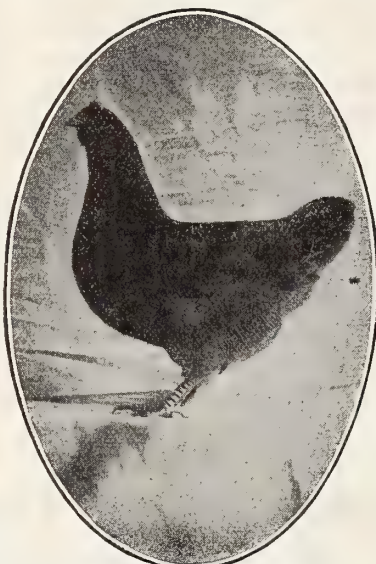

We also give additional premium, copy of the Pig Feeder's Manual, itself worth double to any hog raiser what you pay us. The paper stops at the time paid to.

Address, with \$1,

American Swineherd Publishing Co.
542 Como Building, Chicago, Illinois

it is seen that all the varieties of the Orpingtons come from good foundation stock. The buff variety is a cross between the Golden Spangled Hamburg and the Dorkings, the progeny being mated to the Buff Cochins. The Orpington does well in a small run, and no back yard is too small for them to increase the income of the owner. They are very hardy, and are immune from climatic changes. They do not stop laying when a cold spell sets in, as do most breeds. They make good mothers, and are easily broken up in three days, if one wants them to lay instead of sit. They are more handsome and stately than other breeds, and bring higher prices.

For those contemplating starting in the poultry business the Orpington is the ideal fowl, a demand for them is far larger than the supply, and always will be; and one is sure of a ready sale for their stock and eggs at good prices.

S. C. BUFF ORPINGTON PULLET.
First prize Hagerstown, Md., 1908; silver-cup Dallastown, Pa., 1908. Owned by R. J. Knisley, York, Pa.

From a remunerative point of view, the Orpington leads the world.

One of the great advantages of the Orpington breed is that of selection as to color and comb. Each variety is just as good as the other for utility purposes, and it is only a choice as to color when you want to start in with the Orpingtons. The Blacks run a little larger than the others.

Now the shape, and we are through. The Standard calls for a long, round body, broad back and a deep, full breast. These are the essential characteristics of a well-shaped Orpington. The large size, combined with this symmetry of outline, makes a handsome bird indeed. Never breed from birds showing a flat or undeveloped breast; the deep, full breast is one point that makes the Orpington so valuable for table purposes, and must not be disregarded. Birds having a long body, round and regularly curved, and a broad back are sure to produce better specimens than those having the short Wyandotte shape. The White Orpington is a blocky bird; the legs and the thighs are short, which set on a long, round body, presenting a solid appearance, which is characteristic of the breed. In some strains the legs are too long. We must keep the legs short if we wish to retain the proper shape.

To properly mate Orpingtons we must

study our birds carefully. Cull out the inferior ones and select only the best. Form in your mind your idea of a perfect Orpington, then breed for that ideal. It is better to mate but three or four birds of fine quality than to breed from several of lesser value. By doing this you will have far better results and be amply repaid for your care.

Another favorable point is that the best specimen and the exhibition birds are just as good for practical purposes and will lay just as many eggs as the cheaper birds. This is not true of every breed, as the breeding for fancy points usually spoils their other good qualities.

To all lovers of buff, black and white, Orpingtons will appeal and be recognized as one of the coming breeds.

THE MODERN WYANDOTTE.

Written for American Poultry Journal by John S. Orr, Augusta, Ky.

We read much nowadays in the Poultry Journal about the "Modern Wyandotte," even new books on the subject, pictures setting forth the claims of improvement, etc., etc. I for one am not much in sympathy with the much-extolled superiority of the "Modern Wyandotte." In this article I will try to give my reasons why. In the first place I am of the opinion that feathers and general outline to conform to fads does not constitute all or even the real value of a chicken. It is well in this connection to revert to the primary question, What is it that makes chickens valuable? Certainly not its feathers and contour. Primarily it is nothing more or less than egg production and table quality. The American Poultry Association, the poultry journals and the contributed articles on poultry in the general press of the country have wrought a wondrous good work in stimulating more and better poultry, but there is yet much to be attained in the way of enlightenment to produce generally more and better poultry than present achievement. It depends upon the proper research, and to pursue the proper research is not to run wild on outward appearance. Evidently the most essential characteristic is not feathers— and contour, but anatomy—physical construction—functionary ability to assimilate food to produce the meat texture most palatable, and produce

the greatest number of eggs. The strain or variety that can combine these two most essential qualities in the highest degree is beyond question the most valuable—let feathers and form be what they may. It is, therefore, clearly seen that this question of the greatest attainment is at present seemingly problematical and effort to improve what we have without the proper enlightenment is fraught with danger of injury, rather than benefit. We must proceed most cautiously with experiments, and when error is discovered, retrace and get back, if possible, to where we started. Who does not know that many breeders have destroyed the best quality of their fowls by experiment and neglect to maintain proper treatment. To my mind, the modern Wyandotte is not an improvement upon what is known as the old, original Wyandotte, but far inferior. The modern Wyandotte is a deteriorated bird in comparison with the old Wyandotte. Why? Because there has been so much cross breeding and mixing of strains that the old, original essential qualities have been materially injured. The general appearance may be

WHITE WYANDOTTE.

One of the females in first prize pen, Boston, 1909. Bred and owned by J. W. Andrews, Dighton, Mass.

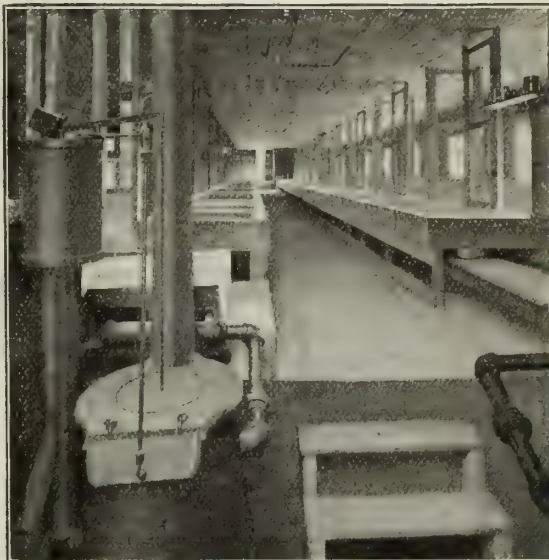

improved, especially in the minds of a large number of breeders, but the qualities that made the name "Wyandotte" famous on its very introduction to the public have been irretrievably lost in many strains of the present day Wyandottes. They have lost measurably first breeding quality—only a small proportion of the number of chicks produced show type of ancestry. Second, a loss of egg producing quality. Third, table quality. Fourth, constitution. This may not be believed, but test and see. Procure some of the unmixed, old, original strain and breed them in comparison, and note results. It is not generally known that the old, original Silver Lace Wyandotte has a record unequalled by any strain or variety of chickens before or since their introduction. What is that record?

First, on their introduction the published statement of Mr. L. Whitaker of the number of eggs they produced exceeded any before known, so much so that his report was not believed, but afterwards proven and generally accepted. Second, in the greatest annual egg contest the world has ever known—a contest in which every laying strain of each laying variety contested—the old

Spaugh's Barred Rocks

WIN AGAIN—In the hottest class of Barred Rocks (150 birds) gotten together this season at Springfield, Ill., I won the two most coveted prizes. 1st cockerel and 1st pen; also 3d cockerel, 3d pullet, 3d hen; winning more prizes than any other exhibitor at this show where it took "quality to win." This winning coming on top of our great winning at Indianapolis demonstrates beyond a doubt that we have

Rocks That Fit the Standard

800 head of ringy, snappy, bright, narrow barred birds with the correct long back type now in demand. Show birds my specialty and breeders to breed them. 200 hens go at \$2.50 each to make room for young birds.

Write me your wants. I have plenty of stock and can and will please you.

Send one dime for my new catalogue. One of the best out this season. Full of valuable information.

C. E. SPAUGH, BOX T, RUGBY, IND.

Spaugh's Result II. First prize cockerel Springfield and Ind. State Fairs, '09

Silver Wyandotte won two years in succession, when the fever was the highest, and the contest the greatest. Third, because of only a few genuine Whitaker birds in existence, the world wild to obtain them, the public imposed upon by a cross of the Dark Brahma and Silver Spangle Hamburg, which produced a bird that resembled the Silver Wyandotte but worthless, advertised as Silver Wyandottes and sold as such, the boom created by the meritorious birds subsided. The public imposed upon wanted no more of them. The few breeders of the genuine, however, knew what they had and continued to produce them until birds of the genuine quality were sufficient in number to partially dispense them, and wherever tested proved popular, and today the Silver Wyandotte is asserting itself as the bird of highest quality. Why? Because the old blood in them will manifest itself whenever permitted. But as said, how unfortunate it is that such wonderful birds, able to produce the record they have made, are being injured by cross breeding and mixing strains to produce an imaginary bird, when the pure bred bird will produce ten times as many of the true type, with the grand old utility qualities. The old, original Silver Lace Wyandotte is a freak bird. Mr. Whitaker bred them as he found them. The blood in them is not known. It has thus far proven to be impossible to reproduce them. Hence, the folly to attempt to improve them by introducing new blood. They are thorough bred in themselves. Keep them so. Any strain of Silvers that contains any outside blood is far inferior to the old, original Silver. Test and see.

GRATITUDE.

It is so very seldom that people express their appreciation of small gifts, especially those given by magazines to which they subscribe, that it delights us to receive one once in a while.

It has been a custom of long standing for farm papers and other periodicals to offer cheap premiums with each subscription, which after a few weeks was thrown away by the subscriber. We have always aimed to get our subscriptions on the merits of our publication, and when we did offer premiums they were good ones.

You have probably noticed, in this issue, our offer of fifty Christmas Post Cards free with each subscription. This same offer was made last month, and many subscribers took advantage of it to renew their subscription or send a subscription to one of their friends, and one of these subscribers did express his gratitude for these beautiful cards in the following words:

El Paso, Ill., Nov. 12, 1909.

American Poultry Journal.

Dear Sirs: Your cards received, and wish to say that we are very well pleased with these cards. They are better than any I ever saw for a premium gift—far better than we expected. Many thanks for them and prompt reply.

Yours very respectfully,

E. R. Boller.

P. S.—The Journal is O. K., too; don't like to be without it.

We are positive that the others who received these cards feel about the same way, but, as above stated, it is so seldom that people express their gratitude without being asked to do so, that we cannot help to make comment on this one.

Our slogan is: "We lead, others follow."

BROTHER BILL'S ADVERTISING SCHEME.

By Louis A. Stahmer.

Every time the Chicago Show comes round it reminds me of a little incident that happened many years ago when the National Fanciers' Association gave their first exhibition.

The boys whom this article speaks of are still alive and as much chicken cranks now as they were then:

"The Promoters of the Advertising Scheme."

"Advertising brings results, if it is rightly done,"

Said an honest German to his group of sons. (Everyone a chicken crank; years ago they bred Leghorns, Rocks and Black Langshans, the best that could be had.)

"Take your chickens to the show, exhibit what you've got.

But don't forget to advertise, if you would sell the lot.

You need ten thousand cards, my sons, to advertise the stock—

They cost a lot of money, which just now we haven't got."

We'll paint the coop the brightest blue there is on Mother Earth—
It's a part of advertising and results will show its worth."

Though entry money's lacking still, the rest is all O. K.

"Let's sell our dogs," said Brother Bill, "and we will have our way."
The show came 'round. We're laughing yet, when memories drift back:
How 'neath the coop did Brother Bill fix cards up by the stack.

The cards went fast, and soon the kid was sweating by the pail.

"Why don't you fellows work a bit and make at least one sale?"

At last a victim down the aisle had spied the coop so blue,

He stopped and read the signs a while, but the card away he threw.

So quickly Anton grabbed it and returned it to the gent—

"You've thrown away the address, sir; how would for eggs you send?

We've carried off the prizes and our stock's the best, you see—

You better leave your order now and buy some eggs of me."

The only problem, then, is one of insuring perfect health.

To do this, the chicks and hens must be provided with those elements of a tonic nature which they were wont to find for themselves in their original wild state, and which they still, in a measure, secure with ample range.

Wilbur's Poultry Tonic has been the favorite for twenty-five years with poultry keepers, because it has proven in practice the claims of its manufacturers—that it is a scientific tonic, providing just what the fowls need without overstimulating or "forcing" growth or abnormal egg-production, to the injury of the fowls.

The Wilbur company makes a most liberal offer of a free package and a valuable "Kon-Takt" incubator, both without cost,

"Orders coming in."

in order to prove the value of their tonic, direct to every poultry keeper. Their introductory premium offer is remarkable and of such a character as to enlarge the opportunity of the poultry keeper, they depending for their final profit on the continued use of their tonic. The poultryman who has once given the Wilbur tonic a fair try-out makes it a daily ration for his flocks in every stage of growth.

For the most liberal introductory offer you have ever had, write today for particulars to Wilbur Stock Food Company, 749 Huron St., Milwaukee, Wis.

TRUCKENBROD BROS., BREEDERS OF BLUE BARRED PLYMOUTH ROCKS, MENDOTA, ILL.

One of our new advertisers appearing in this issue is Truckenbrod Bros., who are famous as breeders of prize winning Barred Rocks. They issue a large circular, profusely illustrated with cuts of their prize winning birds. Many of these prizes have

The "follow-up system."

"Inquiries Coming In."

"I have a plan," said brother Bill; "let's try it; it's a cinch.

A rubber stamp for thirty cents will help relieve the pinch.

The printer sells us pasteboard, a dime will buy a bale;

I'll do the printing 'neath the coop, and offer stock for sale.

"I'll hang a box on every stall and fill them full of cards

Inviting everyone and all to take one. That's my part.

Anton will do the talking and be showing off the points

While the rest of us are steering all the buyers to our joint.

"An order book well filled with names we'll hang upon a nail,

Get Cousin Charlie in the game so orders cannot fail.

He took the book and wrote his name. His eyes they opened wide

In wonder when he saw those names, when he would be supplied.

He handed out a dollar cash, the five cried out like one:

"Advertising brings results if it is rightly done."

A VALUABLE INCUBATOR AND PACKAGE OF POULTRY TONIC GIVEN AWAY.

Profits from the poultry yard are dependent simply upon the health and growth of chicks from the day they are hatched to maturity.

Perfectly healthy chicks will grow speedily into broilers and roasters. Perfectly healthy pullets will lay early and often.

been won at Chicago and other good shows where it takes quality to win.

Their "Teddy" line of males is very fine and at the time of our visit we saw a flock of about 500 head, containing many very fine specimens that would do credit to any show room. They can supply you show birds or fine breeding stock in any number. Look up their ad for prices, or write direct and get their circular. Address Truckenbrod Bros., Mendota, Ill.

H. Burkholder, Clyde, Ohio, who breeds Barred Rocks, sends us some feathers from some of his exhibition cockerels. For narrow, straight, even barring they certainly are hard to beat. Mr. Burkholder won the cream of the prizes on Barred Rocks at Columbus, Ohio, this fall. He reports having a large number of birds having quality like feathers sent us, that are in condition to show. If you want Rocks, either show or utility birds, write him.

Have you seen the ad of the Ridge View Farm, Willoughby, Ohio, of their "Practical Reds"?

QUESTIONS AND ANSWERS

Questions will be answered in this department only when full name and address is signed by the writer.

Question.—(1) What is the standard weight of White Wyandottes? (2) Should their combs, the spike of it, run straight up or should it follow the head back? (3) Will you please have an article written on the shape, type, mating and breeding of White Wyandottes? (4) What is a squirrel tail? (5) Is heads off of clover good; if so, how much and often should it be fed to 12 White Wyandottes? (6) Are pork cracklings as good as green bone; if so, how much should I feed and how often? (7) Please give method for shipping baby chicks. (8) How can you tell when a fowl has the roup?

Tennessee, Ill. Mrs. C. R. M.

Answer.—(1) cock, 8½ lbs.; hen, 6½ lbs.; cockerel, 7½ lbs.; pullet, 5½ lbs.

through your valuable paper why 8 out of every 10 of my young Barred Rocks are crooked one hip up and the other down, some with crooked tails and others so weak in the hock joints that they fall over? I raised them from 6 fine, large, healthy hens and a fine cockerel. They showed no signs of being crooked as chicks, but just as soon as they feathered out I noticed it. They were fed on chick food when young and later on cracked corn and scraps from table. Would it come from feeding, or roosting too young, or could the hens have been too old?

Wood Ridge, N. J.

G. P. Y.

Answer.—This is due to various causes, such as overcrowding in the brooder, roosting too young and from being stunt-

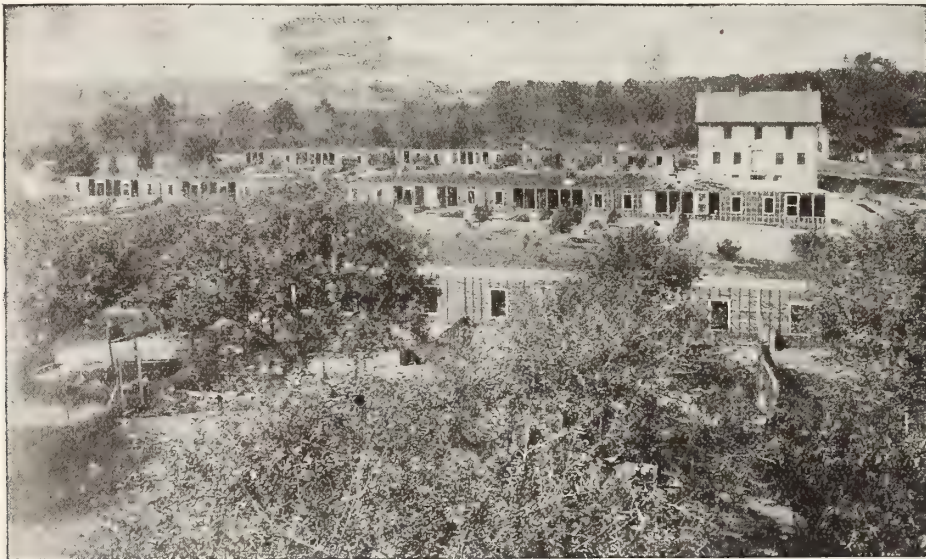

pers I write to ask if you can help me out of my present trouble. I have been keeping chickens for a number of years, but have never had any serious trouble until lately. The chickens would go into their house at night apparently well, but in the morning I would find a couple on the floor almost dead. I have cured a few, but a good many have died. I keep the house clean, they have clean water and plenty of room. Any suggestion that you can make will be greatly appreciated.

New York.

O. A. J.

Answer.—Not knowing how you feed and care for your fowls we are unable to help you.

Question.—(1) What is the matter with my turkeys? I raise very fine M. B. turkeys, but there will be a few that will shed their wing feathers, then they will fail to all grow back in. Sometimes three or four feathers in each wing will fail to grow back in. Hinders me from showing some of my finest young birds. When the young are about eight weeks old they begin to grow large feathers in their

BIRD'S-EYE VIEW SHOWING BUILDING USED FOR COOKING AND STORAGE OF GRAIN. CHAS. F. THOMPSON & CO., LYNNFIELD CENTRE, MASS.

(2) It should conform to the shape of the head. (3) See our new book, "Origin and History of All Breeds of Poultry." Price, \$1. (4) A squirrel-tail is one that is carried too high over the back. (5) Cut clover or clover meal is a good winter food for fowls. A pint to 12 hens three or four times a week is plenty. (6) Pork cracklings are not as good as green cut bone; but can be fed with good results when bone cannot be obtained. About two ounces to each fowl three times a week. (7) There are boxes made for this purpose. See ads in this issue of poultry supply houses. (8) By the discharge from the nostrils and the offensive odor.

Question.—(1) Can hens or pullets be made sterile or unsexed by operation or otherwise. (2) What work treats of the anatomy and physical structure of poultry, especially with reference to the oviducts, creative, of hens.

Zimapan, Hgo.

Answer.—(1) No. (2) There is no such book that we know of.

Question.—Will you kindly tell me

ed in their growth, but we are unable to say which one in your case. They will not be fit for breeding purposes.

Question.—I have 24 healthy R. I. Reds, have a yard 22x31, a scratching shed 5x26, and they have a warm roosting place. I feed 1½ qts. oats every morning, and 1½ to 2 qts. wheat and cracked corn each alternating night. They get the table scraps, have fresh water, oyster shell and grit always before them. Can you tell me why they do not lay?

Salt Lake City, Utah.

F. A.

Answer.—Probably due to moulting. They will no doubt begin to lay as soon as they recover from the strain of putting on a new dress.

Question.—How can one distinguish the laying hens and choose the pullets that will make the best winter layers?

Hamilton Sq., N. J.

A. W. P.

Answer.—Procure the Potter System as discovered by T. F. Potter, Downers Grove, Ill. See their ad elsewhere in this issue.

Question.—Being a reader of your pa-

wings, which takes strength from the poults. We pull them out. Is that the cause? Would it be better to cut them off? (2) I notice the droppings from one once in a while will be just covered with small white worms, ¼ to ½ inch long, very slim, and very active. What is the cause and remedy?

Rose Hill, Ill.

T. H. L.

Answer.—(1) These feathers are not pulled out at the proper time. Better results would probably be obtained by clipping. (2) Intestinal worms in fowls is a very common complaint and is usually caused by the fowls eating too much animal food. Spirits of turpentine on a lump of sugar will usually have the desired effect.

Question.—I have hatched and raised about 40 R. I. Reds this season, and out of this number there are about ten that have developed humps on their backs. This deformity has only shown after they were four and five months old. Some are from my own eggs and some from those I bought away. They are very healthy and I believe I feed them correctly; they have a good range, plenty of grit and

have had beef scraps and alfalfa meal in their mash two or three times a week. I have never experienced anything like this before; sometimes one or two show this when very young, but never after they have arrived at this age. Is there any chance for them to outgrow this, as one or two I would very much like to keep for stock?
H. T. H.

Memphis, Tenn.

Answer.—There is no chance of them outgrowing this deformity at the age you mention. Better dispose of all those that show any signs of deformity.

Question.—(1) Would a judge deduct any points for a White Cochon pullet weighing 5½ lbs. and if so, how many points would he deduct? (2) How many points should a White Cochon have on its comb?

Answer.—(1) Yes, three points. (2)—Five serrations.

Question.—Are young squabs raised any other ways than the old birds feeding them their natural ways?
L. J. S.

Grayling, Mich.

Answer.—Not that we know of.

Question.—Is a good plan to feed the following: Pour enough hot water over a peck of wheat to cover about an inch and mix in two cakes of yeast dissolved in a cup of hot water. Cover and let stand about 24 hours, when the quantity will be about one bushel.

Cleveland, O.

H. C. K.

Answer.—Better results will be obtained by feeding the wheat dry.

Question.—(1) Do you approve of keeping poultry the Philo way? (2) Do you think a coop 3 ft. by 6 ft., with good light and ventilation, is large enough to keep 6 chickens in year around? (3) Is 6x12 ft. yard large enough for a breeding pen? (4) Will leaves answer for litter?
Detroit, Mich.

D. H. V.

Answer.—(1) We never tried the Philo system, but others have used it successfully. (2) No; it should be twice this size. (3) Yes. (4) We do not approve of the use of leaves for litter, as they soon become broken up into small particles of dust, which is not good for the fowls to be breathing all the time.

Question.—What kind of chickens do the best kept in a small place and how many may be kept in a place 90 feet long and 50 feet wide?
La Hague, Ill.

R. F. C.

Answer.—Almost any of the Standard varieties do well in confined quarters if given proper care. Forty to 50 fowls can be kept in the space you mention.

Question.—I have a thoroughbred White Wyandotte rooster whose comb does not seem too grow. When he was only a year old his comb was the right size for the head and now it is very small and sets way upon the head. Is there anything I could do to make his comb grow larger and fit close to his head?
A. J. S.

Pittsburg, Pa.

Answer.—Frequent application of vaseline would develop the comb, but would not make it the right shape.

Question.—(1) Can you tell me in your December Journal if it would hurt R. I. Red cockerels to run with R. I.

Red pullets and common chickens? (2) What is the matter with a hen that died? I cut her open; her liver was a light red and was spotted dark red and there was a bag over it. I cut it open and in the bag it looked like the yolk of an egg after it is fried hard, and a cockerel was the same. (3) My coop is about 28 ft. by 8 ft., roost and all. How many chickens can I keep in it with good care? (4) Is chops and bran good for morning and wheat at noon and cracked corn and oats at night? (5) How much chops and bran and wheat and corn and oats for 24 chickens to a meal.
W. P.

Beaver Falls, Pa.

Answer.—(1) No. (2) Congestion of the liver, due to improper feeding, or

to the feeding of musty grain. The symptoms of this disease are so obscure that it is not discovered until too late for treatment. Good food, plenty of exercise and fresh water will prevent it. (3) 35 to 40 fowls. (4) Yes. (5) Just what they will eat up clean in about five minutes.

Editor American Poultry Journal.

Dear Sir—While reading the October American Poultry Journal I noticed the question of Mrs. J. C. Clovis. In answer I would like to say that I have had trouble similar to hers. I think that the trouble is indigestion caused by high feeding and lack of grit. Plenty of grit will remedy the evil sometimes.

Saco, Me.

H. W. Sanborn.

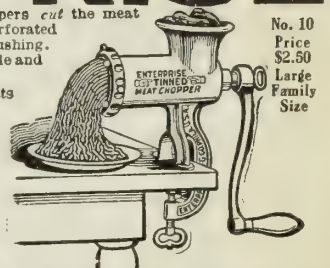

ENTERPRISE

Meat and Food Chopper

"Enterprise" Meat and Food Choppers cut the meat with a revolving steel knife against a perforated steel cutting plate without tearing or crushing. Easily cleaned. Practically unbreakable and will last for years.

The No. 5 "Enterprise" Chopper costs only \$1.75; No. 10, shown in cut, \$2.50. They are standard family size, and not only save half the work at butchering time, but are useful in the kitchen every day in the year.

Made in 45 sizes and styles for Hand, Steam and Electric Power. We also make cheaper Food Choppers, but recommend the above for the reasons given. Illustrated catalog free. Sold at Hardware and General Stores, etc.

No. 10
Price
\$2.50

South Euclid, Ohio

ASSOCIATIONS AND SHOWS

Secretaries are requested to send in news items of interest about their show for this department.

THE BOSTON SHOW LIKELY TO BEAT ALL RECORDS.

The great Boston show of last year was considered the greatest ever, but look out for the next one, January 11 to 15. From present indications the five acres of floor space of the big Mechanics' building will hardly accommodate the entries. From the West, the South and from Canada come letters from fanciers who say they will surely be at the big Boston show.

The National Columbian Wyandotte Club will meet here and \$50 goes up on pens alone, \$10 each for first to fifth pens. The National Bantam Association will come to Boston for their annual exhibition and there is \$160, besides silver cups and medals offered on the little birds. The Partridge Wyandotte Club will hold their annual gathering and besides silver cups there is \$50 in cash specials. The Silver Penciled Wyandotte Club will come for their annual gathering and offer cash and handsome cups. The American White Wyandotte Club chose the Hub for their annual meeting and over \$75 is up in specials. The Hamburg Club comes with over \$50, and the American Dorking Club with about \$100 and several cups. The Golden Wyandotte Club, the Rose Comb Rhode Island Red Club and the N. E. Light Brahma Club will all hold their annual meetings here. A big feature will be the meetings of the American Polish Club and the new Crested Breed Club, and there are specials galore for these birds. There is nearly \$100 up on Rhode Island Reds. The National White Leghorn Club offers a beautiful silver cup and other specials, and the Orpington cups are up for competition here. Plymouth Rocks are always well provided for and the Waterfowl Club have donated specials this year.

Turkeys made a big showing last year has already been made of the Agricultural College exhibits, but this feature promises to be much larger than at first supposed, and are coming strong this year. Mention

and in addition to the plans, charts, etc., there will be fowls from the colleges and each college will send a team of students who will give demonstrations of score card judging, the winning team to be awarded a silver cup. The pigeon, pet stock, cat and cage bird departments promise great things.

On Friday the Massachusetts State Poultry Association will hold three sessions, at which interesting subjects will be discussed.

The judges engaged are Hon. C. M. Bryant, for Rhode Island Reds; Horace Havermyer, White Wyandottes; W. H. Congdon, Games and Game Bantams; C. A. Ballou, all Wyandottes except white and buff; H. R. Ingalls, Buff Wyandottes; W. H. Card, Pit Games; J. H. Drevenstedt, all crested breeds; Richard Oke, Langshans, Orpingtons, Dorkings and Spanish; F. W. Rogers, dark Brahmas and all Leghorns except white; J. C. Punderford, White Leghorns; C. M. Smith, Cochins; W. C. Denny, Light Brahmas and Columbian Wyandottes; H. P. Schwab, White and Buff Plymouth Rocks; C. H. Welles, Barred Plymouth Rocks; Julius Frank, Hamburgs; A. O. Schilling, Ornamental Bantams, and J. M. Cutting, waterfowl and turkeys. Pigeons will be handled by Dr. F. H. Howland, Richard Whitney, A. M. Ingram, Joseph Gavin, T. J. McIntyre, A. J. Edwards, George Feather, F. F. Nagel and W. A. Hersey. Robert Whitaker will take the pet stock. Entries close December 25, with W. B. Atherton, secretary, 30 Broad street, Boston, Mass.

CLEVELAND, OHIO.

The Cleveland Fanciers' Club Co. will hold its annual show January 24 to 29, 1910, inclusive. It will be held at the Central Armory, which is the largest hall in the city of Cleveland and one of the largest for this particular purpose in the country.

The Cleveland show pays its premiums and pays them promptly, and any one

exhibiting here can be absolutely certain of getting anything that he wins.

The club is composed for the most part of young business men, many of whom do not own stock of their own, but are simply interested in the show from the sportsmanship standpoint. This gives the show a backing that insures success.

The judges for poultry this year will be Theodore Hewes, Charles McClave, M. S. Gardner, Richard Oke, Thomas Faulkner. The pigeon judge will be L. A. Jansen.

The superintendent of the show is Eugene Sites, and J. T. Conkey, 2337 East Forty-seventh street, Cleveland, is secretary. Entries will close January 10.

ELMIRA, N. Y.

The tenth exhibition of the Elmira Poultry Association, Inc., will be held Jan. 11-14 in the auditorium of the new Philo National Poultry Institute, Elmira, N. Y.

The Elmira Association was one of the pioneers to incorporate and affiliate with the American Poultry Association, and the rules of the latter will greatly enhance the value of the prizes won and insuring fair treatment to all exhibitors.

Through the courtesy of Mr. Philo the Association is most fortunate in securing the Philo hall for its exhibition, located as it is in the immense new concrete building just erected in the interests of the Philo System; it will afford visiting poultrymen an unusual opportunity to visit what promises to be the largest quality show of the winter outside of New York City, and at the same time inspect and study at first hand the methods that have brought the Philo System into national prominence throughout the poultry world.

Guides and demonstrators will be on hand throughout the show to explain the workings of the system in detail and glad at all times to extend every courtesy to visiting poultrymen.

The show will be held in the main auditorium with a floor space of sixty feet by one hundred and twenty, and the lighting arrangements are such as to show all exhibits to the best possible advantage.

Our president, Mr. C. E. Howell, will be on hand to welcome the host of friends he has made among the poultrymen during the many years he has been identified with the industry.

The association points with pride to its record of the many years during which it has established a record for

THE PEERLESS "RINGLETS"

True to Their Tradition, Are Again Great Winners at New York

At the Imperial Madison Square Garden Show, 1909

E. B. Thompson's Barred Plymouth Rocks

win First, Third and Special Prizes on Exhibition Pens; special prize Cock; special prize Cockerel; numerous specials on hens and pullets, and the Harding \$50 Challenge Silver Cup offered for best exhibition pen. The race at this 1909 New York Show was a Marathon for speed and quality, and my First Prize Silver Cup Exhibition Pen was declared by expert opinion to be the finest ever exhibited—a paragon of perfection—and created a sensation as the finished achievement in modern Barred Rock breeding.

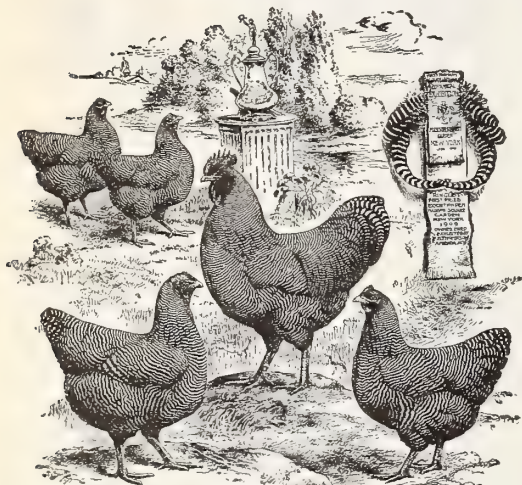

The "Ringlets" are always imitated—but never equalled. They are first in record, first in quality and first in popularity

Their record at New York for 22 years is GOLD LINED

—it is a calendar of successive victories demonstrating step by step their irresistible advance towards the world's absolute leadership

The Enormous Prestige of the "Ringlets" Created by Superlative Quality Has Made Them the Standard by Which All Other Barred Rocks are Judged

I now have on my farm the largest and finest lot of superior exhibition and breeding birds I ever owned; they show the "Ringlet" barring and the sharp contrasting colors that win under all judges.

"Ringlet" First Prize Exhibition Pen and Winners of Sweepstakes Silver Cup at Madison Square Garden, New York, 1909.

Richly illustrated 58-page catalogue mailed upon request; it is full of original pictures of New York winners from life. 1000 grand breeding and exhibition cockerels for sale. Elegant hens and pullets in any number. Show birds fit to win in any competition. You may have the product of my skill, reaped by 30 years' experience, at reasonable prices. Your wants will have my very best and personal attention.

SEE MY AD ON
BACK COVER PAGE

Address E. B. THOMPSON, Lock Box 510, AMENIA, NEW YORK

honorable dealing with all exhibitors and has always paid every dollar of premium money promptly at the close of the show. The association owns its own coops. The premium list is now being compiled. Do not fail to send in your name to the secretary, Mr. Harry H. Hays, and secure a copy. Just a postal, you know, but why not do it now? If you forget you might be sorry; and by all means bear in mind the dates and plan to be with us during what will be an epoch making show, the big quality show of 1910.

Remember visitors are planning to be here during this week from all parts of the United States to inspect the Philo Poultry Farm and also visit the show. This will afford an unusual opportunity for exhibitors to make sales of stock and eggs. If you cannot come send on your exhibits by all means. Your birds will receive every care, and the association will undertake the sale of any specimens if the price is stated on the entry blank when making entries.

George M. Diven, Supt.,
Elmira Poultry Association.

BELLE PLAINE, IOWA.

The Progressive Poultry Breeders' and Fanciers' Association, of Belle Plaine, Iowa, will hold their second annual poultry show at that place on December 13-18, 1909.

The first show, held on February 2-6 of this same year, was a decided success in every way. In spite of the difficulties that a new organization always has in promoting anything of that sort, and in spite of the inclemency of the weather, which at that time was very stormy and cold; also the lateness of the show season, being on the verge of the mating season, when the breeders should have the birds mated for the season's new stock. In spite of all these difficulties there were over 250 birds entered, including twenty pens. The prizes offered at this show amounted to about \$300, and all prizes were paid in full. The exhibitors who showed with us at the last show were all well pleased, both with the work of the judge, W. C. Ellison, who was with us at that time, and with the way their birds were taken care of and handled, as their testimonials, which will be found in our premium list for this year, will show. The show, as in every other respect, was a financial success and left us on a good footing for our second show.

We have every reason to expect that our show this winter will be one of the best in the state and will compare favorably with the larger shows. We expect to have, at the very least, double or triple the number of birds that we had last year, and are prepared to take the best possible care of them in every way, and all birds will be given the attention and treatment that they would if they were our own stock. The show room will be kept clean and disinfected at all times; the light will be good, and the heating will be kept uniform, and all that will be necessary to keep the birds in a good healthy condition. The birds will all be handled under the supervision of the superintendent from the time they arrive at the express office at this place until they are returned to them. They will be fed and watered regularly, and will be given all that they will need to keep them in the best possible condition. The

coops will always be kept clean and fresh, and new bedding will be provided whenever it is needed.

When we tell you that we will have Judge G. D. Holden with us this year to judge the show, that is all that is necessary to convince you that there will be favoritism shown to no one, and that the birds will all be judged upon their own merits and that they will get all that is coming to them, and no more. A score card from Judge Holden is a card that will be recognized in any part of the country, and a bird with a good score over the signature of this judge is one that will command a good price from a true fancier.

We are offering this year a list of cash, cup and merchandise specials that will equal that of any of the smaller shows of the state, is better than most of them, and is equal to some of the large shows. We will give in cash and special prizes this year, no less than \$600, including twenty silver cups.

We will be pleased to send to any one wishing them one of our premium lists if you will send your request to the secretary-treasurer, E. M. Ewen, at Belle Plaine, Iowa.

YOUNGSTOWN, OHIO.

The Mahoning Poultry Association's fifth annual show will be held at Youngstown, Ohio, January 10-15 inc., 1910. The show will be cooped with Empire Cooping, and as the auditorium has sufficient floor space to coop 3,000 birds singly, there will be no double-decking.

The Ohio branch of the American Poultry Association, the Ohio State branch of the Rhode Island Red Club of America, and the Ohio branch of the National White Wyandotte Club will hold their annual meeting at this show.

There is offered 500 over and above the regular premiums in cash and cups, which as in previous years will be paid in full.

The awards will be placed by Judges McClave, Tompkins and Wolsiefer. Of Judge McClave nothing need be said as he is known to all. Lester Tompkins, the most noted judge of Rhode Island Reds, will handle this class. In testimony of his popularity we have an entry from the Pacific Coast. J. H. Wolsiefer is one of the most popular American Class judges in the East, which everybody knows.

These premiums and judges assures all the best and biggest show between New York and Chicago.

Premium lists and entry blanks can be obtained by addressing the secretary,

R. L. Davies,
Box No. 243.

ALL ABOARD FOR PANA.

The catalogue of the Third Annual Show of the Pana Poultry Association is now issued, and is chock full of inducements for the exhibitor from beginning to end. The entire membership of the association has been boosting the big Pana Show for many weeks past, and their boosting has made things go. To say that the Pana Show this year will be a hummer is putting it mildly. It now looks like the Schleibach Hall, large and commodious as it is, will be taxed to the limit to hold the birds.

Among the many attractions that are offered at the big Pana Show are the following: Twelve beautiful gold lined

GERMOZONE

Is the Best Roup Cure I Have Ever Tried

Among the many who say that are a lot who never thought Germozone would do it. Geo. H. Lee knew what Germozone would do before he placed it on the market. It is so good that users are not tempted to accept a substitute. No one ever found anything so good. The reason is plain—Germozone has no equal.

500 HENS SAVED

A Missouri poultryman writes that 8 bottles of Germozone saved his entire flock of 500 hens from Roup. Less than one cent per hen. A Pennsylvanian writes that Germozone would be cheap at \$5.00 a box—and it will do for you what it has done for others. This advertisement is addressed to you. We want your poultry to make more money for you. We want you to recognize the importance of healthy poultry. The health of the chick or the hen is as important to it as your own health is to you. Ever stop to think about it? Perfect health is necessary for positive profit. Try Germozone and test every statement made here. No need to buy a substitute. If your dealer cannot supply you we will mail it to you, postpaid, on receipt of price—50 cts.—and will include free a copy of "Chicken Talk," written by Mr. Lee himself.

GEO. H. LEE CO.,

1101 Harney Street, Omaha, Neb.

General Agents in all principal cities. Write for name of our nearest you.

Germozone is a tonic; a bowel regulator. Not an infallible cure for every disease of poultry, but admittedly the best preventive and cure for all poultry diseases.

Our International Champion. First Madison Square Garden, Guelph, Toronto, Hamilton, Ottawa. Weight 11 1/4 pounds

WILLARD'S BUFF ORPINGTONS

Win again at the great Mich. State Fair, Detroit, Sept., 1909. We won every 1st, 2d, 3d prize in singles on cocks, hens, cks. and pullets; also 1st 2d pens. Every prize offered except 3d pen, for which we made no entry. Our champion male shown in cut illustrates the type and quality we breed. He is sire or grandsire of most of our stock.

500 Grand Young Birds, Culled Out of 1,000

We offer 250 cockerels and 150 pullets at reasonable prices, bred from our New York, Boston, Toronto, Detroit State Fair, etc., winners, for quick sales. These birds are bred in the purple, have great size, correct type, light exhibition color and strong head points. Write us fully your wants in either show birds or breeders. A few good yearling cocks and breeders left. Get our prices. Satisfaction guaranteed or money back. Approval shipments.

John O. Willard : Linden, Michigan
Vice-President Nat'l Single Comb Buff Orpington Club for Michigan

silver prize cups, including the \$65 Pad-dock cup for the best bird in the show and the \$25 association cup for the best ten birds in the show. A long list of 200 special prizes, cash specials and more liberal regular cash prizes than ever before offered. Besides all these prize cups and regular and special prizes, the Pana Poultry Association has secured the co-operation of 22 specialty clubs with an offer of 125 of their handsome silk badges and medals for competition of the members of the various specialty clubs.

There is not a more inviting field for the breeder with good birds to sell anywhere than will be found in the vicinity of Pana. Many persons are about to take up the fancy and there will be some good money spent for good birds at the Pana Show. The Pana Poultry Association is not a local affair, but represents eleven cities and towns as follows: Tower Hill, Pana, Millersville, Owaneco, Taylorville, Rosemond, Nokomis, Herrick, Oconee, Assumption and Moweaqua. The big Pana Show is being thoroughly advertised not only in these towns represented in the membership of the association, but also throughout the entire country and a winning at Pana will mean a greater business for the winner. You can't afford to miss the Pana Show. Don't forget the date—Dec. 14-18, 1909.

For further information, complete list of premiums and entry blank and catalogue, address the secretary, J. A. Bickerdike, Millersville, Ill.

GREAT INTERNATIONAL SHOW.

The management of the Great International Show to be held in Buffalo Jan. 25-29, 1910, is placing large cash specials on each variety of poultry, pigeons and pet stock in addition to the liberal guaranteed cash premiums and the regular and special ribbons.

The numerous inquiries for premium lists so early bespeaks a great entry. Eight more specialty clubs have decided on Buffalo for their conventions to be held in conjunction with the show. The convention and banquet chambers, being in the same building where the show is to be held, makes it a desirable place for such conventions.

These clubs, together with the members of the New York State Branch of the American Poultry Association, the editors, representatives of poultry journals, the judges, superintendents, fanciers and officers of the show, will all be entertained by the members of the Buffalo Poultry and Pigeon Club, one of the up-to-date and strongest poultry organizations in New York state.

Watch how they do it.

The poultry department of the New York State College of Agriculture at Ithaca, working in conjunction with the poultry department of the Ontario Agriculture College at Guelph, is putting on an educational feature at the International Show never before equalled.

Able speakers are being secured from both sides, and a "Jubilee Week" for the fanciers is assured.

Twenty or more poultry, pigeon and pet stock journals all in "Journal Row" in nicely decorated tents at this show. Birds of a feather go together throughout the show.

The exhibit of dressed poultry and poultry products will take considerable space and will be made especially attractive.

With greatly reduced rates on all lines during show week, a grand attendance from a distance is expected.

A card addressed "International Show," No. 309 Brisbane Building, Buffalo, N. Y., will bring you a premium list Dec. 10, 1909.

Entries positively close Jan. 10, 1910.

DES MOINES, IOWA.

The eighteenth annual poultry show under the auspices of the Iowa State Poultry Association will be held this year in Des Moines, Iowa, Dec. 28 to Jan. 1. The show will be the second event in the grand new \$130,000 Coliseum that is now in the course of construction in Des Moines. Present indications are that this will be the greatest show ever held in the middle West. An aggressive advertising campaign has been instituted by the officers with every prospect that the Iowa state will increase their membership this year to the largest membership of any state association. If you are in-

terested in becoming a member you should send your dues to the secretary at once. Membership dues, \$1, which entitles you to a full membership for one year. An institute program for at least two evenings during the show will be one of the leading events. Prof. H. C. Pierce, of the poultry department of the Iowa State College at Ames, Iowa, will have complete charge of the program, which alone insures an entertaining and instructive one. The booster organizations and business men of Des Moines have lent their every aid and assistance to the officers of the association and hundreds of dollars' worth of useful merchandise premiums have been donated. From 25 to 50 handsome silver cups will also be offered. It is the aim to make our cup display the most valuable offered by any association in the middle West. Judges Ellison, Russell and McCord. If you want to send your birds to a show where good premiums will be offered, where every bird will receive its just worth at the hands of the judges, where thousands of people will be in attendance, you cannot afford to miss the Iowa State Show this year. Premium list is now ready and may be had by addressing the secretary, G. S. Phillips, Box 932, Des Moines, Iowa.

KANSAS CITY POULTRY SHOW.

The Quality and Sales Show of America—To Be Held in Convention Hall Jan. 11 to 15, 1910—Free Uniform Cooping—Comparison Judging.

In Convention Hall on Jan. 11 to 15 inclusive the Kansas City Fanciers' Association will hold their ninth annual exhibition. The successful shows handled by this association the past three years, the high quality and condition of the birds shown, and the enormous prices at which some of the birds have sold during these shows gives the Kansas City Association a perfect right to call it the "Quality and Sales Show of America." P. H. DePree, the secretary, of 932 Jackson avenue, Kansas City, Mo., has proven his ability to properly handle a large exhibit. Last season every fowl was judged and all awards placed by Monday, the first day on which the doors

Rose Comb Rhode Island Reds

We only have the one kind. Our stock is as good as the best. Winnings at Tennessee State Fair, September, 1909: first hen, second pullet, second cock, fifth cockerel and second pen. At Tri-State Fair at Memphis, first and third cock, first and second hen, second cockerel and second pen. Eggs in season. \$1.00 to \$5.00 per 15. :: :: :: ::

Why Poultry Pays
and
How to Make It Pay.

PUBLISHED BY
AMERICAN POULTRY JOURNAL,
328 Dearborn Street,
CHICAGO, ILL.

WHY POULTRY PAYS AND HOW TO MAKE IT PAY

A book for the beginner in poultry raising and for those engaged in it who are interested in securing from the business the greatest profit obtainable. This book tells you how to start right, how to succeed with poultry, how to line breed, how to win at the shows, how to breed and prepare fowls for market, how to feed for the production of eggs. Also contains a chapter on Poultry Diseases and simple remedies for same. Gives instructions on incubators and brooders and much other valuable information, and is profusely illustrated with ideal drawings of Standard fowls.

We are selling this book at the popular price of **50 cents**. This book and one year's subscription to American Poultry Journal for only **75 cents**. Send all orders to

AMERICAN POULTRY JOURNAL PUB. CO.
358 DEARBORN STREET - - CHICAGO, ILLINOIS

were opened to the public. Judges Theo. Hewes and W. C. Pierce, of Indiana; A. F. Kummer, of Pennsylvania; E. C. Branch, of Missouri, and Russell F. Palmer, of Nebraska, have been engaged to judge the poultry. Judge K. J. Miur, of Chicago, has also been engaged to judge pigeons. Last year attendance was over 30,000 and the Kansas City Association is striving hard to surpass that record this year. Their new catalogue of premiums will soon be off the press and ready for mailing. It is free. All that is necessary is to let the secretary know that you desire one.

COLUMBUS, OHIO.

The first annual show of the Ohio State Poultry Association Company (Incorporated) will be held in Columbus, Ohio, Jan. 10 to 15, 1910, both inclusive, and all indications are for the best poultry show Columbus has ever had from both the fancier's standpoint and that of the interested laymen.

The personnel of the directory, including as it does prominent business men, with Mr. Charles S. Plumb, professor of animal husbandry of the Ohio State University as president, is a sufficient guarantee that every promise will be faithfully kept.

During this same week the State Farmers' Institute, State Horticultural Society, the Ohio Forestry Association, the Plant Breeders' Association, Ohio Nurserymen's Association and the Ohio Fair Managers' Association will also be in session here, which will afford a most excellent opportunity to meet old friends and make new ones.

Commodious quarters have been arranged for and liberal premiums of cups and money provided. Premium lists now ready for distribution. W. E. Hague, secretary, 1369 Oak street, Columbus, Ohio.

AMERICAN POULTRY ASSOCIATION—MID-WEST BRANCH ELECTION.

The next annual meeting of the above association will be held at Chicago, Ill., December 9, 1909.

At an election held, the following officers were elected:

President, Theodore Hewes, Indianapolis, Ind.; first vice-president, C. R. Fishel, Hope, Ind.; second vice-president, Thomas F. Rigg, Iowa Falls, Iowa; third vice-president, Frank W. Travis, Jackson, Mich.; fourth vice-president, E. G. Roberts, Fort Atkinson, Wis.; fifth vice-president, O. L. McCord, Danville, Ill.; secretary and treasurer, Fred L. Kimmey, Morgan Park, Ill.; members of executive board, three years, W. S. Russell, Ottumwa, Iowa; Charles Ring, Decatur, Mich.; members of finance committee, J. C. Fishel, Hope, Ind.; F. C. Hare, Quincy, Ill.; Earl Hemenway, South Haven, Mich.

THE COLLEGE AND EXPERIMENT STATION EXHIBITS AT THE BOSTON SHOW.

A new feature which will no doubt prove interesting and profitable to the poultry breeder who visits the next Boston show will be the exhibits from the several agricultural colleges. The experiment stations will have on exhibition plans, charts, etc., giving valuable information and the poultry college department will send live specimens of fowls raised at the college and the birds from these colleges will compete together independent of the regular open classes. The premium list of the big show will soon be issued and from inquiries already received the next Boston show promises to be even greater than ever before. Premium lists may be obtained from the secretary, 30 Broad street, Boston. W. B. Atherton, Sec'y.

AURORA, ILL.

The eighth annual show of the Fox River Fanciers' Association will be held January 4-7, 1910, at the Armory. Mr. T. J. Rountree, of Nora, Ill., will place the awards in the poultry department and birds will be judged by comparison.

The officers of the association are the following: Walter M. Smith, president; Val Hibner, vice-president; Herman Moser, secretary, and H. W. Knickerbocker, treasurer.

As in our former shows, we will again have a fine display of poultry, pigeons and seed corn, and any information regarding

any of these departments will be cheerfully furnished by the undersigned.

A fine line of cash premiums, cash and merchandise specials will be offered for competition, and fanciers who have exhibited at our former shows are requested, when making up their list of shows, to again remember Aurora, and would ask that those who have never exhibited with us to drop me a card for premium list or any further information to convince them that Aurora is the place to show your pets.

All exhibitors not in attendance at the show will be promptly notified as to their winnings as soon as judging is completed in the respective departments.

Do not forget Aurora; send for premium list and show your birds with us.

Herman Moser, Secretary.

CEDAR RAPIDS, IOWA.

The fifteenth annual exhibition of the Western Poultry Fanciers' Association (Inc.) to be held at the Auditorium at Cedar Rapids, Iowa, will be one of the big mid-west events for the coming show season. The actual cash prizes will approximate \$1,000, in addition to a large list of sweepstake, grand class and specialty club state cups. The mid-west branch of the American Poultry Association also offers \$200 in cold cash in display specials, open to any exhibitor in America, all of which will combine to make the coming show one of the largest and best in not only Iowa but the entire mid-west. The judges are Shellbarger, Keeler and Shanklin, well known to the poultry world. The dates are January 17 to 22, 1910. Premium list will be out on or about December 20. It's free to all. Send name and address to S. M. Wiley, Cedar Rapids, Iowa.

LITITZ, PA.

The Lancaster County Poultry, Pigeon and Pet Stock Association will hold their fifth annual exhibition in Rudy's Hall, Lititz, Pa., December 27, 1909, to January 1, 1910. Their premium list is now ready for distribution. This is Pennsylvania's quality show and they are offering numerous gold premiums with no strings attached to them. Write the secretary, James H. Breitigan, Lititz, Pa., for full information.

SCRANTON, PA.

The dates of January 17-22, 1910, have been selected for the Scranton (Pa.) Poultry Show. This show has become familiarly known throughout the country as the "quality show." This year they will offer sixteen challenge cups, twenty trophy cups and many other specials, including cash. Catalog for the show will be ready for delivery December 1.

A. W. Close, Secretary, Scranton, Pa.

FREEPORT, ME.

The Seventh Annual Show of the Freeport Poultry Association will be held at Freeport, Me., Dec. 28, 29, 30, 31, 1909. The judges will be Messrs. Lambert, Watson, Atherton, Newell and Bartlett. An unusually attractive list of specials will be offered for general competition. Premium lists can be obtained on application of George P. Coffin, secretary, Freeport, Me.

MUNCIE, IND.

The annual show of the Muncie Poultry and Pet Stock Association will be held January 25 to 29, 1910. Muncie is a live, hustling city and has the reputation of being the best show town in Indiana. In addition to the cash prizes there will be a number of specials offered. C. I. Fishel will judge the show. Charles Veneman, secretary-treasurer.

MID-WEST BRANCH MEETING.

The annual meeting of the Mid-West Branch of the American Poultry Association will be held at the Lexington Hotel, Chicago, Ill., Friday, Dec. 10, at 9 p. m. Thomas F. Rigg, President.

URBANA, OHIO.

The Urbana Fanciers' Association will have H. L. Bridges to make the awards at their third annual show, to be held in Market Square Theater, December 14-18, 1909. Entry fee is 50 cents for single bird and \$1 for breeding pen. Coops and feed furnished free. Can ship via the Ohio Electric, Big Four, Erie and Pennsylvania railroads. Write for premium list to the secretary, C. H. Happersett.

WEST PARK, O.

The West Cuyahoga County Poultry Association will hold their next show at West Park, Dec. 22, 23, 24, 25, Charles McClave, judge. The show will be judged by score card. The show promises to be a hummer, as all members are working hard for the show. As West Park is only three miles from Cleveland, a large attendance is expected. Write for premium list and other information to C. W. Sixt, secretary, West Park, O.

It gives full instructions for operating all kinds of Incubators. This chapter is marvelously complete and worth dollars to anyone using an incubator. It gives descriptions and prices of Incubators, Brooders and all kinds of Poultry Supplies. In fact, it is an encyclopedia of chickendom and will be mailed to anyone on receipt of only 15 cents. Your money returned if not pleased.

C. C. SHOEMAKER, Box 820, FREEPORT, ILL.

OMAHA, NEB.

The Trans-Mississippi Show, Omaha, will be larger than ever. Secretary F. C. Alquist, of the Trans-Mississippi Show, writes us that he is already "head over heels" in work in caring for the correspondence of the Omaha show, which he says should be larger than ever before if one can judge at all by the inquiry for premium lists and the different letters from large breeders who promise to make an exhibit at the Trans-Mississippi. We were glad to get this news from Mr. Alquist, as there is no question but that the Omaha show plays a big part in the fancy poultry business of the central states. The Trans-Mississippi have held four highly successful shows, last year's entries running up close to three thousand. It is a good show for the amateur to make first, because he will be taught many things by observing his older poultry brethren and their fowls, and, secondly, because the show is held during the week dividing 1909 and 1910, thus making it possible for him to show at a smaller or local show and determine which of his birds are the fittest specimens to exhibit at a large show like Omaha, where the competition is bound to be much keener, and thus see how his birds compare with the "big boys," as they are sometimes called.

It is also a good show for the large breeder, for the Omaha show has established a record of being a first-class sales show for quality birds, due to the fact, perhaps, that it is the annual "round-up" place of the many new and small breeders living in Ne-

One of the long breeding houses on Ridge View Farm, Willoughby, Ohio.

braska and Iowa, while there is always a large attendance of breeders from South Dakota, Minnesota, Missouri and Kansas.

The Omaha boys deserve a large show this year, as they have worked hard all summer raising a large amount of money and valuable specials. They are offering, besides all the many cash and silver specials, first-class regular cash premiums. Judges Southard, Rhodes and Shallabarger will place the awards by the comparison system.

This is the first show ever held in Nebraska judged by that method, and many breeders are stating they will enter a few just to try out the comparison system. The large Auditorium in which the show will be held is one of the best ventilated and lighted show rooms in the United States. All the poultry can be cooped on the lower and main floor and still have ample room to spare. Their new premium list is now ready and is free for the asking.

WAUKEGAN SHOW.

The Illinois Poultry Fanciers' Association of Waukegan will hold an exhibition in the Battery C Armory, Jan. 5 to 8 inclusive. The show will be cooped by Spratt's Patent Ltd. Mr. Charles McClave and one other judge to be announced later will place the awards.

This association is a reorganization of the Zion City Poultry Association with the addition of members from Waukegan, Evanston and other cities in the vicinity. The Zion City Poultry Association held successful shows in the past three years. The last year's show had five hundred birds on exhibition and there promises to be a greatly increased entry this year.

The armory, where the show will be held, is a large, well lighted building capable of accommodating a thousand entries. The business men of Waukegan are supporting the show and a large amount in cash specials will be offered for competition. The premium list will be ready Dec. 1.

358 Dearborn Street Chicago, Illinois

SPECIALTY CLUBS

This department is for the use of all Poultry Clubs and the Secretaries are requested to make liberal use of same.

INTERNATIONAL ANCONA CLUB NATIONAL MEETING.

It is very pleasing to note the progressive spirit that has been aroused among the Ancona breeders. Surely these grand layers are worthy of the attention they are receiving.

There are two good ways to advertise our breed. The first is to use the poultry journals, and the second is the show room. Up to this time Anconas have never had a credible showing at any of our shows. Our opportunity is at hand to give our breed the greatest boost it has ever received.

The International Ancona Club has made arrangements to hold its annual meeting January 25 to 29, 1910, in conjunction with the great Cleveland show. The Cleveland Fanciers' Club have favored us with valuable assistance. Am happy to announce that there will be nearly \$200 in prizes for Anconas, including eleven handsome silver cups, sixty elegant club ribbons, besides the generous cash prizes.

From different parts of the country Ancona breeders have notified us of their intention to join in the good work of making this the greatest exhibit in this or any other country.

We sincerely hope that all will climb in the "band wagon," and have the honor of showing your birds in a largest class on record, and in a show of international importance. Do not fail to enter as many birds as possible. We hope that you will attend in person, and avail yourself of this opportunity of meeting a large number of Ancona breeders, and I might say a lot of good fellows, to be sure.

Would appreciate the favor if you will advise me how many birds you expect to enter, also if we may expect the pleasure of meeting you on this occasion. The glad hand will be awaiting all. Come. If you can not come send your birds, and I will see they are well cared for.

H. C. Sheppard, President,
Berea, Ohio.

THE AMERICAN BUFF COCHIN CLUB.

The next meeting of our club will be held at Madison Square Garden, New York City, Thursday, December 30, 1909, at 10:30 a. m.

During the next New York poultry show our president, Dr. J. J. Hare, has promised to be with us and deliver an address on "The Most Desirable Type of Buff Cochins to Aim to Produce," to be followed by a discussion by members of the club, and a thorough handling of the prize-winning birds and any others that will best illustrate the points taken or contraverted by the speaker.

The following is a list of the special prizes:

Dr. J. J. Hare, of Whitby, Ont., will give a \$25 silver cup for two best Buff Cochins cocks, two hens, two cockerels, two pullets and breeding pen.

Mr. H. J. Jenner, of Pocahontas, Ill., will give \$10 cash for second best two Buff Cochins cocks, two hens, two cockerels, two pullets and breeding pen.

Mr. C. W. Case, of Rochester, Mich., will give \$10 cash for best male.

Dr. A. W. Bell, of Winnipeg, Can., will give \$5 cash for best female.

Mr. H. N. Hanchett, of Jackson, Mich., will give \$5 cash for best pullet.

Mr. F. H. Wise, of Westfield, Ind., will give \$5 cash for best cock.

Mr. Thomas Curry, of Anderson, Ind., will give \$5 cash for best hen.

Mr. Hugh Wyatt, of London, Ont., will give \$5 cash for best cockerel.

This letter is sent especially to urge the members to be present, as this will be the most interesting meeting ever held by our club.

If you find it impossible to come personally, send your birds, as the Madison Square Show is considered the best and most important poultry show in the United States, and to win even second or third prize means considerable to you and your birds. I also wish to state that I am anxious to double our membership during the next two months and we are in good position to do so if the outside members take it into consideration.

Wishing you all success at our future shows and again urging you to attend our next meeting, I remain,

C. W. Case, Secretary,
Rochester, Mich.

PARTRIDGE WYANDOTTE CLUB.

The Partridge Wyandotte Club of America will hold its next annual meeting for the election of officers and annual exhibit, to determine the championship of America, with the Boston Poultry Association, January 11 to 15, 1910.

The special prizes to be competed for at this meeting will be:

The Boston Poultry Association \$100 championship challenge cup for best male.

The Boston Poultry Association championship medal, to be awarded to the best Partridge Wyandotte male. (This is a handsomely engraved trophy with the winner's name engraved on it and is perhaps the most coveted prize of any competed for.)

The special prizes to be competed for by club members only will be:

The \$100 championship challenge cup for best male.

The \$100 championship challenge cup for best female.

These cups to be won three times to become the property of the winner.

The cash specials to be competed for by club members only will be:

BARRED PLYMOUTH ROCKS

WE CANNOT TELL YOU in this space all that we want to say about the merits of our Barred Plymouth Rock winners at Toledo, Detroit and other large shows and also our high-class utility stock. We have, however, published a new handsome catalogue telling about our stock and containing many fine illustrations of our yards and buildings, and also individual pictures of our birds. These pictures are untouched and shows the birds true to life. If you are intending to purchase either stock or eggs, send us one dime today for this elegant catalogue. We guarantee that it will interest and please you. Also send at once for free circular telling all about the Poultry Feeder and Exerciser shown in this picture. We are the exclusive agents for this Feeder and Exerciser in Ohio, Indiana and Michigan. It is the greatest feed and labor-saving device ever placed in a poultry yard. We have fifty of these Feeders and Exercisers in constant use in our yards. The price of the Feeder and Exerciser is 8-quart, \$2.50; 14-quart, \$3.25; 20-quart, \$4.10; 32-quart, \$5.00. Send us the price of the size you want and we will ship it to you on thirty days' trial. If you do not want to keep it, return to us and we will refund your money and pay the express charges both ways. We refer to the editor of this paper and to the Citizens Banking Company, Perrysburg, Ohio, as to our financial standing. Write today. Remember, the Barred Plymouth Rock catalogue is only ten

Cents in silver or stamps and the circular telling about the Poultry Feeder and Exerciser is free.

River Home Poultry Yards : Box B : Perrysburg, Ohio

\$10 for first pen; \$5 for second pen; \$3 for third pen.

\$2 for third cock; \$2 for fourth cock; \$2 for fifth cock; \$2 for sixth cock.

\$2 for third hen; \$2 for fourth hen; \$2 for fifth hen; \$2 for sixth hen.

\$2 for third cockerel; \$2 for fourth cockerel; \$2 for fifth cockerel; \$2 for sixth cockerel.

\$2 for third pullet; \$2 for fourth pullet; \$2 for fifth pullet; \$2 for sixth pullet.

Also, very handsome club badges will be awarded for best shaped male, best colored male, best shaped female, best colored female, best pen.

Partridge Wyandotte breeders will please bear in mind that the American championships will be settled at this show, and all Partridge Wyandotte breeders in America are cordially invited to become members and may do so by sending their names, together with \$2 for membership and first year's dues, to Harry R. Hildreth, secretary and treasurer, Worcester, Mass. The Partridge Wyandotte Club of America is a member of and loyal to the American Poultry Association and its exhibits are held in accordance with its rules.

M. H. Coffin, President.

AMERICAN S. C. BROWN LEGHORN CLUB.

The annual meeting of this club will be held in Indianapolis on Feb. 9, 1910. The result of votes cast is as follows: Indianapolis, 42; Buffalo, 14; New York, 1; Kansas City, 1; Cincinnati, 11.

Every member is requested to attend if at all possible and to send an entry to Indianapolis. The prizes on single entries are as follows: \$3 for first, \$2 for second and \$1 for third. On pens, \$4 for first, \$3 for second and \$2 for third. In

addition to above prizes the club members will receive on cock, hen, cockerel, pullet and pen the following additional prizes: First, \$3; second, \$2.50; third,

"As good as they grow." The kind bred by Simmons Bros., Stockton, Ill.

\$2; fourth, \$1.50; fifth, \$1; also \$10 for each class that fills and two cups and

club ribbons. The cash prizes amount to \$93. Attention is called to the fact that cash is paid for every prize from first to fifth inclusive. Every breeder of the Browns is invited to become a member of the club at the cost of \$1; attend the show and compete for all these handsome prizes. For catalogue, application blank, etc., write the secretary, E. W. Staebler, West Park, Ohio.

INTERNATIONAL CRESTED FOWL CLUB.

After the greatest Polish and Polish Bantam show ever held in the world, at Hagerstown, Md., October 12-15, 1909, a club was duly formed among the crested fowl breeders, which will hereafter be known as the International Crested Fowl Club. The object of this club is to advance the interests and further the breeding of crested varieties of poultry, Bantams, ornamental fowls and ducks.

The spacious rooms of the Hagerstown Fair Association, where the meeting was held, were crowded with men having the interests of the crested breeds at heart, and with the officers selected and the members enrolled it is needless to say that the club means business on the square and is here to stay.

The next annual meeting is called during the Hagerstown Fair next year, and there will be specials galore on crested breeds, too.

The officers elected for 1909 and 1910 are as follows: President, William T. Minnish, Carlisle, Pa.; first vice-president, August Brown, Syracuse, N. Y.; second vice-president, W. A. Amhurst, Amhurst, Pa.; secretary, H. W. Schriver, Chester, N. Y.; treasurer, John C. Kriner, Sellersville, Pa.

Any breeder of crested varieties, of good reputation, is eligible to become a member

CALDWELL'S BABY CHICKS OF QUALITY

Hatched in a coal heated Cyphers' Mammoth incubator from the finest utility and the choicest exhibition matings of Fishel "Best in the World" White Plymouth Rocks produce vitality chicks that live and grow into money for you. Custom hatching. Catalogue free. Eggs for hatching.

R. C. Caldwell : Box 1021 : Lyndon, Ross County, Ohio

Consider the Record

First Prize Cockerel, Indiana State Fair, 1909
The type the new Standard calls for

of all breeders of poultry and especially those of White Plymouth Rocks and see how small a showing they make when compared with the winning of our White Plymouth Rocks. Not only are our birds noted in the show room, but in the breeding yard or on the farm they have bred valuable specimens or made such egg laying records that everyone admits

U. R. Fishel's White Plymouth Rocks

are the most beautiful and profitable of all breeds. DO YOU WANT TO WIN? I can supply you exhibition birds that are sure winners. IF YOU WANT BREEDERS, well, no one can give you blood lines. I can and no other White Rock breeder can give you farm reared, strong husky male birds, birds that put "ginger" into your flocks. If you want utility fowls for eggs, well, whenever they get them to laying two eggs a day regular, they have us beat. SEND TWO DIMES FOR MY 56-PAGE CATALOG, worth dollars to anyone, and remember our trade mark

"The Best in the World"

U. R. Fishel : Box A : Hope, Indiana

by sending the membership fee of \$1 and a year's dues of the same amount to the secretary, H. W. Schriver, Chester, N. Y.

NATIONAL R. C. RHODE ISLAND RED CLUB.

The annual meeting of the National Rose Comb Rhode Island Red Club will be held at noon Friday, January 14, 1910, at Mechanics' Hall, Boston, Mass., in connection with the Boston Poultry Show. As there are many questions of great importance to the members of the club to be brought up at this meeting, as well as the election of officers for the coming year, a full attendance is requested. We are offering specials this season at about seventy-five of the leading shows held throughout the country, and the secretary would be glad to hear from any secretaries who desire the specials at their shows, and will send copy for the premium list to all who are interested. We have more than doubled our membership during the past year, and hope to present at least 100 new names to be voted on at the coming meeting.

The secretary would be very glad to have any suggestions from members who cannot be present at this meeting, and if they are submitted to him in writing they will be taken up at the meeting.

W. F. Burleigh, Secretary.
Larabee's Point, Vt.

THE AMERICAN COLUMBIAN PLYMOUTH ROCK CLUB.

The American Columbian Plymouth Rock Club again offers at the leading shows its handsome club ribbons for competition by members only. If you are not already a member of the club, better join at once and compete for these ribbons. The secretary of the club personally offers additional ribbons for competition by members showing at Madison Square and Paterson, N. J. These will be worth going after. Consult premium lists for other specials to be listed later. Notice of annual meeting of the club will appear at a later date. E. B. Andrews, secretary-treasurer, 9 West Seventeenth street, New York City.

THE ANNUAL MEETING OF THE AMERICAN BUFF LEGHORN CLUB.

The American Buff Leghorn Club will hold their annual meeting during the great Chicago show. The meeting will be held in the Coliseum, December 9, at 4 p. m. Any further information will be given there at that time. All those interested are invited to join and be present.

F. A. Tecktonius, President,
Racine, Wis.

George S. Barnes, Secretary-Treasurer,
Battle Creek, Mich.

S. C. BROWN LEGHORN CLUB.

New York State breeders of S. C. Brown Leghorns, take notice. The American S. C. Brown Leghorn Club offers a silver cup to be competed for by New York State breeders only. The cup is placed at the Gouverneur Poultry Show, December 14 to 17 (H. H. Gerner, secretary, Gouverneur, N. Y.). Any breeder of S. C. B. Leghorns can compete for the cup by sending \$1 to E. W. Staebler, West Park, Ohio, with application for membership in the club ten days prior to the show. You are earnestly requested to become a member and try for this handsome cup. Herbert D. Smith, New York State Vice-President.

THE NATIONAL BLACK LANGSHAN CLUB.

The National Black Langshan Club Show will be held at Chicago Dec. 7-12. The annual meeting will be held there on Thursday, the 9th. We expect a large attendance. M. E. Baker, Sec.

ADRIAN, MICH.

The Fence Town Fanciers' Club will hold their annual show Dec. 7 to 13 at Adrian, Mich., with Judges O. P. Greer, of Bourbon, Ind., and J. W. Mulinix, of Toledo, Ohio, to place the ribbons. This club was the first club in Michigan to join the American Poultry Association and strives to be the first in everything that goes to make up the true fanciers' show. J. E. Holyoke, secretary, Adrian, Mich.

NATIONAL DAIRY SHOW DE LAVAL BUTTER AWARD TRIUMPH AS USUAL

The great NATIONAL DAIRY SHOW was held at Milwaukee, Wis., October 15-24, and in keeping with the invariable result since "ALPHA-DISC" DE LAVAL CREAM SEPARATORS went into use all the HIGHEST BUTTER and CREAM awards went to DE LAVAL users, in this latest representative contest, which included the exhibits of nearly one thousand of the best butter and cream producers throughout the country.

The three highest awards in the CREAMERY BUTTER class—all to DE LAVAL users—were as follows:

A. J. ANDERSON, Otisco, Minn.,	Score 97
THOR. MOE, Winthrop, Minn.,	Score 96½
A. L. OESTRICH, Watertown, Wisc.,	Score 96

The highest award on DAIRY BUTTER was to P. Daingaard, Camp Point, Ill.—Score 94½—a DE LAVAL user.

The highest award in the CERTIFIED CREAM contest was to G. Van B. Roberts, Highland, N. Y.—Score 99—a DE LAVAL user.

The highest awards in the CREAMERY PATRONS contest for hand separator cream was to G. B. Fisher, Viroqua, Wis.—Score 93½—a DE LAVAL user.

Full details of all the entries and scores have not yet been made public, but there is no doubt that the vast majority of all exhibits scoring 90 and above will prove to have been DE LAVAL made, as heretofore.

Incomplete reports have been received of highest butter awards at the various STATE FAIRS this year, but practically all of them have been to DE LAVAL users, including particularly New York, Indiana, Michigan, Missouri, North Dakota and South Dakota.

As has been said before, the separator does not of itself insure the making of the best butter, but the superior mechanical and sanitary bowl construction and low speed of the DE LAVAL separator indisputably enable the production of better cream and better butter under the same conditions than can possibly be made in any other way.

This is something that even the most enterprising and resourceful of those who seek profit through the manufacture and sale of would-be competing separators never attempt to explain or deny,—that practically all the best butter, as evidenced by the highest awards in all representative butter contests, is and has for more than twenty years been made by users of DE LAVAL cream separators.

Hence the great advantage to every DE LAVAL user in having the separator that not only makes the MOST but the BEST cream and butter, is the simplest and easiest machine to use and lasts an average of twenty years against from two to five years in the case of all others.

A DE LAVAL catalogue helps to make plain the reasons for DE LAVAL superiority in good buttermaking and other respects, and is to be had for the asking.

W. H. KLUG, BREEDER OF S. & R. C. RHODE ISLAND REDS,

has had over twenty years' experience as a breeder of a fine strain of both Rose and Single Comb Reds, being good in shape and color and an extra large size strain of birds. In Rose Comb he has hens that have laid 245 eggs in a year; in Single Comb he has hens that have laid 247 eggs in a year, weighing 6½ pounds when they began to lay and as much as 9 pounds when they were matured.

He has won on this stock for many years and last year at the Detroit show, in competition with a large string brought out by a meeting of the National S. C. R. I. Red Club, he won first and third pullet, second and fifth hen, third cock, fourth cockerel, together with a great many specials, among which were two beautiful loving cups, one on best pen and one on best display. Among his numerous winnings are many special ribbons for both color and shape, which Mr. Klug prizes very highly as evidence that his strain of birds are close up to the standard.

He is now offering a fine lot of young stock for sale for either exhibition or breeding purposes and is also booking orders for eggs for spring delivery. You will find his ad appearing regularly in the columns of American Poultry Journal, or write him direct. His address is William H. Klug, 895 Seyburn avenue, Detroit, Mich.

THE SIX IN ONE.

You hear it on all sides. "What do you hear?" That the solution of the lice problem has been found. It was a great thing to find the north pole and we are all much interested in the discovery. It is a matter of much more vital interest to poultrymen that the sure lice and mites exterminator has been found. Don't you think so? We are not going through the country lecturing about our great discovery, but we are taking this method of letting those who are interested know that we have found what you have been looking for all these years.

Dustyne is what might be called the Six in One Lice and Mite Exterminator. It combines in itself all of the efficacy of whitewash, lice-paints, sprays, fumigation, dusting and greasing. Dustyne is

an original idea—a practical idea—an economical idea. It is the result of the practical experiments of a practical poultryman. It is always at hand and ready for use. There is no expensive apparatus necessary for the use of Dustyne. There is nothing to break or get out of order. Nothing but Dustyne, and the chickens do the work.

Address the Poultry Dust Bath Company, Whiting, Indiana.

WALTER PERKINS.

By personal contact we have been able to get the likeness of Walter Perkins, of

Ames, Iowa, to present to the readers this month. Mr. Perkins has always told us that he had a good trade, could sell all the good stuff he had to spare and that he did not need to advertise. Now we know Per-

kins has grown with the times. A man 36 years old and 25 years he has bred fancy poultry. He has become a recognized judge and he told us of six engagements for this fall and showed a bunch of letters where he could have gone had it not been for dates and prices. Secretaries do not expect a good man to take a show at \$25 or \$30. We want to help Mr. Perkins get more shows next season and we are glad he can ask what it is worth. We remember this breeder as one of the big exhibitors and winners back in the 90's, and he can show you birds in Langshans, White Leghorns and Silver Wyandottes that will do some winning this winter. We will later show you some pictures of his stock. We would not be surprised to see him showing at Buffalo in January. If you want to get in touch with some up-to-date stuff or a judge write this fancier at Ames, Iowa.

PLEASURE AND PROFIT.

The above is the title of a catalog issued by Charles G. Pape, Fort Wayne, Ind., the man who has made such a wonderful success in breeding Single Comb Black Minorcas. Mr. Pape has spent twelve years in perfecting his strain and he has issued this catalog, which gives descriptions, illustrations and facts in regard to his strain of S. C. Black Minorcas, for the benefit of those who are desirous of taking hold of this beautiful and profitable variety, and he will be pleased to mail you a copy if you mention American Poultry Journal.

J. W. Andrews, of Dighton, Mass., a specialist on White Wyandottes and for 17 years a breeder and exhibitor of that breed only, writes that his 1909 matings have produced the finest lot of breeding and exhibition birds he ever raised, having very few culls and nearly every bird being very white with the correct shape, nice combs and bay eyes.

It is little wonder that Mr. Andrews has been able to procure such excellent results as his breeding yards have been headed by the first cockerels at Boston of 1907 and 1908, also first prize pen cockerels of 1906, 1907 and 1909, besides a long line of Boston winners for the past 12 years. Mr. Andrews has had many very large offers for his first prize winners, but preferred to breed them and by so doing keep his strain of White Wyandottes to the front.

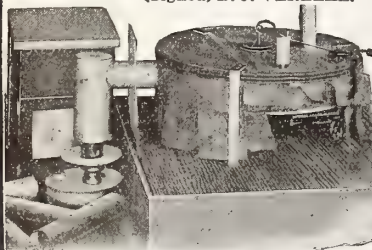

NORTH

VALLEY CITY HATCHERY

Grand Rapids, Mich., Sept. 5, 1909.
Prairie State Incubator Co.

Gentlemen: Have just finished a successful hatching season. I beg to advise you that the Prairie State Incubators I installed last spring are "it" and the very best I ever operated. Hatches were in every instance beyond expectation, some running as high as 96 percent and chicks 100 percent stronger than those hatched by non-moisture, so-called, "fire-proof" incubators. They are as represented in your catalog in every particular, which cannot be said of the many other makes I have operated.

(Signed) D. J. VEREEKE.

Sylvania, Ga., March 20, 1909.
Prairie State Incubator Co.

Gentlemen: I have just taken off 107 vigorous chicks from the 117 eggs put in the 100 egg machine No. 0. I tested these 117 eggs down to 111 eggs, which only left 4 that did not hatch. Two out of the 4 unhatched eggs had dead chicks in them. Do you know of any record that beats this? And too, from eggs that were bought from the country wherever I could find them. I have people constantly expressing wonder about this machine.

(Signed) O. C. EVERETT.

SOUTH

From
Every Quarter
From Every State
From Expert and Amateur

there comes the same universal opinion, that Prairie State Incubators, Universal Hovers and Colony House Brooders are the most successful and satisfactory machines yet produced.

The remarkable high per cent hatches and the big, strong, hen-like hatched chicks the Sand Tray

Prairie State

is producing for its owners everywhere, is the secret of its wide-spread popularity.

Then the problem of rearing the greatest possible number of chicks hatched to the marketable point, has been so successfully solved by the Prairie State Universal Hover and Colony House Brooder, that the profits of their users have been almost doubled. No wonder they will use no other.

Thus the words of their users in all parts of the country are their best advertisements. We don't ask you to take our statements solely as to their exceptional merit. Let us send you proofs from someone near you, for Prairie State pleased patrons are everywhere. Write your name on a post card; simply say "Send me more proofs why I shall buy Prairie State machines." We'll surprise you and show you how much more profitable Prairie State machines are than any other.

PRAIRIE STATE INCUBATOR COMPANY
468 MAIN ST. HOMER CITY, PENNA.

EAST

The HIGHLAND POULTRY FARM

New Hartford, Conn., Apr. 20, 1909.
Prairie State Incubator Co.

Gentlemen: I am very glad to be able to tell you that from the first hatch in my new No. 3 Prairie State I got 320 chicks from 360 eggs, beating all my other machines of the same size by 40 or 50 chicks. I have bought another large size machine and shall want several more another year—as soon as I can get rid of my incubators of other makes.

C. M. MAXFIELD.

The ROCKY FORD POULTRY CO.

Rocky Ford, Colo., April 29, 1909.
Prairie State Incubator Co.

Dear Sirs: The 400-egg incubator I ordered has opened up the eyes of the Western people. This is the record—392 fertile eggs; 366 chicks large and strong; 2 cripples, 5 pipped, but dead in shell; total number of chicks, 373. 19 eggs showed no life.

Look out for orders from here early next year. There are many Universal Hovers in use here and giving the finest kind of satisfaction. We could not think of using any other.

Box 144.

(Signed) O. C. FRANTZ.

WEST

Blood will tell and Andrews' White Wyandottes have the finest blood lines of any strain in America.

The Collie, for the poultry yard, the farm or city watch dog. Money makers for those that breed them. We give here an illustration of the Collie Handsome Harry, sitting erect, holding two bantams sitting on a stick. He was trained to do this little stunt in a very short time. The cut of the chickens is not very plain, due to a poor engraving, but they are live ones. Harry always had a natural inclination to want to help with the poultry. I have shut him up at night with the little chickens to protect

them from the rats, etc. He has been known to stand by a hen and her little chickens for hours at a time and pay particular attention that none strayed away from the mother hen.

It may be interesting to know that the Collie is claimed to be the oldest known breed of dogs. It seems certain that the ancient sheep dog of remote ages was the direct parent stock of the Collie. It is evident that in the time of Job the sheep dog tended and defended the flocks. Therefore the Collie has been bred for hundreds

of years for a general purpose dog and today they are a dog that possess grace, beauty and intelligence not found in some other breeds.

In disposition they are childlike, easily offended and great imitators, they glean to a great extent a knowledge of your work by observation and by a little training can accomplish lots without your help. If you want complete instructions how to train a dog of any breed send for Clark's Book on Training. A year's subscription to the American Poultry Journal and the book for only 60 cents. See ad on other page. Frank R. Clark, Secretary and Manager Sunnybrae Collie Club, Bloomington, Ill.

STORM DOOR AND WINDOW BARGAINS.

Every reader of this paper should know that storm doors and storm windows may be bought of the Gordon-Van Tine Co., of Davenport, Iowa, at bargain prices. In fact the storm doors may be bought from \$1.29 up, according to size and according to the style of door.

Storm windows, technically called storm sash, may be bought complete with glass from 70 cents up for the entire window.

Storm windows are made with 12 lights, 8 lights, 4 lights, 3 lights and 2 lights, and they can be bought from the Gordon-Van Tine Co. in almost any size the user desires.

The storm doors can be had with or without a pane of glass in them, that is, solid wood or with the glass panels.

Hardware for putting up doors or windows can be secured of the Gordon-Van Tine Co. at a very nominal price, but the facts concerning the entire line are fully covered in their grand free millwork catalog, which they will be glad to send to any reader of this publication.

It should be borne in mind that an enormous stock of this material, as well as 5,000 other bargains in millwork and lumber, are carried on hand and can be shipped right from their warehouses to any point in the United States, safe delivery guaranteed.

Lakewood Farms of Lakewood, Eatontown and Vineland announce the opening of their new branch store at 799 Park avenue, borough of Manhattan, New York City, and invite their patrons and the public to an inspection of their really fresh farm

products direct from our farms. No pains have been spared to make this the ideal of what a farm store should be and we trust that we may have the pleasure of a visit from you. The reputation made by Lakewood Farms will be only an incentive to further efforts to furnish farm products having the purity and flavor of those produced on the private estate of the country gentleman. A visit to Lakewood Farms stores will be considered a favor.

Many poultry and hog breeders will need a heater, and it is a pleasure for us to show a cut of the Rippley, which has capacity of heating 800 feet of hoovers of 1 1/4-inch pipe. This heater is highly recommended, and being made of steel and cast iron, will last for years, burns coal or wood, safe as a stove, heat regulated automatically. Write the manufacturers, Rippley Manufacturing Company, Box 27, Grafton, Ill., for their catalogue of heaters, feed cookers, eggs and day old chickens boxes, coops, whitewashers, sprayers, etc. The Rippley firm is highly recommended by U. R. Fishel, A. G. Duston and many noted breeders. Their goods were awarded first premium world's fair, St. Louis, Mo.

NATIONAL ROSE COMB WHITE LEGHORN CLUB.

Annual meeting of the club will be held in Chicago, Ill., December 10, 1909, 8 p. m., at the Coliseum. Members are urged to attend this meeting, as important business is to be acted upon, also election of officers. Club catalogue is ready for mailing, those wishing to peruse one, should send their names and addresses to me and I will gladly mail them free of charge to any one, to know what the egg basket fillers are doing. Membership fee is but \$1, so join now and compete for the specials this club is offering. Write for club catalogue and application blank to

J. J. Peters, Secretary,
Lincoln, Ill.

Would such a poultry writer as C. W. Zimmer say: "Being somewhat of an inventor, I appreciate the good points as well as the simplicity of your invention," and then order two machines shipped to his father;

Would the well known poultry writer, J. C. Clipp, use the expression: "I am in love with your machine;"

Would the Great River Home Poultry Yards of Perrysburg, Ohio, run on the most scientific methods known in Poultry Culture, equip their entire plant, and thousands of poultry men all over the country use

The Norwich Automatic Exerciser and Feeder

if it were not the greatest grain and labor-saving device ever introduced in the poultry business?

At the present price of grain you cannot afford to run your yards without it. The actual saving by the use of our machines is over 20 per cent, and the labor of feeding is reduced to practically nothing. Fill the hopper, and the Norwich Automatic Exerciser and Feeder will take better care of your flock than you can yourself, for the birds will feed themselves at

just the instant their food will do them the most good, and you do not have to be on hand when they get off their roost mornings, nor before roost evenings, and you are not feeding sparrows by day or rats at night. Sold under guarantee to give absolute satisfaction or money and expenses refunded.

A Further Guarantee: We guarantee our Norwich Automatic Exerciser and Feeder, at the present price of grain to pay for itself in 90 days. The next 90 days it will pay for itself again, the next 90 days it will do the same, and again the next 90 days. Just figure this out. Money invested in Norwich Automatic Exercisers and Feeders yield 400 per cent per annum. Can you afford to be without it?

First Pen Cockerel of Cleveland, 1909.

COVERT'S

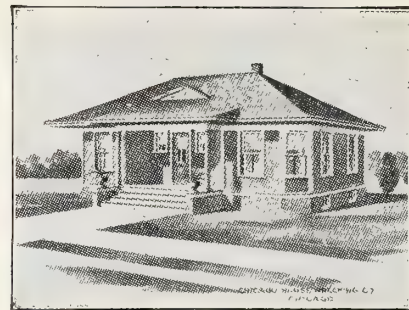

Narrow sharp barred fellows won at Cleveland, 1909, in the strongest class ever shown in Cleveland, on five entries, 4th cockerel, 5th hen, 4th pullet, 1st pen and color special on female. At Willoughby, 1909, in a class of 136 birds won 1st and 2d cock; 2d, 4th and 5th hen; 2d and 4th cockerel, 3d pullet; 1st and 3d pen; color special on female and silver cup for best pen. Won every first at Cuyahoga County Fair last year. I have 100 choice breeding cockerels at \$5.00 each. Pairs, trios and pens mated. Also a few choice exhibition hens, the kind that win in fast company. All birds sent on approval. Exhibition birds, a matter for correspondence. :: :: :: ::

IMPORTANT SHIPMENT OF S. C. B. MINORCAS.

One of the most noted shipments of Single Comb Black Minorcas from the farms of Charles G. Pape, Fort Wayne, Ind., exclusive breeder of Single Comb Black Minorcas, was made on the 22d of October. On that date a pen of birds was sent to each of the following cities: Waxahachie, Texas; Alamogordo, New Mexico, and Belize, British Honduras. These pens were shipped to noted breeders, and shows that fanciers in general are recognizing Pape's strain as equal to any in America for exhibition and breeding purposes.

Below is shown a cut of house that was erected on the Iowa State Fair grounds by the Chicago House Wrecking Company. During the progress of the fair it was visited by thousands of persons who were surprised at the high grade material and general appearance of the design. This house is what is known as No. 117 in this company's catalogue. It is 27 feet in width by 39 feet 6 inches in length, exclusive of porches. Considering the fact that they furnish the material complete for the exact duplicate of this house for \$550, it is certainly an astonishing proposition and a remarkable bargain offering.

It contains six rooms and bath, which are as follows: Living room, dining room, kitchen, pantry, three bed rooms and a bath room, and is in every way a complete and modern home on one floor. The fireplace in the corner of the living room adds cheerfulness to the surroundings. All the rooms are of easy access from the living room of the house. There are no waste spaces where not needed and the whole plan has been developed not only for convenience and beauty but in harmony with the general character of the bungalow pattern. For a summer or suburban home, this class of house offers many advantages not possible in designs of different construction, and they especially recommend this design to people of good taste and moderate means as an ideal home at a comparatively small cost.

The bungalow pattern of construction was at first employed only in houses intended for temporary use, but their beautiful outlines and great convenience soon brought them into rapid favor as suburban and city homes. In this design they show one of the most pleasing examples of this deservedly popular style.

The material they furnish is all brand new stock as described in their material specifications. They also furnish free plans, specifications and list of material for the construction of this design.

They will furnish a complete plumbing outfit for this house for \$97.50. Paint for the entire job, including hard oil finish for interior, two coat work (including porch floor paint but no other floor or roof paint), \$19.70. This building can be heated with furnace, steam or hot water as desired. The hot air furnace they quote at \$32.05. The steam heating plant would amount to \$147.84. Or, if you prefer hot water heating plant, which is by far the best, it would cost you \$176.21.

The Chicago House Wrecking Company, Thirty-fifth and Iron streets, Chicago, Ill., will furnish the design for this house, together with brand new stock for use in erecting it, for \$550. More information that will interest builders of not only dwelling houses, but barns, etc., can be obtained absolutely free of charge. When writing them advise that you saw this design described in this publication. They advertise continually in this medium and a careful study of their ads. we are confident will prove of interest to you.

LIGHT BRAHMAS IN GREAT DEMAND.

River Home Poultry Yards, Box B, Perrysburg, Ohio, the well-known Light Brahma breeders, who are sending out for 6 cents in stamps the handsomest Light Brahma catalog ever issued, report that there is a great demand for the catalog and that they are shipping more Light Brahmas, both young and old stock, than ever before. There is no doubt but that the old reliable Light Brahma is regaining its old-time popularity. The River Home Poultry Yards truly say in their catalog that "Fad and freak varieties come and go but the Light Brahma endures."

They also call attention in their catalog to the fact that the double mating system

We fully agree with their statement in the catalog that there will be a great demand for high-class Light Brahmas for years to come and that poultry fanciers cannot do better than to breed high-class, pure-bred Light Brahmas.

We congratulate the River Home Poultry Yards upon this valuable contribution to poultry literature.

MAKE YOUR HENS LAY.

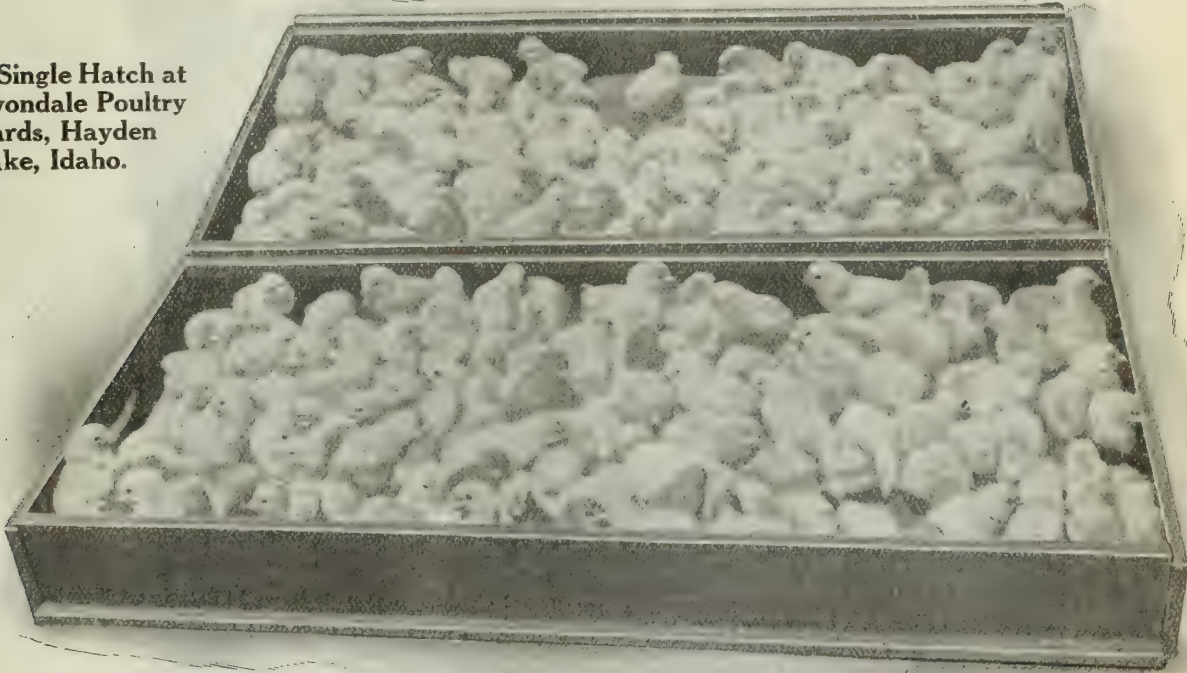

There is no doubt that every poultryman and farmer is looking for some opportunity to increase the egg output of his hens. There are always times when a number of his hens will not lay, particularly in winter, and he looks about for some means of forcing them with injuring his fowls.

self-feeding and cannot clog. It makes no difference whether it is meat or gristle, or whether the bone is dry or green. Write to them for their illustrated catalog and information about a free trial.

THIS BOOK IS FREE.

In another part of this issue will be found a full page advertisement of Montgomery Ward & Co., the largest and oldest mail order house in the world, and in these days of high prices it behooves the poultryman to purchase his supplies where he can get them the cheapest, and there is no question but what you can save money by placing your order with this firm, no matter where you live. They issue one of the largest and most complete catalogs in the

**A Single Hatch at
Avondale Poultry
Yards, Hayden
Lake, Idaho.**

**Poultry Breeding for Profit Necessitates Successful Hatches.**

The 326 Strong, Healthy Chicks which appear in the incubator drawers above are just as they were taken from a single Standard Cyphers Incubator. With it, such hatches are common. They are the means to Successful Poultry Raising. For early broilers and ducklings begin to hatch now, and so get the creamy prices that are paid for early spring chicks. You needn't wait for the hens to sit. They won't be ready till these early chicks are sold, and the money in the breeder's pocket. If you are further interested, send your name to Cyphers Incubator Company, Department 30, Buffalo, N. Y., and get their big 1910 Catalogue. It is Free.

is not necessary in breeding Light Brahmas and that by reason of the fact that the Light Brahma is a true type, probably centuries old, and not the result of a cross, that it is the variety which will produce the largest per cent of "true to type" chicks. If you mate Light Brahmas you will get true Light Brahma chicks and, what is more, you will get Standard cockerels and Standard pullets from the same mating. There is much of interest in the catalog. Its illustrations and artistic features make it a work worthy to be placed in any poultry library. There is no doubt but that the catalog will greatly enthuse the Light Brahma breeders.

A proven method of obtaining results is to feed his chickens with plenty of cut green bone.

The expense of this is ridiculously low when you consider the increased earning capacity of your hens. The cost of the machine to cut the bone is even a minor detail, because the Standard Bone Cutter Co., of Milford, Mass., manufactures eleven grades of machines at unusually low prices. These machines are quite an improvement over the ordinary kinds, for they cut the bone across the grain. It is the easiest way for the chickens to assimilate it.

It is no trouble to run a Standard Bone Cutter either by hand or power. They are

world, a new edition of which is now ready for distribution, and we ask you as a special favor to American Poultry Journal to send for a copy. It is free for the asking. Mention American Poultry Journal when writing them.

If you are interested in high-quality Barred Plymouth Rocks, send 10 cents in silver or stamps at once for one of the handsomest Barred Plymouth Rock catalogs ever published to River Home Poultry Yards, Box B, Perrysburg, Ohio. The writer makes frequent visits to these yards and gladly vouches for their stock and their fair dealing.

**Pumpkin Colored Chickens**

Is what some people call Buff Plymouth Rocks, and we will admit that we have seen many Buff Rocks that are "punk-in" color, but

ALLISON'S BUFF ROCKS

are true Golden Nuggets with that bright Standard color so much desired, which makes them the most beautiful as well as the most profitable of all birds. Besides, Allison's Buff Rocks

Always Win at the Leading Shows

because they are true to shape, have that soft, mellow color and are bred for both fancier and farmer. Send for list of prizes and prices and let us prove to you that our birds are no experiment. In one of the largest shows of Buff Rocks ever held in the world we won more prizes than any other two exhibitors. Go to headquarters for the best Buff Rocks and you will save time and money, and all we ask is for you to get our prices before placing your order. Hundreds of birds to sell; both show and utility stock.

E. C. Allison

THE GOLDEN EGG.

The golden egg, according to Humphrey, is the egg produced in excess of the cost of keeping the hen. It is therefore the profitable egg—the egg that puts money into the bank account. Careful poultrymen have learned that getting eggs at any time is almost entirely a matter of feeding. Given comfortable quarters and fresh cut bone daily, hens will go on laying right through the winter; and it is these winter eggs that are highly profitable. Poultrymen living near large cities frequently command five cents apiece for all their fresh eggs all winter.

Of all the food for making eggs, fresh cut bone is admittedly first, and record-laying hens are continuously bone-fed.

per, Humphrey manufactures the Humphrey Clover Cutter, Humphrey Brooder—the brooder that saves chick life, Humphrey Grit Crusher and other poultry helps, all of which mean larger egg crops and greater poultry income. His book, "The Golden Egg," ought to be in the hands of every reader of this paper who raises poultry, as the Humphrey way is adapted to every poultry yard from ten hens up to the largest. A request to Humphrey's White street factory will bring it.

CUT CLOVER FOR POULTRY.

Cut clover or alfalfa is almost indispensable as a poultry food where heavy egg production is desired. These two

phrey Brooder, Humphrey Grit Crusher and other poultry helps. Write today to Humphrey, New Street Factory, Joliet, Ill.

ECONOMY IN POULTRY RAISING.

A bone cutter is as much a part of a poultry farm as the chickens themselves. Green cut bone is the best cut food that can be given them. It is better than the commercial products and cheaper. With a bone cutter of his own the poultry farmer is not paying the jobbers' profits, nor is he spending money in freight and expense bills for prepared foods that are not at hand.

Cut bone is easily prepared if the poul-

A winning Rose Comb Rhode Island Red cock, the property of Kaufmann & Windheim, Nutley, N. J. See ad in this issue.

Humphrey also advocates the use of fresh cut bone all the year round—both for getting larger egg production—from 150 to 250 eggs a year—and for improving the flavor of the eggs. Fresh cut bone certainly is more appetizing as an egg-making food than worms, bugs and grasshoppers, which generally form the hen's summer meat ration.

In a new book which he calls "The Golden Egg," Humphrey sets forth many new facts regarding egg production by feeding fresh cut bone. Methods of preparing bone in the Humphrey's Always Open Hopper Cutter are fully described, as well as the correct feeding of poultry from chick to laying hen. In addition to his bone cutter, which, by the way, is the only cutter with an always open hop-

Kentucky Stamping Company, 714 West Main street, Louisville, Ky., manufacturers of all kinds of incubator appliances, have an ad elsewhere in this issue. This firm can furnish parts to make a complete incubator, and will furnish plans to build a machine free of charge to go with each set of fixtures. Better write them at once for full particulars and mention American Poultry Journal.

Our New Poultry Book

ORIGIN AND HISTORY OF ALL BREEDS OF POULTRY

This Book Gives a Complete History and the Origin of all the Recognized Varieties of Chickens, Ducks, Geese and Turkeys, and is

Illustrated With 198 Colored Pictures of Fowls Painted From Life

SOMETHING NEVER BEFORE ATTEMPTED BY ANY PUBLISHER

This is, without question, the greatest book ever published on poultry. The artist's work alone on this book took almost one year's time to complete, but it shows the fowls in their natural colors and correct shape, and these colored pictures, together with the history of each variety, gives the fancier all the information to produce fowls for either exhibition or breeding.

How to Mate

This book also tells how to properly mate the different varieties of fowls to produce birds that will conform to Standard requirements. This is something that even the Standard of Perfection does not do. It tells you at a glance what it will take years of practical experience to learn. It is a book that no breeder or fancier can afford to be without, as it is just as suitable for the needs of the experienced fancier as for the amateur.

TEMPERATURE FACTS WORTH KNOWING.

Success in hatching chickens with an incubator depends so absolutely upon the maintenance of a certain temperature that too much attention cannot be paid to the selection of the thermometer. It is upon this instrument that the operator depends. Unless it be accurate, satisfactory hatches cannot be obtained. Good eggs will hatch only at the right temperature and an incubator is only as good as its thermometer.

Although the purpose of an incubator is to furnish and maintain the required temperature for successful incubation, many poultrymen do not seem to realize the importance of absolute accuracy in the instrument which records that temperature. The poor incubator equipped with a reliable, accurate thermometer stands better chances of satisfactory results than a good incubator equipped with a poor, unreliable thermometer. The thermometers may look alike, but it is the hidden qualities that count for accuracy, stability and permanency that make one thermometer better than another.

In a very interesting and instructive little booklet, the Taylor Instrument Companies, of Rochester, N. Y., tells the story of how the famous "Tycos" thermometers are made. As an example of the care and skill that this company exercises in making this instrument, we might cite the process of "ageing" the tubes for "Tycos" thermometers. It is a matter of common knowledge that glass shrinks as it grows older unless it is properly cured. Naturally the shrinking of a thermometer tube would render the instrument absolutely worthless. Every tube used by the Taylor Instrument Companies is properly "aged." More than 200,000 "Tycos" thermometer tubes are kept in the process of ageing at all times.

Not in the "ageing" alone, but in every particular is the greatest care and skill exercised by this company in the production of its instruments. Before sealing the tube, after being filled with purest distilled mercury, the greatest care is exercised that every particle of air and moisture is exhausted from the tube, as carelessness in this respect would render the thermometer liable to inaccuracy.

Because no two thermometers could be filled and finished to register identically, a metal scale is cut especially for and fitted to each individual "Tycos" instrument—not at all a cheap process, but guaranteeing "Tycos" absolute accuracy. The impossible feat of making a thermometer fit the scale is never attempted by the Taylor Instrument Companies.

Before the finished "Tycos" thermometer is placed on the market, it is compared with standard instruments under exact incubator conditions of temperature and any errors in testing, scaling or assembling are corrected or the thermometers are rejected as being unworthy of the "Tycos" quality. The natural result of such painstaking and careful effort is the well earned reputation that "Tycos" thermometers have as standards of accuracy. Poultrymen who are buying incubators should consider the "thermometer insurance" guaranteed by "Tycos" instruments. We reproduce a trade-mark which is shown plainly on every "Tycos" instrument.

Tycos

Poultrymen and manufacturers of incubators will do well to write the Taylor Instrument Companies, of Rochester, N. Y., mentioning this magazine, for their booklet, "Thermometer Facts Worth Knowing," which contains much of interest and help and is free upon request.

A CORRECTION.

Last month we reported Albert A. Brown, of 601 Montana street, Peoria, Ill., as winning second Barred Rock hen at Illinois State Fair. Mr. Albert Brown is a breeder of Buff Rocks and made a nice winning in this variety, and it was Ed. Brown who won second Barred Rock hen, which, by the way, was a very fine specimen. His address is Mendota, Ill., R. R. 37.

H. T. MARSHALL, R. R. 53, SHERIDAN, ILL., BREEDER OF SINGLE COMB RHODE ISLAND REDS.

Mr. Marshall is nicely located on a 180-acre farm and has a handsome large dwelling with all modern conveniences, in the cellar of which he operates his incubators, the young chicks being cared for by seven large sized outdoor brooders, and Mr. Marshall always makes it a point to get out a nice bunch of early chicks. He is a very enthusiastic fancier of R. I. Reds, and will soon have a strain of birds it will be hard to beat. He has recently completed a large new hen house and he intends to mate up several fine pens of birds for next year's egg trade.

His poultry buildings consist of one house 14x36, one 14x18, one 10x17, one 12x12 and one 14x20, therefore he is well prepared to care for a large flock of birds.

ers birds with score cards. Besides having a fine lot of exhibition and breeding stock for sale, Mr. Marshall has about fifty utility pullets which he will close out very reasonable. If you are in need of S. C. R. I. Reds you will do well to write to H. T. Marshall, Route 53, Sheridan, Ill.

A NEW EDITION OF THE TURKEY BOOK.

A new and enlarged edition of the book "Turkeys—Their Care and Management" has just been completed by the Reliable Poultry Journal Publishing Company. The new book has been revised to meet the Standard requirements for turkeys and anticipates the American Standard of Perfection which is to be published in 1910.

An article on score card judging with special charts by Franklane L. Sewell is especially timely and will prove invaluable to the turkey fancier in selecting winners for the winter exhibitions. Particularly valuable to the breeder for market are

tions, including a frontispiece in natural colors of a pair of bronze turkeys by the world's greatest poultry artist, Franklane L. Sewell.

Send us your order for a copy, price 75 cents postpaid, 96 pages, 9x12 inches.

Or this book and one year's subscription to American Poultry Journal for only \$1. Send all orders to American Poultry Journal Publishing Company, 358 Dearborn Street, Chicago, Ill.

NO NEED FOR US TO SHOUT: HERE IS WHAT THE OTHERS SAY.

The G. E. Conkey Company, Cleveland, Ohio, Department 30—Dear Sirs: I have received your new book—Conkey's Poultry Book—and have sent a post card, which is entirely inadequate to express my thanks for what I consider the most effective piece of work I have seen in years.

The book is authentic, interesting and absolutely invaluable to poultrymen, whether they keep 10 or 1,000 birds. I consider it

General view of range at the home of the Practical Reds. Ridge View Farm, Willoughby, Ohio.

He has been carefully mating for several years past and has a flock of 175 head of high class S. C. R. I. Reds, many of the pullets having that rich red surface color which all Red breeders are striving for.

For the past two years the male birds at the head of his best pen have been winners of an A. P. A. diploma, and one of his cockerels was used at the meeting of the National S. C. R. I. Red Club in connection with the Illinois State Fair at Springfield, Ill., as a bird having the typical R. I. Red shape.

At Ottawa show last year he won first and second pullet, first and third cockerel, second hen, first pen, A. P. A. diploma for best cockerel.

Mr. Marshall has recently had Judge Zimmer score his birds and can furnish buy-

the articles telling how to condition the turkeys, when to sell, how to kill, dress and pack for market to bring the highest prices.

Some of the other subjects dealt with in this new book are: How the Turkey Got Its Name, Description of the Seven Standard Varieties, The Care of Breeding Stock, Mating the Breeders, Hatching the Eggs, Coops and Houses for Turkeys and Poults, and Remedies for Turkey Diseases. Well known breeders have contributed special articles on their favorite varieties, including the Bronze, White Holland, Narragansett and wild turkeys, with special illustrations. In these they tell why they prefer the variety and how it is handled to secure best results.

The book contains seventy-two illustra-

the most valuable work on poultry I have, and I have a few! I would gladly have paid \$1 for the work if I had known how good it was. Yours respectfully,

William J. Kleiner, Augusta, Ga.

You can have this book free for two 2-cent stamps and name of your dealer where you buy poultry supplies.

THIS MEANS SOMETHING.

When hundreds of reliable poultry breeders give their unqualified indorsement of a poultry remedy it means something. The Coleman Company, Carey, Ohio, want you to read their large display ad. in this issue. It is of interest to every poultryman.

This Sample Package OF "ESSO" CHARCOAL Is For Your Poultry

Read Our Free Sample Offer:

In order to demonstrate the wonderfully beneficial effect of feeding ESSO Charcoal to your poultry, and also for the purpose of securing the name of your poultry supply dealer, we will send you this generous sample package, without charging you one penny for the charcoal. Fill out the coupon, giving name of your dealer and inclosing 10 cents in stamps to pay the postage on this free sample. We will also send you our interesting booklet, "The Value of Charcoal in Poultry Raising," containing practical pointers for poultrymen.

Esso Charcoal is Re-Carbonized—Twice-Burnt

No other charcoal on the market is anything like as good for chickens as ESSO. Because no other charcoal is re-carbonized—twice burnt. That means, no other charcoal but ESSO is perfectly charred. And partly-charred charcoal is worse than none at all, because it is liable to have an injurious effect on the health of the flock.

The cost to us is more, but the difference in the price you pay is insignificant when you consider the vast difference between the results produced by ESSO Twice-Burnt Charcoal and the results produced by the ordinary once-burnt article. Fill out and send coupon now and get this free sample package of ESSO by return mail.

The S. OBERMAYER CO., 641 Evans St., CINCINNATI, OHIO

BEN-MIN NO. 2 FOR POULTRY

Don't Lose a Prize by a Point—When Ben-Min will put your fowls' legs and feet in the pink of condition, restoring all the original beauty and color. Ben-Min is not an artificial coloring—it will not even color a feather. **But for scaly leg nothing equals it on earth.**

See What Mr. Young Says:

Ben-Min Co.:—Well pleased with sample. It does the work perfectly. Send me three pounds.—D. W. Young, Monroe, N. Y.

Special Introductory Price

A Large Trial Can
25c, by mail

Also put up in 1, 2 and 3-pound packages at \$1 per pound

Ben-Min is also unequaled in the treatment of frosted comb or feet, pip, canker, chicken pox, sore eyes, droopiness in chicks, bumble-foot and favus.

BEN-MIN CO.
303 REP. BLDG., CEDAR RAPIDS, IA.

EDWARD BROWN, MENDOTA, ILL., BREEDER OF PRIZE WINNING BARRED PLYMOUTH ROCKS,

is located one and three-quarters miles from Mendota on a fine farm, where his birds are permitted free range, except those which are yarded during the breeding season. He, of course, breeds both cockerel and pullet lines, having paid particular attention to his matings for many years. He has been able to produce a fine strain of Barred Rocks, having a clean cut, narrow barring which all Barred Rock breeders are striving for, and therefore he has been able to win his share of the prizes in many classes where competition was very strong.

His hen "Annabelle" is an exceptionally fine specimen and won second at Springfield at the Illinois State Fair this year. Her mother, "Queen Ann," was first hen at Bradford, also first at Dixon.

We were compelled to notice the extra fine, clean, yellow beaks and legs to be found in his pullet line, which we consider very fine.

We saw many testimonial letters from satisfied customers, many having reordered from Mr. Brown year after year, which shows that he has been able to please the people with the birds which he has shipped them. We consider this one of the best recommendations a breeder can have. He has also 100 head of good cockerels which

ED. BROWN.

Breeder of Barred Plymouth Rocks, R. R. 37, Mendota, Ill.

he desires to close out cheap as utility birds. They are large sized, vigorous, healthy birds.

His winnings during the past year are. Bradford, Ill., first hen, fifth cock; Walnut, Ill., second cock, third pullet; Rockford, Ill., fourth cock, second pen, mated to produce pullets; Dixon, Ill., first hen, second pullet, third cock, third pen; Illinois State Fair, second hen. Many of these prizes have been won in hot competition in classes ranging up to 128 and 156 birds. Mr. Brown also breeds Mammoth Pekin ducks and has a superior strain of extra large size ducks, and practically has never been defeated wherever shown. He has won at Chicago, Rochelle, Rockford, Peoria, Ill., and Illinois State Fair. We saw ducks weighing as much as 15 pounds, being larger than some geese which we have seen, and if you are in need of Pekin ducks we would advise that you write to Mr. Brown.

We can assure you, should you favor Mr. Brown with an order, he will do all in his power to please you, and in any event you can always get your money back. His ad is to be found in American Poultry Journal and his address is Ed. Brown, R. R. 37, Mendota, Ill.

Are you interested in White Plymouth Rocks, that great all-purpose fowl and one of the handsomest birds on earth? If so you should write to H. W. Halbach, Waterford, Wis., and mention American Poultry Journal.

AGENTS WANTED

BUYING AN INCUBATOR.

Nothing is so disappointing to the aspiring poultry keeper as an incubator that doesn't stay on the job.

A spoiled hatch is an irreparable loss of eggs, time and opportunity, and should not occur with ordinary care in purchasing and operating a hatcher.

There are good incubators at a very moderate price, guaranteed to hatch satisfactorily. Notable among these good low priced machines is the Komon-Sense incubator, which is guaranteed to bring off good hatches or money back. Of course, the money back does not give back the time and loss in eggs, but the fact that the company does make this guarantee is a safeguard against accidents; for no concern can afford to make such a guarantee unless the machine can make it good.

The guaranteed Komon-Sense incubator, 120-egg size, is sold at \$7, freight prepaid. The brooder to accommodate the hatch of this incubator is sold at \$3, while the hatcher and brooder together are sold, delivered at your station, for \$9.50. Poultry keepers should write for catalog and particulars to Komon-Sense Incubator Company, Dept. 22, Racine, Wis.

THIS WILL INTEREST YOU.

In the White Plymouth Rock we have a fowl that has stood the test of time, a fowl that has been tried under all conditions and has always proven its worth. H. W. Halbach, Waterford, Wis., has been breeding and exhibiting this variety for a num-

"White Princess," score 95½, first pullet Sac City, Iowa, 1908, and one of the first pen chicks at Iowa State Fair and at Kansas City, 1908. Bred and exhibited by F. H. Hollway, Lytton, Iowa.

ber of years and herds of his breeding have made a reputation in the show rooms and breeding yards that is second to none. He now has ready for shipment some of the best birds he ever raised, and as he prices them low, considering quality, will not have any trouble in disposing of all he has to spare. Better write him at once if you want something choice. You will get a square deal here and receive just what you order. When writing him mention American Poultry Journal.

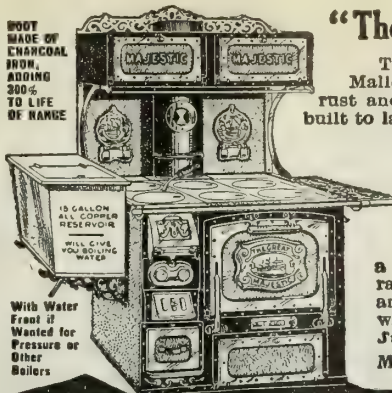

A POULTRY BOOK.

Have you secured a copy of Conkey's Poultry Book of Useful Information? If you have not, you should do so at once. This book contains seventy-two pages of information on poultry that you cannot afford to be without. Why, the chapters on diseases of poultry are worth many times the price of the book. There are also plans and specifications for building poultry houses, brood coops, etc. It also tells how to feed and what to feed. In fact, it is a mine of information. It is published by the G. E. Conkey Company, Cleveland, Ohio. Write them for full particulars and mention American Poultry Journal.

A LION FOR A PET.

P. A. Cook, of the firm of William Cook & Sons, originators of all the Orpingtons, Scotch Plains, N. J., has an African lion for a pet, and in the same cage he has two monkeys and a dog, all of which he has trained to be good friends. Mr. Cook's lion is at present the only one kept as a pet in this country. He was rather savage at first, but he is now very affectionate.

YOU OUGHT TO HEAR A WING PIANO

FOUR WEEKS'
FREE TRIAL
We Pay Freight Both Ways

A Beautiful Toned High-
Grade Piano on
Easy Payments

In 41 years we have built and sold over 40,000 WING PIANOS. All this experient goes into the WING PIANO of today, and makes it as high a grade Piano as you can buy. Thousands of customers yearly write us of the tone and durability of their WING PIANO.

Four Weeks' Free Trial. Some pianos sound well in the warerooms but are a disappointment in the home. WING PIANOS keep their purity and power anywhere; that is why we make the unusual offer of sending you one for 4 weeks on trial in your own home without payment or deposit. You can be the judge of it in the place in which it must be used. We pay freight both ways, if after a 4 weeks' trial you decide not to buy.

Agents' Profit for You

If the Piano pleases you and you decide to buy it, the price will be from \$75 to \$200 lower than any other high-grade Piano on the market. This is possible, because we sell direct to the consumer. We have no agents. We do not sell to dealers. The \$75 to \$200 lower price is just the cost of selling through middlemen. We give that to you, for to you it belongs.

2 to 3 Years to Pay

When paying for a WING PIANO we give you a choice of many different ways of paying for it. A way to meet every possible circumstance in life.

We sell for cash or on the easiest kind of easy payments. And show you how easy it is to do business with us at a distance. No collectors or solicitors.

WING & SON
NEW YORK
CONCERT GRAND

YOU OUGHT TO KNOW ALL ABOUT PIANOS

We have in press a magnificent 156-page "Book of Complete Information About Pianos." It will be the most complete and costly book ever published by any piano house. It is a complete encyclopedia of the piano, giving its history and telling about its construction. Shows how to tell a good piano from a bad one. Gives you a good start toward a musical education. Our price for the book is \$1, but by sending now for our other free book, "A Standard Piano," which ought to be in the hands of every music-lover, it will show you how to get the big book free when it comes from the printer. The book, "A Standard Piano," tells in detail the business methods of the old house of WING & SON. Why they send Pianos for free trial—why they can undersell local dealers, and how you can pay for a Piano and not know it.

Cut out here. A pin will do.

WING & SON, 372-385 West 13th St., N. Y.

Send me your book, "A Standard Piano," without any cost to me or obligation on my part.

BROWN FENCE & WIRE CO. DEPT. 3 CLEVELAND, O.

RUGBY ROCKS.

As seen by Louis A. Stahmer, Artist.

"He has been hiding his light under a bushel." If there ever was a proverb that was truer and a subject that fitted it better than Mr. C. E. Spaugh, Rugby, Ind., who breeds the celebrated strain of Barred Rocks which he has named "The Rugby Strain," we would like to have some one call our attention to same, and if we could we would very much like to gratify our eyes, for comparison's sake. About a mile from the depot at Rugby, Ind., in the choicest part of the country Indiana affords, lies C. E. Spaugh's poul-

plenty of birds left that the majority of fanciers would call "A. No. 1."

We saw about 300 cockerels and an equal number of pullets in the orchard that will make some one step lively at the coming shows. Snappy barring with excellent Rock type as close as they can be bred to Standard requirements make his birds look like sure winners to us. It is no wonder then that he captured the best prizes at the Indianapolis Show last September as well as at Springfield in October. His first prize cockerel is a wonder and won easily at both shows and his running mate did the same in her class at Indianapolis.

Mr. Spaugh's motto is: "The best today—not good enough tomorrow," and

"SPAUGH'S RESULT II."

First prize cockerel, Springfield, October, 1909. Indianapolis, September, 1909. Mr. Spaugh conducted a series of experimental mating during 1907 and 1908 and the Result of same will be seen in the above illustration. This is about as close to Standard requirements as B. Rocks have been raised to date. He has hundreds for sale of the same quality.—C. E. Spaugh, Rugby, Ind.

try farm. Barred Plymouth Rocks are Mr. Spaugh's specialty, and especially when it comes to the barring part his birds certainly can deliver the goods. About 800 of the choicest birds of this variety which we have seen for a long time are ready to be sold for the coming show and breeding seasons. Raised under the best conditions, in clean, sanitary poultry buildings, it is no wonder, then, that they were in the pink of condition in which we saw them. We honestly believe that Mr. Spaugh can send birds to a number of shows at once, time an entry for every place, and still have

with this in view he has bred into his birds such uniform quality that his claim of having the best in the West of this variety is well founded. Mr. Spaugh has been breeding Barred Rocks for a number of years, but never has he had better birds than this year. He practices his own system of double mating and his success is due to close application and study of this variety. We asked him why with such fine stock the poultry breeders had not heard as much from him as his birds justify. He told us at that time that he wanted to be absolutely sure of his matings so he could

guarantee his customers perfect results before he did any hollering (and he certainly can holler now. I would employ a callopie and fog horn combined if I had as good birds as he has). We saw a bundle of testimonial letters that contained volumes of praise of his birds. Never has he had any complaints, or birds being returned to him on account of misrepresenting them, and this record he intends to keep. Mrs. Spaugh, who helps her husband in caring for the flock, is as fully posted on the Barred Rocks as a woman ever was, and can pick out a good one when they are a long way off.

Breeding Barred Rocks on his 150-acre farm is Mr. Spaugh's whole occupation. Breeders desiring to improve their stock or wanting show birds or eggs for hatching will do well to correspond with Mr. Spaugh. His new catalogue just out shows a number of his winning birds, views of the place, and contains lots of valuable information and secrets of success of this variety. In issuing this catalogue Mr. Spaugh wanted something better in the printed line than has been used heretofore by breeders of this variety and he certainly has. Addressing for a copy of this catalogue, mail your letter to Box T, Rugby, Ind.

In conclusion we say once more, "He has been hiding his light under a bushel."

WHAT LEADING POULTRYMEN SAY ABOUT BUYING INCUBATORS.

The time will soon be here when many people interested in poultry culture will be considering the various makes of incubators and brooders offered in the advertising columns of the poultry press, with a view to selecting some particular make as their choice of all.

A word right now on the buying question therefore is particularly opportune, and a little review of the incubator and brooder field in general will no doubt interest many readers.

It is so easy to make claims—printed claims—both in advertisements and catalogues that it is little wonder prospective buyers become perplexed. The cheap incubator catalogue reads as strong as the catalogue of the higher-priced machines,

and in many instances stronger in its claim for big hatches, etc.

But there is one pretty sure way to distinguish the quality and also the economy of the successful, satisfaction-giving machines from the cheap, short-lived kind, and that is by the class of poultrymen who are using and endorsing them.

You will find leading poultrymen—the big poultry farms who use hundreds of machines and the State Experiment Stations do not endorse machines that are built merely as a money-making business for the maker. They prefer machines which represent the best thought, experience and research upon the subject of artificial incu-

State Experiment Stations say, and you will be thoroughly convinced of the wisdom of selecting Prairie State incubators, brooders and colony houses for your 1910 equipment.

It is certainly worth a post card to find out what the big people in the poultry world are using and how they are operating their plants. Address Prairie State Incubator Company, 468 Main street, Homer City, Pa.

River Home Poultry Yards, Box B, Perrysburg, Ohio, are now receiving the famous Norwich Feeders and Exercisers in carload lots of 600 each and are selling them faster than they can get them from the factory.

S. C. WHITE ORPINGTONS.

A very select mating found on the Orpington plant of C. S. Byers, Hazelrigg, Ind.

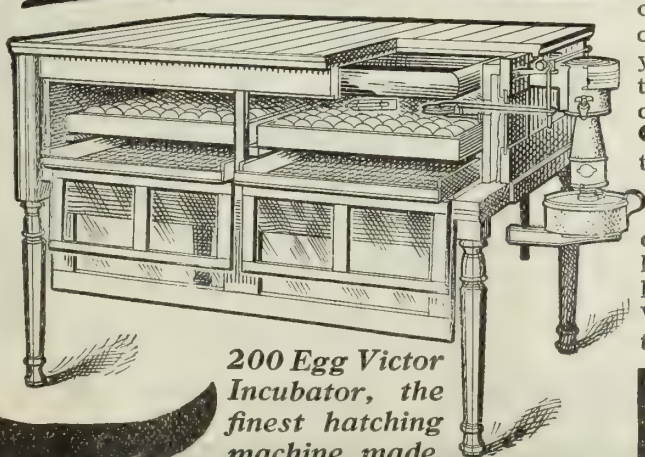

bation, knowing from their own experience that naturally these are the cheapest in the end because the most successful and durable.

If you are thinking of buying incubators and brooders this coming year don't decide on any particular make until you send for the Prairie State Incubator Company's catalogue and read the endorsements from the biggest and most successful poultrymen in the United States—read what the leading

Send to the above address for free circular telling all about the feeder and exerciser. You cannot afford to be without them in your yards another day.

S. M. Dickinson, Granville, Ohio, is making a special of White Rock yearling hens that are grand exhibition birds and capable of winning in any show. Better write him for full particulars if you want something good at a reasonable price.

BEGIN NOW

200 Egg Victor
Incubator, the
finest hatching
machine made.

This is not too soon to plan your poultry work for the coming season.

☛ "The early bird catches the fancy price." ☛ Greatest profits are from first chickens. ☛ Get the best equipment—insure the best results. ☛ Write for Ertel catalog telling why our incubators turn 90 per cent of eggs into chicks. ☛ We will send names of people near you who use Victor Incubators and Brooders—you can ask them what our machines do. ☛ Please write us today.

We can save you money. The lumber, copper and fittings we are putting into our machines this season we bought one year, two years or three years ago, before the present high prices. ☛ We do by machinery what others do by hand labor. ☛ The result is a lower price to you for the same quality of machine. ☛ We use seasoned lumber, we put heavy copper into our tanks and boilers. We build carefully—our doors fit and close tightly, our lamps burn clear and bright, our regulator keeps the temperature at 103 degrees. When you get the Victor you get machines that will hatch and raise chicks. Estab. 1867.

CAN THE COSTS OF FEEDING BE MADE LESS EXPENSIVE?

There is probably no subject in poultry culture that is being more deeply considered by the thinking poultryman than the feeding of his flock with the grain market at the price it has been for several months past, and is likely to be for many months to come. The demand for grain products has increased so rapidly, perhaps owing to the increase in population of the United States and the demands which are made on us from abroad, that the prices now ruling for grain has a most vital effect on the poultry industry of the country, and the thinking poultryman is giving the subject great consideration and thought.

With grain at its present price it is almost suicidal to undertake to run a poultry plant and be obliged to feed the enormous flocks of sparrows which make their home with the poultryman and the army of rats and mice that find a comfortable shelter within his houses. In some of the larger poultry plants it is estimated that the flocks of sparrows hovering over the farm will count up into the millions. We know of one farm that estimates at least two million sparrows that are constantly with them. When one stops to consider the appetite of the sparrow and the quantity of food he can consume in proportion to his size, it is appalling. The ravenous appetite of the rat and the amount of food he can consume is positively discouraging, and when one stops to consider that the poultryman is buying grain which is, apparently, worth almost its weight in gold, is it surprising that the thinker in the poultry trade is deeply interested in so vital a subject?

Several of the well-known poultry publications are taking up this subject, and we feel that it would be interesting to our readers to have us treat the matter and offer suggestions that would effect a necessary saving.

There are numerous devices on the market for feeding, but there seems to be but one machine which has the advantages of being wholly automatic in its action and positively rat and bird proof. Exhaustive tests of the capabilities of this machine have demonstrated the fact that it effects an enormous saving over the method of ground feeding and as the feed within the hopper

is protected from dampness, is beyond the jumping ability of the rats, and as it is mounted on iron legs, beyond the climbing abilities of both rats and mice, it has its distinctive advantages over the numerous home-made devices employed in many yards. Some of the larger yards have been equipped with this machine and the results in saving have been most surprising.

A conservative estimate places the waste in poultry yards at 25 per cent in grain fed to rats, birds and mice, the loss of grain overfed at roost time which is left

Exhibition Barred Plymouth Rock pullet, owned and bred by S. T. Divinia, R. R. 2, St. Joe, Mo.

on the ground over night and dampened by rain or heavy dews, and numerous other causes, to say nothing of the loss sustained by the characteristics of the hen to overfeed because she sees the grain before her. If every grain of feed purchased by the poultryman could go into his flock and do

its portion of good grain, even at its high price, would be considerably less expensive.

This is exactly what this truly wonderful machine accomplishes—every kernel of grain placed in its hopper goes into the flock, and it is absolutely impossible for a grain to be wasted from any cause, unless the plant is visited by fire.

We feel, under the existing circumstances, it is due to the poultry industry to depart from our usual custom and state frankly that the machine in question is the Norwich Automatic Exerciser and Feeder, for it will in a very large measure simplify the absorbing question of the expense of feeding.

Your hints on styles and dressing have always interested and helped me. Now I want to ask if you can suggest a pretty yet inexpensive material for a house-dress?

Mrs. A. M. Grateful.

Thank you for your appreciation of our help. We are always glad to be of service to our friends.

I think you will find Simpson-Eddystone Prints as pretty a cotton dress goods for the house as anybody need want. They are made by the Eddystone Manufacturing Co., Philadelphia, and may be had at most all dry goods stores. With a little simple trimming you can make a charming gown of these goods at a really nominal outlay.

The Silver Greys, for instance, come in an almost unlimited variety of beautiful designs, as do the Black and Whites also. And the colors remain fast after being washed repeatedly; perspiration even doesn't seem to move them.

I hope this hint will enable you to secure the kind of material you are looking for, and I have no doubt but what it will.

On November 10 we received the following letter from Simmons Bros., Stockton, Ill., the well known breeders of Golden Wyandottes:

"Stockton, Ill., November 9, 1909.
"American Poultry Journal Publishing Company, Chicago, Ill.

"Gentlemen:—First inquiry (box 880) received yesterday, and today three more! Let the good work go on.

"Yours very truly,

"Simmons Bros."

P. S.—First insertion of their ad was given in our November issue.

POULTRY PROFITS INSURED

YOU can insure your poultry profits without cost if you will use the "Tycos" Thermometers in your incubators and brooders. "Tycos" means "Temperature Insurance." A "Tycos" Thermometer does not cost any more than some others, but a cheap Thermometer is dear at any price, for it's unreliable. If you use an inferior Thermometer you will undoubtedly have little or no success with your poultry. If you use a "Tycos" your profits are assured.

The skill and experience of nearly 60 years is back of every thermometer we manufacture.

We have studied the temperature requirements in artificial incubation for 30 years. To insure permanency in Thermometers, the tubes must be thoroughly seasoned—glass after cooling contracts slowly for a long period of time—slightly diminishing the size of the bulb. This

contraction is eliminated in "Tycos" Thermometers by storing the finished tubes. Thermometers may look alike, but it is the hidden quality that counts for

ACCURACY—STABILITY—PERMANENCY

We carry in stock,—ageing, 200,000 Incubator Thermometer Tubes. Every "Tycos" Thermometer Tube is entirely free from air; placed in horizontal position the column of mercury will draw back to the bulb.

It's the character of the tube that counts—hidden qualities.

The Thermometer is the smallest part of your incubator investment—the best incubator is no better than the poorest, and fertile eggs prove sterile if the Thermometer is wrong—see that your Thermometers are branded

"Tycos"

Many prominent incubator manufacturers supply "Tycos" Thermometers exclusively, for they learned years ago that it was good business judgment to use only the best.

When you buy an incubator see that it has a "Tycos." If it does not, insist upon having a "Tycos." Write to-day for booklet, "THERMOMETER FACTS." It's FREE.

It's the Taylor
Brand of Quality

Taylor Instrument Companies, Rochester, N. Y.

THE PHILO POULTRY INSTITUTE.

The accompanying illustration shows the new and commodious home of the Philo National Institute at Elmira, N. Y. This building is at once beautiful, convenient, pleasant and healthful. There is nothing like it to be seen anywhere, and it is by far the largest institution to be devoted entirely to poultry instruction, poultry raising and their allied interests. It is situated just inside the city limits on a thirty-acre tract, which is of light gravelly soil, and the portion devoted to the poultry coops and yards is adjoining the main building and slopes toward the south. Many fruit trees, grapevines and sunflowers will furnish shade in summer, and the walks about the institute and between the coops are of cement.

Its founder, Mr. E. W. Philo, has spent over thirty years in poultry culture, and in establishing the Philo National Poultry Institute he is offering to the world at a

Mr. Philo has been aptly termed a wizard in matters pertaining to poultry, and it may be said that he is also of the "Missouri" sort. Nothing of a doubtful nature in his breeding or school work is allowed to go unchallenged, and his many experiments have been put to the most crucial tests before being given to the public as facts. He is constantly studying and working along new lines.

Again, Mr. Philo is and has been making money from his poultry, largely on account of his knowledge of successful advertising, backed by his years of study and experience. It is surely worth while to be under the instruction of one who has solved the financial part of the business. Even if poultry is kept only as a fad or recreation, it is desirable to know how to make it return at least part of the outlay in dollars and cents.

The Philo National Poultry Institute has two courses—the resident course and the correspondence course. The students of the

the same way. The mails carry the questions and answers back and forth, and precisely the same text books, blanks, questions and reports are used as by the resident students. The correspondence students have the privilege of asking any questions desired, blanks being furnished for the purpose, and this course is conducted by instructors that are in daily attendance at the institute.

To the city resident who keeps a few fowls for pleasure or profit, to the men or women who devote their whole time to the business, to the farmer who wishes to perfect and add largely to that now important branch of farm products, or to those who wish to become proficient in the science of poultry culture with a view of securing good paying positions, the Philo National Poultry Institute offers equal advantages.

The building is three stories high, with over 25,000 feet of floor space. The foundation is of concrete, and the building is constructed of concrete stone and cement

PHILO POULTRY INSTITUTE, ELMIRA, N. Y.

nominal charge the benefit of his years of work and experience. For several years he has been giving instruction in poultry raising, and the practical success of his students, together with the many requests for a first-class correspondence course, has led to the building of a new school with facilities for doing better work and providing superior accommodations.

Nearly 100 per cent of the failures in the poultry business have been caused by lack of training along practical lines. No one would think of embarking in any other profession without ample preparation for the work, but it seems to be the popular opinion that anyone can buy a few fowls, build for them a yard and coop, throw them a little feed occasionally, and then proceed to gather the eggs and market the broilers. In the poultry business, as in other lines, there are certain "fixed conditions" which not to know or to ignore means ultimate failure.

resident course are at the institute personally and come in daily touch with Mr. Philo and also the other instructors, who are also trained men and women of ability, willing and anxious to extend to them every help possible, and are right "on the spot" every day. The great keynote of the school is to avoid frills and superfluous instruction and to be in every way practical. Mr. Philo believes in the trite saying that "it is better not to know so much than to know so much that isn't so."

Students can rest assured that what they learn at the Philo National Institute will not have to be unlearned.

The correspondence course differs from the resident course mainly in not having the instructor at all times present with the pupils. Under this plan the school goes to the student and not the student to the school. The pupil asks all the questions in writing, and the teacher answers them in

brick. The first floor front is devoted to the institute's large and well equipped printing establishment, where the text books, forms, catalogs, record cards, poultry account books and advertising matter are printed. This department is complete in itself and insures the students the best material with which to work and at the same time gives them a knowledge of the most approved forms of printed matter for use in the different branches of the poultry business. The rear of the first floor is equipped with modern woodworking machinery, and the students receive instruction in making the Philo System coops, brooders to be used without artificial heat, shipping crates, etc. Also, on this floor extending underground, is the boiler room from which the entire building is heated, with an approved hot water system.

On the front of the second floor are situated the general offices of the institute, re-

\$750 For This 120-Egg Ideal

FREIGHT PREPAID

Write for Low Prices On
Larger Sizes, DELIVERED

I am quoting the only real cut prices of the year.
Let me prove it. I am quoting on quality
machines and I am paying the freight.

Don't buy a "cheap" machine when you can get this big Ideal for \$7.50, freight paid. And don't pay more, because you can't get better value at any price. Ideals are better than ever this year, and this is why:—They are covered all around—front, back, sides, top and bottom, with 22-gauge galvanized iron. They are safe hatches, and the metal cover holds the heat better—saves oil. The ideal regulator is a marvel of accuracy; ventilation automatic; walls of triple thickness and dead air space; double door; most improved copper heating system; large, safe, smokeless lamp.
Write today, for low, freight-paid prices on incubators and brooders of all sizes, and a free copy of my big poultry book. Everybody says—

Miller's Book Beats Them All

Anyhow, I've put my 30 years of "know how" into it, and that ought to help any poultry-raiser to larger profits. It contains full-page cuts of Standard-bred poultry—finest you ever saw; also my guarantee and prices that will save you big money. \$7.50 for 120-egg is a hint of other things. This is my delivered price to all points east of Missouri River and north of Northern boundary of Tennessee. If you live beyond, write for price delivered to your R. R. Station. Send name and address for books and get all the facts. Address, J. W. Miller,

J. W. Miller Company, Box 56, Freeport, Illinois

ception room and offices of the correspondence school. At the rear of this floor is the large packing and shipping room, where instruction is given in packing and shipping baby chicks, eggs for hatching and in crating and shipping fine fowls.

On the third floor is the laboratory and auditorium or lecture room, where frequent talks are given to the students by Mr. Philo and others. It is here and in the poultry yard that the students learn to know Mr. Philo best and to appreciate his wonderful personality and knowledge of the poultry business. On this floor is also the library, where may be found files of all the leading

crete shelf to accommodate the hatchers. ing, on the north side of which is a con. On the south side are arranged the coops, communicating with the outside runs. There is running water throughout the building and a faucet for each pair of coops. The building will be heated to 70 degrees, and the chickens are brooded without artificial heat.

The windows in front of the coops are made to slide up and down, and the upper part of the top half is fitted with a muslin screen. The fronts of the outside runs are fitted with muslin screens, and over the top are hinged sash, similar to those used in hot-beds.

FROGDALE POULTRY FARM, FRENCH LICK, IND.

Situated in a beautiful valley of southern Indiana, the French Lick Springs gush from the rocks amid the most charming and picturesque surroundings.

Noble ranges of hills rear their summits on either hand, while long vistas of valley and upland, of billowy forest, purling brook and grassy meadow stretch away to the horizon, forming an ideal setting for Frogdale Poultry Farm, which is one of the most complete plants in the State. All the buildings face the South and are protected on

A PARTIAL VIEW
Frogdale Poultry Farm
FRENCH LICK, INDIANA

poultry papers, poultry books and copies of the leading magazines. The students have free use of the library for reading, writing or studying. Running water, cloak rooms and toilets are on every floor.

The power house is 21x31 feet and furnishes electric lights for all the buildings and power for the machinery.

The hatcher and brooder house is 12x106 feet and is two stories high and is constructed of concrete and cement brick. The building extends east and west, with coops and runs on the south side. A four-foot passage runs the entire length of the build-

The second floor is used for storage purposes, also on this floor is an office, where pedigree records of the thoroughbred stock are kept, and complete records of tests made regarding the value of different foods, etc.

Altogether, it has been the aim of the institute so to plan the structure that it will amply serve for school purposes, giving sufficient room to move about without undue interference, and at the same time providing suitable and safe quarters for the hatching apparatus and baby chicks.

The institute's new prospectus is just off the press and will be mailed for the asking.

the North, East and West from winds and storms. The drainage and sanitary conditions are perfect, as the illustration shows, and it is certainly an ideal spot for poultry raising.

The large hotels at French Lick and West Baden use the entire output of the broiler plant and all surplus ducks and turkeys not used for breeders. The culls are therefore all disposed of and there is no opportunity for them to enter the breeding flocks.

George C. Thayer, the proprietor, is always ready to welcome visitors and exhibit his "Pluto" strains of White Wyandottes,

240-Egg Reliance *Freight Prepaid* \$10.00

OVER 200,000 have succeeded with this machine, and now it is still further improved. Metal-covered all 'round—front, back, and sides, top and bottom—high-grade galvanized iron. Also metal legs and metal lamp. The **safest** incubator built; the easiest to heat; the surest to keep at exactly the right temperature. Simple as A B C; self-regulating; self-ventilating. Lumber Walls, dead air space, insulating walls, metal walls and double wooden doors—metal-covered. All complete, ready to start your hatch; no extras to buy, and freight prepaid.

RELiance INCUBATOR CO., Box 550, FREEPORT, ILL.

Leghorns and Rocks, Barred Rocks, White Holland and Bronze Turkeys, Indian Runner and Pekin Ducks. The Indian Runners are beauties and began laying November 8. The illustration gives an idea of the appearance of these famous ducks. Fourteen large incubators are in operation continuously, hatching chicks and ducklings and turkeys in season.

The breeding of the Edible Frog is another attraction from which the farm derives its name, and as "Pluto" is known the world over as a famous mineral water, he has applied the "Pluto strains" to his various breeds.

The farm comprises forty acres and is sown in rye, kale, rape, etc., and the finest forage is abundant the year around. There is an oat-sprouting cellar which is operated summer and winter and furnishes quantities of nourishing green food. The large feed house shown in the illustration is complete with power, steam cookers, feed grinders, range, clover and bone cutters, etc., as well as a water system that distributes fresh water to all the buildings and yards.

It is certainly a plant worth seeing and stock from this farm is strong and vigorous. Orders are now being rapidly booked for Indian Runner eggs and are filled in rotation.

"Frogdale" Booklet is now ready and will be sent upon receipt of request.

E. C. Allison, now one of the largest breeders of Buff Plymouth Rocks, has recently moved from Hope, Ind., to Edinburg,

Ind., where he has taken charge of the Edinburg Courier. Mr. Allison is also still owner of the Daily and Weekly Journal published at Hope, Ind., where he fell into the way of breeding fancy poultry, which seems to be in the atmosphere in that famous town in the poultry world. His moving to Edinburg did not lessen his love for poultry however, and he is still in the game of rearing his "World Wide Winners of Buff Rocks." Mr. Allison comes out in the December issue of American Poultry Journal with increased space which paper he says is giving him good returns for his money. He has several hundred birds which he is offering for sale at reasonable figures considering his winning at some of the leading shows and we can recommend him to anyone wanting Buff Rocks for either show or utility purposes. If you are in the market for Buff Rocks it will pay you to send for the Allison price list and record.

The Blue Ribbon Poultry Farm, Columbus, Ind., Carl J. Carter, proprietor, begins a yearly display ad. in our columns this month. Mr. Carter has been breeding high grade S. C. Black Orpingtons for several years and recently purchased the entire flock of Dr. B. F. Dudding, Hope, Ind., who is well known to our readers. It will no doubt be remembered by many of our readers that the foundation stock of Mr. Dudding's flock came directly from the yards of White & Goodacre in New Jersey, the breeders who caused so much excitement in Black

Orpingtons a few years ago by producing some of the grandest birds of this variety ever seen at a show in America. These facts are made mention of here only to impress upon our readers the quality of stock they may expect to see or get at the Blue Ribbon Poultry Farm.

They are putting in a 6,000 egg capacity incubator, and brooding capacity for about 2,000 chicks and intend to raise some two or three thousand birds for sale next year. Mr. Carter intends to put enough money into the business to put the Black Orpingtons at the top in the course of a very few years.

We are pleased to make this announcement, for we believe the Black Orpington is one of the most beautiful fowls on earth, and it goes without saying that they are useful, as they are good layers and make an excellent table fowl.

Write the Blue Ribbon Poultry Farm, Columbus, Ind., for further particulars, and mention American Poultry Journal.

DON'T PASS THIS BY.

The Coleman Company, Carey, Ohio, have a large display ad. in this issue. It is of interest to every breeder of poultry. Look it up.

You cannot do better than to write H. W. Halbach, Watford, Wis., for prize winning White Plymouth Rocks. Mention American Poultry Journal.

Make Your Hens Lay

When Eggs Are Worth Most

HENS relish juicy bugs and worms because these supply the protein feed they require to make eggs. The craving for meat and bone food—protein feed—is simply nature working out the egg-laying proclivity. Hens **must** have food rich in protein or egg-making elements, or it will be impossible for them to lay.

Our little book tells you all about the how and why of this. It makes you master of egg-getting. It's a book that opens up to you the real possibilities with poultry.

It's simply a matter of knowing what food to supply and how to prepare it. It is now established beyond all doubt that raw, green bone, with adhering meat and gristle, cut fine, is the ideal egg-producing food. Its cost is a mere trifle and its preparation is easy with a

Mann's ^{Latest Model} Bone Cutter

Sold On 10 Days' Free Trial—No Money Down

It turns easily and rapidly, cutting green bone, with adhering meat and gristle, wasting nothing.

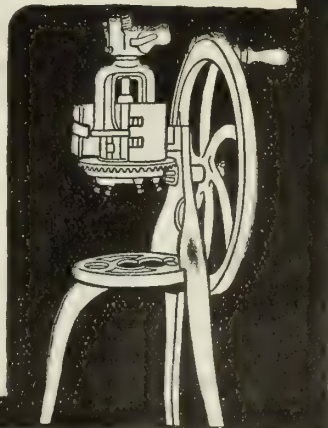

Its self-governing feed automatically adapts the cutting to your strength, so that anyone can use it.

Its open, hinged cylinder is easily cleaned, and it takes in large bones. It is strong, durable, and requires few repairs. We want you to try one.

We will send you a Mann's Latest Model Bone Cutter on **10 Days' Free Trial**—no money down. If satisfied after the trial, buy it. If not, return it at our expense.

You want our good books, at any rate, send for them. We'll forward by return mail.

MAPLE LAWN POULTRY YARDS,

WM. H. HOOVER, POLO, ILL.,

BARRED ROCK SPECIALIST.

We found Maple Lawn Poultry Yards very splendidly located one and one-half miles out from the pretty little town of Polo, Ill. Mr. Hoover, the owner, is a Barred Rock specialist, and is ably assisted by Mrs. Hoover, who has been brought up with thoroughbred poultry all her life. The Hoovers have been carefully and successfully breeding Barred Rocks of high exhibition quality for the past fifteen years, and it was certainly a grand sight to see their large flock of over 500 head of young birds coming from all directions when called by Mrs. Hoover on our visit at their farm.

We certainly were pleased with the grand quality which we saw in their flock, which we found exceptionally strong in many points. Particularly noticeable was their grand strain of cockerels. One of the noticeable features was the clean yellow legs and bills free from black. They also had large size, heavy bones and were a vigorous lot of birds, free from sickness

first, second, third, fourth cockerel, first cock, first pen, best display, club specials and other special prizes. These winnings have been made under nine different judges and, as you see, extend back for a period of six years, which is convincing evidence that the Hoover strain of Barred Rocks has been carefully bred and mated during this time and have been able to reproduce show specimens each year.

As we mentioned before, they are in position to supply you fine specimens in young stock for either exhibition or breeding purposes, and they also have a few breeders which they will dispose of. All stock sent out by them must come up to the descriptions which they send you, being fully guaranteed, and can be returned if unsatisfactory. You should look up their ad elsewhere, which will appear regularly in our columns, and write them, addressing William H. Hoover, Polo, Ill.

Frogdale Poultry Farm, George C. Thayer, proprietor, French Lick, Ind., have just issued a 20-page booklet about the "Pluto" strain White Wyandottes, White Plymouth Rocks, Barred Plymouth

**LADY CHARLOTTE.**

Single Comb Black Minorca pullet, winner of first prize and special State trophy at Chicago, Ill., and Indianapolis, Ind., 1909. Owned by Charles G. Pape, Fort Wayne, Ind.

or disease of any kind. The color is exceptionally good, the barring narrow, even and regular, and their pullet line was close up to their cockerels.

A further testimonial of the quality of their Barred Rocks is the following winnings: At Polo, 1904, they won four firsts and best display; at Polo, 1905, first cockerel, first cock, sixty-nine cockerels competing; Evanston, 1905, three firsts, one second; Oregon, 1906, four firsts, one second, two thirds, two fourths, one fifth, best display, club specials and grand sweepstake prize; Oregon, 1907, three firsts, three seconds, one third, and many other important prizes at several other shows in hot classes during this year; Oregon, 1908, three firsts, two seconds, three thirds, two fourths, best display of parti-colored varieties; Rockford, 1908, four firsts, two seconds, one fourth and club specials, also many other prizes; at Rockford, 1909, in a class of 130, they won first cock, second cockerel, second and fifth pullet, first pen, club specials; at Dixon, 1909, second cock, second and third cockerel, first pullet, third and fourth hen, first pen; at Polo, 1909,

Rocks, Single Comb White Leghorns, Indian Runner and Pekin ducks, Mammoth Bronze and White Holland turkeys, imported edible frogs, Belgian hares, Scotch colliers, Irish setters and ferrets. This booklet will be sent to you if you will send your name and address and mention American Poultry Journal.

Mr. Alfred G. Clark, proprietor of Ridge View Farm, the home of the Practical Reds, Willoughby, Ohio, writes us that this year they have the best breeding stock in the history of the farm.

They are making a particularly attractive offer of eggs for breeding purposes, delivering from every pen, insuring the purchaser of getting very much above the average value for his money.

Mr. Clark's Reds made a very handsome winning last year at the big Cleveland, Ohio, show and also other large shows.

H. W. Halbach, Waterford, Wis., the White Plymouth Rock man, is prepared to supply you with birds that will win in the hottest competition.

THE OLDEST HOUSE IN THE BUSINESS.

It is over thirty-seven years since Montgomery Ward & Co. originated the idea of inviting the people to order goods by letter and of issuing a printed "store" to be sent to all parties who desired to make a selection. It was in response to the Grange movement, back in 1872, that this first centralized warehouse ever known was established. Here goods of all kinds, bought from the manufacturers, and thus eliminating all middlemen, are on sale direct to the people at less than usual prices. The growth of their great business is generally well known. Their customers now reach into the millions. Not only were they the very first house to start a mail order business, but they have steadfastly maintained their supremacy.

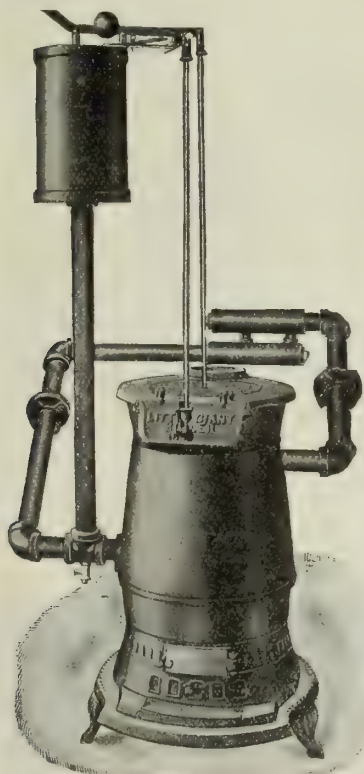

This month's issue contains a large announcement of their poultry supplies, and an invitation to each of our readers personally to send for a copy of their new, large catalog, which will be sent free and prepaid. They are now occupying their new, large, nine-story building at Kansas City as well as their new 50-acre building at Chicago Avenue Bridge, Chicago. The Kansas City house is for the convenience of parties living west and south of that city, which saves time and freight cost to a very large number.

You are invited to order supplies direct from their advertisement and at the same time to request that a copy of the new catalog be sent you. Write your name and address plainly and mention this paper, as a courtesy to us.

CANDEE BROODING SYSTEM.

After years of effort the Candee Hot Water Brooder Company, DeWitt, N. Y., have perfected a practical pipe brooding system that is unlike anything on the market and far in advance of the overhead systems so commonly in use today.

A Candee Hot Water Brooder Outfit consists of a Candee hot water heater and automatic temperature regulator that de-

pends not upon thermometrical control in the hovers, but upon the heat of the water in the system itself, carefully planned piping and arrangement of hovers.

This system has demonstrated its superiority in practical tests and is rapidly being installed in some of the largest plants in the country. Send for booklet to the Candee Hot Water Brooder Company, DeWitt, N. Y., and mention American Poultry Journal.

POULTRY
IN VIRGINIA

Good Land \$10 and Up PER ACRE

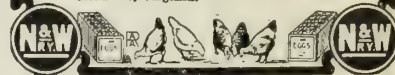

A steady market and good prices place Virginia FIRST as a poultry-raising State.

The Diseases of Cold Climates are Unknown

Virginia's soil, roads, schools and churches are excellent—her hospitality is unsurpassed.

Send to-day for booklet and additional information about Virginia.

Address F. H. LA BAUME, Agricultural and Industrial Agent Norfolk and Western Railway, Dept. B 51, Roanoke, Virginia.

POULTRY HERALD

Has it

If it's worth knowing you'll find it in Poultry Herald (every issue copy-right) edited by experienced poultrymen only, published monthly, 22 years old, full of illustrations, 50 cents a year. Each month it tells just what you want to know then—about fowls, chicks, turkeys, ducks, geese, diseases, poultry shows, houses, coops, answers questions free, etc. You can't go wrong if you read it. We want you to try it and we'll send FREE with your subscription, at the regular price of the paper, one (your choice) of these necessary poultry books: "Poultry Manual," all about the breeds, etc.—"Poultry House, Coops, etc." (50 plans)—"Simple Poultry Remedies"—"Egg Money, How to Increase It"—"Chicks, Hatching and Rearing"—"Turkeys, Ducks and Geese."

Address POULTRY HERALD, Dept. C, ST. PAUL, MINN.

Multiply Your Egg Income By FIVE!

Multiply your egg income by FIVE. You can do this and, to learn how, you do not need to be in the market to buy anything. Simply tell me without delay that you raise chickens and I will present you, free, with my compliments, my comprehensive Manual of Poultry Facts and Secrets, just published—**"Making the Golden Egg."**

This Book explains the HUMPHREY WAY and tells how to make hens lay all winter.

How to get 150 to 250 eggs a year a hen—how to get the finest egg-making food right in your own home town for almost nothing—how to start lazy hens laying—how to get eggs for early setting—how to get fertile eggs—how to raise chickens for the March market—how to shorten the moulting period—how to feed fresh cut bone—how to multiply your poultry income by five.

"I can make your hens lay more eggs this winter than they ever laid in summer."

Man wrote me recently that, by the HUMPHREY WAY, he averaged 50 eggs a day all winter from 70 hens, often getting 58 in one day. He considered that a remarkable record, but it was no better than anyone should expect who knows and follows the HUMPHREY WAY.

If you have 10 or more hens it will pay you well to learn the HUMPHREY WAY, to know which costs only a cent.

Rush your name in by postal for "Making the Golden Egg"—FREE. You can multiply by five the winter value of every hen on your place. Write me.

HUMPHREY

White Street Factory, Joliet, Ill.

I made the Humphrey Bone Cutter, the Humphrey Clover Cutter, the Humphrey Brooder—the brooder that saves chick life—the Humphrey Grit Crusher, the Humphrey Corn Sheller, the Humphrey Dry Bone Mill and other Poultry helps. Please advise me if you are interested in these.

INCUBATOR LAMPS

For years we have made lamps for the largest and most prominent incubator manufacturers in the world. Seamless bowls galvanized after drawing; either in knock-down shape or assembled and finished. Our long experience counts. A good range of sizes.

Heating System

A warm air pipe system for incubators and brooders. An advanced idea, time tried and tested. These and our finished lamps extensively handled by dealers in poultry supplies.

Drinking FOUNTAINS

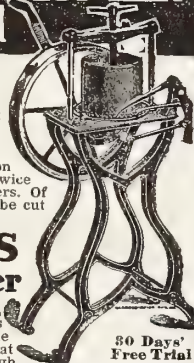

In two styles and six sizes, galvanized after finishing, and the best line of fountains yet produced.

Double Your Egg Crop Guaranteed

Make this test. Divide your fowls into two lots. Feed one lot the same as usual. Give the other lot one-half ounce of green cut bone per day. We guarantee that within a month the fowls fed on green cut bone will lay twice as many eggs as the others. Of course the bone must be cut with a

STEARNS Bone Cutter

which we will lend you, free, for the test. It is the only machine made that cuts green bone, meat and gristle fine enough without making splinters or chunks. The Stearns is the strongest, easiest running, fastest Bone Cutter. It is absolutely automatic feeding, self-cleaning and cannot become clogged. Let us send you full details of our 30 day free test. Write to-day for our catalogue and booklet "How to make Poultry Pay."

E. C. STEARNS & CO., Box 5, Syracuse, N. Y.

SUCCESSFUL EGG FARMING

**200 Eggs
a Year
Per Hen**

HOW TO GET THEM

THE seventh edition of the book "200 Eggs a Year Per Hen," revised, enlarged, and in part rewritten, 96 pages. Contains among other things the method of feeding by which Mr. S. D. Fox of Wolfboro, N. H., won the prize of \$100 in gold offered by the manufacturers of a well-known condition powder for 1st egg record during the winter months. Simple as a, b, c, and yet we guarantee it to start hens to laying earlier and to induce them to lay more eggs than any other method under the sun. The book also contains a recipe for egg food and tonic used by Mr. Fox, which brought him in one winter day 68 eggs from 72 hens; and for five days in succession from the same flock 64 eggs a day. Mr. E. F. Chamberlain, of Wolfboro, N. H., says: "By following the methods outlined in your book I obtained 1,456 eggs from 91 R. I. Reds in the month of January, 1902." From 14 pullets picked at random out of a farmer's flock the author got 2,999 eggs in one year—an average of over 214 eggs apiece. It has been my ambition in writing "200 Eggs a Year Per Hen" to make it the standard book on egg production and profits in poultry. Tells all there is to know, and tells it in a plain, common-sense way.

Price 50 cents; or with a year's subscription to AMERICAN POULTRY ADVOCATE, both for 75 cents; two years' subscription and book for \$1.00, or given free as a premium for two yearly subscriptions at 50 cents each. Our paper is handsomely illustrated, 44 to 84 pages, 50 cents per year. 3 months' trial, 10 cents. Sample free. CATALOGUE of poultry books free.

Standard Prints

Old-fashioned honest quality of our grandmothers' time is still in these standard calicoes after more than 65 years—

Simpson-Eddystone Prints

Beautiful new designs, printed in colors that will not fade, on cloth of exceptional quality, make these the cotton dress-goods of enduring service.

If your dealer hasn't Simpson-Eddystone Prints write us his name. We'll help him supply you.

The Eddystone Mfg. Co., Phila., Pa.
Established by Wm. Simpson, Sr.

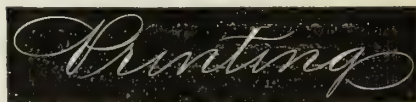

75c Pays for one year's subscription to American Poultry Journal, Western Poultry Journal and Farn-Poultry. See advertisement elsewhere in this issue.

Ideal Aluminum

*** Mated pair kissing. Eggs to squabs in four weeks ***

Write to-day for our 1910 Free Book, handsomely printed and illustrated, How to Make Money Breeding Squabs. (Cloth-bound book now 303 pages, 114 illustrations; it's great.) Ask for special offers with express and freight prepaid. **PLYMOUTH ROCK HOMERS and CARNEAUX** are the standard everywhere. Read stories of customers who started small with our prolific pairs and now have big flocks. We were first, the originators. The greatest success of the twentieth century in feathers. We take subscriptions for the new splendid National Squab Magazine (monthly). Specimen copy mailed for ten cents. **PLYMOUTH ROCK SQUAB CO.**
414 Howard Street Melrose, Mass.

Great International Show

OF POULTRY, PIGEONS AND PET STOCK

Buffalo, N. Y., January 25 to 29, 1910

A card addressed "INTERNATIONAL SHOW" 309 BRISBANE BUILDING, BUFFALO, N. Y., will bring you a Premium List, December 10, 1909.

SIMPLE

The only piece inside Sharples Dairy Tubular bowls.

Manufacturers of common cream separators put 40 to 60 disks, or even worse contrivances, into an old-style bowl and call it simple and modern. The 52 disks shown on the sticks below are all from one such bowl. These contraptions must all be washed twice daily.

But Sharples Dairy Tubular bowls have nothing inside except the tiny, instantly removable piece shown above on the thumb. And Tubulars and out-class all other separators. That is because Tubulars are different—the only simple, sanitary, modern separators made—the World's Best.

52 Disks from one Common Bowl.

World's biggest separator factory. Branch factories in Canada and Germany. Oldest separator concern in America. Sales exceed most, if not all, others combined. Tubulars probably replace more common separators each year than any maker of such machines sells.

SEE THAT "XX"
POINT TO THE WAY
START RIGHT
YOU END RIGHT
The strongest chicks are those hatched from "xx" eggs, and when carefully incubated, practically all hatch, and the chicks being covered with heavy fuzz, are tough, and do not crowd. Substantiated by tests at the largest poultry farms in America, with proof, also, that "The MAGIC TESTER shows the weak and unhatchable eggs BEFORE incubation," thus preventing their use in time.

Incomparable Testimonials

Early winter eggs hatch poorly, because they are weak. Don't wait, order now. Your hens are just right when their eggs test "xx," and not before. "Strongest germs are in the strongest eggs." Nothing to lose, everything to gain. Fully guaranteed.

Cost saved before hatch begins

By mail, postpaid on receipt of \$2.00. Test daily while bringing the eggs up to full strength, when a further trial of sixty days (after the first hatch) will be given, and if not satisfied money refunded. Newest facts on incubation with every Tester.

MAGIC EGG TESTER WORKS

Dept. B. BUFFALO, N. Y.

HIGHEST SCORE EVER WON

100 Envelopes, 3 1/2 x 6 1/2 inches, an extra strong, thick, smooth, slick, white writing face, and 120 Letterheads, 8 1/2 x 11 inches, heavy, hard, smooth, slick, pure white writing paper, all artistically printed and illustrated with latest new Standard cuts of your breed for only \$1.00. Express charges paid by me. Better printing for the price was never done. No order less than \$1.00 filled. Name your Express office. Cards, tags and egg labels same price as above.

Address, J. R. HUDSON, Hardin Springs, Ky. I have seen samples of Mr. Hudson's printing. It is very nice; he is perfectly honest.—EDITOR

More Winter Eggs from Less Feed

This Poultry Fountain will keep water warm for 36 hours in ordinary weather. It's built like a Fireless Cooker—works like a "Thermos" bottle. When water, always pleasantly warm, is kept before them in winter, the egg yield doubles and trebles. All the food goes to make eggs. None is wasted keeping the fowls warm and active. Cold water in winter chills the fowls and thus freezes dollars right off your pocket. Our FREE BOOK gives the experience of successful Poultrymen with this wonderful invention. Ask for it.

Weldon's Fireless Poultry Fountain and Hopper Feeder

The Hopper Feeder is the only one which allows the fowls to feed as nature intended—that is, little and often and as appetite dictates. There is no possibility, as there is with other Hoppers, for the strong to crowd away the weak and no opportunity for the greedy fowl to gorge itself to its own undoing. There are holes in the side of the Hopper just large enough to allow the grain to go through without flowing. These holes are made smaller by a metal band which slides up and down. The grain must be picked from these holes by the fowl. Every one shares alike. Dropping grain is caught in the trough. None is wasted.

Try One or Both, 10 Days At Our Risk.

Our valuable book—sent FREE for the asking—gives results from experiments so remarkable that every poultry raiser will want to make them for himself. To make this easy we will send either the Fountain or the Combination Outfit for 10 days' use at our risk, without the slightest obligation to keep it unless you choose. Say when you write whether you would like to try the outfit or read the Book first. Be sure to answer this "ad," as trial outfits must be sent out in the order requests are received. (2)

"The Best Dealers in Poultry Supplies Carry It"

Huffman's Bluetie-Barred Plymouth Rocks

Have won in strong competition at the best shows for over sixteen years. Grand breeding cockerels and pullets for sale at reasonable prices. Exhibition birds that will win, the finest I ever bred down-to-date.

A. D. Huffman, Route 33, Wanamaker, Ind.

CLASSIFIED ADS

UNDER this heading ads will be inserted for six cents per word each month for less than three months, and four cents per word each insertion for three months or longer. Changes in copy allowed every three months. Numbers and initials count as words. All ads will be inserted under classified headings. No ads accepted at less than an average of fifty cents per insertion. Terms, cash with each ad. Count the words carefully to avoid delay in publishing. Write your copy plainly, as upon this the correctness of your ad largely depends. When placing your ads remember that advertisers of Classified Ads get better returns from AMERICAN POULTRY JOURNAL than from any other poultry journal—none excepted. On writing any of these advertisers mention A. P. J.

ALL COPY FOR CLASSIFIED ADS MUST REACH US BY THE 19th OF THE MONTH PRECEDING DATE OF ISSUE

**Cure Your Fowls of**

Cyphers Poultry Remedies Case contains ten remedies, each in a separate bottle. Each bottle is labeled with the name of the disease it is intended to cure, and instructions for its use. You cannot expect one remedy to cure all diseases. Each disease needs a special and different treatment. These remedies are in tablet form and do not lose strength with age if kept in our airtight case. No trouble to use. Little time in giving treatment.

Colds
Canker
Roup
Cholera
Indigestion
Limber Neck
Cramps
Worms
and all Diseases

Sold Also in Single Bottles

If you do not know what ails your fowls, write us describing symptoms and enclose money for a single bottle of the cure. We will select the remedy your fowls need. Write for our Poultry Remedy Free Catalog. Address nearest office. Dept. 30.

DARK CORNISH AND WHITE INDIAN GAMES

1st Cornish cock and 1st pullet, Allentown, 1909. 1st White Indian ekl., 1st pullet, 1st pen. Young and mature breeding stock. Prices right. Let me know your wants. Eggs in season. Mention A. P. J. when writing.

JOHN A. MILLER : NAZARETH, PENNA.

POULTRY QUEEN FOUNTAIN

will keep water warm in winter without fire, therefore will not freeze. It will keep water pure and fresh until used. As the fowls drink from the cup the water flows automatically from the reservoir. It is impossible for dirt to get into the water. Where the production of winter eggs is desired this fountain is indispensable. As a labor saver it pays for itself in a short time. In watering young chicks you don't have to carry water every day. By replenishing the water once a week the water will be clean and pure.

Bryan Manufacturing Co. Inventors and Manufacturers Cadiz, Ohio

S. C. Buff Orpingtons

MADISON SQUARE GARDEN WINNERS—We won first prize pen at the above show, 1908 and 1909, with fifteen pens competing. This pen was conceded by judges and breeders to be the best pen of Orpingtons ever shown at the Garden, and we have refused to sell eggs for the past five years, although we have been offered \$20.00 per setting for them. But we will sell you birds bred from this pen and others there equal that can win for you in the best of company, and we will ship them C. O. D. Nuff Said.

What
E. H.
Harriman
has to say of

**"The
Only
Way"**

"The 'Alton' is today the best railroad physically in the state of Illinois; the service it renders is far ahead of most of the railroads in the state; it has been made 250 per cent better for two-thirds of its original cost; it is a perfect physical property, wisely managed and run in the way to give the people the best possible service. You may quote me in this respect."

Lock Box 510, AMENIA, N. Y.

"RINGLETS" STAND ALONE, VICTORS OF THE FIELD . . .

At America's Imperial Show, Madison Square Garden, New York, Winters of 1908 and 1909

E. B. THOMPSON'S BARRED P. ROCKS

As usual win the leading prizes and achieve the highest honors that can come to any breed. First prize on cockerel, first prize on cock, the Great National Silver Cup presented by the American Plymouth Rock Club for best cock, cockerel, hen and pullet. Double the number first prizes of any competitor. Special for best shaped male, special for best headed male, special on hen, special on pullet, the Sweepstakes Special in Gold for best Plymouth Rock on exhibition of either sex and any variety. The Imperial prize of the show, special for champion male.

At the 1909 New York Show my 1st Prize Sweepstakes Cup Exhibition Pen was Declared by Expert Opinion to be the Finest Ever Exhibited. A Paragon of Perfection, and created a Sensation as the Finished Achievement in Modern Barred Rock Breeding.

For more than twenty years at New York my "Ringlet" victories have been complete. Exhibited by me personally they have won a grand total of 127 prizes, 69 of these being firsts and specials, being more first and special prizes than won by any competitor in the history of the show. These include the \$100 Champion Challenge Trophy, won three times; the \$100 Association Cup, won three times; the \$100 Sweepstakes Cup offered by the President for best Plymouth Rock cock, cockerel, hen and pullet, any variety.

The "Ringlet" world's record at New York four years in succession is a page of history. The "Ringlet" record of first on exhibition pen three years in succession is the undisputed Champion. My clean sweep of FIRST, SECOND, THIRD, FOURTH AND FIFTH PRIZES on pullets has never been approached in Madison Square Garden, and stands alone and unequalled.

One thousand grand breeding cockerels for sale; elegant hens and pullets in any number. Show birds fit to win in any competition. Richly illustrated 58-page catalogue upon request; it is full of original pictures of New York winners from life. EGGS from the world's finest exhibition matings, one setting \$6; two settings \$11; three settings \$15; four settings \$18. Address

Winners at New York, from Life.

36 First and Special Prizes at BOSTON and NEW YORK 1907.

HAWKINS' ROYAL BLUE STRAIN PLYMOUTH ROCKS

BARRED, WHITE AND BUFF.

WYANDOTTES, COLUMBIAN, WHITE, SILVER, BUFF.

Have won more prizes at New York, Boston, Washington, and America's greatest shows than all others.

My matings this season are the best I ever owned.

At New York, in the strongest show of Barred Rocks ever seen, 451 Birds, I won 1st, 2d, 3d and 4th Cockerels; 1st, 2d and 3d Pullets; 1st and 3d Cocks; 1st and 2d Hens; 1st and 2d Breeding Pens. My other varieties are of the same high quality. Hundreds of choice exhibition and breeding birds at honest prices. EGGS from Prize Matings: one setting, \$5.00; two settings, \$8.00; three settings, \$10.00; five settings, \$15.00. \$20.00 per 100. Catalog of America's finest Plymouth Rocks and Wyandottes free.

A.C. HAWKINS, Lock Box 25 Lancaster, Mass.

First Cockerel at New York.

BUFF WYANDOTTES THE KIND THAT WIN

Have broken up my breeding pens and will sell some of my fine breeders at very low prices. Now is the time to get bargains. Am now booking orders for

Young Show and Breeding Stock

of which I have a fine lot. If you want to win at your show get birds from me. The record of my stock in the show room is unequalled. My large catalogue gives full particulars. Write for it today; mention American Poultry Journal.
